Highlights

Overall: 221k ADO, 110% RR, CB% -0.2pp MoM; $2.3M ADG, 110% RR, CB% +0.2pp MoM; SIP seller P&L $775k at target (-$94k within +/- 0.5% fluctuation), **+$248k MoM.**

Local SIP: 151k ADO, 110% RR, CB% -0.6pp MoM; $1.60M ADG, 115% RR, CB% -0.2pp MoM. MoM decline expected due to structural headwinds including ID budget reduction, platform fee/tax increase, and ops cleanup; partially offset by CNY assortment push.

CNSIP: 32k ADO, 104% RR, CB% +0.1pp MoM; $279k ADG, 94% RR. CB% +0.1pp MoM. ADO growth driven by 1) new sku incubation ads push in VN; 2) CNY assortment push in MY; ADG missing target due to TH tax impact kicked in 2 weeks later than projected.

Swarm: 5.1k ADO, 102% RR, CB% +0.03pp MoM; $40k ADG, 95% RR due to TH tax impact, **CB% +0.01pp MoM**; ADG missing target due to assortment mix change -higher vol share from VN with lower ABS than other regions.

Direct: 26k ADO, 118% RR, CB% +0.2pp MoM; $367k ADG, 109% RR, CB% +0.3pp MoM; growth driven by (1) new sellers onboarded (+8% MoM); (2) SKU effi improvement from maturing SKUs.

WH cross-selling: 7.3k ADO, 97% RR, CB% +0.01pp MoM; $53k ADG, 93% RR, CB% +0.01pp MoM; topline missing target due to local FBS target overset, to revise target setting in next cycle.

[Backup] Local SIP Jan'26 vs Dec'25 loss: Structural headwinds leading to 34k ADO loss in Jan'26 vs Dec'25.

Type	Reason	Description	Budget cut (Jan-26)	ADO impact (Jan-26)
Budget Adjustment	(-) ID BPSF budget cut	In FY25, ID over-invested **to local SIP via BPSF discount** to boost ID export, with negative ID MP P&L from SIP local orders in ID In FY26, ID **revised budget support down to prioritize ID MP P&L breakeven**	-1.1M	-12.5K ADO
	(-) MY seller P&L back to breakeven	**Restore SIP seller P&L in MY to breakeven without big seller discount** in FY26, from negative P&L in FY25 from over-investment. In progress of finalizing topline and total P&L target with MYCB and MYBD.	N.A.	-3.3K ADO
	(-) CS + FTE Cost Enrollment	**Count CS+FTE cost** to SIP standalone PnL from Jan FY26	-205K	-2.8K ADO
	(-) Platform Fee/Tax Changes	**TH LVG tax increase** by ~10% to protect SME from low price import; **MY export lane SST** 6%; **Platform fees hike** with TH commission fee +2.1%, PH commission fee +1.0%	-	-8.4K ADO
Operational Adjustment	(-) Operational Cleanup	**Remove high NFR shops** to improve buyer experience; remove potential **scam sellers**; **onboarding and offboarding criteria** changes	-	-6.2K ADO
	(-) ID Export Cleanup	**Remove non-local manufacturer** required by ID gov	-	-0.3K ADO
	(-) Logistic Vendor Switch	MY import market **logistic partner change** to BEST as replacement for Flash; less serviceable areas vs before	-	-0.2K ADO
Total	-	-	-1.3M	-33.6K ADO

Highlights

- **[Budget adjustment]** a) ID revised down budget support this year to target local P&L breakeven -12.5K ADO ; b) Increased import tax in TH market and platform fee changes in various markets further reduce topline by -8.4K
- **[Ops cleanup]** In order to reduce NFR and increase buyer experience, SIP aligned with management to tighten the onboarding criteria and cleanup low quality shops -6.2K ADO. Also ID gov pushed Shopee to focus on local manufacturer export so SIP needs to cleanup non-local sellers, with first batch kickstarted in Jan with -0.3K ADO

** ADO decline projection not inclusive of direct selling cannibalisation*

[Back-up] Local SIP Dec'26 vs Jan'26 growth: Despite headwinds, target 253k ADO by Dec'26, +67% / +102k vs Jan'26; outperform platform growth (+29% Dec'26 vs Jan'26)

Highlights:

1. -34K ADO decline from Dec-25 to Jan-26 mainly due to 1) lower ID budget support; 2) platform fee/tax raise; 3) ops cleanup to improve SIP shop quality and mitigate GR risk
2. Additional growth levers +71K by Dec'26 planned with 1) new market expansion 2) aligned strategic PRM support programs 3) automation projects 4) Opex improvement 5) new seller acquisition ; growth levers expect to compensate ADO loss by Dec'26
3. Project 253K ADO and $5.9M total P&L contribution by Dec-26, +67% ADO growth from Jan-26, higher achievement expected vs original baseline at 225K

P&L - Local SIP [Jan EOM]: Seller P&L +$985k above target, MoM drop expected due to one-time budget control in Dec no longer needed in Jan; total P&L $3.2M, MoM drop in line with seller P&L drop

Highlights

Seller standalone P&L: $985k, +$74k vs target, -$586k MoM

- **-$586k MoM** due to Dec'25 intentionally keeping a P&L surplus of $400k to cover for Swarm P&L loss and ensure Q4'25 SIP P&L hitting target; one-time practice, discontinued from Jan
- **Unit economics**: -$0.07/order MoM, mainly driven by 1) reduction in ID budget (reflected in logistics cost increased $0.26/order) and 2) local market base comms raise (reflected in platform cost increased $0.17/order), partially offset by 3) higher PC1 (+$0.28/order) from ABS raise

Total P&L: $3.2M

- **-$490k** MoM (**UE +$0.02 per order**) mainly due to
  a. Seller P&L **-$586k** as mentioned above (UE -$0.07)
  b. SLS P&L **-$85k** from lower topline (UE stable)
  Partially offset by:
  c. MP PC2 **+$199k** due to higher platform fee and lower PRM (UE +$0.09)

P&L - CNSIP [Jan EOM]: Seller P&L -$2, missed target and dropped MoM due to system issues; one-time issue resolved from Feb. Total P&L $381k, MoM increase driven by higher MP PC2 from higher topline

Highlights

Seller P&L: -$2, -$122k vs target; -$94k MoM

- **-$122k vs target; -$94k MoM** due to a system issue in setting up big seller discount (2% base comms rebate) in system
- **What's the system issue**: when CB FP&A team set up the discount rule in the system, it triggers CNSIP SKU markup and FE price reduction, instead of keeping the base comms rebate as profit in seller P&L as planned
- **How do we resolve it**: CNSIP has increased price markup to counter the system issue, reverting to original FE price; keeping the rebate as profit in seller P&L from Feb onwards

Total P&L: $381k, +$27k MoM

- **+$27k MoM** mainly driven by 1) MP PC2 **+$94k** (UE +$0.1) driven by higher topline and lower platform PRM; 2) SLS P&L **+$27k** mainly due to higher topline (UE stable)
  Partially offset by
  3) **-$94k** seller P&L as mentioned above

P&L - Swarm [Jan EOM]: Seller P&L -$210k; total P&L -$168k, loss narrowed and UE improved MoM for both seller and total P&L

Highlights

Seller P&L: -$210k, -$46k vs target, +$48k MoM, UE +$0.54 MoM

- **-$46k vs target** due to revenue dropped more than expected driven by lower ABS than projected (uplift of orders from incubation sellers in 2H Jan)
- **+$48k MoM, UE +$0.54** driven by 1) +$45k SLS discounts from higher weight; 2) +$6k from comms waiver discount 3) +$4k ads budget cut

Performance

- **VNPH 98% RR, -0.3 days MoM:** missing target due to long inland transit time in PH; improved MoM but still behind BAU days. PH logs team confirmed to recover by early Feb.
- **MYTH 98% RR, +0.4 days MoM:** due to longer/tighter import custom inspection at Bangkok airport; performance already recovered as of 30 Jan.

Feb focus

- **CNY logistics operations planning:** to ensure capacity alignment during and post-holiday period across import and export lanes
  - TW Import:: No operation for import custom office from 14 Feb to 22 Feb; vendors for ID / VN export to store the shipment w/o additional cost
  - TW Export: No operation for Linehaul vendor from 14 Feb to 22 Feb; pre-planned additional capacity post CNY to clear backlogs
  - VN Export: No operation for export custom office from 14 Feb to 22 Feb; pre-planned additional capacity post CNY to clear backlogs

CS - SG import: All agent performance metrics met target in L4W; Chatbot Jan MTD overall performance met target, with CSAT fluctuations within expected range; next to focus on new Chatbot DR improvement

