Highlights

Topline (5 segments total): 219k ADO, 109% RR, CB% -0.3pp MoM; $2.3M ADG, 107% RR, CB% +0.1pp MoM; growth driven by Direct, CNSIP, and Swarm.

SIP seller P&L (3 SIP segments total): $1.0M, $157k above target; outperformance driven by local SIP higher topline vs target (111% RR)

BU topline highlights

Local SIP: 153k ADO, 111% RR, CB% -0.6pp M; $1.58M ADG, 113% RR, CB% -0.2pp MoM; MoM decline expected due to structural headwinds including ID budget reduction, platform fee/tax increase, and ops cleanup; partially offset by CNY assortment push.

CNSIP: 30k ADO, 104% RR, CB% +0.1pp MoM; $256k ADG, 89% RR, CB% +0.1pp MoM. ADO growth driven by 1) new sku incubation ads push in VN; 2) CNY assortment push in MY; ADG missing target due to TH tax impact.

Swarm: 5.1k ADO, 100% RR, CB% +0,02pp MoM; $40k ADG, 94% RR, CB% +0,01pp MoM; ADG/ABS missing target due to assortment mix change - higher vol share from VN with lower ABS than other regions.

Direct: 23k ADO, 107% RR, CB% +0.2pp MoM; $346k ADG, 103% RR, CB% +0.4pp MoM; growth driven by 1) new sellers onboarded (+8% MoM); 2) SKU effi improvement from maturing SKUs.

WH cross-selling: 7.4k ADO, 100% RR, CB% +0.01pp MoM; $54k ADG, 98% RR, CB% +0,01pp MoM; topline missing target due to local FBS target overset, to revise target setting in next cycle.

1) Local SIP P&L [Jan full-month]: Seller P&L +$1.2M, +$327k above target; Total P&L +$3.5M, -$1.6M MoM due to cut on ID sponsored budget and thus paid ads revenue to platform

Highlights

Seller standalone P&L: $1.2M, +$327k above target, -$506k MoM

- **-$506k MoM** due to Dec'25 intentionally keeping a healthy P&L surplus +$653K to cover for Swarm P&L loss and ensure Q4'25 SIP P&L hitting target; one-time practice, discontinued from Jan'26
- **Unit economics**: -$0.05/order MoM, mainly driven by starting to book FTE staff cost into PC3 from Jan'26 (cost = $0.05 per order)

Total P&L: $3.5M,

- **-$1.6M MoM** mainly due to
  a. MP PC2 **-$1.0M** from lower marketing budget from (a) removal of PBPSF waiver for ID export lanes (~ -952.1K USD) and (b) topline decline (lower platform take rate)
  b. Seller P&L **-$506k** as mentioned above
  c. SLS P&L **-$22k** (UE +$0.01) from lower topline

2) CNSIP P&L [Jan full-month]: Seller P&L +$63k, -$71k behind target due to one-time system issues, resolved from Feb; Total P&L +$371k, +$17k MoM driven by higher MP PC2 from higher topline

Highlights

Seller P&L: +$63k, -$71k vs target; -$31k MoM

- **-$71k vs target; -$31k MoM** due to a system issue in setting up big seller discount (2% base comms rebate) in system
- **What's the system issue**: when CB FP&A team set up the discount rule in the system, it triggers CNSIP SKU markup and FE price reduction, instead of keeping the base comms rebate as profit in seller P&L as planned
- **How do we resolve it**: CNSIP has increased price markup to counter the system issue, reverting to original FE price; keeping the rebate as profit in seller P&L from Feb onwards

Total P&L: $371k, +$17k MoM

- **+$17k MoM** mainly driven by 1) MP PC2 **+$34k** (UE +$0.04) from higher platform takerate and lower PRM in Jan; 2) SLS P&L **+$13k** from higher topline (UE stable); partially offset by 3) **-$31k** seller P&L as mentioned above

3) Swarm P&L [Jan full-month]: Seller P&L -$263k; Total P&L -$224k; both seller and total P&L loss narrowing MoM with UE improvement (+$0.31 for seller P&L UE, +$0.32 for total P&L UE)

Highlights

Seller P&L: -$263k, -$99k vs target, +$13k MoM; UE -$1.67, +$0.31 MoM

- **-$99k vs target** mainly due to VN order higher than expected with VN platform growth, but VN UE is lower than other markets.
- **Actions taken:** raised prices twice in Jan, which improved UE but not enough to fully close the gap.
- **Feb plan**: further price increases to bring seller P&L UE to -$0.99 and seller P&L to -$133k target.
- **+$13k MoM, UE +$0.31** driven by 1) +$39k SLS discounts from higher weight; 2) +$2k from comms waiver discount 3) +$2k ads budget cut; partially offset by lower PC1 of $25k due to order mix change mentioned above.

