KRJP Cross Border Bi-weekly Sync

Mar 20 2026

Previous Meeting Follow Up

No.	Topic	Action Items	Updates	PIC
1	Topline (TR)	1) Deep-dive TR gap vs. target	Replied separately via e-mail	Ray/Taeksoo
2	LFF	1) Review TH MP ADO after D&T impact for more accurate TH LFF%	WIP - confirming MP ADO target with Projects ETA Mar 26	Joanne/Dabin
3	JPCB New Seller	1) Plan for 2026 JPCB seller acquisition plan - Incentive to community partners - TT collab- seller acquisition	WIP - to share by Apr 1st	Ray/Xiaolin
4	SIP	1) Re-assess non-managed sellers' target	UM sellers' pitching success rate will increase from 10% to 23% by quarterly repeated pitch (~3 times), with potential SIP ADO uplift at 14%	Ray/Caroline
5	Site Expansion	1) Current market coverage % of managed sellers 2) Operational viability across markets (e.g. local shop operated by vendor and etc)	Replied separately via e-mail	Junho

[KR SIP Target Re-assess] Applying the updated UM seller acceptance rate by quarterly repitch sellers, KRSIP ADO is expected to achieve 1.9k, with 0.3k (+14%) uplift v.s. the initial target

[1] Updated and Initial target: Initial UM seller acceptance rate at 10%, update to 23% for this version
[2] Eligible MT SKU: ICB/SA shops will not be eligible for SIP based on SIP rules
[3] Migration unsuccessful SKU including issues e.g. sync item fail, MTSKU has published MPSKU, listing limits sync price failure, missing mandatory attribute, translation issues, etc.

Key assumptions

1. Increase unmanaged sellers' SIP pitching success rate **from 10% to 23%,** referring to local SIP success rate with quarterly basis repitch with pop up message **(expected to hit 23% acceptance rate with ~3 times pitching).** Total #live SKU after migration is expected to increase 84%

2. KRSIP ADO is expected to grow **14%** with the increased UM sellers' pitching success

KRJP Bi-weekly agenda

1. **Overall Performance**
   - P&L performance
   - KRJP LFF ADO and LFF% Monthly Actuals
   - Campaign participation
   - New seller acquisition progress

2. **For Discussion**
   - KR RM KPI discussion

3. **For Updates**
   - JP CC delay update
   - Counter Coupang update

P&L Performance

KRJP Mar Topline : KRJP Mar: Demand beat target (ADO RR ~106%, ADG RR ~110%) but TR% target missed due to low G2N ratio market's overachievement

Key Highlights

KRJP Topline : KRJP Feb topline started strong with combined ADO RR 106%, ADG RR 110%, growing slower vs. PLT (Feb YoY -0.3%p, Ytd YoY -0.3%p for ADG) - *pg 6*

- KR ADO RR111% (MoM +9%)
  - All markets except for TH (RR 96.6%) overachieved RR
  - BR shows predominant RR with 164%, led by 3 major GPs which have 72% share, showing 2x MoM
- JP ADO RR 86% (MoM -4%)
  - TW/VN/BR overachieved RR, SG/MY/TH/PH behind
  - Due to CC delay continues, seller sentiment remains negative, 1) turning on HM, ADO loss impact reduced from Feb peak 1K to 0.8K, 2) continued ads spending/campaign participation pullback

KRJP MP PC2 + SLS PnL:

- Despite KR Rev overachievement of RR 109%, KR TR% RR shows 96%, mainly caused by non-ads TR. (Non-ads gap -0.8%p, Ads gap -0.6%p respectively) - *pg 8 (figure 1)*
  - Non-ads: Commission TR% gap is the main driver (-0.5%p), mainly due to markets with low G2N ratio overachieving topline target (e.g. TW 7.3%, VN 18.5%, BR 41.2%) - *pg8 (figure 2)*
  - Gross-Ads : SG missed Ads target by -58k (Gross ads TR% missed target by -1.8%p); KRMS has been developing a new seller guide deck and start tracking smt1 sellers daily spend trend by EoW to catch up
- KRJP SLS revenue exceeded the target by 27%. The variance was driven by increases in total SLS orders (5%) and PPO (15%) compared to the target.

