1. **Overall CB** ADO/ADGMV runrate at **97%/99%,** mainly due to **VN** under performance in 3PF with top SKU OOS and **SG/MY** lower platform performance with optimization in platform spending; **Choice ADO** runrate at **112%** mainly driven by PH/BR platform FSV0 push

EBITDA: **+$5.4mil** vs Target,

2. **MP PC2: +$3mil** vs target driven by higher ads takerate (+0.5pp vs target) from increase of seller daily min ads budget roll out in SG/PH; and SG/MY PRM optimization in voucher
3. **SLS P&L: +$3.7mil** vs target mainly driven by TH/PH/BR lower LH cost than expected

Note: SIP seller P&L has been adjusted to with 2% commission waiving and 5% ads discount view both for target and actuals
Data refreshed as of Jan 14th, Standalone PnL using EOM proj.
** apply true cost savings discount*

4. **Choice P&L: -$1.5mil** vs Q3'25 due to lower orders (PC3 +0.5/per net ado)
5. **Local SIP P&L: -1mil** vs Q3'25 due to further reinvestment for topline growth

Note: SIP seller P&L before consideration of big sellers discount (2% Commission and 5% Free Ads Credit), and only include local SIP, to start include CNSIP, Swarm from Y26

Key Highlights:

Topline:

1. Overall CB ADO/ADGMV prj. increased by **6%/13%** vs FY2024, lower than platform mainly from TH/VN affected by VAT and evolving import policies, however, Choice YoY saw an decrease due to P&L optimization but still contribution to 9% of CB orders

P&L: Y2025 at **$212mil**, YoY +**$154mil**

2. **MP PC2: -22mil** vs Y2024. YoY takerate increase by **3.5%** from Commission fee increase and Ads GMV Max roll out; while offset by higher PRM for order push

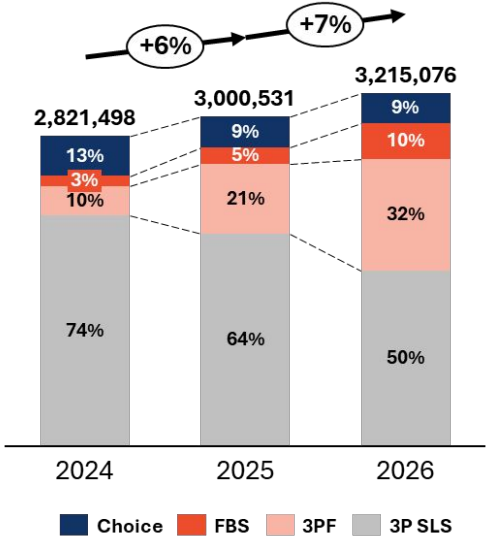
3. **SLS P&L: +10mil** vs Y2024 mainly due to BR cost improvement initiatives such as switching to lower cost vendors (i.e. from Correios to Anjun/SPX) and better BSA allocation

4. **Choice P&L: +172mil** vs 2024, from proactive seller P&L optimization in pricing and warehouse G&A

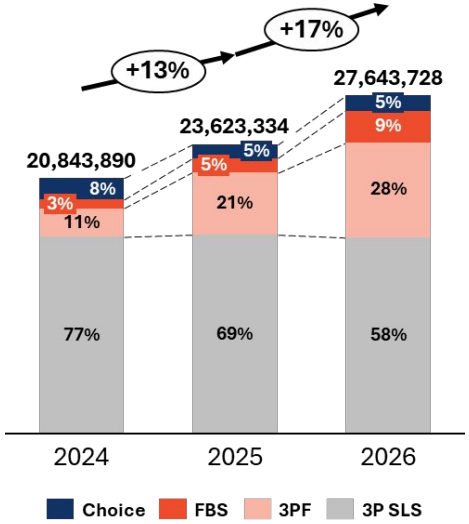
Shown To Chris

[Y2026 Forecast]: CB expects 7% growth in ADO and 17% in ADGMV, with EBITDA rising by $51 million due to higher commission and ads take rate

