KRJP Cross Border Bi-weekly Sync

5 Mar 2026

Previous Meeting Follow Up

No.	Topic	Action Items	Updates	PIC
1	Topline	1. Review PnL EoM logic (re-check targets for CIR)	• Previously deviation mainly due to CB fp&a manual adjustments done for unexpected local adjustment not communicated to KRJP with communication gap • Built up the sync process with CB fp&a to incorporate these adjustments timely going forward and we are working on simulation to standardize a process translating CB adjustment into KRJP p&l	Ray /Taeksoo /Haenle
2	LFF	1. LFF target setting for all markets 2. Share conversion benchmark CN	Covered in this week's meeting.	Joanne/Dabin
3	KPI	1. Align metrics and weightage across SMT teams 2. Remove seller graduation # and increase weightage for LFF/NPC	Shared through email thread on Feb 25	Ray
4	Counter CP	1. Coupang brand expansion to other markets 2. Assortment completeness	Covered in this week's meeting.	Ray/Jaeeun

KRJP Bi-weekly agenda

1. **Overall Performance**
   - P&L performance
   - KRJP LFF ADO and LFF% Monthly Actuals
   - Campaign participation
   - New seller acquisition progress

2. **For Discussion**
   - JP performance diagnosis and action plan
   - KR 2026 LFF target
   - KR SIP target and roll-out timeline

3. **For Updates**
   - Counter Coupang update

P&L Performance

KRJP Feb Topline : KRJP Feb: Demand beat target (ADO RR ~114%, ADG RR ~113%) but profitability was pressured by PRM shortfall (~-$0.6m) and CIR% above target (KR +0.27%p, JP +1.19%p).

Key Highlights

KRJP Topline : KRJP Feb topline started strong with combined ADO RR 114%, ADG RR 113%, growing faster vs. PLT (Feb YoY +0.3%p, Ytd YoY +1.35%p for ADG) *- pg 6*

- KR ADO RR119% (MoM -1%)
  - total MoM is -1% comes from VN (-10.5%), partially offset by MY (+7.1%), TW (+2.5%), SG (+0.9%), and TH (+2.4%).
- JP ADO RR 93% (MoM -14%) [details in discussion topic 1]

KRJP MP PC2 + SLS PnL: KRJP PnL RR 108%(+$0.16mil)

- KRJP SLS PnL (+$0.32mil) and JP PC2(+$0.17mil) exceeded the target and covered KR PC2 short of target (-$0.3mil) due to -$0.9 mil of PRM gap
- PRM side, KRJP missed the target by -$0.6mil (-$0.9mil by KR, +$0.3mil by JP) but CIR% target exceeded by 0.36%p due to GMV outgrowth PRM increase (KR CIR% +0.27p%, JP CIR% +1.19%p vs.Target)
  - KRJP PRM spending was sharply lifted on Feb 2 but turned sluggish after mid-month, led to meet CIR% target.
- KRJP PnL PPO exceeded the target by 21% (+$0.17). The variance was driven by increases in heavy-weight items in SG (0.409 vs. 0.145, +283%) and TW (0.497 vs. 0.144, +345%)

Key Highlights

1. Feb KRJP FBS ADO closed on track, closing with MoM 11% vs. 3PF ADO -17%
   a. FBS ADO MoM uplift was mainly driven from TH higher new SKU CVR% after SLS D&T price markup
   b. 3PF ADO dropped from one-off reasons 1) postponed VN UST seller onboarding (e.g. Tirtir proj. ADO 0.7k) due to delay in license registration (ETA shifted from Feb to Mar) 2) Dalba's ADO 1.4k loss from OOS due to local CC delay, so expecting immediate recovery in Mar
2. Feb EoM Blackstock showing downward trend with 22% (MoM -2%p, still 7%p higher vs. target), but expecting manageable levels of BS% by Mar through 1) seller RTS and 2) WH clearance campaigns

Key Highlights

1. **Feb EoM LFF ADO is 20k (RR 114%, MoM flat)** from MY ADO MoM 17% growth with new seller onboarding and TH ADO MoM 8% growth from new SKU inbound after D&T price markup
2. **Feb EoM LFF% slightly miss target with RR 97% (36%, MoM flat)**, gap mainly from VN (RR 74%) and PH (RR 97%)
   a. VN: expecting immediate recovery in Mar with new seller onboarding and OOS replenishment
   b. PH: expecting to meet Mar target with new seller onboarding through air consol, offsetting Feb target gap driven from sellers' tentative focus on SLS due to 1) long license acquisition timeline required for beauty device(Pcalm, 38% of RR gap) 2) clearance campaign of existing SLS stock(Dalba, 62% of RR gap)
3. **Feb Blackstock Qty% 22%** (MoM -3%p) mainly coming from MY top sellers' GWP inbound, planned to use for upcoming campaigns in Q1. Other markets on track

Notes:

1. *LFF targets are aligned only to LFF%, so when KRMP ADO target changes, LFF ADO target can fluctuate and result in unusually high RR (e.g. TH LFF ADO RR 160% this month)*

Campaign Participation

[KRJP Campaign Participation Performance Overview] KR shows slight regression in SG SSV, MY LTD and TW Seller Voucher due to key beauty brand missing deadline and no seller response; JP shows overall drop in all campaigns due to Customs Clearance delay issue.

