1 **CB LFF grew by 84% YoY to reach 955k, with LFF penetration to CB MP increased from 28% to 42%**

a. VN CB 3PF grew the fastest at 167% YoY and LFF penetration to CB MP rising from 6% to 34%. The growth mainly driven resolving seller pain points on 3PF payment compliance requirements, converting SLS to do 3PF via aggressive acquisition package and partnering with 3PF vendor to onboard new 3PF sellers to Shopee platform

2 **CB FBS grew by 140% YoY to reach 238k and FBS penetration to CB MP increased from 5% to 10%**

a. MYCB, SGCB, PHCB had doubled the FBS penetration to CB MP and hit >10% FBS penetration (MYCB at 15%, PHCB at 10.4%, SGCB at 10.1%). The growth mainly driven from **aggressive new seller acquisition via free trial and new SKU acquisition via dedicated new SKU package and RM KPI**

b. THCB saw lower growth, with FBS penetration at 6%, mainly due to CBWH running out of capacity in H2'25, which led to the pause of both the CB FBS free trial and new SKU inbound

[FBS 2026 Growth focus] In 2025, we focused on acquisition but FBS penetration still low at 31%; In 2026, we will refresh FBS incentives to focus on growing seller FBS penetration%

Table: FBS conversion funnel by market (Sep'25)

			Total			SG			MY			TH			PH

Key Highlights

1. FBS ADO increased 149% YoY, driven by aggressive seller acquisition; with FBS seller coverage as the key driver to contribute 83% YoY
2. However, the FBS ADO penetration to sellers only increased from 22% to 31%. We aim to continue to improve FBS penetration to seller% as 2026 key focus

[CB FBS Topline Targets] We target CB LFF% of CB MP to be 55% and CB FBS (Local CBWH)% of CB MP to be 15% by Dec'26; For markets with local CBWH, FBS will hit 18% by Dec'26

1: SG/TH/PH is WIP to adjust FY26 topline to factor in the new base commission changes and 2026 seller incentive plan

Key Highlights

1. We target CB LFF% of CB MP to reach 55%, with CNCB targeting 61% LFF penetration and KRCB targeting 42% penetration
2. For CB FBS, for markets with local CBWH (excl. VN as no CB FBS in VN), we target CB FBS to reach 18% penetratin by Dec'26

[CB FBS 2026 Focus] CB FBS to focus on 5 areas and 10 initiatives to improve FBS attractiveness to buyers, acquire new sellers, grow FBS penetration and improve FBS Profitability to Shopee

CB FBS 2026 Focus	2026 CB FBS key initiatives	
Enhance FBS exposure to Buyers and drive ADO uplift	1	**Shift FBS budget from Seller focus to Buyer focus**, investing in FBS dedicated vouchers
	2	Further differentiate FBS BWT vs 3PF (e.g., increase same day delivery share in SG/ TH)
Acquire New Sellers to join FBS	3	Acquire new shops to join FBS with 3-6 months WH handling fee Free Trial
	4	Govern CBWH handling fee rate card to ensure FBS competitiveness vs 3PF
Grow Sellers' FBS penetration	5	**Launch new Penetration Increase Program** to increase FBS coverage of seller ADO
	6	**Revamp VIP program** to set monthly ADO target for top FBS / highly FBS penetrated sellers
Improve FBS UE/ profitability	7	Increase FBS base commission to improve FBS order UE
	8	Prioritize to pitch and inbound high ADIS SKU for WH to lower its CPI
Strategic Projects	9	Explore Anbo WH staging model to push for higher FBS penetration
	10	3PF market trend and landscape study

[Shift FBS budget to buyer focus] Total CB FBS investment CPO to reduce from 0.97 in Dec'25 to 0.77 in Dec'26, with more budget shifted to buyer facing spending (77% to buyers)

CPO lower than Dec'25

CPO higher than Dec'25

FBS investment Cost Per Order (CPO)

		Total			SG			MY			TH			PH

1. With the budget cut, total FBS investment CPO expects to reduce from 0.97 to 0.77, with buyer facing cost at 0.60 and seller facing cost at 0.17 by Dec'26
2. More budget will be shifted to buyer facing spending, increasing from 68% of CPO to 77% of CPO to be buyer spending. For TH, seller facing CPO increased by $0.02 due to minimal FBS incentives offered to sellers in 2025, stronger incentives are expected in 2026.

Note: CPO calculated as monthly cost / target monthly FBS ADO

[Acquire and grow sellers] In 2026, we will streamline seller incentive programs into 3 programs for different seller stage, including a new Penetration Increase Program to grow FBS% to sellers

Seller Stage	New to FBS sellers	→	Low FBS penetration sellers	→	Top FBS sellers / High FBS penetration sellers
2026 CB FBS Seller Program	**1 Free Trial Program** • Mechanism: Best offer (WH handling fee free)	→ After Free Trial, auto-enroll to penetration program to retain free trial sellers	**2 [New] Penetration Increase Program** • Target-based rewards • Given sellers' FBS% is low, set monthly penetration targets • Reward 1 month 50% off WH fee discount upon hitting monthly % targets	→ Selectively invite, control via strict quota	**3 Top Seller Program (Regional/ local VIP)** • Target-based rewards • Given sellers FBS penetration already high, set FBS ADO monthly targets • Reward 1 month 0.5-1.5% comm fee rebate upon hitting aggressive FBS targets

[New Program to drive FBS penetration growth] In 2026, we will launch Penetration Increase Program to look at all shops under FBS seller and increase seller FBS ADO penetration

2026 CB FBS Penetration Increase Program:

- **Program objective:** Look at seller total ADO base as a whole (all shops under the FBS GGP) and increase seller FBS ADO penetration
- **Program mechanism:** Set aggressive quarterly targets (grow 15-20% every quarter) and rewards only when hitting targets
- **Target seller group:** FBS seller with sizable ADO in the market (PH:100 ADO, MY&TH:50 ADO, SG:20 ADO)

New penetration program mechanism illustration

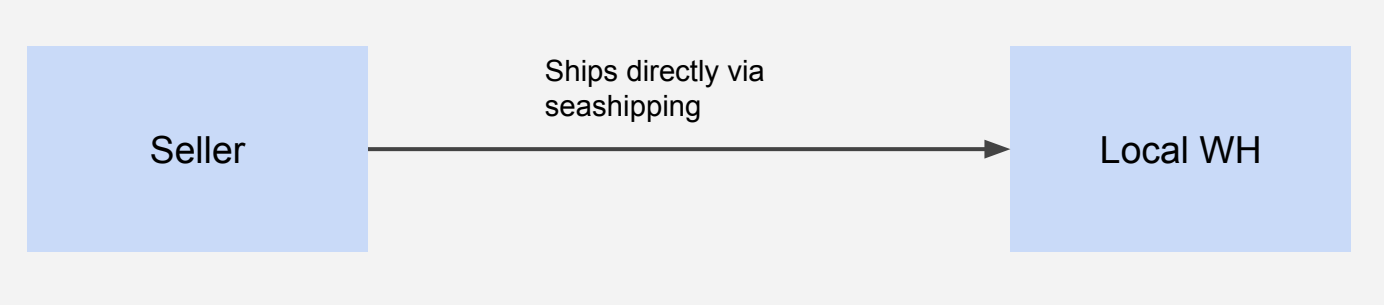
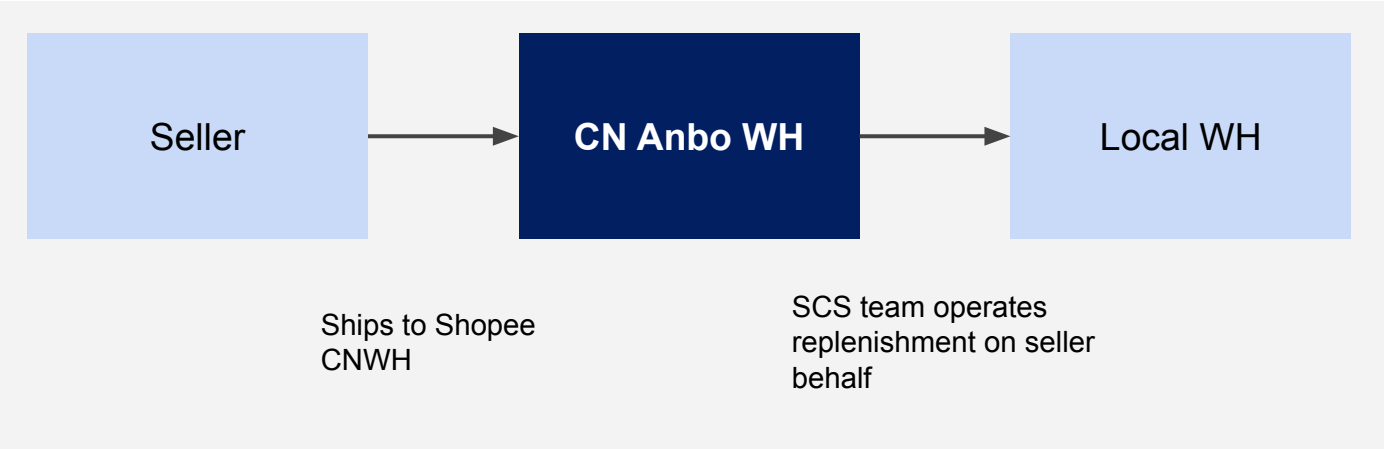
3. **Regional CB PMO Updates**

