Key Highlights:

Topline:

1. **Overall CB** ADO/ADGMV runrate at **105%/102%,** mainly driven by **VN** platform order push thru more lower MBS Voucher rebate during Tet push and strong 3PF growth (MoM ADO+43%); **PH** driven by platform higher FSV spending; **BR** from stronger-than-expected recovery after Dec holidays

EBITDA: **+$1.5mil** vs Target,

2. **MP PC2: -$0.3mil** due to higher Voucher and FSV rebate in SG/VN/PH for order push
3. **SLS P&L: +$1.6mil** from PH higher 3P SLS order runrate and lower LH, CC and LM cost as well as BR lower LH rate from BSA negotiation offset by TH duty tax undercollection
4. **Local SIP PC2+SLS+Stdn: -$0.8mil** due to one-time ads investment target setting error and higher PRM spending in SG/PH

[Feb'26 Projections]: CB ADO proj. at 2.7mil, with EBITDA at +$10.6mil; Lovito/SCS ADO RR 104% with seller pnl breakeven

Key Highlights:

Topline:

1 **101%** ADO/ADGMV RR, with higher topline from VN driven by good performance during mini-spike & CB Sunday on 2.1 and Spike on 2.2

PnL: -$0.5mil vs target, mainly

2 **PC2: -$1.7mil** mainly from **VN** to factor in heavy push during 2/1 and 2/2, which contributed to ADO E.RR at 108%, and **BR** due to 4 additional backup FSV0 during 12h–24h on 2/2 spike;

3 **SLS PnL: +$1.1mil** vs target mainly from BR (1) lower LH cost expected due to higher BSA% and (2) higher ASF from FX appreciation

Note: Local SIP seller P&L has been adjusted to with 2% commission waiving and 5% ads discount view both for target and actuals

[Feb'26 Projections]: future reporting for SIP will be including local SIP, CN SIP and Swarm

Key Highlights:

- **Context:** Adding FBS Program P&L to better evaluate pltf-level total investment proposed by Reg BD to TP
- **Definition**: adding FBS Program P&L by including MP dedicated support in commission waiver and PRM extra subsidy
- **Results**: on top of the FBS ops P&L, we are giving another 8% of GMV subsidy mainly in lowered commission charge and dedicated vouchers

To improving the program P&L

- Narrow the FBS base commission charge gap vs SLS
- Overall strategy to shift seller subsidy to buyer

[FBS P&L Evaluation]: to expand the view time, FY25 FBS ADO ramps up very fast by increasing 5.8 p.p. CB ADO penetration, at the cost of investments in commission waiving from May'25, to continue monitor two key metrics 1) Seller Subsidy% of total subsidy 2) incremental ROI

Key Highlights:

1. **FBS Ops P&L** is -0.5~-1mil per month, but with subsidy it will be -4mil
   2. Seller subsidy accounts for ~80%, trending down
   3. MP commission discounts accounts for 82% of total support
4. However, the investment at regional level is still quite reasonable, incremental ROI <50%

Expectation for Y26:

- Seller subsidy to move to buyer side with two key adjustment 1) increase FBS commission to match SLS 2) removed subsidies for new sellers onboarded to FBS program

[FBS P&L Evaluation]: breakdown by market, MY warehouse ops P&L is able to breakeven without any handling waiver, however, all mkts program PnL is negative due to lower commission charge

Key Highlights:

- **Jan Actuals vs Budget: -100k** vs budget, mainly from VN outperformance in line with CB trends (-60K), despite raise price for twice in Jan, unable to cover the loss, if to view Jan performance, new SKU UE is benchmarkable vs SCS -2.4usd/order at 3.5K orders(Aug'23), UE still spend quite a lot but good trends observed
  - (1) New shops' UE improved from -5.7 usd/order in Oct '25 to -2.8 in Jan'26, with ADO rising from 0.6k to 1.7k orders
  - (2) After three incubation months, UE has recovered to around -1.5 usd/order. We are working towards to achieve positive P&L on mature Shops through seller co-sponsorship and optimized marketing by Apr'26
  - (3) As the seller portfolio matures, overall (new+old skus) UE is projected to break even , new shops UE is projected to improved to -1.35 by Dec'26
- **Feb Projection vs Budget:** projection WIP, to update on Monday
- **Mar Target vs last alignment:** same as last alignment, UE worse off as more new sellers join after CNY

Agenda

Key Highlights:

To Design Reg CB teams' AI OKR, we split to improve awareness, adoption and impact

Specially for Adoption, this is aligned with Reg LLM defined OKR across all SHP org, key logic is

- Average Agents per MAU: **indicating activeness**
- Average token per agents - **indicating quality and size of Agents**

Key Highlights:

As SLS P&L is very important to local mkts, so we need to deep dive SLS P&L at least weekly to ensure on track, and needs to communicate this info with 10 mkts whenever this is a spike

However, SLS P&L is very complex to view from just one glance as multiple factors contributes to

1) 10 Mkts

2) 8 BUs with unique PPO and characteristics (CNCB 3P/Lovito/SCS/KR/JP/Local SIP/Direct)

3) **156** Logistics Channels

4) 9 key metrics that impact SLS P&L

Hence, purely use human to monitor the performance is time consuming meanwhile hard to cover all aspects

Hence, we developed an AI powered SLS P&L analysis Agent to facilitate weekly SLS monitoring