New Sellers

[2026 KRSA PLT/Retailer Onboarding Progress] 2 PLT confirmed to onboard with 75 Beauty brands(not yet onboarded to SHP) rounding up to 6.3K C2C ADO oppty and in discussion of benefits/commitment

Key Highlights

1. 2 platforms provide brand lists that can be onboarded to SHP, totaling 6.3K C2C ADO (excluding SMT-managed brands; incremental upside remains from exclusive SKUs held by the platforms)
   - 13/75 brands overlapping with counter CP Brands(including F&B and FA) yet minimal ADO impact(2% of counter CP Brands' total TW PLT ADO)
   - (on-going w/ proj) discuss benefits we can provide to platforms as part of strategic relationships, such as commission discounts, dedicated brand pages, etc.
2. 2 other PLT(incl Musinsa Beauty, P0 priority) scheduled for kick off meeting this week

List of platforms in current SA pipeline

#	Name	Platform Overview	Biz model	Cat.	Priority	Status	Progress details
1	Olive Young*	Korea's No.1 beauty & health platform with unmatched online–offline reach	1P + PB	Beauty	P0	Rejected	Ready for CB selling model, but mgmt decided to focus on their B2C directly via D2C online mall
2	Musinsa	Originally Korea's top fashion platform, now rapidly scaling Musinsa Beauty as a strategic growth category	MP + 1P + PB	FA + Beauty	P0	Kick off meeting scheduled	Kick off meeting on 3/6
3	Daiso*	A value-focused lifestyle retailer where beauty drives frequent visits and impulse purchases.	1P + PB	All	P0	Attempting to Contact	Contacted and waiting for their response
4	Hwahae	Korea's most trusted beauty ingredient and review-based discovery platform targeting ingredient-conscious consumers.	MP + 1P + PB (Partial)	Beauty	P1	Confirmed to Onboard	- Requesting strategic partnership, with benefit of Hwahae dedicated exposure, commission benefits, etc. - **C2C ADO 4K from 30 brands**
5	Kurly*	A premium grocery-first platform that has expanded into beauty and wellness as daily essentials.	1P + PB(Partial) + MP(Partial)	F&B + Beauty	P1	In Discussion	Kick off meeting TBC
6	ZIGZAG	A leading women's fashion aggregation app increasingly extending into beauty to expand baskets.	MP + platform-managed 3PL	FA + Beauty	P1	Kick off meeting scheduled	Kick off meeting on 3/5
7	ABLY	A mobile-first style commerce platform leveraging personalization to scale beauty, targeting 20s female users	MP + platform-managed 3PL + Partial 1P	FA + Beauty	P1	In Discussion	- Want to onboard FA only, mainly DDM FA sellers who's using their WH - Internally reviewing
8	W Concept	A designer-focused fashion platform extending curated taste into beauty, positioning premium fashion platform	Curated MP (3P, consignment-style)	FA + Beauty	P2	In Discussion	- Interested in SEA but need to direct purchase and want more support from SHP (1P cost sharing, commission benefits, etc.) - Potential brand list to be shared by early Mar
9	Prika*	A newly launched global beauty platform connecting brands, creators, and cross-border distribution	1P	Beauty	P2	Onboarded	- Operation is getting delayed due to their offline pop-up in mid Mar - Reviewing NSP
10	Off beauty*	Korea's first urban beauty off-price outlet, operating warehouse-style offline stores that offer a wide range of products at deep discounts	1P + PB	Beauty	P2	Confirmed to Onboard	(To update by today) - Onboarding date targeting late Mar - **C2C ADO 2.3K from 45 brands**

1

- In pipeline/discussion
- Meeting scheduled
- Confirm to onboard
- Onboarded

Notes:

- ** indicates retailer*
- *C2C ADO from Local + CB orders from items with the brand name in the brand name attribute*
- *Priority based on platforms' online domestic revenue + online SKU #*

[2026 KRSA Brand Onboarding Progress] Following up on 7 brands with ~1.1K potential ADO (onboarding & NSP), and 11 counter CP brands with 0.4K potential ADO newly added to our pipeline

Key Highlights

- Two P0 brands confirmed joining NSP, pushing for 4 high priority 'in discussion' brands for onboarding
- Counter CP: Two confirmed to onboarding(*same content as pg 50)* - 6 more scheduling and expecting more from 'internal reviewing' brands

List of brands in current SA pipeline

In pipeline (P0, P1 Only)									
#	Brand	Source	Cat	Priority	PLT ADO	Status	Onboarding date	Details	Next steps
1	FILLIMILLI	Crawling_OY,Wishilist_TW	Beauty	P0	267	In pipeline	n/a	Onboarding will be planned after the operations of existing OY PB brands (Wakemake, BOH) are stabilized	Onboarding ETA is H1

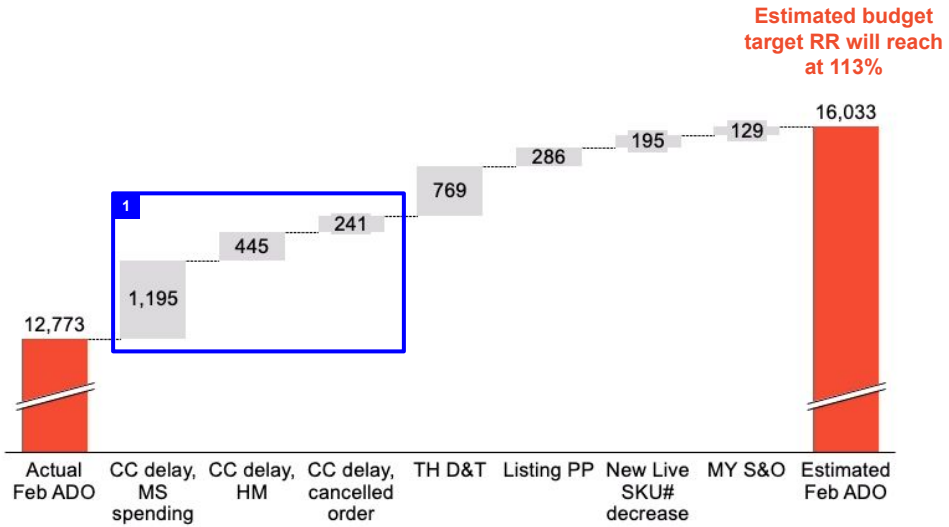
Key Highlights

1 JPCB 26 Jan achieved target at ADO RR 108%, among which TH ADO RR only at 67% due to TH tax impact (Jan ADO loss -666).