Staging WH model aims to push stubborn sellers towards adopting FBS model, thereby increasing CB FBS penetration while alleviating local WH Ops concern

CB FBS Model



FBS Staging WH Model
For discussion today



[Objective for Anbo staging new model] With the new Anbo staging model, we target to acquire more FBS sellers, gain control over DOC and ATP, and increase Ops profit

	Current pain points	Output of Anbo Staging WH project
Commercial	Some sellers choose ● **not to do FBS** due to complexity and manpower required to operate FBS ● **Only do FBS in bigger markets** to avoid hussle preparing multimarket stock	Convert SLS sellers to do FBS by helping sellers to do replenishment planning and execution, and at lower cost of doing business vs SLS
Ops	Local CBWH tight DOC control leading to **lower ATP and higher OOS**	Gain control over inventory replenishment to keep low DOC but high ATP
PnL	FBS UE is lower than SLS	Anbo will target to earn similar profit/order vs SLS

[SHP View: True Cost] Anbo staging's true cost is lower than SLS in MY and TH, and potentially in PH if with better Blackstock control, enabling long-term Ops profit to be as high as SLS

SHP True Cost Comparison (Per Order, USD)

Cost lower vs SLS | Cost higher vs SLS | Possible to be lower than SLS if reduce BS cost

Main Cost components	Sub components[1]	SG			MY			TH			PH

1: Assume the item go through FCL and SPX for delivery to buyers;
2: Cost for Anbo Staging WH and blackstock is conservative estimate based on current SCS operations and to be validate via Pilot

Key Highlights

1. **Markets with potential that long term Ops profit to be as high as SLS: MY, TH and potentially PH**
   a. MY&TH: the Anbo staging model's true cost projected to be lower vs SLS (MY is $0.11 lower and TH is $0.23 lower)
   b. PH: the Anbo staging model's true cost slightly higher than SLS (0.06 higher) mainly due to the high blackstock treatment cost at 0.20. Next to do pilot and test if can lower blackstock treatment cost by 0.06 to 0.14 and become similar level to MY (0.15) and TH (0.10)
2. **Markets with Anbo projected cost higher than SLS: SG**
   a. SG: the Anbo staging model's true cost expect to be higher than SLS, because CBWH cost is even higher than SLS true cost (1.29 vs SLS 0.72). Next to explore cost saving initiatives and validated projected true cost via pilot.

[SHP View: Profitability] Anbo charging rates range from $0.42 to $0.78 to cover SHP Ops true cost and target similar profit/order as SLS

				SG			MY			TH			PH		
				SLS	FBS	Anbo Target	SLS	FBS	Anbo Target	SLS	FBS	Anbo Target	SLS	FBS	Anbo Target
SHP Profit per order	**Ops profit (incl. 3PL margin)**	e=a+b+c+d	1	$0.69	$0.64	$0.69	$0.48	$0.22	$0.48	$0.16	$0.22	$0.22	$0.41	$0.10	$0.41

Implication to Anbo staging charging	**Anbo charging**	c+g	2	-	-	$0.73	-	-	$0.73	-	-	$0.42	-	-	$0.78
	- Anbo staging true cost	g		-	-	$0.68		-	$0.47	-	-	$0.42	-	-	$0.47
	- Anbo target profit per order	**c**		-	-	$0.05	-	-	$0.26	-	-	$0.00	-	-	$0.31

1: SLS profit already include 3PL margin (buyer shipping fee + seller shipping fee - LM cost)

Key Highlights

1. We target the ops profit to be on par with SLS, implying WH profit + Anbo staging profit + 3PF margin to match SLS profit
   - Given SLS profit includes last mile 3PL margin, including the 3PL margin for FBS/ Anbo staging to have apple-to-apple comparison with SLS. 3PL margin is defined as buyer shipping fee + seller shipping fee - LM cost

2. Anbo charging to be Anbo staging true cost + target profit per order. With this logic, Anbo staging target profit per order will range between $0 to $0.31 across the markets hence Anbo charging rates are set from $0.42 to $0.78.

Propose immediate next step to validate cost assumption with Pilot. End state to target Ops profit to match SLS. Anbo staging seller cost still expect to be lower than SLS in MY, TH and PH

Table 1: By phase increase Anbo charging

	1 Small scale Pilot	Short-term(2026)	End state
Focus	Validate cost Assess if scale up	Acquire sellers and grow	Increase FBS stickiness & profitability
Anbo charging	Only to cover true cost	Start with lower fee	Target end state with Ops profit to match SLS
Ops profit vs SLS	Less than SLS Same as FBS	Less than SLS, More than FBS	Match SLS

Table 2: Projected Anbo sellers cost vs doing SLS (per order)

Seller Cost Savings at End state	SG	MY	TH	PH
Seller inhouse pick and pack cost saving	-0.10	-0.10	-0.10	-0.10
Ops true cost saving passed to seller	1.25	-0.11	-0.23	0.06
FBS commission differentiation	-$0.6	-$0.3	$0.0	-$0.3
Anbo sellers cost saving vs SLS	2 0.59	-0.49	-0.33	-0.30

1 Propose next step to validate cost assumption with small-scale pilot targeting to trial run with 3-5 sellers

2 In the End state, we target Ops profit to match SLS. Anbo staging seller cost still expect to be lower than SLS in MY, TH and PH due to 1) inhouse pick and pack cost saving 2) True cost saving vs SLS 3) MP fee saving

Target addressable and initial ADO impact

[Target Segment sizing] We will target 1) top SLS sellers who rejected FBS today, 2) Sellers with remaining potential to expand to all site FBS; Estimated target addressable segment at 258k ADO

Target addressable market for Anbo staging

CB MP FBS Addressable ADO breakdown (Dec'25, CN Sellers only)

			SG	MY	TH	PH	Total	Remark for staging model target group
Multi-market sellers	**SLS in all markets**	1	8,266	20,790	20,525	75,174	124,755	1) SLS sellers who are not trying FBS at all today

… Anbo new staging model target segments			13,434	43,610	34,523	166,660	258,227	

- Anbo Staging model target SLS sellers with 2 main value prop. Estimated target addressable segment at 258k ADO
  - **1** For SLS sellers not willing / able to do LFF, to help them plan/ execute replenishment and bear the blackstock risk. Estimated target segment at 127k ADO
  - **2** For sellers who choose to only do FBS in selected markets (SLS in the rest), to help them expand to multiple/ all-site FBS. Estimated target segment at 131k ADO