Total P&L: -$224k, +$19k MoM, UE +$0.32 MoM

- **+$19k MoM, UE +$0.32** driven by 1) **+$13k** seller P&L as mentioned above; 2) MP PC2 **+$12k** from lower platform PRM; partially offset by 3) SLS P&L **-$7k** from SLS rebates to Swarm.

BWT [Feb MTD]: Performance mostly stable. IDMY LH LT disruption from customs system downtime has recovered; VN Export +1-1.5 day LH LT due to unstable capacity; backup capacity in progress, target recovery next week

Performance

- **IDMY 98% RR, +0.3 days MoM:** missing target due to (1) MY custom system update lead to frequent inspection, CC clearance delayed for 0.5 days, one-time issue with performance back to normal from 3 Feb (2) Capacity issue for one of the LH vendor, team has reduce the volume allocation, expect LT to recover from next week
- **VNPH 100% RR, +0,2 days MoM, + 2.7 days vs. CNCB:** performance worse than CNCB due to no direct ingestion to Visayas/Mindanao area. PH inter-country transit from Manila to Visayas/Mindanao area takes 5-7 days, compared to normal direct ingestion LM LT to be 2 days. To explore the cost impact for direct ingestion
- **VNSG 107% RR, +1.1 days MoM:** missing target due to unstable capacity supply for SGN export (55% of SG volume). Vendor working on backup plan, target to recover next week

Feb focus

- **CNY logistics operations planning:** to ensure capacity alignment during and post-holiday period across import and export lanes
  - TW Import:: No operation for import custom office from 14 Feb to 22 Feb; vendors for ID / VN export to store the shipment w/o additional cost
  - TW Export: No operation for Linehaul vendor from 14 Feb to 22 Feb; pre-planned additional capacity post CNY to clear backlogs
  - VN Export: No operation for export custom office from 14 Feb to 22 Feb; pre-planned additional capacity post CNY to clear backlogs

CS - SG import: All agent performance metrics met target in L4W; Chatbot Jan MTD overall performance met target, with CSAT fluctuations within expected range; next to focus on new Chatbot DR improvement

Highlights

1. **Agent Performance:** All metrics met target in L4W
2. **Chatbot performance fluctuations expected and caused by low CSAT from old chatbot and low DR from new chatbot**
   - New chatbot adoption: 30% of IDSG shopchat vol; 50% of non-IDSG shopchat vol; adoption % based on agent capacity
   - Chatbot CSAT slightly declined over the past week due to fewer good CSAT responses, while bad CSAT remained stable and largely attributable to the old chatbot
   - Shop CSAT miss target on 2 days driven by low Chatbot CSAT
   - Next steps to improve new Chatbot DR by enhancing listing quality, and optimizing backend solution - image translation enhancement feature is under development; once new Chatbot DR improved, increase new chatbot adoption to uplift CSAT

CS - MY import: All agent performance metrics met target in L4W; Chat Deflection Rate miss target due to new chatbot rollout; next to focus on Agent CR uplift and Chatbot DR improvement

Highlights

1. **Shop CSAT fluctuations driven by changes in Chatbot Deflection Rate**
   - Shop CSAT target was set based on Jan'26 data - assuming 50% chats resolved by chatbot, daily deviations of Chatbot DR caused Shop CSAT to miss target on two days, even though both Agent CSAT and Chatbot CSAT individually met targets, as higher % of chats was handled by chatbot which has lower CSAT than agent-handled
2. **Agent Performance:** All metrics met target in L4W; to continue improving CR via regular QA checking and sharing best practices from top agents
3. **Chatbot Conversion Rate in PH** is generally lower than other markets and declined in Jan/Feb, consistent with patterns observed in other business lines; Next to implement SIP listing quality improvement and monitor its impact on chatbot CR and DR
4. **Chat Deflection Rate behind target due to low DR from new chatbot**
   - New chatbot adoption: 30% of IDPH shopchat vol; 50% of non-IDPH shopchat vol; adoption % based on agent capacity
   - Next steps to improve DR by enhancing listing quality, and optimizing backend solution - image translation enhancement feature under development

Highlights

Seller/SKU count: **88%/86% RR; +1%/-2% MoM**; driven by 1) TH export seller acquisition; 2) increase in TH import start sales; **next to focus on repitching top target sellers (Mall/OS).**

- **VNMY 60%/65% RR**, working with VNCB to understand potential sellers' concerns and any blockers in increasing acquisition
- **SGMY 42%/32% RR**, aligned with SGCB team to start mass whitelist from W4 of Jan

