Key Highlights:

ADO:

1. **Overall:** slightly adjust up by 1% from BR as local FP&A low projection in last cycle by reflecting Dec CB penetration to FY26 when normally is a low CB penetration

P&L: FY26 +1mil vs last submission mainly due to

2. **MP PC2: -11 mil vs last submission**, revenue +0.2% mainly from additional revenue uplift from KRCB Commission Increase and Compulsory Ads plan; and slight adjustment to G2N and NCB/NMV assumption to reflect the latest trend, CIR spending revise to spend more
3. **SLS: +10mil vs last submission**: mainly from PH/MY/BR line haul cost reduction + TH tax loss recovery from import duty tax mark-up wef Jan 19th
4. **Standalone P&L: -2mil** vs last submission, mainly from FBS WH ops P&L drop in MY mega wh rental increase and TH/PH topline drop

Backup: Nov'25 to Jan'26 Key Numbers Summary: given Dec cycle local spending plan is not so confirmed, hence, to put last 3 cycle to see together

Standalone	29m	22m	21m
EBITDA	**152m**	**262m**	**263m**

Key Highlights:

ADO drop mainly from TH/VN

- **TH due to** import duty
- **VN due to** based on recent 3 month runrate trends (overall CB ADO RR 85-90%), further reduction of 3PF to reflect a more realistic target and 3P SLS due to SLS hidden fee increase impact and P&L optimization by reducing FSV0

Takerate: make sense Jan'26 vs Nov'25 submission +0.9pp

- ~1p.p base commission increase for SG/MY/PH (VN/TH alr factored in Nov submission)
- 0.8p.p - 1.4p.p ads incremental for SG/MY/TH/VN from compulsory ads

CIR revise to spending more based on latest spending plan, in general to spend more in PH especially

Standalone PnL: worse off from
1) FBS ops: from PH handling fee discount
2) Choice seller P&L: from commission cost increase, but still able to breakeven after SLS discount by Dec'26

ADO: Y26 ADO +1%, adjust up from BR to reflect Jan actual performance (5.9% CB ADO% rather than Dec 5.3% ADO% due to holiday season)

Key Highlights: SLS: FY26 P&L at $296mil, vs. last submission +10.8mil. Gaps mainly driven by topline changes:

- **[PH]: +2.4m** from higher 3P SLS orders (+2.0m) from LFF downward revision (-2% ADO) and UE improvement (+1.3m) mainly from lower LH and CC vendor price down
- **[MY]: +3.0m** mainly from higher 3P SLS orders (+4.2%) from 3PF downward revision (ADO -6%) offset by LH cost increase (+0.06/kg, -$0.9mil)
- **[TH]: +3.2m** mainly from UE improvements (+2.1m) from lower LH+CC quotation vs last cycle and FX gain (+1.5m), net off by Jan tax loss due to import duty under collection (-3m).
  **Note that despite we charge import duty tax with a $0.38/pc tax surplus, this can not be booked in SLS P&L per Sea Fin/tax guidance*
- **[SG]: +0.7m** mainly from lower WH X-sell orders (-27% vs last cycle, PPO is negative) (+2.1m), offset by CNCB 3P PPO drop from higher BSC%(+3.4%) from launch of SPX locker (-3.1m)
- **[VN]: -2.0m,** mainly from order drop (-4.1m) due to 3PF ramp up (+23% ADO) offset by better PPO (+1.9m) mainly from higher weight projection to factor in VN cc fee impact
- **[TW]: -1.7m** mainly from higher LM cost due to 7-11 SEA + OK mart quotation increase and higher airway LH quotation increase
- **[BR]: +3.1m** mainly from lower LH cost (from $11.1/kg to $10.7/kg) due to good BSA rate secured
- **[AR]: +2.4m** from higher order projection from Local's target adjustment. (Hidden fee rate card reduction not yet factored in, to add next cycle, est. -$77k full year)

Key explanation on THCB impact from Duty Tax: SLS orders impact by 22% after normalization, SLS tax loss of -1.03usd/pc has been recovered to +0.38usd/pc tax surplus for future months