[Initial Seller feedback] Some sellers interested in Anbo for reducing OOS and BS risk. However, sellers are sensitive to cost as the overall cost expect to be higher than FBS

Initial seller feedback to new Anbo staging model

	GGP name	FBS adoption status	Seller ADO	FBS ADO	Market presence	Remark (why interested/ not interested in Anbo Staging)
Seller interested in Anbo Staging	深圳市通创汇供应链有限公司 - GGP	Pure SLS sellers	917	0	SLS in SG/MY/TH/PH	• Can leverage Anbo staging with replenishment, reducing OOS and Blackstock risk. • Seller shows interest but need to see the rate card to confirm their interest.
	义乌市震能贸易有限公司 - GGP	FBS in some market, rest SLS	838	612	FBS in MY/PH; SLS in SG/MY/TH/PH	
	海口欧麦高科技有限公司 - GGP	FBS in some market, rest SLS	781	493	FBS in PH; SLS in SG/MY/TH	
	深圳煜城信电子有限公司 - GGP	FBS in some market, rest SLS	369	127	FBS in SG/MY/TH; SLS in SG/MY/TH/PH	
	深圳市简致电子商务有限公司 - GGP	FBS in some market, rest SLS	287	232	FBS in SG/MY/PH; SLS in SG/MY/TH/PH	
Seller not interested in Anbo staging	上海星芒商贸有限公司 - GGP	Pure SLS sellers	1627	0	SLS in SG/MY/TH/PH	• Seller use seller owned WH and have enough manpower of operating, no intention of onboarding FBS.
	深圳市伟诚网络科技有限公司 - GGP	Pure SLS sellers	1017	0	SLS in SG/MY/TH/PH	• Seller main product type within XS/S items and rapid product iterations, have difficulties in stock preparation, inbound warehousing will increases the workload.
	广州格雷特电子科技有限公司 - GGP	FBS in some market, rest SLS	341	336	FBS in TH/PH; SLS in SG/MY	• Seller have the manpower to handle direct shipping to FBS instead of extra cost of staging.
	广州黑色草莓电子商务有限公司 - GGP	FBS in some market, rest SLS	289	266	FBS in MY; SLS in SG/MY/TH/PH	• Seller have the manpower to handle direct shipping to FBS instead of extra cost of staging.
	...	...	...	...	...	...

[ADO impact] Based on projected seller cost saving, initial ADO impact assessment at 16k - 30k ADO by Dec'26

Projected CB FBS incremental ADO impact (Dec'26)

	Total (excl SG)	SG	MY	TH	PH
Pessimistic scenario	2 15,979	815	3,822	3,306	8,036
Base case	22,827	1,164	5,461	4,722	11,480
Optimistic scenario	29,675	1,513	7,099	6,139	14,924

Key Highlights

1. Compare anbo new staging model with CBWH and SLS, there are few pros and cons to sellers affecting conversion
   a. (+) Differentiated Value Prop on end to end service for inventory management
   b. (+) Differentiated Value Prop to easing multi-market operation for FBS
   c. (+) Real local fulfillment : lower BWT, potential grey channel tax saving for sellers
   d. (-) More expensive than CBWH: requires sellers to pay additional Anbo staging fee on top of current CBWH handling fees
   e. (-) Inventory and financial pressure: Comparing to SLS, sellers need to prepare stocks for at least 2 months sales in advance

2. With all the factors, split to 3 scenarios as
   a. Pessimistic: Assume lower than expected seller adoption, overall ADO by Dec'26 is around 16k
   b. Base case: Assume projected seller adoption using current FBS benefits, overall ADO by Dec'26 is around 23k
   c. Optimistic: Assume stronger seller adoption driven by more initial incentive, overall ADO by Dec'26 is around 30k

Proposed next steps

[For approval - Pilot for new Anbo staging] Next step propose to pilot new model to test cost assumption, collect seller feedback and assess if to scale up

Trial plan for approval	
Objective	• Test end to end operation and validate Anbo staging true cost assumption • Collect seller feedback and assess if to scale up
Key success metrics	• Inventory metrics: DOC, ATP %, Blackstock % to be better than MP average • Cost metrics: Anbo staging CPI, Blackstock cost control
Timeline	• Q1’25, start pitching in Jan once approved
Budget	• n/a, charge sellers to cover extra cost *(proposed pilot rate card for approval in next page)*

[For approval - pilot rate card] Proposed Anbo new staging rate card for pilot. Official rate card to be defined after pilot validating true cost assumption

Proposed Pilot rate card for Anbo staging services (item level)

			Trial rate card			
			SG	MY	TH	PH
Item rate card (USD)	XS	<=2kg, <=20cm	$0.298	$0.243	$0.224	$0.219
	S	<=15.5kg, <=25cm	$0.636	$0.491	$0.418	$0.655
	M	<=15.5kg, <=50cm	$0.706	$0.609	$0.464	$0.598
	L	<=15.5kg, <=100cm	$1.054	$0.876	$0.605	$0.791
	XL	>10kg, >100cm	$2.089	$2.014	$1.673	$1.625
	Total		$0.427	$0.349	$0.312	$0.365

- Pilot rate card design logics
  - **To cover true cost of Anbo WH handling fee, estimated blackstock treatment cost and FCL cost**
  - Not yet include margin for Anbo as pilot focus on testing ops/ cost assumption and collect seller feedback
- Official rate card to be defined after pilot validating true cost assumption

[Backup - pilot rate card design logics] Proposed pilot rate card to cover the True cost for Anbo WH CPI, Sea-shipping cost and estimated Blackstock treatment cost

Proposed Pilot rate card for Anbo staging services

		SG			MY			TH			PH

- Proposed pilot rate card to cover the True cost for
  - Anbo WH CPI
  - Seashipping cost
  - estimated Blackstock treatment cost

Key Topics

1. **LFF Updates**
2. **CNLS Updates**
   a. **2025 Annual Review and 2026 Directions**
   b. Site Expansion
3. **Regional CB PMO Updates**

[2025 review] In 2025, we achieved milestones in optimizing CNLS seller mgmt. structure and defending and growing CNLS business, maintaining SOB at 1.6x while outpacing platform by 0.23x

What we have done good | What can we do better

Objectives	Focus area	2025 review	Impact (24 Dec vs 25 Dec)
Optimize CNLS seller mgmt. structure	**Maintain CNLS universe and gate-keep account transfer**	Archetype **seller type** to direct seller mgmt. R&R split between CN and Local Set up **monthly account transfer** cadence to secure sellers' proper RM coverage Locally managed shops are **not properly grouped across sites** and lack of consolidated visibility Seller mgmt. team and seller type **not fully unified on market level**	ADO managed by the right team **68%** to **92%**
	Better align CN teams with local priorities	Construct **CN CNLS unified KPI** to drive joint effort around key priorities Set up **cadence for CN and local key commercial priorities sync** Opportunities exist in **local infra optimization for Type 1 regional RMs to perform regional roles** more effectively; **Type 3 scope is not fully aligned with RBP** scope	ADO **3.4m** vs. **4.3m** ADG **28m USD** vs. **35m USD** PA TR **3.7%** vs. **5.2%**
Defend and grow CNLS business	**Build up fundamental capabilities over competitor**	**Built up S2S NPC visibility** to guide team push and improve performance **Improve content ADG%** through **top seller content analysis** for team push **NPC coverage for white-label sellers remains low** and in need of further push **Fulfillment-related metrics** (e.g., ID/ED coverage, BWT) requires systematic push	NPC% performance increased from **38%** to **~55%** Content ADG increased to **27%** YoY **~4%**
	Ensure fair growth support for CNLS sellers	Establish **CN access to CFS slots and PRM support in local markets** **Build nomination pipeline** to ensure top sellers properly covered in existing seller program **Establish new programs for VN and PH** to ensure coverage for strategic CNLS sellers	Seller program overage **63%**(25 Jun.) vs. **75%**
	Site expansion *(Details in next section)*	Orchestrate **seller pitch across different models** (e.g., Direct/ CNLS) to tailor-make right models for sellers and accelerate expansion process Facilitate **collaboration between import and export side** to ensure smooth onboarding Establish **cross-market Mall recognition** to fast-track high potential sellers **New seller programs vary** across sites& models, adding complexity for seller understanding and resource mgmt. Sellers are unable to **share resources** across different business models	**498** sellers moved in 2025, YoY **~30%** **75k** ADO impact from moved sellers, YoY **~40%**

