1. CB FBS incentive CPO has decreased slightly from $0.78 in Feb'26 to $0.71 in Mar'26
2. Overall buyer facing % improved slightly from 51% to 52% in Mar'26 except SG and TH, we will continue to monitor and balance between buyer and seller-facing costs
   a. SG buyer % dropped 5% in Mar following platform-level budget optimizations in the second half of the month
   b. TH buyer % dropped slightly but still at 95%. From 1 Apr, TH will start offering 2% FBS base commission.
   c. MY buyer % is low mainly due to platform infra free waiver discount but is on an improving trend and will be closely monitored

Key Highlights

1. FBS live SKU# decreased by 12% mainly due to CN SKU # decrease by 13% vs KR CB FBS SKU# grew by 6%
   a. CN SKU# decrease mainly due to
      i. Long tail SKU being cleaned up given SHP tightened WH DOC control and long tail SKU being RTS
      ii. CNY supply chain shortage/ shipment delay leading to temporary OOS
      iii. Some of top CB seller considering to shift to CNLS (e.g., Sunflower, 上海晨光)
      iv. Seasonal downtrend (e.g., traditional style clothing sold well before CNY but detrend post CNY)

[CN SKU decrease deep dive] Top 15 sellers contribute 55% of CN SKU# drops mainly due to temporary reasons like 1) cleaning long tail SKU and 2) CNY supply chain shortage

Scenario 2 (Moderate scenario) assume PH with 20% ADIS uplift in Dec’26 based on discussion with local

[Proposed action plan] To expedite acquisition, Reg CB will explore to 1) increase addressable SKU, 2) Launch New SKU package, 3) Check WH capacity, 4) CN/KR to assess if to add to RM KPI

Proposed action plan		Remark	Timeline
1	**Increase addressable SKU#:** to explore lower WH ADIS requirement *(Deep dive next page)*	• Already lowered for PH (from 0.7 to 0.5) and for TH (from 0.5 to 0.3) • However, estimated Dec required SKU implied 72% conversion in PH and 85% conversion in TH	Reg CB LFF to trigger discussion with local when conversion% to addressable pool hit > 50%
2	**Expedite new SKU acquisition:** to discuss with local to re-launch new SKU package	• Previously we ceased new SKU package to avoid base comm waiver • Next to explore on buyer facing incentives (e.g., shop vouchers)	Reg CB LFF to discuss with local and align by Apr
3	**Upfront check with Reg WH capacity planning to avoid capacity shortage**	• Already shared the initial projected Dec'26 SKU for Reg WH to assess if capacity sufficient	Pending Reg WH ETA
4	**Add back New SKU dedicated metrics to RM KPI**	• In 2026, CN removed new SKU# in RM KPI to prevent high volumne of long tial SKU • To avoid long tial SKU # issues, Reg CB proposed to add "new SKU ADO" to RM KPI	CN/ KR to assess by Apr

[Addressable SKU feasibility check] Current conversion to addressable is at 15-30% across markets, we will trigger discussion with local when conversion% to addressable pool hit > 50%

Addressable SKU feasibility check

	Inbound ADIS requirement (Current)	Addressable SKU (Current)	Apr'26 SKU # conversion to addressable pool	Target Dec'26 SKU # conversion to addressable
SG	0.1/ Flexible	147,357	1 17.3%	45.9%
MY	0.05/ Flexible	949,189	15.1%	32.5%
TH	0.3	193,493	18.7%	2 85.1%
PH	0.5	423,875	26.9%	71.6%
Total	/	**1,713,914**	**18.6%**	**49.2%**

1. Apr'26 SKU# conversion to addressable still low at 15-30% across markets
2. However, estimated Dec required SKU implied 72% conversion in PH and 85% conversion in TH.
   a. For next steps, Reg CB will trigger discussion with local when conversion% to addressable pool hit > 50%

[New Regional CB LFF seller program] TTS 3PF Seller Acquisition Program summary

Context	• We aim to close the gap vs TTS LFF% by Jun'26 while we are still behind TTS LFF% by 6% (SHP avg 50% vs TTS avg 56% in Mar'26)
Program objective	• Acquire TTS only 3PF sellers and **counter TTS LFF ADO%** • Acquire new seller base for **future CB FBS conversion**
Program Approach	• **Pain points to solve:** even though SHP identify target TTS only seller shop ID, it's difficult to get the direct/ correct contact with these sellers to pitch for SHP onboarding and thus not efficient • **Program solution:** partner with 3PF vendors to leverage their seller base and seller contact to pitch for SHP (in exchange we give 3PF vendors referral commission if seller successfully onboard SHP)
Program Target	• **Incremental 1.8K new to SHP 3PF sellers, additional 50K 3PF ADO and 435K ADG by Dec'26**
Progress/ Next Step	• Launched in SG/MY/PH on 1st Apr. TH/VN in progress and aim for launch by mid-Apr • **As of 13 Apr (~2 weeks after launch), the program has generated 742 leads** to newly join SHP and in process for onboarding process (new seller + 3PF shop onboarding process takes ~20 days)