Key Highlights

1. Mar EoM LFF ADO 24k(MoM +19%, penetration 39%), mostly driven from 3PF (MoM 44%) and healthy uplift from FBS (MoM 7%)
   a. 3PF ADO MoM uplift was mainly driven from VN UST sellers' OOS replenishment after delay caused by recently tightened CC in Feb
   b. FBS ADO MoM uplift was driven by increased new SKU inbound, encouraged by seller incentive programs, contributing 53% of MoM ADO increment
2. Mar EoM Blackstock showing slightly upward trend with 24% (MoM +1.3pp), but expecting manageable levels of BS% by EoM since disposal will take effect (3/20) as part of aging stock force clear initiative

Key Highlights

1. **Mar EoM LFF ADO is 24k (RR 114%, MoM 19%)** from VN ADO MoM 47% growth with OOS replenishment and PH ADO MoM 16% growth from 1) uplift from VIP program sellers' OOS replenishment (95% of growth) 2) new SKU inbound through air consol program (5% of growth)
2. **Mar LFF% ahead of target at 39% (RR 106%, MoM +3pp)**, TH/VN/PH projected to exceed target but target gap from SG/MY(RR 93%/92% respectively)
   a. SG/MY missed the target due to one-off reason from Eqqualberry's ongoing transition from CB to local across all markets, with a greater impact on LFF vs. SLS as replenishment has been halted
   b. But both expected to meet Apr target with scheduled new makeup category seller onboarding (SG Fwee 50 ADO, MY Tirtir 100 ADO)
3. **Mar Blackstock Qty% 24%** (MoM +1.3pp) mainly coming from SG/MY Eqqualberry aging stock, all scheduled for disposal on March 20; therefore, all markets are expected to be on track by the end of March

Notes:

1. *LFF targets are aligned only to LFF%, so when KRMP ADO target changes, LFF ADO target can fluctuate and result in unusually high RR*

Campaign Participation

[KRJP Campaign Participation Performance Overview] KR demonstrated sound RR% except for TH SSV, as only seller nomination is available - to build up RM visibility and push seller adoption; JP showed overall decline in RR% as CC delay issue still remains

Market	Campaign	Team	# sellers			Target ADGMV %			Actual ADGMV %			RR %

* The tracker above now includes CB overall as a reference, along with unmanaged seller data. For SG/MY target GMV, we've excluded OOS, Penalty, and Delisted GMV.

New Sellers

[2026 KRSA PLT/Retailer Onboarding Progress] Musinsa(KR #1 Fashion vertical PLT) engagement progressed with two onboarding models proposed which worked for their JP entry; discussions with 5 other platforms are ongoing

Key Highlights

1 Meeting completed with Musinsa, the largest FA platform in KR; two business models proposed: 1) onboarding as Musinsa shop-in-shop 2) PB onboarding

- 1) Musinsa has successful shop-in-shop experience with ZozoTown (JP FA platform) in Japan; API integration was a key challenge and must be resolved to consider SHP onboarding under this model
- 2) FA PB 'Musinsa Standard' onboarding not feasible due to strategy to launch online and offline simultaneously and no SEA offline expansion plan; Beauty PB onboarding available