SoB **1.6x**, Plt gap **-0.12x** vs. **+0.11x**

[CNLS Performance - Overall] In 2025, CNLS ADO grew by 26.4%, with VN/ID/MY leading the growth through seller engagement, program coverage increase, and upsized rebate support at key moments

		Total			MY			TH			ID			VN			PH		
		Dec 24	Dec 25	YoY	Dec 24	Dec 25	YoY	Dec 24	Dec 25	YoY	Dec 24	Dec 25	YoY	Dec 24	Dec 25	YoY	Dec 24	Dec 25	YoY

Note: All identified sellers

Key Highlights:

- **Topline:** Total CNLS ADO grew 26.4% YoY, with **VN (+176.2%), ID(+36.4%), and MY(+29.2%)** leading the growth.
  - **VN (+176.2%)** collaboration with top KOL to drive up traffic and performance, strong engagement with top sellers, and top/viral SKUs push from RMs (e.g., 等风 large-scale enrollment in Shopee Super Cheap program)
  - **ID (+36.4%)** efforts to target key brands with upsized rebate support at key moments and increase in seller program coverage (low ABS seller 等风 YoY +274% in ADO)
  - **MY(+29.2%)** strong engagement with key sellers through program coverage increase in SSP/SME and campaign participation in LTD &DDV as well as higher seller investment in ads

- **Investment Spend:** Total CNLS Paid ads increased by 1.5% and AMS grew 0.4%.

- **Content ADG:** Total CNLS Content ADG increased by 4%.

[Appendix- 2025 Performance] 2025 CNLS overall ADG SOB project to land at 1.55x, outperform platform by 0.26x mainly contributed by PH/ID/MY

Key Highlights:

1 Regionally, CNLS is closing the negative ADG SOB gap with platform, with Dec (Proj.) Platform and CNLS SOB at 1.41x and 1.55x (vs Jan 1.89x vs 1.77x). PH/ID/MY closed most of the gap

a. **PH:** CNLS SOB projected to land at 1.51x, outperformed platform by 0.50x, mainly contributed by 1) revamped local SSP with content push and increased coverage; 2) built up price comp visibility with additional PRM support for top sellers

b. **ID:** CNLS SOB projected to land at 1.92x, outperformed platform by 0.51x, mainly contributed by 1) upsized local SSP support for top TTS sellers and increased coverage; 2) additional PRM support for key brand sellers; 3) built up price comp visibility with additional rebate support for top skus

c. **MY:** CNLS SOB projected to land at 1.38x, outperformed platform by 0.27x, mainly contributed by 1) continuing growth for SSP/SME program adoption%; 2) leverage on Big campaign LTD and Cofund voucher to drive up topline; 3) price bidding & comp program strong push to ensure price competitiveness

[Emerging trend] We have observed three key trends, site expansion, brand incubation, and CNLS-advantaged categories extension

Site expansion trending up

- **Increasing # of CNLS sellers are expanding their local presence,** total seller # grew at 12% CAGR from 2021-25 while seller # with multiple market presence hit 20% CAGR
- **Site expansion ADO has been increasing** and contributes **~8% of CNLS total ADO growth** in 2025 (vs. 3% in 2021). So we should capture site expansion as a significant growth opportunity

"Branding" among white labels

- Top CNLS white-label sellers (e.g., 中南万象) are **cultivating their own brands** or **expanding brand agency/distribution business** to build differentiated assortments and drive up profitability
- However, current **local malls' diverse onboarding criteria and lengthy processes** can hinder sellers' brand incubation journey.

Extending CNLS advantaged categories

- CNLS sellers have **distinct competitive edge in key categories** due to strong supply chain capabilities, and we have observed a trend of top sellers **expanding their lead in these categories to other sites** (e.g., 福州宇墨 extend its advantages in Lifestyle groceries from PH to ID)
- At the same time, we have observed differences i**n topline contribution of key CNLS-advantaged category to the platform** among markets (e.g., ID bulky contributes ~20% of platform ADG, while MY bulky contributes ~30%) , where indicates opportuities for us to align market needs with seller intent

[Emerging trend - Brand incubation] CNLS top sellers have been incubating their own brands since 2025 and expect to further expand brand coverage in 2026

Highlights

- 中南 / 新环亚 / 舰长 are the toppest lifestyle sellers with ADO 125k / 48k / 33k and ADG $2,526k / $271k / $627k across all five markets[1].
- These sellers are traditionally UST 铺货 sellers with white label, **while they have been incubating their own brands since 2025 and expect to further expand their brand coverage across all markets in 2026 to drive their profit margin**
- **However, local malls' diverse onboarding criteria and lengthy processes may hinder their growth potential** (with #mall shop count only 3% / 3% / 8% for 中南 / 新环亚 / 舰长 yet), thus proposing to streamline the mall onboarding criteria across the markets

Seller name	25 Brand coverage% [2]	25 current brand count	25 current key brand	26 projected brand GMV growth%	26 Brand to incubate and plan
中南万象	Seller not provided	20	PH: TIXX TH: ILUOLAI ID: BEIGE MY: BMZAR VN: BMZAR	Seller confirmed brand incubation as a key growth driver in 2026, will focus on S&O, H&B and Tools	
新环亚	Brand ADO%: 14%	13	All Markets: monqiqi	> 100%	**Incubate brands: mocababy (ID) and fofox (TH)** Distribute brand: 韩国现代 (ID)
舰长	Brand ADG%: 5%	21	ID: KEEPHIKE MY: GAMEFORGE PH: MIYAMOKI TH: XUTI VN: Srabuy	> 200%	Expand current brands to all markets of SHP, **with brand GMV growth +200%**

[1] *Data cut off as Dec 2025*
[2] *Collect from seller survey, brand include those still already mall shops as well as those shops still under/pre mall onboarding process*

Private & Confidential

[2026 Direction] We plan to continue to drive SoB growth based on key improvement area we identified in past year's work and also riding on emerging trends we observed

Objectives		Lever	Key initiatives
Key improvement areas based on 2025 work	Optimize CNLS seller mgmt. structure	**Seller governance enhancement**	1) Group same seller's shops across markets to allow consolidated visibility and efficient initiative drive 2) Quarterly seller survey to capture seller type change 3) Unify seller management on a market level
		Regional role optimization *(new)*	1) Optimize local infra for regional role set up 2) Aligh type 3 management scope with RBP
	Defend and grow CNLS business	**Content push**	1) Build up regional visibility on CNLS content performance deep-dive; 2) Pilot on benchmark view on CNLS content performanc vs. competitors
		Price comp	1) Continue improve seller and sku level NPC visibility coverage 2) Ensure stable and healthy NPC through RM push and upsized rebate if already same or lower price vs TT set by seller 3) Drive price bidding participation for non-brand sellers
		Fulfilment enhancement *(new)*	1) Develop long-term FBS seller retention plan (e.g., RC discount) after free trial period to increase and sustain FBS coverage 2) Build CNLS BWT dashboard to create visibility and drive next steps 3) Systematic push for delivery-related program coverage (e.g., embedded in mgmt. criteria, PRM resources) to enhance fulfillment capability
Strategic moves based on emerging trend		**Site expansion**	1) Orchestrate seller site expansion across different models (Direct/SLS/LFF/CNLS) ***Details to follow up next section*** 2) Sync up new seller program across models across sites for better seller side clarity and effective resource mgmt. 3) Establish product infra to enable shared resources (e.g., stock, shop performances) aross different business models
		Mall attack *(new)*	1) Co-work with RBP team to standardize and align Mall onboarding criteria across sites to simply Mall process and increase Mall coverage 2) Design onboarding incentive package (e.g., discounted commission fee) to resolve seller concern on Mall ROI
		Extending CNLS advantaged categories *(new)*	1) Identify key categories that CNLS show distinct advantage 2) Map out penetration gaps in local markets for CNLS advantaged categories 3) Develop sourcing plan and incentives to drive CNLS sourcing

