Bi-Weekly CB-PM Catch Up

14-Mar-2025

Follow up from last meeting

No.	Market	Topic	Action Items	PIC	Status
1	CB	Shop chatbot rollout	• Track the overall performance • Track the overall seller adoption rate • Track the CNLS seller adoption rate	Amber Xu	Pending Reg BI pull data, will share more on next PM meeting
2	CB	Seller chatbot LLM	Check CN sellerbot LLM rollout status and performance	Amber Xu	As shared on ops meeting. CN sellerbot LLM will be a mix of compass（shopee self developed LLM) and 3rd party LLM (eg GPT,qwen,llama). Will keep monitoring on bot performance once lived
3	CB	Order split for furniture	Run-through business case with Christin and plan for cleaner solution for both seller and buyer	Qingqiang	- Already aligned with Christin, David and Supply Chain team that to support parcel split of 1 quantity order item is a long term solution - BPM will raise a P1 feature request to RSX to evaluate

Agenda

Key Initiatives Discussion & Update [For Read]

1. CNLS seller feedback on Marketing tool
2. Shopbot LLM Rollout Status Update
3. CB BUG SLA review - Feb

Agenda

Topic: CNLS seller feedback on Marketing tool

Mkt Tool | In order to understand CNLS seller perception and pain points on marketing functions, interviews were conducted with 6 sellers of mixed profiles

Background

- Interviews were conducted with 6 CNLS sellers in order to get an understanding of shared seller perceptions on Shopee marketing functions
- Marketing functions discussed include content related marketing functions (livestream/video/AMS) and classic marketing functions (seller discount, bundle etc.)

Profile of Sellers Interviewed

Seller Name	Seller Type	Key Category	Adoption on Marketing Functions				
			Summary	Video	LS	AMS	Classic Mkt Tools
中南万象(厦门)贸易有限公司	UST	Home & Living; Sports & Outdoors	Active livestream user with own stream staff and infra	Low	High	Low	Generally high, except for Add-on/Bundle/Shipping Fee Promo
深圳市蓝狮科技有限公司	EL	Mom & Baby	Active adopter of content related marketing across	High	High	High	
惠州市腾牛商贸有限公司	Fashion	Watches	Active adopter of livestream and video	High	High	Medium	
上海千岛五象电子商务有限公司	Lifestyle	Home & Living	Active livestream user with own stream staff and infra, less reliance on AMS	Medium	High	Low	
达尔立安(广州)品牌管理有限公司	FMCG	Beauty & Skin Care	Relatively conservative user on content related marketing	Medium	Low	Medium	
清迈贸易网络科技有限公司	MT	Mobile & Accessories; Home & Living	Minimum adoption on content related marketing	Low	Low	Low	

Key Findings

1. Most pain points are from **content related marketing functions**, with **minimum feedback on classic marketing tools**
2. Benchmarking TTS, Shopee functionality is mostly on par, **yet data support is often mentioned by seller as an area where TTS outperforms Shopee** -- TTS provides more comprehensive and sophisticated data especially in livestream and video to facilitate seller operations
3. On AI capability needs, majority of seller asks focus on **efficiency improvement of Livestream**, followed by Video and AMS

Mkt Tool | On Video, traffic and conversion are the most heard pain points, interest in Video Ads are shared among sellers; Benchmarking TTS, gaps lie in video generation tool and data support

Video (Detailed Seller Feedback Summary)