- **[Deep dive on the next page] However, JPCB 26 Feb declined across all markets with negative MoM -14% and RR only at 93%**

[Diagnosis] Five key reasons caused the decline, with CC delay contributed the most at 63%, followed by TH D&T impact at 26%. Target RR will hit 113% without the systematic impacts

Chart: Waterfall of JPCB Feb actual ADO and ADO loss caused by systematic impact



Calculation logic:
[1] Additional new live SKU ADO: calculated by #new SKU cadence following FY 25 pattern * Feb 26 SKU effi across markets, JPCB started BR since Feb 25, thus using SEA markets average as proxy
[2] CC delay MS spending: calculated by [Jan 26 MS/GP *(1+ LY Feb vs Jan MS/GP MoM) * Feb 26 GP # - Feb 26 MS actual] * MS ROAs
[2] CC delay HM: Holiday Mode shop ADO in Feb 26 vs ADO for the same group of shops in Feb 25
[3] CC delay cancelled order: Feb 26 seller cancelled order due to longer waiting time
[4] TH D&T impact: the gap between projected ADO vs actual ADO, cross check with FPA data
[5] Listing PP: shops ADO loss caused by listing PP (major in PH and TW) in Feb
[5] MY S&O: calculated by Jan 26 S&O *(1+ LY Feb vs Jan S&O MoM) - Feb 26 S&O actual

Key Assumptions

- Adding up Feb actual ADO 12.8k and potential loss caused by systematic reasons, we reach the Feb projected target at 16.0k, with budget target RR at 113%
- 1 **[Deep dive on next pages] CC delay lead to majority ADO drop, including**
  - MS spending decrease contributes the most, with **ADO impact at 1.2k.** The drop is **concentrated in big sellers** with top 10 sellers accounting for 94% of MS spending drop in Feb
  - Holiday mode shop **ADO impact at 445**, mainly for MT/LT sellers switched on HM due to CC delay
  - Seller direct canceled order ADO due to longer waiting time**, ADO impact at 241**
- **TH duty impact:** as TH announced additional SLS tax since Jan, TH Feb order gradually impacted, **with ADO drop at estimated 769. Next step** is to switch to a new vendor since Q2 which can have a 30% discount on the tax ratio
- **Listing PP:** sellers get heavy PP with items violated FDA in PH and violated EL licensed requirements in TW, which caused **ADO impact at 286**
- **[Deep dive on next pages] Additional New SKUs ADO impact at 195,** mostly contributed by existing GP listing less new SKUs in 2026 comparing with 2025
- **MY S&O seasonality:** MY rainy season longer and heavier than last year, with seasonality fishing category **ADO impact at 129,** to be recovered this month

[JP Shipment Delay] Direct impact of SHP vendor's tightened JP Export Customs Clearance caused delivery delay is 4.78% of JP order(for buyer cancelled orders only), actively sourcing new LH+CC vendor and aim to go-live in Q3

Key Highlights

- **Background:** JPCB experiencing shipment delay due to heightened inspection during export customs clearance, resulting in +2~6 days increase in BWT vs BAU. Generally, all shippers are subject to export customs clearance inspection but SHP's situation worsened because ;
  - SHP vendor flagged by the JP gov't for import business non-compliance, resulting in increased scrutiny of its export shipments
  - Discrepancy between shipment manifest documents vs. actual item in parcel during inspection -> lead time increased to provide add'l docs (eg Country of Origin, Ingredients List, JAN CODE)
  - Increased lead time between transit warehouse and line haul handover due to vendor allocating shipments to 3rd party bonded warehouses to handle JP's export clearance
- **Impact:** (Order Placed Jan 27~Feb 25) Direct impact of buyer cancellation from CC delay is 4.78% of JPCB order (1157% increase vs BAU) - *pg 24*
- **Actions taken by SHP**
  1. Extended EDD/EDT to manage buyer/seller experience
  2. Seller comms on delay and compensation
  3. New line haul + CC vendor shortlisting and sourcing
- **Product Support Needed:** 1) Add new product attributes in product listing (Country of origin/manufacturing country, JAN CODE, main ingredients), 2) 3PL portal reform (Add HSCODE mapped to category attribute, Country of Origin, JAN CODE, main ingredients list)
- **Next Steps:** 1) New LH+CC vendor sourcing, realistic timeline for phased transition to start Q3 2) legal checking to officially request compensation to vendor (by right we should be able to cover the compensation cost paid to sellers) and 3) Expedite on the seller compensation (especially for those impacted with longer delivery time) on order/seller level aiming 3~4 weeks (vs. 2~3 months BAU) - *pg 27*

	Jan 23/Feb 2	Feb 5	Feb 11	Feb 13	Feb 26	Mar 4	Today	End of Mar	Q3 onwards
LH+CC Vendor Comms <> SHP	Notified twice from vendor on possible delay from CC tightening starting early Feb resulting in a 1 day delay(inspection to end mid-Feb)	SHP requested a full root cause summary of export customs inspection and shipment delay	Vendor failed to meet operational requirements (pre-alerts, sufficient manifest data)						
1 SHP (Buyer facing)			Extended EDD by 10 days in all markets		Extended EDD/EDT by 10 days in all markets				
2 SHP (Seller facing)				1st seller comm - shipment delay(incl Compensation)		2nd seller comm - shipment delay(incl Compensation)		Complete compensation for Key sellers	
3 SHP (Internal)			SHP started shortlisting new vendors			New vendors meeting w/ RFQ			New vendors go-live (w/API integ)

Private & Confidential

[JP Shipment Delay - Appendix] Buyer Order Cancellation from Shipment Delay

Key Highlights

1 **Impact:** (Orders placed Jan 27~Feb 25) : Direct impact of buyer cancellation from CC delay is 241 ADO (2.44% of overall JPCB) and there is clear market level discrepancy(e.g. MY 10% of total MY order impacted vs. SG of 3.47%) as the inspection is done by manifest level(which is based on market)