[2026 Projection] 2026 CNLS overall ADG SOB project to grow to 1.61x, outperform platform by 0.03x mainly contributed by ID/TH/PH

Key Highlights:

1 2026 regional CNLS ADG multiplier project to land at 1.61x (YoY+0.06x), overperformed platform by 0.03x mainly driven by **ID/TH/PH**

a. **ID:** project to grow 0.17x driven by 1) upsizing SSP and more PRM support for high potential sellers; 2) heavier TTS countering through CBP Max by reinvesting to sellers with large fee gaps with TTS; 3) acquisition more top TTS sellers

b. **TH:** project to grow 0.04x driven by 1) more PRM ingested for frontend price to drive sales(e.g. Rebate Program); 2) new incentive program to improve seller performance across topline, investment and content (e.g. GPP and GPP Max); 3) enhanced support and special treatment for top sellers

c. **PH:** project to grow 0.02x with trend following platform upsized support to drive topline

	- Seller# w/ multiple sites	91%	96%	64%	88%	97%	62%

Data as of 2024 YE, Only managed sellers

Key highlights

We observed **growth opportunities** in site expansion

1. CNLS distribution across markets is uneven, with majory of sellers concentrate in PH **(~70%)**
2. **93%** sellers are only with single market presence

Note: Seller count is prioritized by GGP, then GP, and lastly by shop level if neither is available.

[2025 progress] Through proactive push, we have achieved +17% uplift in seller # and +32% uplift in ADO

Spontaneous seller-driven action ⟷ *Proactive platform-led push*

Business Model	Metrics	2021	2022	2023	2024	2025	2025 organic***	Inorganic uplift	Inorganic uplift / Organic %
CNLS	Incremental seller#	145	163	156*	193	264	212	52	2a 24%
	Incremental ADO	13,836	12,273	15,723	42,183*	67,664	49,764	17,900	36%
	ADO contribution to CNLS growth**	2.5%	5.3%	0.9%	5.4%	2b 8.2%			
Direct sell	Incremental seller#	0	0	0	0	22	0	22	-
	Incremental ADO	0	0	0	0	80	0	80	-
CNCB	Incremental seller#	154	169	199	192	212	212	0	0%
	Incremental ADO	7,075	3,617	7,829	10,806	7,042	7,042	0	0%
Total	Incremental seller#	299	332	355	385	498	424	74	1 17%
	Incremental ADO	20,910	15,890	23,552	52,989	74,787	56,807	17,980	32%

Note:
**for CNLS model, 2023 moved seller # is especially low due to fake local shops check, 2024 ADO impact is especially high due to two top sellers (倍基, Popmart) migrated to ID*
*** ADO contribution to CNLS growth = ADO from newly moved seller within Y1/ (Y1 year-end CNLS total ADO - Y0 year-end CNLS total ADO)*
**** Organic trend is caculated based 21-24 CGAR, for ADO, we exclude 倍基 in 20-24 CGAR calculation as not replicable*

Key Highlights

1 Through proactive push, **we have achieved +17% uplift in seller # and +32% uplift in ADO vs. 2025 organic trend in 2025 site expansion**

- **CNLS model**
  - 2a We have achieved **24% seller# uplift** and **36% ADO uplift** vs organic
  - 2b ADO contribution also increased to 8.2%, **+2.8 pp vs. 2024**
- **Direct model,** newly launched in 2025, all progress from the direct model will be counted as inorganic
- **CNCB model** doesn't show a clear organic trend, thus count inorganic uplift as 0

[2025 progress] Seller # with multiple sites achieved 12% YoY, ADO contribution increased from 52% in 2024 to 55% in 2025

Spontaneous seller-driven action → *Proactive platform-led push*

Metrics		2021	2022	2023	2024	2025	2025 YoY
Seller#	Total seller #	6,672	8,410	9,679	1 10,283	10,504	2%
	Seller# w/ single site	6,304	7,942	9,129	9,610	9,749	1%

	...ADO of seller w/ 3 sites	16,491	40,889	82,121	219,251	302,538	38%
	...ADO of seller w/ >3 sites	457,353	634,140	1,305,067	1,859,775	2,271,234	22%
	ADO% of seller w/ multiple site	33%	40%	44%	2 52%	55%	5%

**Seller# = GGP# → fallback to GP# → fallback to ShopID# if neither exists.*

Key Highlights

1. We have observed **increasing sellers with multiple market presence** (12% YoY) **compared to total seller # increase** (+2% YoY)
   - 1a **Site/seller increased** from 1.23 to 1.25 in Y2025, +2% YoY
   - 1b **Seller# with >3 sites has seen highest YoY** among all seller cohort (16% YoY)
2. Multi-site sellers have also emerged as an **increasingly important ADO contributor** to overall CNLS growth, ADO contribution increased from 52% in 2024 to 55 % in 2025

[2025 review and 2026 plan] We aim to deepen site expansion orchastration across models across sites in 2026 based on 2025 work and lessons learned

What we have done good What can we do better

	2025 review - Turn site expansion from **spontaneous seller-driven action** to **organized platform-led push**	2026 plan - Deepen orchatrstaion of **cross-model synergy & transition** and **cross site synchronization**	Impact sizing
Increase pitch success rate	Tailor **best-fit light site expansion models** (CNCB/ Direct) for seller pitching to ease seller capacity concerns Establish **vendor handshaking SoP** to ensure seller receive proper support on enabler sourcing Embed site expansion into **RM KPI** to motivate pitching **CNCB SLS and LFF** are driven by separate programs and **lack of consistency/ coordination** Opportunities exist in **local infra optimization for Type 1b/c regional RMs** to pitch site expansion Type 3 seller pitching delayed due to **scope not fully aligned with RBP scope**	Further orchastrate **all site expansion models pitch in one export market in parallel** to optimize seller experiences and RM workload (details to follow) **Optimize local infra** for regional role set-up Align **type 3 mgmt. scope** with RBP	25 incr. sellers 3k incr. ADO
Accelerate seller onboarding	Create **progress visibility** to facilitate collaboration among multiple teams Establish **regular de-bottleneck catch up** to ensure smooth onboading	Continue to **monitor seller onboarding process** and debottle neck if any	*Embedded in organic growth*
Accelerate seller ramp up	Establish **cross-market Mall recognition** to fast-track high potential sellers Assign dedicated **CNLS Mall PIC** to gatekeep Mall onboarding SLA and facilitate troubleshooting **New seller programs vary** across sites across models, adding complexity for seller understanding and efficient mgmt. Sellers are unable to **share resources and leverage synergies** across different business models	**Sync up new seller program across models across sites** for better seller side clarity and effective resource mgmt. (details to follow) Establish product infra to **enable shared resources** (e.g., stock, shop performances) aross different business models	8k incr. ADO

[Back up: 2025 new seller program - status quo] Current seller program mechanics vary across models across sites, adding complexity for seller understanding and efficient resource mgmt.

