KRJP Bi-weekly agenda

1. **Overall Performance**
   1a. PnL performance
   1b. OKR performance

2. **For Updates**
   2a. Commercial - JP H2 New Seller Inbound Channel (inorganic) Update (Hongkeun)
   2b. Operational - VN KYC Issue Update (Joanne)

1a. Topline

KRJP Jul Topline : KR/JP will fall short of targets with 93%/106% ADO RR(projected MoM -8% degrowth) however without VN buyer KYC issue, would have closed with KRJP combined 102% ADO RR

Data 7/1-7/8

		Jul 2024	Jun 2025	Jul 2025					YTD YoY % vs. PLT (%p)	Aug 2025
						Projected				
		Y-1 actual	M-1 Actual	Projected	Target	RR	MoM	YoY		Target

Highlights

1 **KRJP Topline** : KRJP combined Jun MoM -17% showing de-growth(Jul MTD vs. Jun same period) **growing slower than PLT/CB by 14%p/15%p respectively mainly from VN buyer KYC policy roll out bound SLS channel toggle off -> without would have hit target with 102% ADO RR**

- Slow 7/7 in two markets(VN 16%/TH 90% D-day order RR) -> *(TBC) working with VNCB on the recovery plan*
- **As of 7/10, the KRJP VN SLS channel is toggled ON for all sellers with with hard block** feature(e.g. Buyer cannot checkout unless KYC info filled) and expect ~50% order recovery

2 **KRJP MP PC2 + SLS PnL**: KRJP PnL RR is 67% where we show different trend as before; 1) 360k USD less PRM spending(vs. M-1 same period) mainly from VN channel toggle off impact on 7/7 yet 2) due to slow 7/7 performance in VN/TH we couldn't make up this shortage from Revenue

- Show continuously good SLS PnL with 100% PPO RR but from the remaining July onwards revenue may be impacted from lower VN topline (See section 2b.)

[Reference] KR is lagging by 6%p in '25 YTD ADG vs. PLT with biggest gap in BR and VN

KR-VN have -20%p slower growth vs. PLT for ADG YTD YoY. In addition to KYC issue from July, **sellers' paid ads-driven traffic decrease is one of main reasons**. ADG opportunity loss of 20.4K USD was mainly caused by a drop in traffic, with 93% of the loss (-19.9K USD ADG)coming from KR sellers' paid ads-driven traffic. Without this traffic drop, the gap would have narrowed from -20%p to -5%p for ADG. The traffic drop was mainly due to two reasons:

1. **Top 3 UST brands' reduced spending** : Ads spending by the top 3 UST brands dropped by -57% YoY, contributing 1.4k ADO/ 14.5k ADG loss, due to their post-launch budget cut and TTS budget increase

2. **Other brands increased spending but CPM grew faster so traffic declined :** While KRVN overall paid ads spending rose by +13% YoY, a steeper +23% rise in CPM limited the corresponding growth in the actual exposure, driving a -7% YoY decline in paid traffic. This traffic loss directly contributed to 394 ADO/ 5.3k ADG decline

	KFBS ADO	2,423	2,064	1,527	1,593	95.9%

Notes
1) OKR items without EOM projections, RR is based on MTD actual vs. Target

Highlights

KRJP Topline related OKR: 1 Until now KRJP Topline OKR shows on track performance vs. CB yet due to slow 7/7 coupled with VN SLS channel toggle off, likely to miss target for topline as well

KRJP Key growth driver OKR:

2 JP new seller # is lagging due to having "less" M-1 leads to convert due to homepage error (apprx. 330 leads) -> addt'l push(cold calling, email etc) are in place and ADO % still strong

3 LS Due to VN KYC issues, two UST sellers had to cancel their LS/VDO events with KOLs originally scheduled for 7/6–7/7(estimated 15% of July's target GMV) -> *(TBC) aligning with VN to recover the loss through upcoming mid- and end-July events*

4 LFF OKR on track and LFF% grew (26% → 36%) mainly driven by VN (14% → 45%) and TH penetration (32% → 40%)

- But even with VN removed, KRJP LFF OKR RR is 113% to target (LFF% w/o VN grew 31% → 35%) Jun-Jul
- TH LFF % grew from new SKUs (67% of growth)

5 **Logistics OKR:** all show good trajectory vs. target

2a. JP H2 New Seller Inbound Channel (inorganic) update (Hongkeun)

JP Inbound (inorganic channel) performance in H1 : Inbound channel grew YoY +22% in new seller no. and +74% in ADO. Also, by combining KR+JP agency in May, ads efficiency and cost improved

Background: 1) Since both KR and JP run Ads primarily through global platforms (on Meta, Google), we determined that consolidating under a single agency would be more efficient from May. 2) The proportion of traffic and leads driven by Ads (inorganic), 80%, out of inbound, is higher compared to KR so we saw a clear need to optimize Ads efficiency.