[SHP LFF% vs TTS] We aim to close the gap vs TTS LFF% by Jun'26 while we are still behind TTS LFF% by 6% (SHP avg 50% vs TTS avg 56%)

1 We aim to close the gap vs TTS LFF% by Jun'26 while currently behind TTS LFF % by 6% (SHP avg 50% vs TTS avg 56%)

2 By Dec'26, we target to outperform TTS in all markets and overall SEA to outperform TTS by 2%

[Program Mechanism Summary] 3PF vendor incentives to be 2 tier and only when sellers successfully onboard. Seller incentives to leverage SHP existing new seller/ counter TT package

Program mechanism design principal

3PF/ Vendor incentives	Vendor eligibility	• Besides 3PF vendors, also extend to other ecosystem partners (e.g., ERP) • **The referred new to SHP sellers must generate 3PF ADO in M1** for vendors to get rewards regardless whether it's referred by 3PF vendors
	2 tier incentives	• **P0 - Priority sellers:** Upsize reward to focus on Key TTS seller that local clusters target to acquire or TTS ADG >1k USD. Sellers must be TTS sellers • **P1 - Normal Sellers:** not only acquire existing TTS sellers (Attack) but also to acquire potential TTS sellers (Defend)
Seller incentives	Leverage existing package	• Leverage existing SHP new to platform seller acquisition package and counter TTS package

Deep dive comparison vs TTS in appendix

[For alignment - scope of target sellers] Propose to not only acquire existing TTS sellers (Attack) but also to acquire potential TTS sellers (Defend). Both seller groups will contirbute to SHP LFF SOB vs TTS

SHP's Attack move to TTS (Target existing TTS sellers)

SHP's Defend move to TTS (Target potential TTS sellers)

1. **Propose to not only acquire existing TTS sellers (Attack) but also to acquire potential TTS sellers (Defend)**
   a. TTS is also using partnership programs to acquire new 3PF sellers from Amazon, Temu, Taobao/ CN platform and other platforms. We propose to also acquire these sellers with our SHP TTS 3PF acquisition program, instead of waiting these sellers become TTS sellers to acquire them

2. **Both Attack and Defend seller groups will contirbute to SHP LFF SOB vs TTS as it must be new to SHP sellers with 3PF ADO generated**
   a. The rewards will only be given to vendors after validating 1) it's new to SHP sellers (validated by business license) 2) New to SHP Sellers successfully open 3PF shops and generate 3PF ADO in M1 (validated by SHP internal data)

[TTS 3PF Seller Acquisition Program] Target to launch in all markets by Apr with program targets of incremental 1.8K new to SHP 3PF sellers, 49.7K ADO and 435.4K ADG by Dec'26

1. Program has launched for SG/MY/PH. TH/ VN pending local approval on mechanism and budget. Target to launch by mid-Apr
2. Total Dec'26 target impact to achieve are 1.8K sellers, 49.7K ADO and 435.4K ADG
3. Total projected CPO is at $0.05 except SG CPO of $0.18 is relatively higher due to higher ABS of $25 (MY $12, PH: $6,TH $9, VN: $4), which fulfills GMV targets through lower order volumes

[Initial Vendor feedback to program] We've launched the program with 31 partners. Initial vendor feedback is positive with the program and vendors' sales teams are motivated and started to pitch

- We've launched the program with 34 partners, including 11 of 3PF vendors, 8 of ERP vendors, 4 of association and other ecosystem partners such as media/ payment etc
- **Initial Vendor feedback to program:** generally positive and vendors' sales teams are motivated and started to pitch. Potential blocker: 1) SHP base commission is higher than TTS which impacts seller willingness to join SHP; 2) execution wise SHP acquisition wishlist only have TTS shop ID/ shop name and harder for vendors to match

[Acquisition Progress Update] As of 13 Apr (~2 weeks after launch), the program has generated 736 leads to newly join SHP and in process for onboarding process

1. Total of 4.8K new sellers to acquire from TTS via 3PF vendors, with PH having the highest potential ADO of 70.3K followed by TH with 62.2K

2. Next to cover these sellers with tiered approach:
   a. Standard package for all new TTS-only seller acquisition
   b. Target seller / high ADG seller acquisition: to work with each local market to develop targeted hitlist (e.g., SG focusing on top 80% TTS GMV sellers, MY focus on P1-P3 TTS acquisition program sellers)