Program Description	Owner	Eligible Seller	Seller Requirement			Shopee incentive

At least 100 giveaways for shopee video or livestream	Base comm waiver for M1-6	1. $1,500 welcome credit 2. $30 AMS credit 3. $3,000 monthly shop voucher	- 20 CFS - 3 secured slots for Game package (sure-win/brand package) - CB circle - Tier-1 KOL session	1. Paid Package cash waiver

2025 Key Pain Points and 2026 action

1 **Sync up incentives machanics across sites and across models**, to avoid adding compalexity for seller understanding (e.g., PRM incentives vary from ads credit, ads voucher, co-fund vouver, voucher rebate)

- **Assign single owner for each program** to gatekeep incentives efficiency and avoid duplicate reward

2 **Optimize resources allocation across models** based on strategic positioning to prevent mismatches (e.g., TH cms waiver provides to CNCB seller but not local sellers)

[2026 new seller program] We will sync up seller program mechanics across models across sites. Taking CNLS as expmle, incentives across sites all aligned and tied with seller topline and investment performance

Program Introduction

Target Seller

Jan 2026 -Dec 2026 newly onboarded **CNLS seller**

Program Cadence

1. Select & Recruit seller: Monthly

2. Performance Review & Incentive Payout: Monthly

Applicable Sites

MY, TH, VN, PH, ID, SG

	Seller commitment	Shopee commitment
Commission waiver	**"New to the site" - Open a new local shop** (No previous local shop under the same GP/GGP)	**3-month base commission waiver**, cap 500 orders/month, limited to the first shop under the same GP/GGP *No commission waiver for ID; No cap for PH, 4-month for SG with no cap, No cap for VN for the first month *PH/SG/VN start in 1st month, MY/TH start in 2nd month of onboarding, pay out in the current month
Ads credit	Meet tiered **ADO milestones**	**6-month NMV based ads credit** - ADO [50, 100), 0.6% of NMV - ADO [100, 150), 0.8% of NMV - ADO [150, 200), 0.9% of NMV - ADO [200, 300), 1.0% of NMV - ADO [300, ∞), 1.2% of NMV *cap $1,000/month for PH, no cap for others *Pay out in the next month
	Invest **incremental ads spending**	**6-month 15% of incremental net ads spending** as ads credit, cap **$200/month** *Incremental ads spending is based on M-1 monthly net ads spending *For 1st month, reward 15% of net ads spending as ads credit *Pay out the next month
Item rebate	Set **AMS commission fee** >= local recommended level	**6-month item rebate, $100/month** *Pay out in the next month

Local alignment progress

- **ID/MY/PH/TH/SG** aligned with local fpna, **VN** pending final email approval from country head (plan to send out on Jan 15th)

Private & Confidential

[2026 pitching plan] Pitching is organized by export site. We have kicked off PH CNLS and VN CNLS & Direct, and we will kick off the remaining model in PH & VN and scale up to TH/MY/ID

By export market pitch plan ▲ Direct lane launch time

Export Site		2025	Jan 26	Feb 26	Mar 26	Apr 26	May 26	Jun 26	July 26	Aug 26	Sep 26
PH	CNLS	Already kick off						Repitch			
	CNCB			Kick off				Repitch			
	Direct			Kick off				Repitch			
			▲PH - MY&SG								
VN	CNLS	Already kick off						Repitch			
	CNCB			Kick off				Repitch			
	Direct	Already kick off						Repitch			
TH	All Model				Kick off				Repitch		
MY	All Model					Kick off				Repitch	
ID	All Model					Kick off				Repitch	

▲ Other Markets already launched

Today

Key Highlights

1. To optimize seller experience and RM workload, **we aim to orchestrate all site expansion models pitch in one export market in parallel.**
   a. PH: Direct & CNCB pitching planned in 2026 separately, due to Direct product delay + CN team capacity concern
   b. VN: CNCB pitching planned in 2026 separately, due to CN team capacity concern
   c. For TH/MY/ID, we will pitch all site expansion models in parallel, target to kick off starting from Mar 26
2. **Repitching will start 3 months after the 1st round pitching,** with a focus to re-engage sellers still in consideration

[2026 target] We aim to move 319 sellers (+21% vs. 2025) and achieved 82k ADO (+21%) impact in 2026

Destination	metrics	CN managed		Local managed		RBP managed		Total

Key Highlights

1 **Target on expanding 319 selles (+21% vs. 2025) to their new markets and contributing 82k ADO (+21%) in 2026 EOY:**

- 2 **By management team:** CN Managed sellers are expected to be the core driver of 2026 expansion; Local managed sellers are expected to have highest YoY growth rate due to better import-export side connection
- **By Market:**
  - 3 SG is newly added to site expansion scope in 25YE, aiming half size of MY, expected to have highest YoY among all markets
  - 4 ID is expected to have 2nd highest YoY due to 2025 progress hindered by protests

*Note: TBG Projections by CNCI team, considering expert input and historical TBG growth trends, to be cross checked with multiple sources and local
**Note: SHP CB Projection based on Dec'25 budget submissions to CB FP&A with Counter TB program targets added

Key Highlights:

- **Actuals:** From Nov'24 to Nov'25, SHP CB SOB ADG multiples fell against TBG by 0.3 to 1.1x YoY due to TBG outpaced SHP CB growth (TB:+40% vs SHP CB:+11%). TBG's monthly active user also grew faster, averaging +4% per month vs SHP platform at +1%, due to TBG's increased spending and assortment
  - PRM: Increased PRM after change in promotion strategy from cross-shop discount to direct price discount
  - Logistics Rebate: TBG rolled out the FSS program in TW/SG/MY/TH starting in late 2024 and continued to improve seller penetration in 2025 (exceeding 30% by Nov '25), supporting higher conversion rates vs 24; Meanwhile, FSS's category coverage expanded from fashion-focused to full categories
  - Offsite ramp up of KOL marketing and offline campaigns in priority markets (SG/MY).
- **Projection:** ADG SOB is expected to recover slightly in Dec'25 as Taobao reduces spending after the 11.11 campaign, but will slide to 1.16x by Dec '26 due to TB's continued aggressive growth in SG, MY, and TW outpacing SHP CB.

[Market Trend] Chinese TB brands are increasingly penetrating Southeast Asia markets; Taobao has also ramped up marketing investment and enhanced its mobile app to acquire new buyers

Seller

Local Retail Presence (SEA + TW)

- More Chinese brands are establishing physical retail presence across SEA+TW, leveraging prime mall locations and top celebrity endorsements to accelerate local brand building (e.g. Joocyee and Judydoll in SG HLA and Anta in SG/MY/TH).

Local Distributor Collaboration

- Brand seller leverage local leading distributor such as Watson to expand buyer reach (e.g. Flower knows, Florette, Perfect Diary, Florasis & Winona)

Platform

Increase Investment in Affiliate Programs

- Taobao launched an affiliate program in SG/MY/TH on Nov 25 to lets users earn commissions up to 30% by sharing product links directly through the Taobao app. They collab with local performance marketing firm **Involve Asia** and and **Foodie Media** to expand their reach to new local buyers.

Localised Approach

- English App interface launched in 2024
- Bahasa Malaysia App interface launched in May 2025
- Thai interface App launched in June 2025, with +60% user search after a month of app launch

[Counter TB FY2025 Perf Review] TB program grew 8% from Jan'25 to Dec'25 with ADO% to CB improving 1.2pp to 6.2% driven by new seller acquisition, with positive program PC2; SG/MY grew faster

Table 1: Counter TB Program 2025 Performance

Program PC2%	8.8%	0.2 pp	-1.4%	-5.0 pp	-0.1%	-4.0 pp	10.5%	-4.2 pp	0.2%	-7.1 pp

Key Highlights:

1. As of Dec'25, Counter TB program achieved 111K ADO (RR 89%), +1.3pp from Jan'25 to 6.2% ADO% to CB and achieved 1.1M ADG (RR 91%), +0.7pp to 6.2% ADG% to CB.
2. Growth was driven by new Fashion & Beauty sellers acquired through SAI direct acquisition (Lever 1) and ERP partners (Lever 3).
   a. 5.8K new-to-Shopee Taobao sellers were onboarded via TB program, (566 for Lever 1, 5.2K for Lever 3) which includes 406 top tier TB sellers.
   b. However, Furniture/Food & Beverage continue to fall behind targets due to limited seller pool and strong reliance on traders.
3. Across markets, MY/TH/VN saw the strongest ADO% to CB growth, driven by the rapid ramp-up of shortlisted seed shops supported by strong local incentive programs. However, VN saw a 14% decline in absolute ADO due to the implementation of new tax and infrastructure fees, that impacted overall VNCB sellers.