Key Highlights:
1. Overall inbound YoY performance in H1: New seller number YoY +22%, ADO YoY +74%, Cost per Acquisition YoY -23%
2. Ads efficiency since KRJP ads agency consolidation : Cost per Acquisition MoM -27%, New seller number +71%
3. (Ref.) 81% of the JP new sellers number and 42% of new sellers' ADO came from inbound this H1 (ADO% shrank due to Outbound Community channel sellers' high ADO/seller growth in PH market)

Inbound : Inorganic + Organic

Inbound H1 YoY Performance

1

	YoY	3%	-3%p	549%	31%p

3

*Data : H1 for 1Jan~30Jun

JP Inbound H2 projection : For maximum topline growth with reasonable cost efficiency, the suggestion is to increase advertising spend by 15% vs H1 in line with H2 seasonality of Japan market's CPM & CPC increase

Key Highlights: When compared to not increasing the spend, **by increasing advertising spend by 15% in consideration of seasonality, the impact to total JP overall pnl is -0.03%p for the growth of +27%p in Dec ADG.** Also, Inbound channel's contribution to full year new seller number will be 81% → 78%, and contribution to total (or new seller) Dec ADO will increase 42% → 48%.

1. **[Option A : +15% vs H1)** additional 271 new seller sellers (+7%) and additional 260 ADO (+10%) expected over the baseline by end of the year, and If Ads spending exceeds 15%, the efficiency per ad is expected to drop significantly, making Option A the more cost-effective choice
2. Although ADO is projected to increase by 12% compared to the baseline, CPL is expected to increase by 20%
3. Baseline could be an option if the direction is to sustain the current pnl level (instead of maximizing topline growth)

Next step is also to verify sellers' lifetime value to justify the cost per acquisition from another angle. Will share in the upcoming meetings

2H Total Inbound Estimation:

Recommendation

2025 Full Year Projection							
Full year total lead #	24,144	25,367	+5%	25,704	+6%	25,842	+7%
Full year total new seller #	3,951	1 4,222	+7%	4,268	+8%	4,279	+8%
ADO projection	2,568	2,829	+10%	2 2,885	+12%	2,905	+13%
ADG projection	$98,367	$101,837	+4%	$103,572	+5%	$104,598	+6%

**PC3($) PnL vs Baseline : Option A -1% / Option B -8% / Option C -17%*
**ADO per seller is 0.65 and lead-to-launch CVR is 18~20%, based on H1 trend*
**baseline(market benchmark) for Cost per Lead / Cost per Acquisition: $35~$40 / $200~$250*

2b. VN KYC Issue Update (Joanne)

VN KYC Impact : Timeline of events & difference in ADO/ADG/PnL projection if we choose soft or hard block

Context

- VN customs announced new regulation requiring buyer KYC ID information for import CC process effective 2025 Jul 9, with short notice.
- Because SHP did not have any stored buyer KYC ID, KR and JP temporarily toggled off VN SLS channel from Jun 5-10 18:00 VNT to avoid potential compensation cost if parcels got stuck during CC process
- KR and JP SLS channels **resumed Jul 10 18:00 VNT with KYC hard block feature, meaning** buyers must input their full names and buyer IDs in order to check out
- Orders created before Jul 5 will be intercepted and stored in transit warehouse, wait maximum 7 days to collect buyer info, then either ship out or ship back depending on whether the buyer info is successfully collected

List of Events and Timeline

Date	Event
26 Jun	VN customs 1st announcement about KYC to be mandatory
5-10 Jul	KRJP toggled off SLS channels
8 Jul	VN customs announced to have gradual implementation, with selected cc vendor only from Jul 9
9 Jul	KYC regulation took effect for the selected vendor (KR and JP vendor)
10 Jul	KR cc test shipment (confirmed cannot clear w/o Buyer KYC) > KYC feature release for Android and iOS > KR and JP reopen SLS with hard block for 100% of the sellers (18:00 VNT)
1 Aug	VN KYC Phase 2 will start, including all cc vendors and landway channels

Key Parameters

- KR Transit Warehouse storage capacity is max 10k (for KRVN ADO without KYC if soft block)
- Transit Warehouse Storage Fee (USD per Order)
  - KR : USD 0.8/order
  - JP : USD 0.03/order/day
- RTS Cost (Ship Back Fee from Transit Warehouse to Sellers) (USD per order)
  - KR : USD 3/order
  - JP : USD 5/order
- If soft block, %of orders with buyer KYC info = 10%
- If hard block, order drop off % will be 50%

VN KYC Impact : KR will opt for hard block option since VN customs require buyer KYC and hard block FY PnL is 94% better than soft block, though this reduces FY ADG projection by 17%

- KR '25 FY ADO hard block projection at 12.2k, 1 -21% vs soft block option
- KR '25 FY ADG hard block projection at 170k USD, 2 -17% vs soft block option
- KR '25 FY PnL hard block projection at -26.7k, 3 +94% vs soft block option