- 2 And buyer order cancellation peaked from Jan 31-Feb 10 at 4.78% of orders during the given period (1153% increase vs BAU)
- Starting Feb 11, buyer order cancellations returned to normal after extending EDD and buyers had expectation matching to realistic delivery timeline

Buyer Order Cancellation Impact Pertaining to the Delivery Delay

Date	Type	Total ADO	% of Cancelled Order (ADO)							
			Total	BR	MY	PH	SG	TH	TW	VN

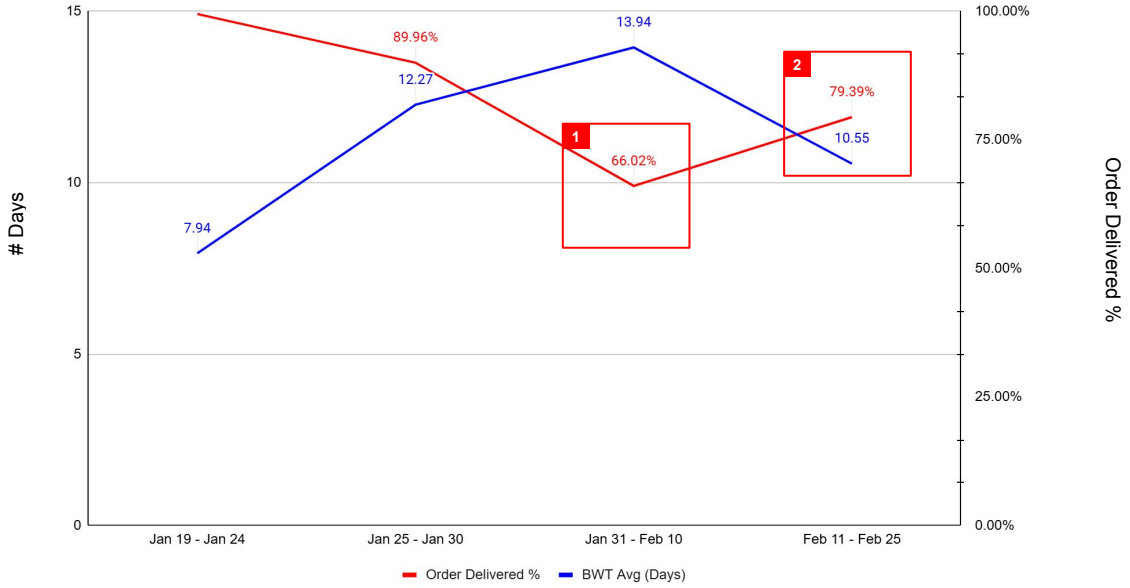
[JP Shipment Delay] Too early to say whether we are in recovery trend in both Order Delivery Trend and Average Buyer Wait Time (Jan 27 - Feb 25 Placed Orders) due to volatile situation of our vendor

Key Highlights

- In general, still too early to diagnose whether we are in a clear recovery trajectory towards BAU in terms of both 1) order delivery %(=clearing %) and 2) BWT as the situation of our vendor is too ambiguous
  - Order delivery %(=orders are being cleared from CC) lowest for week of 1 Jan 31 - Feb 10 (66%) and slightly improving in week of 2 Feb 11 - Feb 25 (79%)
  - BWT in the downward trend

Order Delivery Trend and Average Buyer Weight Time



Notes:
Orders include
1) *Orders placed Jan 27 - Feb 25*
2) *JP TWS WH Inbounded orders only*
3) *Buyer cancelled orders removed*
4) *Orders with EDD <= Feb 25*
5) *All data points as of Feb 25*

[JP Shipment Delay - Appendix] Impact to Buyer Wait Time

Key Highlights

1 **Impact (Data limited to orders delivery completed to buyers only):** BWT increased up to 6 days vs BAU for orders placed Jan 31 - Feb 10, with up to 8 days increase BWT in MY and PH markets

2 Buyer wait time improved slightly starting Feb 11 - Feb 25 orders (+2.6 days vs BAU)

BWT Impact Pertaining to the Delivery Delay

Order Placed Date	Type	Buyer Wait Time (Days)							
		Avg	BR	MY	PH	SG	TH	TW	VN

[JP Shipment Delay] Meanwhile, we are planning active mgmt on the seller sentiment focusing on seller compensation in both amount and payout schedule for key sellers

Key Highlights

1. Key Seller Target Group : aim to actively manage seller sentiment and loosen the cashflow pressure via 1) expediting compensation cycle and 2) compensating 100% of COGs pertaining to delay buyer cancellation reason code
   - Criteria of Key seller Target Group is top 50% of compensation amount, total top 32 sellers
   - Impact: 6.8K orders qualify for SHP seller compensation, totaling USD 273K
- Rest of the Group : cap the compensation amount to 50% of COGs and follow the BAU payoute criteria and cycle
  - Yet, if the buyer submit compliant(via official CS channel) compensate up to 100%
- Based on current agreement with vendor, we have sufficient grounds to cover the seller compensation amount but pending confirmation from legal

	Compensation Cap (% of COGs, $)	Compensation Eligibility	Compensation Type	Compensation Method	Timeline
1 ***Actively manage seller sentiment*** Key Seller Target Group	**100% (up to 150 USD)**	Buyer Cancelled order (limiting to reason code pertaining to delay only)	Active	50% of COGs (system) 50% of COGs (manual)	**By end of Mar** (~ 3 weeks)
Rest	**50% (up to 150 USD)**	Buyer Cancelled order (limiting to reason code pertaining to delay only)	SLS+ (insurance program)	50% of COGs (system)	By end of Q2 (~3 months)

[JP Shipment Delay - Appendix] Key Seller Target Group List

Key Highlights

- Compensation eligibility: Within the Cancelled orders with 5 reason code pertaining to delivery delay, meet either of below
  1) Delivery time to buyer exceeds EDD or
  2) EDD passed and order not yet delivered to buyer