	Perception on Shopee	Benchmark against Competitor	AI/Automation Needs
Summary	• **Traffic and conversion** is the most heard pain points; **Less voices heard on operation** such as video making, publish and refinement. • Most heard pain points: a. **Traffic and conversion** is unsatisfactory b. Cannot invest in **Video Ads**	• Most sellers are publishing videos on TTS as well, some on LZD • TTS outperforms Shopee in: a. **Video generation** functions, e.g. filter effects, video auto generation b. **Data support**, e.g. lack of data by each video on Shopee	• While with preliminary understanding on AI for video, interests on AI video from interviewed sellers remain **neutral** • AI functions mentioned that could be helpful: a. Before video publish: **generate captions, voiceover, recommend tags, cover** b. After video publish: **video diagnosis and optimization advice**
Seller Voices	• **中南万象**:“我们试过让主播去线下拍摄然后传短视频，人力投入比较大，但是效果并不好，转化差；可能是因为没有投流” • **上海千岛**:"我们短视频量铺得不少，但流量一般““短视频广告没办法精细化做，没办法通过人群包、人群画像去投放” • **达尔立安**:“现在没法给短视频加热呀” • **蓝狮**:“现在传视频主要是为了做任务拿补贴，如果没有的话估计就不传了，转化不太好”	• **千岛五象**:”TK做的比较好的有滤镜特效、一键生成这些视频剪辑功能“ • **达尔立安**:“TK的优势，有一个是他们短视频数据更全面，会展示比如转化相关的数据、用户行为的数据，用户在哪一步加购了“ • **清迈**:“我们TTS和LZD短视频功能用的比较多，shopee比较少；Shopee的手机端看不到短视频的转化数据，影响对短视频效果的评估和后续策略的制定“	• **腾牛**:”没怎么用AIGC工具，主要用平台的剪辑工具“ • **达尔立安**:“对AIGC短视频没有怎么使用过，目前我们有专门的视频剪辑部来做短视频“ • **上海千岛**:“对AIGC短视频有了解过一些工具，希望有自动生成本土字幕/音效和自动解说短视频的功能“ • **蓝狮**:“希望可以支持文生图做封面，根据文本信息的输入自动生成，目前不管是自动还是手动选帧都不够精美和有吸引力”

Key Next Steps:

P0 - Traffic and conversion

1. To validate seller feedback on traffic and conversion issue by data analysis, meanwhile work with Mkt to provide seller video bible to educate on best practice
2. To follow up on latest roll out plan for Video Ads -- sofar still open to KOL only for performance analysis, high-level timeline to open to seller in Q2

P1 - Data support and AI capability

1. On *performance metric by each video* - (1) App: to expand seller survey pool to evaluate biz impact and request accordingly; (2) PC: to follow up on launch for all regions within Q2
2. To follow up on DC side AI video seller tool plan, and work with Mkt to trial on CB-developed AI generation tool in CN SIP to evaluate performance

Mkt Tool | On Livestream, sellers are more keen on efficiency enhancement features such as data monitor and AI stream; TTS is considered to outperform Shopee especially in data supply

Livestream (Detailed Seller Feedback Summary)

	Perception on Shopee	Benchmark against Competitor	AI/Automation Needs
Summary	• Unlike Video, seller feedback for LS are more on **operation functionalities**, less on traffic & conversion • Most heard pain points: a. **Insufficient data support** b. Need more **auto/AI tool for efficiency improvement**	• Most sellers are streaming on TTS as well, some on LZD • TTS outperforms Shopee in **data support** -- providing comprehensive monitor and tracking functions	• Sellers are keen on livestream **efficiency enhancement via AI/automation capabilities** • Key asks include: **a. AI streamer** b. **AI customer service** to auto reply buyer questions during streaming c. Auto generate **streaming script**
Seller Voices	• **千岛五象**:“现在用户观众行为分析较少，比如用户的停留、流失、来源渠道等分析” • **腾牛**:“数据指标太简单了，比如订单里就没有剔除退款/退货订单”“	• **中南万象**:“TT的直播广告数据指标很全，而且他们还支持看小时级别的直播间数据，这个功能可以方便我们去看指导直播间的运营策略，比如调整主播话术” • **千岛五象**:“TK和shopee功能好像不是差很多，但是shopee在数据上可以做得更细致一点，现在用户观众行为分析较少，比如用户的停留、流失、来源渠道等分析；TK后台还有optimizer，给每个直播优化建议“	• **中南万象**:”因为场地、人力投入资源有限，想用数字人直播同时在一个站点多个直播间做直播，但是平台不允许“ • **腾牛**:“希望可以通过ai智能回答评论区的简单问题，例如发货等“ • **蓝狮**:”如果可以有预先录入FAQ，直播间自动回答用户问题就挺好“ • **千岛五象**:“如果可以做虚拟人直播，就可以节约直播成本，提升直播时长，做到24小时播；自动回复评论区也很重要，可以提升卖家直播效率”