List of platforms in current SA pipeline

In pipeline/discussion | Confirm to onboard | Onboarded

#	Name	Platform Overview	Biz model	Cat.	Priority	Status	Progress details (3/18)
1	Olive Young*	Korea's No.1 beauty & health platform with unmatched online–offline reach	1P + PB	Beauty	P0	Rejected	
2	1 Musinsa	Originally Korea's top fashion platform, now rapidly scaling Musinsa Beauty as a strategic growth category	MP + 1P + PB	FA + Beauty	P0	In Discussion	Two business models proposed: 1) platform onboarding as Musinsa shop-in-shop (preferred) 2) PB onboarding - available for Beauty only
3	Daiso*	A value-focused lifestyle retailer where beauty drives frequent visits and impulse purchases.	1P + PB	All	P0	Attempting to Contact	
4	Hwahae	Korea's most trusted beauty ingredient and review-based discovery platform targeting ingredient-conscious consumers.	MP + 1P + PB (Partial)	Beauty	P1	Confirmed to Onboard	PLT meeting completed with the operating agency introduced; SHP awaiting NSP confirmation to position as a benefit
5	Kurly*	A premium grocery-first platform that has expanded into beauty and wellness as daily essentials.	1P + PB(Partial) + MP(Partial)	F&B + Beauty	P1	In Discussion	Kick off meeting TBC
6	ZIGZAG	A leading women's fashion aggregation app increasingly extending into beauty to expand baskets.	MP + platform-managed 3PL	FA + Beauty	P1	Rejected	Main seller pool is DDM-based brands and value SPA brands; low seller margins (~10%) limit onboarding to PLT
7	ABLY	A mobile-first style commerce platform leveraging personalization to scale beauty, targeting 20s female users	MP + platform-managed 3PL + Partial 1P	FA + Beauty	P1	In Discussion	Preparing data requested by ABLY to assess market size and profitability
8	W Concept	A designer-focused fashion platform extending curated taste into beauty, positioning premium fashion platform	Curated MP (3P, consignment-style)	FA + Beauty	P2	In Discussion	To share brands with C2C ADO on Shopee and assess onboarding feasibility
9	Prika*	A newly launched global beauty platform connecting brands, creators, and cross-border distribution	1P	Beauty	P2	Onboarded	Pending decision on NSP participation
10	Off beauty*	Korea's first urban beauty off-price outlet, operating warehouse-style offline stores that offer a wide range of products at deep discounts	1P + PB	Beauty	P2	Confirmed to Onboard	Listing guide shared; awaiting platform listing, targeting April onboarding

Notes:

- ** indicates retailer*
- *C2C ADO from Local + CB orders from items with the brand name in the brand name attribute*
- *Priority based on platforms' online domestic revenue + online SKU #*

[2026 KRSA Brand Onboarding Progress] Following up on 7 brands (~1.1K potential ADO) with pipeline expansion underway; 19 counter CP brands (0.45K potential ADO) in pipeline, with 3 onboarded

Key Highlights

- One P0 and one P1 brand to be handed over to PSP team
  - Outreach initiated to new SG Beauty wishlist (3K C2C ADO) and RBP KR brand list (4.5K C2C ADO), to add new brands to pipeline
- Counter CP: 19 brands (incl. PLT ADO <1 not on the table) with 0.45K potential ADO (3% of total wishlist C2C ADO) in pipeline
  - **Dunst** (FA) onboarded and joining NSP from Mar; white **ATEX** and **DR.BANGGIWON** to join NSP upon readiness

Notes

- *Brand sourcing DB includes 1) domestic/CB plt crawling, 2) each local wish lists including counter competitive specific wishlists and prioritized based on PLT ADO*
- *PLT ADO Logic : Local + CB orders from items with the brand name in the brand name attribute*
- *Onboarding date(in red) implies that this brand has onboarded historically but not active under KRCB currently*

Private & Confidential

KR RM KPI discussion

[RM Capability] Overall KR RM test scored 66%, below CN benchmark (80%), largely given short tenure (56% <1y); targeted training planned, to maintain team-level KPI

RM Test Result						Tenure by Team		
Team	Team avg.	Ops/SLS	LFF	MS	SMT	Avg. tenure	<6M Tenure	<1Y Tenure
Overall	1 **66%**	**73%**	**46%**	**62%**	**78%**	2 **2.0 years**	**39%**	**56%**
SMT1	69%	98%	45%	55%	75%	2.6 years	20%	20%
SMT2	3 49%	30%	33%	47%	77%	0.4 years	3 67%	100%
SMT3	67%	80%	45%	65%	77%	2.8 years	50%	50%
PSP	77%	83%	60%	80%	85%	1.3 years	25%	75%

Key Highlights

- KR RM Test:designed based on expected knowledge for ~2-3 year tenure RMs, covering Ops/SLS, LFF, MS, and SMT
- 1 **KR RM overall score landed at 66% accuracy rate**, a **14pp gap vs. CN benchmark (80% probation threshold)**; all key topics fall below the benchmark, **LFF (46%) shows the largest knowledge gap**, followed by **MS (62%)**
- 2 **Low test score is largely given short team tenure, with 56% of RMs have <1 year tenure at Shopee, 39% with <6 months**, indicating early ramp-up stage
- 3 **SMT2 lags the most (49% avg.)**, with ~67% of RMs having **<6 months tenure** (highest among teams), and 100% RMs < 1Y tenure

