Highlights

Local SIP: 180k ADO, 101% RR, CB% -0.2pp MoM; $1.73M ADG, 95% RR, CB% -0.3pp MoM; ADO% MoM decline expected due to platform/CB pushing brands and EL during 11.11, which SIP lacks. Budget re-allocated to new skus aggressive discount/ads to push 2H incremental growth.

CNSIP: 31k ADO, 92% RR, CB% -0.03pp MoM; $288k ADG, 97% RR, CB% -0.1pp MoM; low RR mainly due to 1) VN ADO gap due to import tax implementation (-2.5K ADO); 2) PH market halloween assortment detrend (-0.5k ADO), will push Xmas assortment in Nov-Dec

Swarm: 4.6k ADO, 102% RR, CB% -0.2pp MoM; $36k ADG, 98% RR, CB% -0.1pp MoM; MoM decline as planned to improve P&L health

Direct: 16k ADO, 98% RR, CB% +0.1pp MoM; $233k ADG, 105% RR, CB% +0.1pp MoM; ADO behind target due to lower traffic to top shops as 3-month free ads support ends

WH cross-selling: 7.4k ADO, 92% RR, CB% +0.01pp MoM; $51k ADG, 93% RR, CB% +0.01pp MoM; topline missing target due to 1) MY SCS>SG price markup to do ads less effective than expected; 2) SG PRM support cut (~600 ADO)

Highlights

[1] **Seller standalone P&L $1.2M USD**

- [2] **+$126K (+0.2% OC GMV) above target** (within +/- 0.5% fluctuation buffer of breakeven).
- [3] **-$91k MoM** due to a) **-$74K** from planned ads and voucher spending; b) **-$11K** from higher BPO costs; c) **-$17K** from less big seller discount.

[4] **Total P&L: $3.9M**

- [5] **-$302K MoM** mainly due to 1) **-$91k** Seller P&L as mentioned above; 2) MP P&L **-$142k**; 3) SLS P&L **-$69k** due to 1 day less in Nov (% OC GMV ratio maintained MoM)

**Staff cost for CS office staff, will start booking cost together with HQ SIP staff cost from Jan-26 onwards as aligned with Reagan team*

Highlights

[1] **Seller standalone P&L -$309k**

- [2] **-$26k vs target** within +/- 0.5% fluctuation buffer of target; spent more than proj mainly due to lower than expected budget ROI from 2 small-scale pilot initiatives in Nov to catch up topline (price reduction of non-performing SKUs); cut budget in H2 to protect P&L health
- [3] **+$1076k MoM** mainly driven by Swarm P&L optimization in Nov

[4] **Total P&L: $95k**

- [5] **+586k** MoM mainly due to 1) seller P&L **+$1076k** as above; 2) partially offset by MP PC2 **-$255k** due to lower ads take-rate and higher platform PRM; and 3) SLS P&L **-$236k** due to lower topline

**Staff cost for CS office staff, will start booking cost together with HQ SIP staff cost from Jan-26 onwards as aligned with Reagan team*

Highlights

Seller/SKU count: **117%/117% RR; +65%/ +112% MoM;** on track to hit target by EOM

- **VNMY/SGMY 94%/80% RR**, pending sync-up with VN and SGCB teams on catch up plan in remaining days and planning for next month
- **THPH 50% RR**, as of 27 Nov aligned with Dhika to prioritize focus brands from PH/MY/SG + sellers from top 5 A market platform L1 categories. Will be added to TH RMs' KPI from January onwards for 1:1 pitching; meanwhile open direct selling to all eligible sellers via mass whitelisting

ADO/ADG: **98%/103%RR; +15%/+27% MoM**; growth mainly driven by MY import lanes

- **VNMY 85% RR** due to less aggressive platform PRM set up for top sellers vs Oct, and top 10 sellers decline in traffic MoM due to removal of F3M free ads onboarding incentive
- **IDSG 66% RR** due to lower SKU effi and traffic than expected, to refresh seed program sellers to more responsive shops with higher seller investment + encourage paid ads investment through upcoming platform ads reward program
- **TH import 41%** due to lower SKU effi than expected, to look into seller's ads utilisation and work with MYCB team to engage sellers

Dec Reg team focus: 1) implement seller programs with greater coverage to benefit more sellers; 2) improve system SKU migration from local shop to Direct shops; 3) explore ads top-up service to increase traffic; 4) review promotion sync and markup% to reduce ABS

System default toggle on feature lived on 28 Nov; SEH article improvement in progress, ETA 5 Dec • **Assessment #2 [WIP]**: NPC analysis for Direct SKUs + markup components deep-dive to identify price reduction potential further; ETA 30 Nov

	Mall onboarding	• Mall onboarding criteria and SOP established with market **MY,PH,TH,SG** • Export market ID,SG,TH,MY sellers started to apply for mall • YTD 1 ID export direct shop onboarded successfully to MY Mall, and remains 7 shops pending on listing check and will soon onboard in MY

	RR/RTS	• **MYSG Direct case (RTS currently available)**: SG/MY CB team in progress of assessing 1) cheaper RTS vendor/cost; 2) lower RTS threshold, based on seller/buyer experience and impact to platform
		• **Other lanes (RTS currently not available)**
		  ○ Additional considerations vs MYSG case include 1) listing price impact 2) seller pain points: longer RTS time, higher RTS cost, higher import tax without grey channel; 3) platform impact: SLS/WH/CS capacity in handling RTS
		  ○ **Assessment [WIP]**: working with Monee Insurance to compare buyer/seller/platform impact between 2 options, ETA 30 Nov
		  ■ Option 1: No RTS, mandatory RR insurance [KRCB model]