Key Next Steps:

P0 - Data Support

1. To summarize key metrics needed and request to PM after (1) feature analysis on TTS; (2) further seller discussion on top needs

P1 - AI capability

1. To direct sellers to raise AI streamer whitelist request to Mkt and keep checking with PM/Reg on future direction and policies for digital streamers
2. To follow closely with PM on (1) AI bot -- now under proposal stage, high-level planning to start with ID first, ETA TBC; (2) AI streaming script -- now under trial in ID and VN to limited sellers

Mkt Tool | On AMS, asks focus on functions to facilitate KOL sourcing and support commission lowering; Confusions are shared among sellers on overlapped order from different solutions

AMS (Detailed Seller Feedback Summary)

	Perception on Shopee	Benchmark against Competitor	AI/Automation Needs
Summary	• Most heard pain points: a. Cannot **lower commission rate** b. Challenges in **identify suitable KOLs and reach out to KOL** (e.g. cannot batch send messages to KOL) c. Unsatisfactory **KOL quality** -- responsiveness, fans size, fulfilment quality d. **Overlap in order attribution** from different marketing solutions	• Most sellers are also using TTS AMS, some on 抖音/LZD • TTS AMS functions are considered similar with Shopee, except that **TTS free sample shipment experience is better** as free sample order is integrated with normal order shipment	• **No strong interests** heard from sellers, potentially helpful function desired is **auto recommend KOLs based on seller profile** to minimize seller efforts in selecting KOLs
Seller Voices	• **蓝狮**:“很多达人质量很差，即便达人ins粉丝高，最后他给我们发堆的却用shopee video的账号”;”比较愿意去用第三方(达秘)找达人，因为可以批量筛选和建联” • **达尔立安**:“达人拿到样品后，交付无意义链接” • **千岛五象**:”直播、联盟营销、站内广告这些的订单有重复，没办法知道单一渠道的转化表现“ • **中南万象**:“直播和广告订单有重复”;“不能操作降低佣金” • **腾牛**:“希望佣金率可以下调”	• **腾牛**:“TK的免费样品发货方便，已经跟普通订单打通“ • **中南万象**:“不用免费样品功能是因为不太方便，还不如让达人低价下单商品，这样我们方便追踪订单发货信息” • **清迈**:“免费样品没有跟普通订单打通，操作起来也比较麻烦”	• **达尔立安**:“如果平台可以智能推荐达人，哪些达人适合带我的货，就可以大大减少我自己找达人的成本，我会用平台推荐达人列表再进行一些筛选”

Key Next Steps:

P0 - Support Lowering Commission

1. Support lowering commission is now under dev, to follow up on launch in Q2

P1 - KOL Sourcing and Order attribution concerns

1. On KOL sourcing, to (1) work with Mkt on sourcing external capabilities that facilitate seller on reaching KOLs; (2) follow up with PM on KOL auto recommendation plan; (3) work with Mkt to feedback KOL quality issues to local team
2. On seller confusions in order attribution, to work with Mkt on seller education

P2 - Integrate Free Sample with Normal Order in Shipment

1. To re-evaluate business impact and re-raise to PM for support -- request previously deprioritized by Reg for limited impact

Agenda

Topic: Shopbot LLM Rollout Status Update

Shopbot | 1P Sellers Plan to Fully Rollout LLM Shopbot by End of April and CB MP sellers Shopbot Rollout Has Kicked Off the Criteria Discussion