Next Steps:

- **Tackle topics with largest knowledge gap through RM training**
  - MS workshop by Regional RBP team scheduled for April
  - LFF training currently under planning
- **[For discussion]** With RM capability issue, **will still roll-out new KPI for Q2 but propose to keep as team KPI first and reassess transition to individual KPIs by end of Q2,** following capability uplift from training and workshops

JP CC delay update

[JP BWT Mar Trend] Mar BWT trending downwards but still ~8 days above BAU; recovery uneven across markets due to export customs variability. Expecting BWT to improvement marginally starting from orders placed mid/late Mar and expect full recovery with orders placed end of Mar

Key Highlights

1. Mar 16-18 (E) vs BAU (A) shows that our BWT is up 8 days but
2. Mar 16-18 (E) BWT improved significantly vs early March peak in (C) early Mar, but shows uneven recovery across markets (PH, SG, VN show 3~5 days improvement while MY, TH, and TW show less than 2 days improvement refer to BWT Appendix), likely due to different manifest shipments using different customs (e.g. stricter inspection at Narita compared to Haneda).
3. Expect BWT to improve by ~2 days from Mar 18 placed orders and BWT to return to BAU by end-March, with impact visible in Apr W2.

All Markets - Weekly BWT Trend (Feb 23 - Mar 18)

	BWT (#of Days)								
	A	B	C	D	E	1		2	
	BAU	Feb 23 - Mar 1 (Avg)	Mar 2 - 8 (Avg)	Mar 9 - 15 (Avg)	Mar 16 - 18 (Avg)	E vs A	E vs B	E vs C	E v D

BR	20.96	24.47	24.94	23.74	24.73	▲3.77	▲0.26	▼0.21	▲0.99

Note: Dates are order delivered date

[JP BWT Trend - Mar 12 to 18] BWT slightly improved vs peak in early Mar; expecting add'l 2 days recovery after Mar 24 and return BAU by mid Apr, based on vendor's commitment

Key Highlights

1. BWT has shown a steady increase / flat during week of Mar 12–18 (=order placed date mid-late Feb, TWS outbound Mar W1), but this is expected as vendor committed to TWS operational improvement started Mar 15, thus we **expect to see 2 day improvement post Mar 24**
2. Additionally vendor also committed to export CC normalization starting with orders export cleared Apr 1, thus **expect to see BWT and order delivery % return to BAU level by Apr W2**

TH	7,930	7,916	2,185	99.8%	27.6%
Total	96,534	96,329	33,441	3 99.8%	34.7%
Remaining Backlog 4	-	205	62,888	0.21%	65.3%

Remaining backlog as of Mar 18

[Feb Order Backlog Largely Cleared]

- 1 99.8% WH outbound completed, with 96.2% already handed over to LM SOC
- 2 Minimal WH outbound residual backlog at 0.17% (480 parcels)
- Only 3.8% still in transit, indicating near complete export CC for Feb orders

[Mar 1 - 10 WH OB Operations Stable but Delay Still in Export CC]

- 3 99.8% WH outbound completed indicating that vendor's WH operations stabilized but
- 4 Continued delay in export CC, as shown by low LM handover at 34.7%, with 65.3% still in transit

[Key Takeaway]

- WH outbound performance has normalized (~99.8%) and WH backlog is resolved
- Delay still observed in operations post WH outbound (=export CC)
- Latest vendor side update is that export CC will be back to BAU starting Apr 1 (=late Mar orders)

Private & Confidential

[JP Order Delivery Status] As of Mar 18, Feb orders are 99% departed from WH, 96% handed over to LM, and 85% delivered to buyers