	GP Name	Total Seller Compensation Amount (USD)	Count of Buyer Order Cancelled	% of Total	Cumulative % to Total

[1] GP count for total = aggregate GP count in all the markets, not remove duplication for GP operating in multiple markets
[2] TW new SKU count comparison already removed 25Q1 fraud shops

Key Highlights

1. **#New SKU/GP drop across the markets except BR, mainly caused by new SKU / GP drop for both new GP and existing GP**
   - #New SKU/GP drop at 89 for new GP and 136 for existing GP

- **Next step: 1) launch SSP for JPCB** sellers and push existing sellers to upload more #new SKUs **(ETA Mar 2026);** 2) aligned again with BPM to develop JPCB Seller Center, so that sellers can upload new SKUs and replicate to more markets easily (ETA pending)

[JP #new SKU drop - Appendix] Existing #New SKU/GP drop is mainly contributed by existing shops new SKU pacing down. Will launch SSP since March to further drive

[C] ADO Budget after Impact	10,677	12,809	15,292	17,x727	13,790
[D] YoY vs '25 Actual	11%	7%	25%	25%	19%
[C] - [A]	-3,520	-2,142	-789	-677	-1,606
[D]/[B] -1 1	-37%p	-18%p	-6%p	-5%p	-14%p

Annualized ADO impact by causes

Causes		Q1	Q2	Q3	Q4	Total
Total		-3,520	-2,142	-789	-677	-1606
Customs Clearance Delay	Sub-total	-2,236	-1,135	0	0	-707
	MS Spending	-898	-168	0	0	-274
	Extended EDT	-1,003	-968	0	0	-325
	HM Mode	-336	0	0	0	-90
	Cancelled Order	0	0	0	0	-18
TH D&T Impact (ADO)		-814	-825	-622	-634	-696
Decreased New SKUs/GP		-183	-182	-168	-43	-147
Seasonality		0	0	0	0	-9
Penalty Points		-286	0	0	0	-46

Key Assumptions

1 The [D] budget after impact YoY vs [B] initial budget YoY is **at -14%p.**
- The gap between [D] budget after impact YoY vs. [B] initial budget YoY will be wider until Q2 and gradually to be closed < 6%p since Q3.

- All the impacts except for TH D&T and New SKU are expected to be fully resolved by Q2.
  - CC delay >> expected to be fully resolved with expected line-haul and CC vendor switch by Q2
  - D&T impact >> partially recovers in H2 with new vendor expected 30% tax discount
  - New sku >> expected to gradually recover with JP SSP drive
  - Others >> expected to phase out by Q1 due to temporary nature

[Action plan] To focus on stalize existing managed sellers, increase managed seller base, and strengthen new seller pipeline to drive recovery

Key Objective	Action Plans	PIC	ETA
Stabilize existing managed sellers (CC Impact Control and recovery)	***Top and heavily impacted sellers (top 32)***: a) 1-1 communication on compensation plan; b) expand SSP coverage to all; c) additional resource support from markets and customized growth/recovery roadmap - opportunity to tap on for enhanced seller partnership	Projects/KAM	Immediate – April
Increase managed seller base	Identify P3M ads active CS (unmanaged) sellers → 1 on 1 Pitch SSP → Selectively pick high-potential sellers to KAM management	Projects/KAM	Mid April
Strengthen new seller pipeline	Upcoming GR (Jetro webinar) + co-host Payoneer webinar for AMZ (early Q2) to secure additional pipeline.	JP SA	Late Mar~April
	Revamp p1 program and launch partner incentive program.	Projects/JP SA	~April
	Expand TTS partner outreach, touchbase CN seller communities.	JP SA	Within Q2

2026 KR LFF Target

[2026 KR LFF Target] Topics and Today's Focus Areas

#	Topics	Detail	Page
1	2026 LFF Target Proposal: Scenario Analysis	By Levers	36
2	...Market Deep Dive	By Market	37
3	...Addressable Pool and Conversion		38
4	...Seller Program Deep Dive	By Programs	39

Private & Confidential

[2026 LFF Target Proposal] For '26 LFF, we aim to reach yearly 53% LFF order penetration(vs '25 32%, '26 baseline 41%) with yearly 36k ADO which is 37% higher vs. baseline and 126% higher vs. '25

Key Highlights

1 In '26, KR LFF aims to reach yearly 36k ADO (53% LFF order penetration, 21%p higher vs. '25) growing **YoY 126% (51%p faster vs. CN LFF YoY 75%) by new LFF seller onboarding and existing LFF seller growth (LFF order growth and OOS improvement) by generating incremental of 9.7k ADO**

2 Will further gauge on possibility 2.5k incremental ADO when we onboard managed brands' unopened shops via LFF

Notes:

1. *'26 target LFF % includes all markets excluding TW, as TW is a new market and will add in target subsequently after pilot FBS shipment in April.*

[Appendix - 2026 LFF Target Proposal] In '26, KR aims 9.7k incremental LFF ADO led by VN (34%) and SG (25%) through new seller onboarding and existing seller growth

Key Highlights

1. In '26, KR aims to bring 9.7k incremental LFF ADO (which is equivalent to 45% of convertible SLS ADO - *next page*) ; 55% from existing LFF seller growth and 45% from new LFF seller onboarding
2. For market breakdown, incremental ADO is mainly driven from VN (34%) and SG (25%), followed by MY (14%), PH (14%), and TH (12%)
   a. VN is expected to generate 70% of increment from 24 new sellers onboarding through new license vendor sourcing to improve current long and complicated license registration process by 50% (6 → 3 months)
   b. SG is expected to generate 55% of increment from 39 existing managed brands growth, given the market's maturity and the limited pipeline of new sellers

'26 Scenario [2] LFF ADO by Levers X Market	Total	VN	SG	MY	PH	TH

[Addressable Pool and Conversion] KR aims to convert 45% of SLS addressable pool ADO to bring 9.7k LFF target incremental ADO