ADO/ADG: **107%/110%RR; +29%/+29% MoM**; growth mainly driven by PH import lanes; **SKU effi improved due to SKU maturing, indicative of sustainable growth**

- **VNMY 96% RR** due to reduced acquisition pace, in progress of consolidating potential blockers faced by sellers in onboarding and performance management
- **MYSG 89% RR** due to less active shops and live SKUs than expected, SKU effi still on track
- **MYTH 95% RR** overachieved acquisition but SKU effi lower than projected; (1) Revise acquisition targets; (2) Encourage sellers to utilised onboarding incentives

Feb Reg team commercial focus: 1) shift acquisition focus to high-potential sellers (i.e. mall/OS) and deep-dive seller pain points; 2) streamline seller programs and incentives to be standardized across lanes/CB for easier tracking and management; 3) build reg data transparency on NPC, seller investment (ads, vouchers, campaign participation) and propose incentives

Topline [Export View, Feb MTD]: Direct continuing to grow alongside local SIP; Direct ADO at 18% of local SIP, Direct ADG at 26%; on track to FY26 target of 30% local SIP ADO and 50% local SIP ADG by end 2026

- **VN Export: ADO 19% / ADG 23%**

Next steps:

- Acquisition:
  - Focus on targeted Raya sellers and mall/managed seller repitching with revised onboarding incentives
  - Exploring digital RM bot to consolidate pitching progress for RMs to push acquisition
- ADO/Seller Investment/SKU Effi:
  - Upsized Raya exposure in Feb/Mar
  - Global wallet rollout (Mar-Apr) to simplify ads investment
  - Seller voucher sync (Apr-May) to replicate local vouchers for Direct shops

Program P&L - all sellers [Jan full-month]: MP + SLS P&L -2.8% / -$302K, driven by -$324k MP PC2 primarily due to 3-month comms waivers to new sellers; SLS P&L +$22k

Despite small amount, MP PC2 is negative in MY and TH for sellers no longer enjoying 3-month comms waivers - which is counter-intuitive

Deep-dive analysis on root-causes on next slide to make sure no system / design issue

[Deep-dive] MY/TH -ve MP PC2 for mature sellers: No program design/system issue; MY likely due to Direct selling high ABS ($15.1) enjoying higher platform voucher; TH high PRM consistent with CNCB 3P SLS

Drivers of negative mature seller P&L – MY & TH

MY

- MP PC2 UE: -$0.37 for Direct selling, +$0.20 for CNCB 3P SLS
- Observation: MP PRM is higher than take rate for Direct selling ($3.45 PRM vs $3.39 takerate) but lower for CNCB 3P SLS ($2.20 PRM vs $2.50 takerate)
- Reasons: 1) Direct selling higher ABS than CNCB 3P SLS ($15.1 vs $9.3) qualify for more platform-sponsored vouchers targeting higher ABS and higher voucher value; 2) Direct selling takerate can be under-stated pending data fix
- Conclusion: No program design/ system issue; Direct selling orders enjoy higher platform voucher support due to its highest ABS among current CB business models

TH

- MP PC2 UE: -$2.57 for Direct selling, -$0.20 for CNCB 3P SLS
- Observation: MP PRM is higher than take rate for both Direct selling ($5.32 PRM vs $3.05 takerate) and CNCB 3P SLS ($2.27 PRM vs $2.24 takerate)
- Conclusion: No program design/ system issue; higher platform PRM consistent between Direct selling and CNCB 3P SLS

[Recap] Direct selling FY26 regional focus: 1) expanding network; 2) strengthen program infrastructure and design; 3) drive regional commercial growth levers; 4) tighten regional ops policy and seller ops quality

	Pillar	Key initiatives	PIC	
Expand network and improve system	Launch new direct selling lanes	• Launch TW import, PH export, TW export lanes • Launch Direct to AME lanes (IDBN Direct, etc)	Jill	
	Build system infrastructure	• Build global wallet to enable payment details, ads top-up via escrow • Enable seller voucher replication from local shop to direct shops • Build seller apps, so that sellers can operate direct shop chats and logistics on app	Jill, Jiayi	
Drive cross-lane optimization (commercial)	Enhance seller acquisition	• Formulate repitching plan to onboard priority Mall/managed local sellers • Automate RM process to simplify pitching and onboarding process • Leverage ERP Resource for acqusition	Zhang Yu	**Summary on slide 23-24**
	Improve SKU migration	• Improve SKU migration efficiency by removing system/ops blockers • Remove listing limits/constraints due to policy difference between local markets and overseas markets	Qiang Wei	
	Push seller investment	• Propose and drive regional initiatives to improve NPC • Propose and drive regional initiatives on higher seller investment (paid ads, seller vouchers, seller rebates, campaign participation)	Zhang Yu, Ailin	
Drive cross-lane optimization (ops and logistics)	Standardize ops policy and SOP	• Standardize and simplify Direct selling operations (mass pitching and seller onboarding, payment operations, shop ops, CS ops, fraud management)	Qiang Wei	**Summary on slide 25**
	Improve seller ops quality	• Monitor and drive improvement of ops metrics (CSAT, CRR, NFR, etc.)	Qiang Wei	
	Improve logistics efficiency	• Build BSC channels to SG to improve order conversion • Review RR/RTS design to return RR ownership back to sellers with scale	Zhi Ann, Jill	
Regional reporting	Track and report regional performance	• Coordinate target setting with import markets • Report and track commercial performance (topline, P&L) regionally	Zhang Yu, Zhi Ann	