Highlights

1. **Agent Performance:** All metrics met target in L4W
2. **Chatbot performance fluctuations expected and caused by low CSAT from old chatbot and low DR from new chatbot**
   - New chatbot adoption: 30% of IDSG shopchat vol; 50% of non-IDSG shopchat vol; adoption % based on agent capacity
   - Chatbot CSAT slightly declined over the past week due to fewer good CSAT responses, while bad CSAT remained stable and largely attributable to the old chatbot
   - Next steps to improve new Chatbot DR by enhancing listing quality, and optimizing backend solution - image translation enhancement feature is under development; once new Chatbot DR improved, increase new chatbot adoption to uplift CSAT

CS - MY import: All agent performance metrics met target in L4W; Chat Deflection Rate miss target due to new chatbot rollout; next to focus on Agent CR uplift and Chatbot DR improvement

Highlights

1 **Shop Presale CR miss target due to fluctuations in both Agent CR and Chatbot CR**
- Shop CR target was set using Dec'25 data - 20% presale chats handled by chatbot, this % increased to 26% in Jan'26, leading to overall Shop CR slightly miss target
- PH market's chatbot CR is generally lower than other markets and declined in Jan, consistent with patterns observed in other business lines
- Agent CR fluctuation driven by resignations and increased chat volume from IDPH Direct Selling; agents had limited capacity for upselling. Agent backfills have been hired and started training on 28 Jan.

2 **Agent CSAT miss target, driven by low CSAT of IDPH Direct selling**
- Jan MTD CSAT of Direct selling IDPH lane is 83%: DSAT mainly caused by Direct sellers' delayed shipments, pulling down overall PH CSAT
- Next steps to return chats to ID Direct sellers starting from 9 Feb when the system feature is ready, with target completion date of 2 Mar; separately in progress of setting up ops monitoring and system improvement to drive up direct sellers' on time shipment

3 **Chat Deflection Rate behind target due to low DR from new chatbot**
- New chatbot adoption: 30% of IDPH shopchat vol; 50% of non-IDPH shopchat vol; adoption % based on agent capacity
- Next steps to improve DR by enhancing listing quality, and optimizing backend solution - image translation enhancement feature under development

Highlights

Brunei
[P0] MYBN/CNCB/CNSIP: launched on 26 Jan as planned; 61 CNSIP orders as of 29 Jan
[P1] ID-BN SIP / ID-BN Direct: on track to launch by Feb-26, pending legal review
KRJP-BN: Feb-26 tentative; MY PMO + MYCB + KRJP team to finalize plan
Other SIP-BN lanes: Mar-May on track

Cambodia & Laos
[P0] VN-KH/TH-LA: postponed to Feb-26 to mitigate ongoing geopolitical risks
[P1] CNSIP-KH/LA: Postponed to Apr/May 26 due to payment setup lead time
ID-KH/VN-LA SIP: Mar-26 on track
CN/KR/JP MP, Direct selling: Jun-26 tentative (2-3 months post-SIP stabilization); VN/TH PMO + VN/THCB to finalize plan

Myanmar
[P2] TH-MM: Jun-26 (using same business model as BN)

[Backup] IDBN SIP launch prep: In discussion with HQ legal to continue existing SIP approach (option 2, opt-out) to maximize seller adoption (vs shift to option 3 opt-in expect low adoption); pending final legal assessment

Highlights

Seller/SKU count: **99%/98% RR; +14%/+14% MoM**; driven by 1) TH export seller acquisition; 2) increase in TH import start sales; **next to focus on repitching top target sellers (Mall/OS).**

- **VNMY 68%/79% RR**, working with VNCB to understand potential sellers' concerns and any blockers in increasing acquisition
- **SGMY 54%/42% RR**, aligned with SGCB team to start mass whitelist from W4 of Jan

ADO/ADG: **113%/108%RR; +30%/+26% MoM**; growth mainly driven by PH import lanes; **SKU effi improved due to SKU maturing, indicative of sustainable growth**

- **VNMY 68% RR** due to reduced acquisition pace, in progress of consolidating potential blockers faced by sellers in onboarding and performance management
- **IDSG/VNSG 98%/94% RR** due to platform policy for CB sellers and un-whitelisting of 430K shops in December, slower growth impact still observed
- **TH import 102%** overachieved acquisition but SKU effi lower than projected; (1) Revise acquisition targets; (2) Encourage sellers to utilised onboarding incentives

Feb Reg team commercial focus: 1) shift acquisition focus to high-potential sellers (i.e. mall/OS) and deep-dive seller pain points; 2) streamline seller programs and incentives to be standardized across lanes/CB for easier tracking and management; 3) build reg data transparency on NPC, seller investment (ads, vouchers, campaign participation) and propose incentives