By March 1st	1P Sellers			Marketplace Sellers	
	CB SCS Model	CB Lovito Model	SIP Model	MP Model	Seller Adoption
ID	-			LLM	1 48.70%
BR	2 LLM+NLU	NLU	NLU	LLM	10.20%
VN	LLM+NLU	NLU	NLU	LLM	11.50%
PH	LLM+NLU	NLU	NLU	LLM	30%
SG	NLU	NLU	NLU	LLM	Just start greyscale
MY	NLU	NLU	NLU	LLM	Just start greyscale
TH	NLU	NLU	NLU	LLM	whitelist testing
TW	NLU	NLU	NLU	LLM	whitelist testing
CB	-			LLM	3 N

1 The local shops (including CNLS shops) are whitelisted under local team plan

2 Currently, for 1P shops only CB SCS's PH/BR/VN is using LLM, others shops are using NLU (old rule based) model
All SCS/Lovito/SIP shops are preparing for the LLM rollout, with the detailed timeline as follows:

- **By March 19** - A/B test preparation, solution review & customization, UAT
- **From late March to early April** - A/B testing, LLM performance evaluation
- **Late April** - fully rollout for SCS/Lovito/SIP(TBC, depends on A/B result)

3 The CB MP seller shopbot rollout discussion was **kicked off on March 12**. CB ops team will be the PIC of setting rollout criteria.

- The CB MP seller shopbot is under development and will be ready by end March. Initially, it will be set to toggle off and hide on FE by default, and once the rollout plan is confirmed, it will be toggled on accordingly

Shopbot | SCS and MP Shopbot Has Different Focuses and LAC Strategies, which Lead to Higher Deflection Rate and Lower CSAT for SCS Shopbot

2025 Feb	Chat Deflection Rate		CSAT	
	CB SCS	Local MP	CB SCS	Local MP
ID	/	26.50%	/	83.50%
BR	1 77.40%	25.60%	48.30%	2 56.60%
VN	70.40%	36.50%	49.76%	73.40%
PH	76.60%	48.00%	57.23%	61.90%
SG	52.40%	/	41.92%	/
MY	60.90%	/	57.18%	/
TH	51.80%	/	46.71%	/
TW	67.90%	/	55.47%	/

1 Chat Deflection Rate with higher priority for CB SCS sellers vs. local MP sellers as SCS focus on cost efficiency while MP emphasise buyer experience

1 Therefore, CB SCS and Local MP have different live agent control strategy. Compared with SCS, buyers are easier to find live agent when chatting with MP sellers in the follow scenarios, which also lead to **higher deflection rate of SCS sellers**:

Scenario	Local MP	CB SCS
Allow direct chat with agent/seller under FAQ card	Y	N
Auto transfer to agent/seller when buyer down voted	Y	Only PH/VN
If buyer has been transfer to seller within 1 day, auto transfer to seller	Y	N
Directly transfer to agent/seller when intent is unclear	Y	N

2 The deflection rate and CSAT are like the two ends of seesaw. Since SCS shopbot has blocked sellers to chat with seller in above scenarios, sellers are more easily to feel frustrated and give bad rating with **lower CSAT of SCS sellers**

Suggestion for next step

Measure the performance of sip launch, analyze different seller type csat data to decide the launch plan for CB MP sellers

Agenda

Topic: CB BUG SLA review - Feb

BPM Bug SLA Overview (2025.02)

1. Compared to Jan
   - Feb's ticket number was higher (728 vs. 744)
   - Feb's performance was lower than expected (9.68 vs. 2.32) due to a few extreme cases that heavily impacted the overall metrics

2. Among the 4 Highest/High tickets exceeded SLA:
   - 2 of them were changed from Low/Medium Priority to High Priority. Meet High Priority SLA after changed
   - 2 of them were slightly longer than SLA, taking 35~45 minutes for 1st handling

- Among the 25 Medium tickets exceeded SLA:
  - 16% are indeed exceeded SLA, 28% are due to internal transfer
  - Will further improve the Medium tickets performance after Highest/High tickets performance get stable