Direct selling key initiatives [Seller acquisition]: Feb focus on 1) Raya push for ADO growth; 2) support local markets to simplify repitching of Mall/managed sellers; 3) explore ERP partnership

Key focus	Initiative	Update	PIC
Drive cross-lane optimization (commercial - seller acquisition)	**Raya push**	• **MY import:** secured 1) 5 additional daily CFS slots; 2) microsite exposure; 3) upsized seed program for 10 focused Raya sellers 4) Deals sourcing from direct sellers for Raya related assortment in joint push with ID team • **SG import:** secured 1) upsized seed program to include 10 MF/modest wear sellers; 2) 5 additional daily CFS slots; 3) microsite exposure; 4) livestream package support 5) co-share voucher support to increase voucher participation • **Overall Raya target (MY+SG):** Direct target 22K ADO, +440% YoY; SIP+direct combined target 112K ADO, +19% YoY	Ailin
	Improve acquisition - **Mass** pitching	• **ERP Acquisition:** in progress of retrieving data of top ERP vendors for each region; target to work with local Biz/Product/BD team to start connecting with vendors for acquisition plan discussion next week • **SG/MY Export:** resume mass whitelist from 9 Feb • **VN Export:** pending 1st batch shop to successfully offboard to resume mass pitching, target to resume from 23 Feb • **ID Export:** resume mass pitching in Feb as planned (paused in Jan to focus on existing seller support) • **Other export lanes:** on-going mass pitching with weekly mass pop-up	Jill
	Improve acquisition - **Mall/managed seller** pitching	• **Progress:** pitched 15% local mall sellers, 41% success rate • **Feb focus:** prioritize eligible mall sellers who are not yet pitched or non-response from round 1 pitching • **Next steps:** 1) ID SMT to pitch 250 SG/MY priority Raya sellers for Feb acquisition; 2) sense-checking with local team on redistribution of onboarding incentives to better attract mall sellers (ETA Feb 10) • **[AI initiative]** Reg SIP + CBBI in progress of creating a Bot for local cluster leads in each export market, to share weekly update on RM pitching progress, and reminder to chase RM to update pitching outcomes	Joanne
	Improve acquisition - **Seller education**	• Collect **A-market category bible** from each import market, ETA mid-Feb • Consolidate **marketing tool training materials** • Prepare **seller seminar rollout**	Joanne
	Improve **SKU migration** efficiency	• **Issue resolved:** For unlisted SKUs due to missing mandatory attribute, enhancement to sync LLM's recommended input to direct SKUs 100% greyscale rollout on 26 Dec • **Impact:** successfully resynced 1M SKUs • **Next steps:** add more attributes for auto-input, ETA Feb 10	Emily

Direct selling key initiatives [Seller investment]: Global wallet on track to roll-out in Mar to simplify paid ads top-up; Seller voucher sync feature on track to launch in Q1

Key focus	Initiative	Update	PIC
Drive cross-lane optimization (commercial - seller investment)	Improve seller **ads** investment	• **Quick Win - Escrow top-up:** open to all Direct shops with SEH article to allow seller to top-up paid ads easily • **On-track - Shope Balance top-up:** VN/ID/PH export in Mar, MY Export in Apr • Next step: design the top-up/set-up mechanism to **maximize ads ROI**	Jill
	Improve seller **voucher** investment	• BRD finalized, pending sign off from Local next week Q1 launch on track	Jill

	Improve **NPC**	• **NPC analysis preliminary findings:**
		  ○ 63% MY import SKUs are price competitive contributing to 80% ADO, with higher SKU efficiency at 0.44% vs non-price competitive SKUs at 0.19%
		  ○ IDMY has more price competitive SKUs vs VNMY (69% vs 51%)
		• **Next steps:** deep dive category level and SKU level to understand price gap reasons & improvement areas