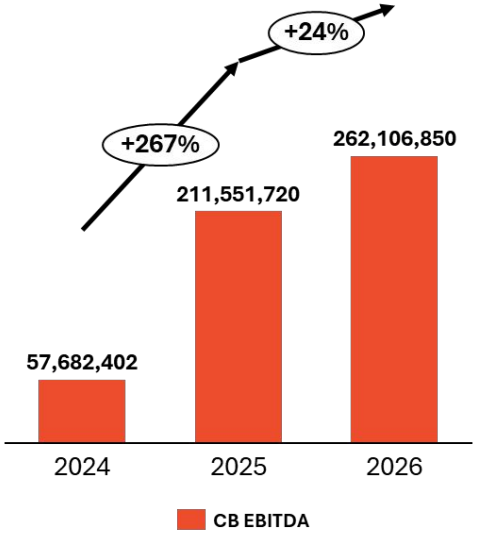
ADO: +7%, lower than platform due to import tax / KYC impact in TH/VN, other markets in line with platform growth



ADGMV: +17% higher growth than ADO as 1) markets push ABS in MY/VN 2) tax push selling price up



EBITDA: +24%, driven by base commission increase 1-2% and compulsory ads program expects to roll out Feb'26



Y26 P&L improvements mainly from 1) commission increase of 1-2% in 3P SLS business and narrow the gap btw FBS and 3P SLS, …

Three Key Things in commission

#1 **For 3P SLS,** we target match our takerate vs TT by increase 1-2% across markets

#2 **For FBS**, we are targeting a ~2% commission takerate gap vs SLS , and to further adjust with more concrete end stage plan

#3 **For 3PF**, we already set same commission charge rate as CNCB SLS

…, 2) rolling out 5% compulsory ads to CNCB sellers with an additional 1-2% ads take rate increase

Key Highlights:

Topline:

1 **102%** ADO/**100%** ADGMV RR, due to TH the listing price markup for import duty on CN airway channels was postponed

[EBITDA] +1.1mil vs target, mainly

2 **MP PC2: +$1.9mil** vs target mainly from **TW** less-than-expected logistic rebate after **mandating** FSS and TH MoM higher ads investment from increase of seller daily min ads budget

3 **SLS PnL: -$0.6mil** vs target from TH tax duty undercollection

4 Choice PnL: 0.7mil vs target, mainly due to BR high ADO runrate from extra FSV sponsorship that lowered MP PC2

Note: TH Tax loss projection under discussion

Note: SIP seller P&L has been adjusted to with 2% commission waiving and 5% ads discount view both for target and actuals

Key Highlights:

- For markets **local ALSO increase fee**, i.e **SG/VN**, CB ADO% least impacted
- For markets **local NOT increase fee**:
  - **[MY/TH]** CB ADO% drop by 0.3% - 0.4%
  - **[PH]** CB ADO% seeing ~0.4p.p increase instead due to local sellers still on Holiday Mode and platform push for low ABS CAT like Mobile Accessories, will need more time to monitor

Note: Before period: *Dec'25 H2 BAU (16-31 Dec),* ***After period:*** *Jan'26 BAU (2-10 Jan)*

[Commission Increase Impact to BU topline]: not much impact to 3P SLS, FBS high commission increase mkt MY/TH only see slight penetration drop despite big fee hikes

Key Highlights:

- **3P SLS:** have yet seen high impact to orders
- **FBS:** although ALP/ASP increase, platform penetration only slightly drop in SG/MY, but yet seeing much impact in TH
- **3PF:** seeing penetration drop in TH/PH, given same commission increase as 3P SLS, under reason clarification (suspect year end OOS and yet to replenish, to get back reasons)

Next steps:

- *To monitor for longer period*

Before period: Dec'25 H2 BAU (16-31 Dec)
After period: Jan'26 BAU (2-10 Jan)

[Impact to Price by BU]: despite order not seeing big impact, seller do already reflect fee change in listing price, except PH seeing price reduction which is mainly due to seasonality change results in product mix shift