SPS BPM SLA Overview

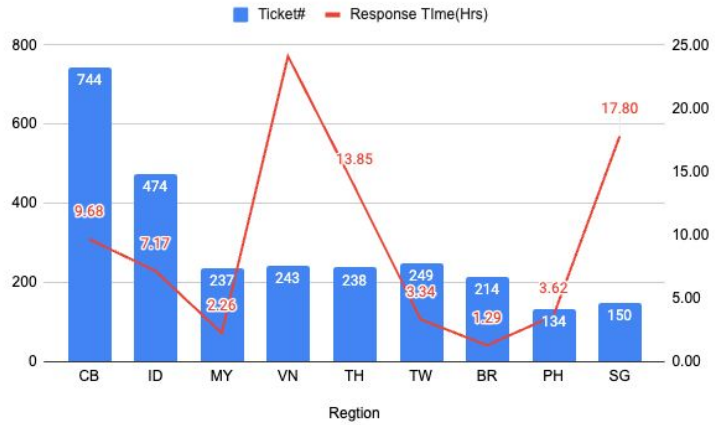
Priority	# Ticket		# Avg handling time (hr)				# Exceed SLA		% Exceed SLA	
	Jan	Feb	SLA	Jan	Feb	MoM	Jan	Feb	Jan	Feb
Highest	5	2	0.5	0.07	19.20	27331%	1	2	20.0%	100.0%
High	21	11	0.5	0.18	0.19	4.60%	4	2	19.0%	18.2%
Medium	297	346	8	1.72	2.29	33.06%	19	25	6.4%	7.2%
Low	401	380	12	2.75	16.21	489.63%	21	49	5.2%	12.9%
Lowest	4	5	24	19.99	42.22	111.19%	3	1	75.0%	20.0%
Overall	**728**	**744**	**-**	**2.32**	**9.68**	**317.42%**	**48**	**79**	**6.6%**	**10.6%**

Missed SLA Reason	Ticket #	Ticket%
BPM internal transfer	7	28%
Public holiday	7	28%
Different SLA calculation method	5	20%
Wrong info reported	2	8%
Indeed exceed SLA	4	16%
Total	25	100%

** Data might be slightly different with previous as ticket priority might be changed after checked by DC Team*

Comparison with Local Team Bug SLA (2025.02)

- CB's overall SLA is behind in ID/MY/TW/BR/TH
- CB switch most of resources to high/highest ticket
  - Only CB is shorter response time for higher priority issues
  - Response time for Highest issue longer than expected due to extreme cases that heavily impacted the overall metrics