[Backup] In 2025, we ramped up in our acquisition of Taobao sellers by 2x, with 406 top sellers acquired through upsized incentives, prioritised SAI acquisition and forming new partnerships with Taobao ERP.

Table: Taobao Seller Acquisition Funnel

Taobao Seller Acquisition Funnel	Total Across 4 Focus Categories (Fashion, Beauty, F&B, Furniture)			
	# Shop	% as of total	# ADG (USD)	% as of total
Taobao Seller Huntlist	**4,582**	**100.0%**	**20.69**	**100.0%**
...Successfully onboarded	**593**	**12.9%**	**5.72**	**27.7%**
1 .....Onboarded before 2025	187	4.1%	3.51	17.0%
.....Onboarded in 2025	406	8.9%	2.21	10.7%
.....Direct Acquisition by SAI Team	182	4.0%	1.58	7.6%
.....Acquisition via ERP Partners	224	4.9%	0.64	3.1%
...Yet to onboard	**3,989**	**87.1%**	**14.97**	**72.3%**
.....Yet to pitch	1,096	23.9%	0.99	4.8%
.....Seller Uncontactable	2,068	45.1%	8.69	42.0%
.....Pitched, Seller Reject	697	15.2%	4.31	20.8%
.....Pitching ongoing	128	2.8%	0.98	4.7%

Note: ADG is estimated by the front-end crawling of # annual sold count multiplied by ASP of top 30 best-selling products of each shop, and represents total TB sales (domestic & international).
Note: Top TB Shop Huntlist was generated using BI crawling of top-performing shops on TB identified via L2 keywords in our focus categories.

Key Highlights:

1. Out of the top 4.6K TB shop huntlist, we have successfully onboarded 593 top shops with 27.7% ADG, 3× increase before 2025, where we had 187 top shops with 17% of ADG.
    a. In 2025, we expanded our pitching efforts through through more attractive incentives with commission waiver for new shops, reallocating manpower from the SAI team to focus on Taobao acquisition, and establishing new partnerships with key Taobao ERP providers (JST, WDT, OF) to reach more sellers.

[Recap: Counter TB Program FY2025 OKR] Overall TB program behind topline targets in 2025 due to ERP Lever underachievement, initiatives KPIs (Acquisition/Assortment push) were achieved.

Category	OKR	Actuals	Target	RR	Insights
Topline (SEA + TW)	Nov'25 Shopee CB ADG SOB vs Taobao Global	1.13x	1.42x	80%	Underperformed as Taobao growth outpaced expectations. Between Nov'24 to Nov'25, TBG ADG grew 40%, while Shopee CB ADG grew 11%.
	Dec'25 Counter TB Program ADO	111K	124K	89%	Underperformed due to P&L control for Lever 3 ERP to achieve breakeven in Q1'26 and SG/MY tightened PRM to achieve positive program PC2 in December
	Dec'25 Counter TB Program ADG	1.14M	1.26M	91%	
Acquisition	New-to-Shopee Seller	5.8K	5.6K	104%	Overachieved targets driven by CN-led seller acquisition and three ERP integrations.
Assortment	% of Shopee SKUs matched to Taobao	60%	60%	100%	Met targets through seller acquisition and trader sourcing, improving match rate by 22pp since Apr '25.
Price Competitiveness	% price competitiveness vs Taobao	-9%	40%	65%	Underperformed as item-level matching inflated the SKU pool and increased seller rejection.

Key Highlights:

1. Moving forward, in 2026, we will continue to drive topline growth to increase the program contribution to CB and amplify its impact on SOB.
2. Key initiatives include:
    a. Maintaining acquisition momentum and prioritize acquisition of sellers through ERP
    b. Double down on closing shop-to-shop assortment and price gaps to drive more actionable impact

[Counter TB FY2026 Targets] Counter TB Program to achieve 2.1M ADG by Dec'26, 10% of CB ADG*, YoY at 75% outpacing CB's 16%. Targets & Incentive Plans are aligned with CN & Local teams to support aggressive growth.

*% to CB covers SG, MY, TH, VN, and TW only. PH is excluded because it will not participate in the Counter TB program in 2026

Key Highlights:

1. Counter TB Program **targets 2.1M ADG by 2026 (10% of CB ADG*)**. We expect to outpace CB with **YoY growth of 75%** vs. CB's 16% and TB's 30%
   a. We expect aggressive growth from new sellers with Lever 1 & Lever 3 expecting YoY growth of 118% and 810% respectively. This will be achieved through continuous seller acquisition & incubation of acquired sellers in 2025 to maximise their growth potential.
   b. Fashion/Beauty categories will be the main growth engines, contributing be the primary growth driver, contributing 74% of total program ADG.
   c. Across markets, Counter TB ADG% to CB in 2026 will increase by 3.3pp.

[Counter TB 2026 Framework] Prioritize acquisition of sellers through ERP, double down on closing shop to shop SKU and price gap. Focus platform resources on growing brand sellers and improving visibility.

Objectives	Levers	Current Status	Dec'26 Target
Drive Seller Acquisition	• CN Seller Acquisition team to acquire through direct outreach & ERPs, and prioritise the acquisition of true top TB brand sellers. (1.1K out of 4.9K huntlist) • Onboard Tmall sellers on our platform to Shopee Mall to improve brand credibility and buyer conversion	• Till date, we have onboarded 593 out of 4.9K huntlist sellers to Shopee Mall	**+689 new sellers (inclusive of non-huntlist sellers)**
Close assortment gap vs TBG	• Work with acquired sellers to systematically close shop-to-shop assortment gaps through clear monthly targets and incentive-based rewards. • For unacquired sellers, to leverage traders to source for their top Taobao assortment	• As of Jan'26, match rate for shop-to-shop is at 44%	**80% shop assortment matched to TB**
Ensure Price Competitiveness vs TBG	• Focus on Shop-to-Shop price improvement instead of pursuing broad braised price improvement across all SKUs. • Work with sellers with proven performance on Shopee in 2025 to secure lower price vs Taobao	• As of End Dec'25, SHP CB NPC is at -9% vs TB at total buyer paid price in SEA + TW, and Shop-to-Shop NPC is at -7% vs TB.	**60% shop level NPC vs TB**
Acquire TB buyers	• Awareness of TB SKUs on Shopee remains an issue; Explore buyer acquisition to build awareness of TB brands on Shopee through external ads/chinese affiliates/shop search optimisation in mandarin	• Secure SG/MY KOL for content posting on XiaoHongShu • Targeted push via CRM to existing Taobao buyers on Shopee • Establish microsite to shoutout top chinese brands listing on Shopee	Deepdive **New-to-Shop Buyers (Target: End Jan)**

[Counter TB Seller Acquisition] In 2026, we will focus on actively managing and accelerating newly acquired sellers in better-penetrated categories (Fashion/Beauty) and continue seller acquisition in under-penetrated categories

Table: Taobao Seller Acquisition Funnel (Refocused)

Mid-Penetration | Low -Penetration

	#Seller	Total	Fashion	Beauty	H&L	Furniture	F&B	Mom & Baby
	Huntlist Total	**4,928**	**3,579**	**254**	**275**	**334**	**153**	**333**
	...Tier 1 Seller*	1,119	637	91	155	118	55	63
	.....Pending to reach out	309	86	5	155	0	0	63
	.....Pitching ongoing	27	18	3	0	2	4	0
	.....Uncontactable	422	304	28	0	65	25	0
	.....Rejected	171	86	34	0	31	20	0
2	**.....Onboarded to SHP**	**189**	**143**	**21**	**0**	**20**	**6**	**0**
	.....Onboarded to SHP (%)	**17%**	**22%**	**23%**	**0%**	**17%**	**11%**	**0%**
	.....is Mall on TB	119	73	21	0	20	6	0
	.....is Mall on SHP	53	39	7	0	6	1	0
	...Non-Tier 1 Seller	3,809	2,942	163	120	216	98	270
	.....Onboarded to SHP	404	356	17	0	21	10	0