Key Highlights

1. '26 FY SLS addressable pool ADO stands at 21k excluding non-addressable factors(Regulatory constraints / SHP WH ops, cost constraints / Low potential) and we aim to convert 45% of this ADO to deliver 9.7k incremental LFF ADO
2. VN/SG also has the highest addressable pool, which also translates to high LFF target increment
3. Based on total addressable pool, KR is targeting higher CVR across most markets vs. CN as LFF delivers higher uplift in KR when sellers convert from SLS to LFF. Thus, KR will push LFF more aggressively vs. CN as it holds greater strategic importance
   a. In addition to LFF increment impact, KR also outperforms CN on an overall basis comparing [H] vs. [L]

KRCB Addressable pool and target SLS to LFF conversion

[LFF Seller Program] To drive 9.7k incremental LFF ADO, we will operate 4 programs, aligned with the seller LFF growth journey and cover both order growth and preventing order leakage

Key Highlights

1. To bring 9.7k incremental LFF ADO, we will operate 4 seller programs covering different stages along the seller's LFF growth journey and will be initiated from both Reg and KR
   a. 3 Reg programs rolled out sequentially in line with the seller growth journey: New seller program for all new sellers, Pene% increase program for high potential existing sellers, and VIP program for selected existing sellers with high LFF%
   b. 1 KR program has been designed to improve OOS of VIP program sellers and will be conducted through 1:1 weekly seller push for replenishment
2. We expect to achieve LFF ADO uplift through each LFF seller program, primarily driven by new seller program (45% of total uplift), followed by pene% increase program (28%), VIP program (25%), and OOS replenishment push program (2%).

LFF Seller Programs Breakdown by Target / Push Type / Initiator

Target Seller Type		Type	Reg Initiated Seller Programs	KR Initiated Seller Programs	Incremental ADO impact	Eligible ADO Coverage
New LFF Seller	[a] Onboard managed brands' LFF	Order Growth	1 [A] New seller program		2 4,369	45%
	[b] Onboard managed brands' unopened shops via LFF					
	[c] Onboard unmanaged brands LFF					
Existing LFF Seller	[d] Increase managed brands' LFF order penetration		[B] Pene% increase program		2,699	28%
			[C] VIP program		2,411	25%
	[e] Improve VIP LFF sellers' OOS	Order Leakage Prevention	-	[D] OOS replenishment push program	225	2%
Total					9,704	100%

Notes:

1. *'26 LFF seller incentive programs are streamlined into three programs aligned with seller maturity and FBS penetration levels to drive acquisition, penetration, and growth:*
   a. *New seller program(new LFF seller): supports new-to-LFF sellers with entry incentives (free trial and shipping discounts) to accelerate onboarding and acquisition.*
   b. *Pene% increase program(existing LFF seller): drives FBS adoption among low-penetration sellers through quarterly ADO% uplift targets, with WH fee discounts as performance incentives.*
   c. *VIP program(existing LFF seller): encourages aggressive ADO growth and FBS site expansion among top sellers through commission and ads rebates tied to stretch targets.*

KR SIP target and roll-out timeline

[KRJP 26 Growth Levers] While we are still exploring additional opportunities, it's clear that we'll focus on optimize infrastructure, drive fundamentals, faimiltate seller movement, and go local be local.

Focus Areas	Levers	Details
Optimize Infrastructure	Optimize OKR setting	• Ensure ambitious targets that align with platform directions with clear tracking to guide growth
	Optimize RM KPI setting	• Connect seller and RM actions to overall business target • Ensure easiness of execution, clarity in understanding, and proper incentivization of RM actions
Drive fundamental	Content push and MS ramp up	• Benchmark top brands managed by CNCB and RBP to see the space to grow and develop content focus program to better push
Facilitate seller movement	KR SIP for assortment expansion	• Leverage SIP to enable KR sellers to expand all SKUs across the markets with no additional efforts and cost Deep dive
	Category expansion	• Grow non-beauty categories through targeted seller acquisition and assortment sourcing
Go local, be local	LFF push	• Increase new seller adoption by incorporation of local fulfillment in new seller program • Enhance penetration of adopted sellers with RVP and penetration drive program

[KR SIP Target] Estimated additional 1.6k ADO from KRSIP across the markets, with 6.0k ADO after SIP shop return to sellers

	...CS	0.17%	0.05%	0.07%	0.06%	0.11%	0.09%	0.07%	0.00%	0.07%
	...SMT	1.79%	0.69%	0.73%	0.71%	2.60%	0.47%	1.03%	0.02%	0.98%
	Total	0.68%	0.23%	0.28%	0.27%	0.83%	0.21%	0.34%	0.01%	0.34%
KR SIP ADO potential	...ICB + SA	0	0	0	0	0	0	0	0	0
	...PSP	0	11	28	34	33	6	2	0	115
	...CS	39	12	22	16	39	26	26	1	181
	...SMT	268	87	152	105	491	93	155	3	1,353
3	SIP ADO	308	111	202	154	563	125	183	4	1,649
	ADO after shop return	795	465	902	739	2,151	504	363	61	5,979

Key assumptions

1. **# SKU migration potential will be #3.9mn,** which is the gap between # eligible MT SKU and # SKU from direct shops in each market
2. **Total live SKU# after migration** will be at #394k, calculated by SKU migration potential * SIP acceptance rate * migration efficiency.
   - **SIP acceptance rate:** 64% for KR managed sellers based on seller survey and brand specific push; 10% for unmanaged sellers based on historical data
   - **Migration efficiency [2]:** 70% for KRSIP based on local SIP opt-in model historical data
3. **ADO uplift from SIP will be at 1.6k and 6.0k after shop return.** KRSIP SKU efficiency is assumed at 10-20% of self-run shop SKU efficiency based on CNSIP benchmark**, which will lead to 1.6k SIP ADO**. SIP will return good performing shops to sellers assuming ADO efficiency will be the same as self-run shop after return

[1] Eligible MT SKU: ICB/SA shops will not be eligible for SIP based on SIP rules
[2] Migration unsuccessful SKU including issues e.g. sync item fail, MTSKU has published MPSKU, listing limits, sync price failure, missing mandatory attribute, translation issues, etc.