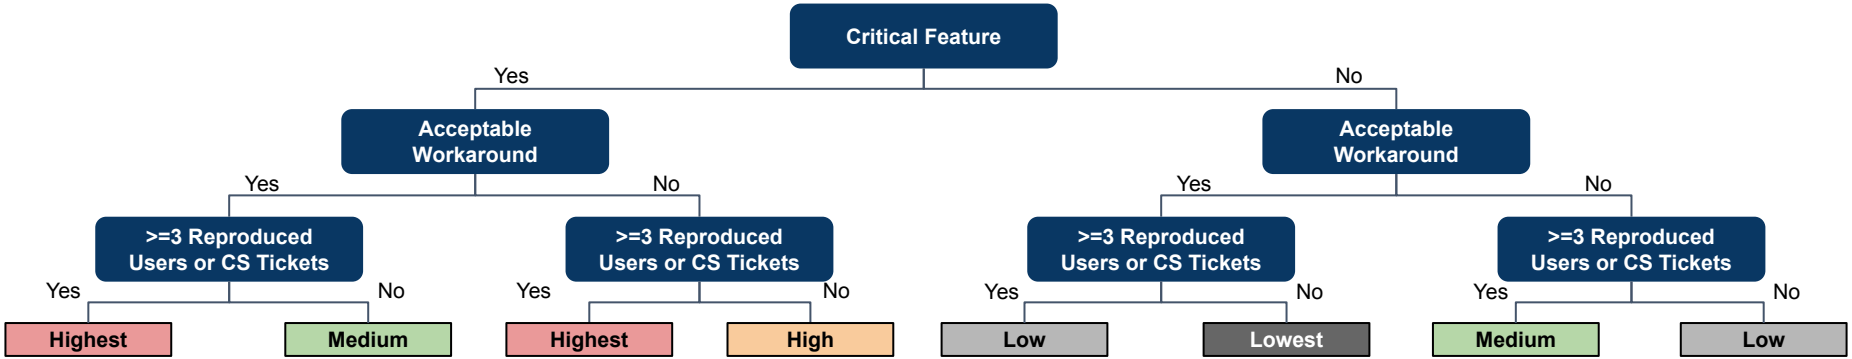
Ticket#/Response Time by Regions

Region	Highest	High	Medium	Low	Lowest	Trend
CB	19.20	0.19	2.29	16.21	42.22	
ID	0.00	20.84	9.65	4.92	1.85	
MY	0.12	22.33	1.91	1.30	0.11	
VN	-	64.49	34.90	11.44	0.00	
TH	0.01	17.97	7.43	17.16	0.14	
TW	11.71	22.51	1.86	3.05	-	
BR	0.00	0.86	1.16	1.97	1.80	
PH	-	0.23	12.48	0.48	0.78	
SG	18.04	19.54	31.92	13.62	2.27	

Response Time by Priority for Each Region

[Appendix] Bug Priority Definition - Over Escalation is welcomed

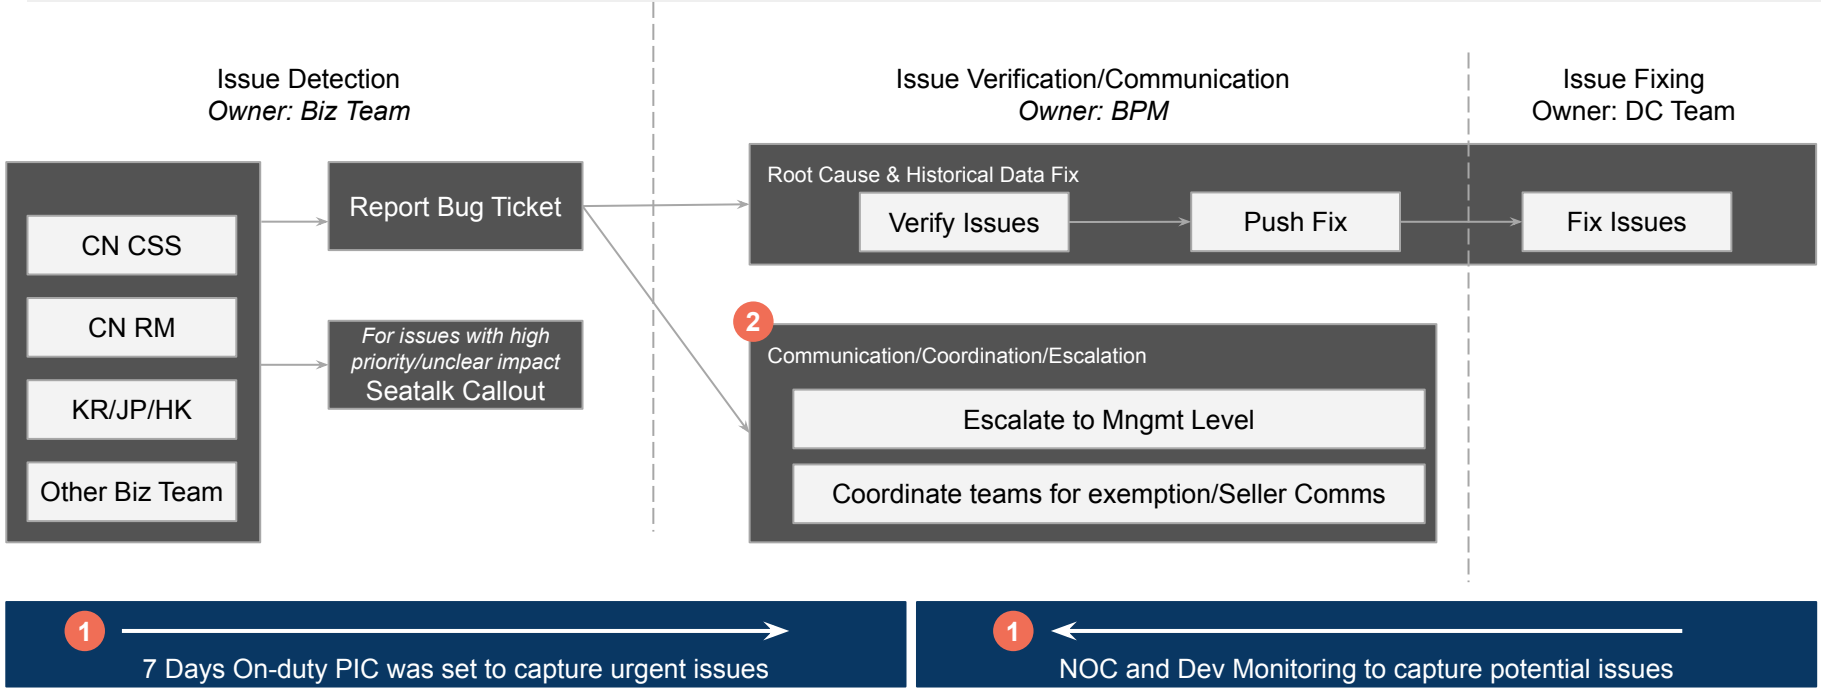
- Overall, will follow Reg's Priority Definition
  - For issues have monetary loss, will adjust up to High/Highest Priority even though it's Medium Priority using Reg's Priority Definition
- Ask BPM team members to adjust up Bug Priority if received similar issues during a short period