Key Highlights

- [Backlog] Feb orders: 99% of backlogged WH orders departed for outbound, with 96% delivered handed over to LM SOC. Mar 1–10 orders: 99% departed WH, with 34% handed over to LM SOC so far *(refer to pg 31)*
- 1 [Feb Orders] From the 96% of orders handed over to LM SOC, **~85% of orders have been delivered to buyer**
  - Delivery completion rates vary by market, with PH and MY lagging behind others due to differences in the number of orders per manifest (e.g., in PH, a single delayed manifest impacts more orders because there are more orders tied to 1 manifest compared to smaller markets) as well as variations in export customs processing (e.g. stricter inspection at Narita compared to Haneda).
- 2 [Mar 2-8 Orders] From the 34% of orders handed over to LM SOC, **~27% of orders placed have been delivered to buyer**
- We expect delivery completion % pacing to return to BAU starting from orders placed in late Mar, which results to be realized by Apr W2

All Markets - Data as of Mar 18

[JP seller sentiment] Seller sentiment remain negative, in need to further actions to avoid topline decline

Key Highlights

- Feedback from **137 managed sellers (54% JP ADO)** indicates sentiment is largely negative (~80%), resulting in **reduced MS spending** [detail on next page] and **refusal of campaign participation**

1 **Top seller asks:** 1) clear timeline & delivery assurance, 2) address compensation gaps, 3) buyer sentiment management

2 **Next steps:**
- Manage vendor performance and build up logi visibility
- Finalize seller list for additional compensation
- Ops to assess feasibility for negative buyer review deletion

Top Seller Requests 1	% ranked as No.1 request	Proposed action Item	Timline 2
Clear timeline & delivery assurnace	30%	- Logi: monitor vendor's performance for the next 2 weeks to ensure that they commit to BAU lead times before sending out seller announcement - KAM: utilize logi trackers to get visibility of order status and share status up on seller request	Logi - end of Mar ~ early Apr RM - ongoing
Address compensation gaps	28%	- KAM: Define eligible sellers and shortlist for additional compensation request for mgmt decision	RM - end of Mar
Buyer sentiment management	7%	- Ops: request review deletion to local	TBC

Note: Based on feedback collected from 137 JPCB managed sellers (84% of total KAM sellers), representing approximately 54% of JP ADO, gathered via RM outreach between 3/13~3/17.

[JP HM (holiday mode) Impact] JP HM impact reduced to 758 from Feb peak (1K ADO, 8% of '26 Jan JP ADO) with 64% Feb impact recovered, but newly turned HM shop causing 324 ADO loss

Key Highlights

1 Feb HM impact is recovering, with **64% of Feb HM ADO already resumed** and KAM recovery strongest at 74% (51% KAM GP back to BAU in Mar). However, despite recovery, **newly on HM in Mar with 324 ADO loss**, Mar MTD HM ADO remains at 758, as new HM partially offsets recovered ADO. (Newly on ADO mainly coming from CS non-managed sellers)

Feb ~ Mar MTD HM Shops Recovery Status

		Feb HM Total	Mar MTD HM off	MTD recovery %	Remaining	MTD Newly HM on	Newly on%	Mar MTD HM Total
1 Total ADO		1,008	647	64%	361	1 324	43%	758
	CS	405	211	52%	194	199	44%	447
	ICB	6	0	1%	6	25	155%	16
	KAM	530	392	74%	138	92	36%	258
	SA	66	43	65%	23	9	23%	38
GP #		3,563	146	4%	3,457	226	6%	3,642
	CS	2427	86	4%	2,361	137	6%	2462
	ICB	76	15	20%	63	35	36%	96
	KAM	49	25	51%	36	10	24%	41
	SA	1,011	20	2%	997	44	4%	1,043

Note: ADO data period 2026 Jan (MTD newly HM on in MTD ADO impact data period 2026 Feb)

[JP ads pull-back] Continued ads pull back causing -726 ADO loss mainly due to KAM sellers

Key Highlights

- JP **reduced ads spending by US$-2.7K** vs. Mar baseline (spending estimated based on ads TR YoY trend when assume no CC delay)**,** resulting in an estimated **-726 ADO loss MTD,** with 90% coming from KAM seller spending reduction
- **Next steps:**
  - [For discussion] a) lower Mar SSP target and change the reward format to ads credit to drive ads ADO & mitigate negative seller sentiment; b) expand SSP coverage in Apr. to encourage seller ads investment
  - provide regular logi updates and leverage compensation for spending re-engagement