Shopee Confidential

[KR SIP Timeline] KR and SIP team is working on KRSIP system optimization and legal alignment for pitching message, next step is to do mass seller pitching

Section	Detail	PIC	Status / ETA
KRSC Product	Enable KRSC to online SIP system to allow seller to proceed	BPM	Ongoing, ETA 31 Mar
Potential SIP GP and ADO to convert	Align with SIP team on SIP onboarding criteria and set KRSIP potential ADO target	KRCB project, SMT, SIP	Done
Seller comm legal alignment	Align with legal on using opt-in popup to do seller pitching in seller center. Seller comm pop-up message and pitching deck under legal review	KRCB project, KRCB Ops	Ongoing, ETA 6 Mar
Pitching plan	Align with SIP and SMT on pitching plan, with first round using 1) Mass pitching with popup in KRSC+survey; 2) RM 1:1 pitch via call or email for managed sellers	KRCB project, KRCB Ops, SMT, SIP	Not started, ETA: 1st round pop up message: start since 9 Mar 2nd round 1v1 pitching: start since 16 Mar
Launch timeline	2 batch to launch KRSIP since mid Apr, with 1st batch in PH/TH/VN/BR, and 2nd batch in SG/MY/TW/MX	KRCB project, KRCB Ops, SMT, SIP	Not started, ETA: 13 Apr for 1st batch and 2 May for 2nd batch

Counter CP update

[Recap: 2026 Focus Area] KRCB will focus on 3 objectives to increase matched seller & SKU count and improve price competitiveness

	Program Objectives	Details	Highlights	Key Success Metrics	2025	2026	PIC	Target
A	New Seller Acquisition	- New seller acquisition	- Acquire CP-only brands to maximize matched seller/SKU *pg 42*	New seller #	Y	Y	KRCB SA	*Targets to be shared in 03-20 KRJP Biweekly*
		- (KR Swarm) New brand acquisition via ERP	- Acquire CP-only brands whose blocker to joining SHP is 'manpower' via integration with ERP provider *Pg 43*		N	Y		
B	Grow Existing Seller Assortment Completeness vs Coupang TW	- New SKU sourcing via existing resellers	- Source CP-only SKUs via working with existing sellers through (TBD) seller program *pg 46*	New SKU #, % SHP SKU matched to CP	N	Y	KRCB SMT3, PSP	
		- Migrate matched non-TW shop/SKUs	- Migrate CP-matched SKUs in non-TW markets		N	Y		
C	Ensure Price Competitiveness vs Coupang TW	- Vouchers to matched SKUs	- Provide voucher to target audience on CP-only SKUs	NPC	Y	Y	KRCB PRJ, SMT	
		- Seller negotiation	- Accelerate price negotiations between RM-seller via dashboard support & KPI incorporation *pg 47*		N	Y		

[SHP vs. CP KRCB TW SOB] KRCB ADO SOB outperforms TW market by +1.61 MoM, and ADG SOB by -0.76 MoM; F&B remains the core issue

Key Highlights:

1 KRCB ADO SOB outperforms TW market by +1.61 MoM, and ADG SOB by -0.76 MoM, overall showing a stabilizing trend and mainly due to strong performance in beauty category

2 F&B SOB remains the core issue
   a. **SKU #**: see 13% MoM (0.4k) increase, and to further push by unmatched sku sourcing
   b. **SKU effi.**: 1) arranged exposure during F&B campaign to boost traffic, 2) optimize npc visibility and seller push

[Lever 1 New brand acquisition] Out of 292 wishlist brands, SA team has contacted all 292 (100%) and converted 2 sellers; next to focus on tackle pending review and unresponsive sellers

Table: New brand contact & acquisition progress

	Seller # RR					

Key Highlights:

1. KRCB has identified 292 wishlist brands for SA team recruitment, including 54 brands with TW local shops
2. KRCB SA team has contacted 100% of 292 brands and 134 (46%) are pending review and 91 pending response from sellers
3. **Next steps: KRCB SA team plans to:**
   a. Onboard meeting scheduled with 4 brands & completed meetings with **2 brands confirmed TW shop onboarding**
      i. Farm stay: Onboarding in TW and two additional markets. ETA: June → We will push to accelerate the onboarding
      ii. VARUZA: Starting with TW. Onboarding ETA: March
   b. Contacting 91 unresponsive brands through 3rd round of contact via cold call from 2/26, **ETA EoW**
      i. To conduct one-on-one follow-up calls with each pending review brand
   c. Include non-TW market pitching, prioritizing markets with high category ADO penetration and brand appetite. **ETA Ongoing**

[Lever 2 KR SWARM/ERP] Expect KR SWARM to kickoff by mid May 2026, one ERP provider with 80 brands expressed interest, with conversations with 3 other providers ongoing

Background of SWARM project:
- Piloted to onboard CN/Taobao sellers that have no interest in onboarding to Shopee in the past
- Developed a system that integrates directly with their ERPs to reduce their effort to onboard to Shopee
- Shopee will manage their shop for them entirely *(incl. Ops, Marketing, Customer Service etc.)*

#	PIC	Next steps	Status	ETA
1	KRCB SA	- Seller onboarding and education - ERP provider pitching (Target pool of 16) ● 1 ERP expressed interest (Ecommerce - 80 brands with 7.5K L90D platform ADO) ● Ongoing conversation with 4 other ERP providers	WIP	Ongoing
2	BPM	- To work with KRJP team to identify ERPs and Sellers Pool - System development to support the launch of ERP program	WIP	Mid May
3	Reg. CB	- Impact assessment (by market) - Develop performance and P&L trackers - To operate shops frontend post-onboarding to Shopee	WIP	Apr
4	TWCB	- Provide key brand list for targeted seller/ERP onboarding - To discuss with Local SMT for potential resources packages to push high-potential SWARM sellers	To start	Mar