Criteria	Description
Critical Feature	- [Critical](#) **pages/button/trigger point/flow/process** which blocks main user experience - **Buyer/Seller FE issues - E.g**. UI/UX, misleading FE translation - **Monetary Loss**, **Price Related** or **Blocking the Whole Internal Process**
Workaround	- **YES:** Other ways to do the same thing easily - **E.g.** Access via PC for seller, kill App - **NO:** Not intuitive or not a regular behavior **- E.g.** Update App version, change network connection, reinstall App, relogin, clear cache
Impact	- **# Reproduced Users/CS Tickets >= 3** (within 48h) - **Platform-wide issues affect all users will be super urgent handling**

[Appendix] P0/P1 Bug - Escalation Process

1. Potential high priority issues will be captured by two new ways (from biz team/DC team)
2. P0/P1 Bugs Escalation SOP to make all stakeholders more clearly about the bug fixing progress



[Appendix] P0/P1 Bug - Escalation Channel

- Escalate the issue using below channels to push bug fixing and make CB management level know the bug status
- Highest/high issue here refers to P0P1 issue that need Management Level to pay attention, e.g.: affect profit,PR/Legal risk,affect buyer experience

Channel	To Whom	When	Description
Seatalk	SPS	Highest/high issue confirmed by CB BPM and need SPS to check ASAP	- Team Leader sends the issue details to the seatalk group [[All MKT] PS Critical Issue Review] and tag @lijen.ong (the team leader of SPS) to ask help
	NOC	Highest/high issue confirmed by CB BPM and need fix ASAP	- Send issue details to the seatalk group [NOC - CB] and tag @wenyu.zhi (the team leader of NOC) to ask help
	Shuning Wang	Milestones during bug fixing, incl. but not limited when issue is reported/fixed	- Ask your team Leader to tag Shuning in Seatalk Group: CB BPM Lead
	JJ/JH/Ian	Milestones during bug fixing, incl. but not limited when issue is reported/fixed	- Ask your manager to tag JJ/JH/Ian in Setalk Group: ● BPM With Jianghong ● BPM With Ian
Incident Report	Recipient List	Any time when highest/high issue is identified	- If CSS send the warning email, can directly reply the email (details can be found HERE) - If CSS does not send the warning email, draft one to Recipient List
CB Daily Issue Tracker	Recipient List	Any time when issue affected seller/buyer experience is identified	- Fill in the gsheet sent in the Seatalk Group [CB Daily User Experience Tracker] daily following the guidance in [Raw-new] tab - BPM PIC @jiacheng.liu will send out the daily email