March Ads Spending Pullback & ADO Loss Estimation

gp_smt	2603 Spending Baseline* [A]	2603 Spending Actual [B]	Spending reduction [C] = [A] - [B]	Spending/order (Y-1) [D]	Ads ADO loss [C] / [D]
Total	$10,298	$7,565	-$2,733	$4.46	-726
CS	$2,216	$1,881	-$335	$6.75	-50
ICB	$628	$252	-$376	$6.35	-59
KAM	$7,241	$5,173	-$2,068	$3.31	-624
SA	$213	$259	$46	$6.59	7

Note: 2603 Spending baseline is estimated based on Feb actual multiplied by 2025 Feb to March MoM

Counter CP update

[Recap: 2026 Focus Area] KRCB will focus on 3 objectives to increase matched seller & SKU count and improve price competitiveness

	Program Objectives	Details	Highlights	Key Success Metrics	2025	2026	PIC	Target
A	New Seller Acquisition	- New seller acquisition	- Acquire CP-only brands to maximize matched seller/SKU pg 46	New seller #	Y	Y	KRCB SA	Targets to be shared in 04-01 KRJP Biweekly
		- (KR Swarm) New brand acquisition via ERP	- Acquire CP-only brands whose blocker to joining SHP is 'manpower' via integration with ERP provider		N	Y		
B	Grow Existing Seller Assortment Completeness vs Coupang TW pg 47	- New SKU sourcing via existing resellers	- Source CP-only SKUs via working with existing sellers through (TBD) seller program pg 48	New SKU #, % SHP SKU matched to CP	N	Y	KRCB SMT3, PSP	
		- Migrate matched non-TW shop/SKUs	- Migrate CP-matched SKUs in non-TW markets		N	Y		
C	Ensure Price Competitiveness vs Coupang TW	- Vouchers to matched SKUs	- Provide voucher to target audience on CP-only SKUs	NPC	Y	Y	KRCB PRJ, SMT	
		- Seller negotiation	- Accelerate price negotiations between RM-seller via dashboard support & KPI incorporation pg 49		N	Y		

[SHP vs. CP KRCB TW SOB] KRCB is showing stable SOB against CP CB but lagging in F&B

Key Highlights:

1. **Similar to last month, KRCB has achieved 0.61x ADO SOB (0.55x ADG SOB) showing consistent trends**

2. **F&B also remains slow to ramp up, and KRCB is working on below items to accelerate pace**
   a. Shops: KRCB will contact 1) potential shops to migrate to TW and 2) (Done) TW non-whitelisted shops at risk of deletion to acquire more sellers
   b. SKUs: KRCB SMT3 is collaborating with resellers to source non-matched SHP SPUs
   c. SKU efficiency: KRCB is analyzing MS investment trends and NPC to determine which lever to double-down on to uplift efficiency

[Lever 1 New brand acquisition] Out of 292 Counter-CP wishlist brands in TW, SA team is pending response from 129 sellers (44%) and following up on leads of 12 sellers

Table: New brand contact & acquisition progress (TW)

Status (YTD)	Metrics		Total	F&B	Beauty	Fashion	Others
(0) Total wishlist	**Seller #**		**292**	**86**	**132**	**45**	**29**
... With local shops/sellers	Seller #		47	7	33	3	4
(1) Sellers nominated for SHP review	**Seller #**		**292**	**86**	**132**	**45**	**29**
... Uncontacted	Seller #		0	0	0	0	0

..... Pending shop open/SKU listing	Seller #	2	7	1	4	1	1
..... Rejected	Seller #	1	148	39	71	24	14
(2) Sellers joined SHP	**YTD Seller # Actual**		**3**	**0**	**1**	**1**	**1**
	... Incremental Seller #		*Targets to be shared in 0401 KRJP Biweekly*				
	... Seller # before increase						
	YTD Seller # Target						
	Seller # RR						

Key Highlights:

1. SA team has reached out to all 292 sellers, with 148 initial refusals (51%) and the rest 141 pending review & discussion
2. SA team is now currently following up on the rest 141 leads, of which 7 sellers are alpreparing for TW onboarding
3. **Next steps: KRCB SA team plans to:**
   a. Key bottleneck : DB contains general CS contact (vs. PIC contact) thus addt'l contact point search via Linkedin, prioritized by brands' C2C ADO
   b. For brands who showed interests: Keep following up via email and call (12 brands)
   c. Seller meeting scheduling with 3 F&B brands: SEMPIO, JUNGWONSAM, BADASORI

