Highlights

Seller standalone P&L: $717K,

- **Exceed target by +$43K** due to topline outperformance driving higher p&l surplus from 2% waiver (set aside)

  a. Feb'26 having less days
  b. Jan'26 additional surplus no longer set aside in Feb (327K)

- **Unit economics**: -$0.10/order MoM, driven by lower ABS from higher order volume.

Total P&L: $3.1M,

- **-$0.4M MoM** mainly due to
  a. Seller P&L **-$521K** as mentioned above
  b. SLS P&L **-$41K** from lower gross orders (less days in Feb'26), UE stable
  c. MP PC2 **+$189K** driven by higher take rate from topline outperformance.

2) CNSIP P&L [Feb EoM]: Seller P&L +$73k, -4k behind target due to drop in topline due to CNY impact; Total P&L +$419k, -$131k MoM driven by weaker topline lowering SLS P&L, cushioned by Seller P&L improve

Highlights

Seller P&L: +$73k, -$4k vs target; +$88k MoM

- **-$4k vs target**; due to lower topline from CNY impact lowering the absolute P&L in dollar terms.
- **+$88k MoM** driven by 2 issues in Jan now resolved in Feb 1) one-time system issue to set up 2% comms rebate ($41k); 2) AR P&L loss due to seller input wrong weight leading to wrong shipping cost markup ($40k)

Total P&L: $419k, -$131k MoM mainly driven by

- SLS P&L **-$242k** from lower topline (UE -$0.07) mainly driven by change in G2N ratio due to CNY impact;
  Partially offset by
- MP PC2 **+$23k** from lower topline as MP UE is negative;
- Seller P&L **+88k** as mentioned above

3) Swarm P&L [Feb EoM]: Seller P&L -$89k; Total P&L -$77k; both seller and total P&L loss narrowing MoM with UE improvement (+$0.75 for seller P&L UE, +$0.67 for total P&L UE)

Highlights

Seller P&L: -$89k, +$75k vs target, +$214k MoM; UE -$1.19, +$0.75 MoM

- **+75k vs target** mainly due to revise business strategy to improve UE and overall P&L by factoring CNY impact for EoM projections.
- **Actions taken to improve UE:** raised prices on 12th Feb, restoring both OF SKUs and non-OF matures SKUs to P&L breakeven.

Total P&L: -$77k, +$190k MoM, UE +$0.67 MoM

- **+$190k MoM, UE +$0.67** driven by 1) **+$215k** seller P&L as mentioned above; 2) MP PC2 **-$8k** from lower MP revenue due to reduced topline; 3) SLS P&L **-$17k** from mainly driven by lower ADO despite SLS UE maintained.

Performance

- **ID Export:** Performance missing target due to ID SPX capacity issue; high backlog for campaign load causing SIP First Mile LT to increase by 2 days, with ID local LT increase by 3-4 days. ID SPX has revised the routing for SIP parcels and expect the performance to recover from 3rd week of Feb
- **IDMY 93% RR, +0.6 days MoM:** missing target due to Linehaul LT delay for 1-2 days for West Malaysia terminal capacity issue, target to recover after 14 Feb
- **IDPH 98% RR, +0.1 days MoM:** missing target due to Linehaul LT delay for 1 day for continuous offload. Vendor has changed the transit port to mitigate the issue. Expect the performance to be stabilized after 14 Feb
- **VNPH 97% RR, +0.5 days MoM:** Linehaul lead time increase by 1 day due to offloads from increasing passenger luggage, vendor has secured the space for backlog clearance. Expect to recover by 14 Feb
- **VNTH 100% RR, +0.5 days MoM:** LT affected by 1 long-tailed shipment (15% of MTD delivered orders) which stuck at custom for inspection for 6-7 days in Jan due to weapon-like parcels. One time issue which shipment OB in Feb having Linehaul LT within target (3.5 days)

Highlights

1. **Agent Performance:** All metrics met target in L4W
   - DSAT increased on 5-7 Feb due to stuck IDSG orders caused by flood in ID
2. **Chatbot performance fluctuations expected and caused by low CSAT from old chatbot and low DR from new chatbot**
   - New chatbot adoption: 30% of IDSG shopchat vol; 50% of non-IDSG shopchat vol; adoption % based on agent capacity
   - Chatbot CSAT slightly declined over the past week due to fewer good CSAT responses, while bad CSAT remained stable and largely attributable to the old chatbot
   - Shop CSAT miss target driven by low Chatbot CSAT
   - Next steps to improve new Chatbot DR by enhancing listing quality, and optimizing backend solution - image translation enhancement feature is under development; once new Chatbot DR improved, increase new chatbot adoption to uplift CSAT

CS - MY import: All agent performance metrics met target in L4W; Chat Deflection Rate miss target due to new chatbot rollout; next to focus on Agent CR uplift and Chatbot DR improvement
