Key Highlights

1 **KRJP Topline** : KRJP combined closed Dec missing ADO target RR 92%(MoM -12%) mainly from absence of M-1 level promotions and UST seller shop closure

- KR closed Dec with ADO RR 91%/ADG RR 95%(MoM -14%) also '25 growth behind PLT by 12.3%p(KR ADO YoY 12.4% vs. PLT YoY 24.6%) mainly from a one-off UST seller COSRX going local in VN, coupled with absence of M-1 aggressive promotions(e.g. KOL collab, GWP), thus plan to run a seller-funded ads program in '26 focusing on managed brands
- In '25 JP grew ahead of PLT by 92%p(JP ADO YoY 116.7% vs PLT 24.6%) mainly from key growth driver(e.g. New seller ADO contri 30% to JPCB) in key markets such as SG/MY/PH from non-beauty cat(e.g. F&B, Hobbies)

2 **KRJP MP PC2 + SLS PnL**: KRJP PnL $2.4mil with RR 116%(MoM -8%)

3 KRJP TR% over target with KR 19.74% (RR 102%, MoM 1%) and JP 13.06% (RR 105%, MoM 13%) mainly from growth in ads TR% reaching 5.8% for KR and 2% for JP

Note:

1. *Competitor related metrics(ADG share in SEA, ADO% to platform's origin SKU ADO) are M-1 actual vs. M-1 target due to the time limitation of gov't official data publish period and processing time*
2. *New seller definition is sellers' which go-live after '24 Oct onwards*
3. *OKR items without EOM projections, RR is based on MTD actual vs. Target*

Key Highlights

1 **KRJP Topline OKR:** In Dec, KRJP topline related indicators show RR 109%/RR 111% for ADG/ADO respectively despite Topline degrowth showing healthy penetration to CB

KRJP Key growth driver OKR:

- 2 JP closed new seller #/ADO strong ahead of target with RR 140%/124% respectively, contributing 30% of JP ADO despite lead CVR slow down during EoY seasonality
- 3 LS ADG% dropped in TH (MoM -27%) by Fwee self-stream ADG drop and in SG (MoM -22%) by overall LS driven from AMS drop (SG Platform LS GMV also dropped -20% MoM)
- 4 LFF closed Dec with RR 98% and target gap mostly driven from VN 3PF (MoM -37%) regression from Cosrx switching to local shop (-1.6k ADO)

5 **Logistics OKR:** all closed Dec meeting target and '26 SLS key focus still remains the same; cost and BWT reduction

- Cost reduction: aim to lower down CPO by ~7% in '26(vs. '25) via 1) LH/CC quarterly bidding, 2) LM vendor change to SPX, 3) SLS+ fraud monitoring and 4) parcel liquidation (booked under costs)
- Buyer experience: SLS BWT is expected to improve by 1.7%(-0.13 days in '26 vs. 7.76 days in '25) from enlarged XDD coverage