*Tier 1 sellers are defined as Tmall sellers with over 1 million shop fans, representing brands with strong recognition in China. For Fashion, non-Tmall sellers are included due to the prevalence of marketplace sellers.
*High penetration defined as >50%, mid penetration: 20%-50%, Low penetration <20%

Key Highlights:

1. In 2026, we will adopt a more focused acquisition strategy by prioritising Tier 1 sellers within the huntlist, identified as brands with strong brand recognition in China.
2. Out of the Tier 1 sellers, we have onboarded 17% (189 sellers) onto Shopee, Fashion/Beauty is better penetrated with >20% acquisition rate. We will focus on incubating these sellers to maximize their topline. For the remaining categories, we will continue to prioritize seller acquisition in 2026.
    a. **New Seller Incubation**: We will incubate and grow recently acquired sellers by 2x to 156 ADG/seller by Dec'26 through 1) driving onboarding to Shopee mall to strength brand credibility, 2) continue incentive support aimed at growing topline & assortment completeness.
    b. **Seller Acquisition**:
        i. Direct acquisition through SAI outreach is expected to have limited impact as most sellers have been contacted multiples times in 2025. We expect some success in new categories (Home & Living + Mom & Baby)
        ii. Instead, ERP-led acquisition is expected to be more effective. We are partnering with 聚水潭 to acquire 50 sellers per month via partner events / referral. In addition, a new dropshipping vendor, Pu Yuan, will be integrated by Mid Feb to improve seller outreach.

[Taobao Crawler] Current crawler has been blocked by Taobao since end Dec'25 with no near-term recovery plans. Propose 万邦 as an alternative crawler to keep NPC running at higher cost (+7.8K USD per month)

Better than current | Same as current | Worse than current

		Current	Replacement Options (Under Evaluation)		
		淘大象 (Current Crawler)	Option 1: 万邦 (New Crawler)	Option 2: 万邦 (New Crawler)	Option 3: Pu Yuan (ERP Vendor)
System Readiness Status		**Blocked by Taobao Anti-Crawling Measure**	2-3 weeks lead time to go live	2-3 weeks lead time to go live	3-4 weeks lead time to go live
Data Granularity	Crawling Frequency	Shop-Level NPC: Weekly Platform-Level NPC : Weekly	Shop-Level NPC: Weekly Platform-Level NPC : Weekly	Shop-Level NPC: Weekly Platform-Level NPC : Monthly	Blocker : Only when sales is generated
	SKU Information	Item Level Information	Item Level Information	Item Level Information	Model Level Information
	Shop-Level NPC	✔ Top SKU from search term **X** Fixed SKU List	✔ Top SKU from search term ✔ Fixed SKU list	✔ Top SKU from search term ✔ Fixed SKU list	✔ Top SKU from specific shop ✔ Fixed SKU list
	Platform-Level NPC	✔ Top SKU from search term **X** Fixed SKU List	✔ Top SKU from search term ✔ Fixed SKU list	✔ Top SKU from search term ✔ Fixed SKU list	✔ Top SKU from search term ✔ Fixed SKU list
Cost	Charging Model	7 USD / month / account	0.01 USD per crawl item	0.01 USD per crawl item	TBC (Vendor prefers a comms based agreement based on order generated rather than crawler fee)
	Estimated Monthly Cost	7 USD	Shop-Level NPC: 5.7K USD Platform-Level NPC: 8.3K USD	Shop-Level NPC: 5.7K USD Platform-Level NPC: 2.1K USD	

Preferred

Key Highlights:

1. The **current crawler, 淘大象 , has been blocked by Taobao's anti-crawl measures since 21 Dec**, which has impacted assortment & NPC improvement for the Counter Taobao Program. The vendor has not provided an ETA for service restoration.
2. We are in discussion with CBBI & CNDC to evaluate 万邦 & Pu Yuan as a replacement while continuing to monitor for recovery of the existing vendor. However, 万邦 charging model is significantly more expensive than our current vendor.
    a. To manage costs, we propose to go with Option 2 where we reduce the crawling frequency for platform-level NPC from a weekly to a monthly cadence. Even with the reduced scope, this option will incur an incremental cost of USD 7.8K per month, compared to the current USD 7. **Next Step:** Meeting with 万邦 to conclude by this week, target to **go-live by End Jan** after confirming data quality and cost commitment

Counter TB Incentive Plan - All markets are aligned to provide incentive to drive aggressive program growth, with tightened seller & Shopee commitment to improve program PC2, assortment and price gap

Table: Counter TB Incentive Plan Alignment

Upsized in 2026 | Reduced vs 2025

Resource Tier	Commitment	Component	Reg Proposed	SG	MY	TH	TW	VN
Tier 1 - Tmall sellers with over 1M shop fans	Seller Provides	Topline Target	Meet monthly ADG target	Y	Y	Y	N	Y (3PF / CNLS shop only)
		Seller Investment	Ads Take Rate 5-10% 15% AMS Commission	Y	Y	Y	N (Lower Commitment)	Y (+ voucher commitment)
		Assortment Drive	Meet monthly assortment targets (until 80% assortment match)	Y	Y	Y	Y	Y
		Price Comp Drive	Meet monthly NPC targets (until 60% NPC)	Y	Y	Y	Y	Y
	Shopee Provides	Commission Waiver	First 3 months for new sellers	Y	Y	Y	Y	Y
		PRM	150 - 800 USD ads / shop / month Upsized item rebate Upsized coshare shop voucher	Y (Vouchers optimised from fully sponsor to coshare)	Y (Vouchers optimised from fully sponsor to coshare)	Y	Y (Reduced Ads due to platform control)	Y
		Exposure/Content	3 - 40 CFS slots / shop / month & dedicated exposure for CTB assortment	Y	Y	Y	Y	Y
		Content	Boosted Livestream OR AMS Credit or KOL support	AMS Credit	AMS Credit	Boosted Livestream	Livestream ads	Boosted Livestream
Tier 2 - Any new Taobao sellers acquired to Shopee	Seller Provides	Seller Investment	Increase 50 USD paid ads MoM	Y	Y	Y	N	Y
		Assortment Drive	10 listings by M1, 40 listing by M6	Y	Y	Y	Y	Y
		Topline Target	Meet topline target at M6 of onboarding	Y	Y	Y	Y	Y
	Shopee Provides	Commission Waiver	First 3 months for new sellers	Y	Y	Y	Y	Y
		PRM	100 - 300 USD ads / shop / month Upsized coshare shop voucher	Y	Y	Y	N (Removed ads due to platform control)	Y
		Exposure/Content	1 - 8 CFS slots / shop / month & dedicated exposure for CTB assortment	Y	Y	Y	Y (Free slots for CFS slot purchased)	Y
		Content (Optional)	Livestream/AMS credit based on platform push	-	AMS Credit	-	Livestream ads	Livestream
Tier 3 -Any F&B/H&L/M&B traders who can source TB-like SKU	Seller Provides	# SKU	10 - 20 SKU / month	Y	Y	Y	N (reuse Tier 2 incentive)	Y
	Shopee Provides	PRM	Ads credit or co-share Shop Voucher	Y	Y	Y		Y

Key Highlights:

- All markets will adopt a tiered resource allocation model, prioritising Tier 1 sellers, followed by new sellers and traders.
- Seller commitment have been further tightened to match program objectives to improve topline, close assortment gap and price gap.
- Shopee commitment: Resources in SG and MY have been streamlined to control PC2 spending, TH resources have been scaled up to support more aggressive growth targets; while VN resources have been reduced to align with CB efforts to scale 3PF and CNLS.