[Grow SKU Assortment Completeness vs Coupang TW] Out of 306K target SPUs, TW/KRCB team has scanned 208K and matched 33K out of 78K validated SPUs

Table: SPU scan progress & match %

Matching is conducted via pricing tool to determine similar SKUs on SHP via image search and product description

Key Highlights

- Out of 306K target SPUs, TW team has **completed scanning of 208K SPUs (RR 69%)**
- **KRCB achieved 41% match rate,** having delta of matched 6K SPUs
- **To improve match rate, KRCB has**
  a. KR BI and PRJ has started matching SPUs that have been newly added to SHP
  b. KR SMT is working with resellers to source non-matched SPUs
- **Next steps:**
  a. KR BI/PRJ will manually match models of system-matched items

[Lever 3 New SKU sourcing via resellers] SMT3 has confirmed 1.1k SPUs sourceable (31%), but received low initial confirm rate (11%) at target price for F&B; would receive seller target price & continue to expand seller pool

Table: New SKU sourcing via reseller progress

Status	Metrics		Total	F&B	Beauty	Fashion	Others
(0) Total wishlist	**SPU #**		**43,892**	**712**	**12,970**	**8,503**	**21,707**

	... SPUs able to be sourced		1,104	2a 648	369	2b 0	87
	..... SPUs able to be sourced but not at target price		570	570	*To be shared 0401 KRJP Biweekly*		
	..... SPUs able to be sourced at target price		78	78			
	SPUs not shared to seller		0	0	0	0	0
	Refused SPU #		**2,512**	**64**	**185**	**968**	**1,295**

Key Highlights:

1. **KRCB SMT3 team is collaborating with resellers to source non-matched items (CP only) of ~ 44k SPUs**
   a. 1st batch (already shared to resellers): 3.6k SPUs, coming from 2025 3Q TW team's matching and consists of top CP TW SPUs
   b. 2nd batch (to share by Mar 31st): 40k SPUs, coming from TW/KR team's matching of 306K SPUs by 1Q, currently under review by KRCB team
   c. *2nd batch is consistently being added as matching progresses
   d. ** 3rd batch (pending May): will come from TW/KR team's matching of ~800K SPUs
2. **SMT3 feedback for 1st batch: 1.1k SKUs sourceable (31%) out of 3.6k SKUs, of which:**
   a. **High sourceability for F&B, but low target price hit rate:** 648 SKUs (91%) sourceable, only 78 SKUs (11%) confirmed at target price (CP after voucher price)
   b. **Low sourceability for fashion & others categories:** given there are no Fashion & Others specialized resellers managed by SMT3
3. **Next steps**
   a. SMT3: 1) Check with the 570 sellers again on if they can source at Price C (target price) & their lowest sourcable price and 2) calculate potential PRM size based on price gap between seller price and target price
   b. BD/SMT: Will review unmanaged reseller pool (esp Fashion & Others category) to manage more sellers & increase sourcable sellers

[Price Comp] KRCB NPC decreased MoM by 8%p despite WoW +1%p, as voucher budget dropped from 15K USD to 4K; next step would further improve data fidelity, set up dashboard & RM KPI to drive price negotiation

Key Highlights:

1. After-voucher NPC has worsened by 8%p (-28% → -36%) as TWCB has reduced its budget for voucher
   a. Compared to 15K USD voucher budget in February, March budget was at 4K USD (Apr budget ETA Mar W5)
2. To ensure price fidelity, KRCB has manually fixed price/units per SPU of xx items and shared to TW team; TW team will update this in Apr cycle
3. **Next steps**
   a. Price fidelity improvement: TW/KRCB is reviewing price data (ETA Apr 3rd)
   b. Seller negotiation: KRCB is setting up NPC seller dashboard & RM KPI to further push & support RM negotiation (ETA Mar 27th)
   c. Discuss voucher budget: KRCB is reviewing CP vs SHP price and voucher/rebate to estimate how much voucher budget would be needed to improve NPC (ETA Apr 3rd)