[Grow SKU Assortment Completeness vs Coupang TW] Out of 306K target SPUs, TW/KRCB team has scanned 140K SPUs (RR 94%) and matched 27K (match rate 43%) out of 62K validated SPUs

Table: SPU scan progress & match %

Matching is conducted via pricing tool to determine similar SKUs on SHP via image search and product description

Key Highlights

- Out of 306K target SPUs, TW team has **completed scanning of 140K SPUs (RR 94%)**
- **KRCB achieved 43% match rate,** having delta of matched 26K SPUs
- **To improve match rate, KRCB has**
  a. **1) KR BI started auto-scanning new SHP** SPUs to accelerate
  b. **2) KR SMT3 has shared non-matched SKU list** to resellers
- **Next steps:**
  a. KR BI is assessing new matching method using Pricing Center to join force with TW BI

[Grow SKU Assortment Completeness vs Coupang TW] To build up ADO view of spu gap, KR/TW team are exploring two methods as proxy

#	Logic & Methodology	Progress	Timeline
1	• **(SKU level) A. # of reviews per SPU * B. ADO/review multiple** ○ A. # of reviews: Crawling by KR BI ○ B. multiple: Identify via expert interview	• Obtained crawler code from data engineer team • Searching expert interview to identify ADO/review multiple by category	• Target to validate crawler feasibility by eow
2	• **(Brand level) A. Brand's SHP TW platform ADO / B. brand match rate * C. category SOB** ○ A. platform ADO: Extract by TW BI ○ B. match rate: manual mapping by TW/KR team ○ C. SOB: Collected via local intel	• Identifying key brands in F&B, H&B, H&L, Fashion, and TKB based on brand exposure within the CPCB circle.	• A. platform ADO: Mar W1 • B. match rate: Mar W2 • C. SOB: Mar W3

[Lever 3 New SKU sourcing via resellers] confirmed 88% of prioritized F&B spus can be sourced; next to nego with seller on sourcing at or near coupang pricing

Table: New SKU sourcing via reseller progress

Status	Metrics	Total	F&B	Beauty	Fashion	Others
(0) Eligible wishlist	**SPU #**	**3,480**	**724**	**386**	**976**	**1,394**

... Doubtful of SPU demand	% of response	25%	25%	0%	0%	0%
... Need additional benefits	% of response	0%	0%	0%	0%	0%

Key Highlights:

1. Problem statement: isolate sourceability issue by either **non-price related bottleneck** (seller driven) or **price related bottleneck** (SHP/seller co-driven)
2. Prioritized F&B spu pool, and confirmed **88% sourceable** - indicating spu gap **addressable by SHP PRM support**
3. **Next steps**:
   a. SMT3 to confirm sellers on sourceability at CP price (already obtained) and **start sku listing by Mar W2** and push for review on sourceability in **other categories by Mar W2**
   b. Organized newly identified unmatched SPUs and start sourcing **by Mar W2**

**SPU wishlist based on short-listed CP-only SPUs from CP SPU manual matching of ~15K SPUs*

[Price Comp] KRCB NPC improved to -31% (+11%p MoM) due to advanced SPU matching process and continued vouchers

Category	#SPU	% Net Competitiveness			MoM		
	On Shopee	After SHP & CP rebate [C]	After rebate and Voucher [D]	After rebate, voucher and BPSF [E]	After SHP & CP rebate [C]	After rebate and Voucher [D]	After rebate, voucher and BPSF [E]
Total	**5,640**	**-56%**	**-30%**	**-31%**	**7%**	**11%**	**11%**
... Beauty	4,418	-54%	-25%	-25%	**9%**	**16%**	**17%**
... F&B	357	-63%	-54%	-54%	**18%**	**23%**	**23%**

... TKB	441	-64%	-51%	-51%	**11%**	**-1%**	**-1%**
... Others	298	-62%	-50%	-50%	**-6%**	**-11%**	**-11%**

Key Highlights:

1. KR NPC reached -31% following a 11%p MoM increase, driven by progress in SKU matching & vouchers
2. The main gap comes from both a) seller pricing; and b) CIR gap [details on next page]

[Price breakdown vs Coupang CB]

	[A] CP CB	[B] SHP KRCB	Price Gap [B] vs. [A]

	40%	*25%*	*-15%*
3) Logistic Cost	76	-	-76
	23%	*0%*	*-23%*
4) Import Tax (Buyer Pay)	13	17	4
	5%	*5%*	*0%*
5) Final Buyer Paid Price	209	352	143
Platform Profit	**-140**	**-17**	**123**
	-43%	*-18%*	*25%*

Key Highlight

1 **Price Comparison**
- Overall final buyer-paid price of SHP KRCB and CPCB show **~41%** gap (352 vs. 209).

2 **COGS & Margin**
- The primary driver of the price gap is the platform take rate, followed by COGS, which is **~20%** higher on SHP KRCB (326 vs. 260). Lower order volumes among SHP KR resellers may lead to higher COGS compared to Coupang, and the requirement to pay platform commissions further squeezes seller margins.
- This suggests that **securing suppliers with lower COGS is critical to achieve price comp. against CPCB**.
- CPCB operates under a 1P model, reserving at least a 20% margin, with prices directly synced to TW without additional markup.

3 However, after factoring in PRM and other platform-rebate costs, CPCB appears to be **operating at a loss** (-NT$140) from a platform perspective.

- **Platform voucher CIR**
  - Coupang most aggressive voucher at 40%, while SHP TW voucher deployed at 25% to narrow price gap
  - Due to benchmark against local CIR and budget constraints, the **voucher scheme cannot be further increased**
  - **Next steps:** KR team to a) nego with sellers to lower SPU listing price (weekly tracking to establish by W2); b) initiate reseller acquisition with stronger sourceability to close the buyer paid price gap with TW team voucher support