[Proposed program mechanism] Proposed mechanism to benchmark TTS for 3PF vendor referral incentives and leverage existing CB counter TTS package for sellers

Incentives to sellers (deep dive next slide)			b **Leverage SHP existing CB initiatives:** 1) CB acquisition package for new to SHP sellers (3 month commission waiver + conditional PRM support) 2) Counter TTS program for targeted TTS only sellers	3 month mandatory fee waiver for SG/TH/PH/VN, MY incentive is higher at 4 month commission fee waiver New Merchant launch plan where sellers receive “product discount coupons” for every milestone achieved.	Better vs TTS

- We aim to acquire with incentives for both 3PF vendors and sellers
  a. **3PF vendor referral incentives:** We will set 2 tier of incentives for 3PF vendors to push for acquiring high ADG sellers/ SHP target list sellers
  b. **Seller incentives:** leverage existing new seller/ counter TTS package to attract sellers

Notes: Platform data as of Apr 10, with new CN CNLS seller list.

1 **26 Mar** regional CNLS ADG multiplier is expected to **increase by 0.01x and land at 1.55x, consistent with platform trend**, mainly driven by growth in **MY& VN&PH:**

- 1.1 **MY: increased by 0.05x,** outperform platform trend, mainly due to TTS slowdown because of lower content supply and purchasing intent after Ramadan.
- 1.2 **VN: increased by 0.05x,** growth driven by platform EL push; CNLS grows less due to higher share of FMCG, which receiving less rebate in SHP vs. TT (e.g., Corlorkey, Top 1 in TTS)
- 1.3 **PH: increased by 0.04x**, in line with platform, due to push for high ABS items (ADO multiplier is flat)

2 **26 Dec CNLS SOB is projected to land at 1.56x and continue exceeding the platform 1.33x by 0.23x**, push levers incl. ensuring top seller CIR share and driving price competitiveness.

[Appendix. CNLS ADO SOB] Mar regional CNLS ADO multiplier expected to land at 1.27x, outperform platform trend (dropped by 0.01x), lifted by MY TTS slowdown after Ramadan and TH EL brand sellers

Notes: Platform data as of Apr 10, with new CN CNLS seller list.

1 **26 Mar** regional CNLS ADO multiplier is expected to **increase by 0.01x to 1.27x, outperform platform trend** (plt decreased from 0.89x in Feb to 0.88x in Mar), mainly due to:

- 1.1 **MY: increased by 0.03x,** mainly due to TTS slowdown in MY because of lower content supply and purchasing intent after Ramadan.
- 1.2 **TH: increased by 0.02x,** outperform platform trend with strong performance from EL sellers

2 **26 Dec CNLS ADO SOB is projected to land at 1.32x and continue exceeding the platform 0.87x by 0.45x**, push levers incl. ensuring top seller CIR share and driving price competitiveness.

Highlight

- **Reg CNLS is working together with RBP on CN brand attack, covering two pieces 1) on-SHP management; 2) not-on SHP acquisition** *(WIP, update in next meeting)*
- **For on SHP management**
  - **29 brands** are with **clear regional ownership**
  - **7 brands** currently have **no regional owner**, managed by local CNLS/local cluster, aligned with RBP to take regional owner
  - **5 brands** currently managed **by both RBP & CN**, discusssing with both teams to **assign single ownership**
- Next to complete brand account ownership assignment and confirm authorizied shop list, ETA Week 0413

[CN brand attack- on SHP brand mgmt.] Brand prioritization is based on brand popularity, conversion and growth rate; next to refine prioritization based on brand collab. willingness and SoB, and align on growth target

Adoption rate reach 79.4% in Mar (+8.7pp, local overall adoption is 77.1%) due to integrated ISV sellers rollout by batches and regular new seller rollout

- 6.5% self-toggle off rate is lower then local (overall 8.1%), and 4% of true sellers are non-integrated ISV sellers remain excluded from rollout
- Most of the medium / poor performance sellers are rolled out and kept toggle on

Further drive the adoption rate (Toggle on%) to reach 85% in Jun via the following actions

1. **[On going]** force toggle on the sellers who never used and with medium / poor CRR & CRT as they have lower CSAT then shopbot CSAT. (Next Batch: 20 April)
2. **[On going]** continue whitelist all new Non-ISV sellers who are driven by ICB / SAI / LT by batches to cover more potential poor seller
3. **[On going]** whitelist ISV sellers by batch and complete in Jun, the medium / poor CRR & CRT sellers will have higher priority
