CB FP&A Meeting_Initiatives and Updates

July 15, 2025

Agenda

- **CB Performance update**
  - Jun’25 Actuals Performance (as of Jun 11th)
  - Jul’25 Projection
  - H1’25 Review
  - Drill down of Jun’25 Performance
- **Key Initiatives Updates**
  - **All BU:** Local Ownership Initiatives (Workshop Feedback)
  - **Marketplace**: Commission Increase/Waiver Updates
  - **SLS**: [VN/PH] Customs New Regulations Status Update
  - **SLS**: [MY] BSC Push Impact

[Jun'25 Actuals]: CB ADO at 3.1mil, with EBITDA at +9.3mil; Lovito/SCS ADO RR 104% with a standalone PnL of 0.5mil

Table: CB Jun'25 P&L breakdown by BUs

With SLS true cost savings discount: Choice Seller P&L will be -3.7mil

Note: *TH SLS profit included net tax loss, Choice seller P&L reflected platform VAT cost.*

Key Highlights:

Topline:

1 Overall CB ADO runrate at **99%** and ADGMV runrate at **101%,** ADO below target mainly due to MY holiday impact and VN underperformance of low-ABS push.

P&L: **-0.7mil** vs Target

2 **MP PC2: -3.5mil** vs target primarily due to higher CIR% mainly from PH/TH higher PRM investment to boost topline and BR higher logistics rebate on pay day not factored into budget

- **SLS P&L: +2.7mil** vs target

3 mostly due to BR higher PPO from Fx appreciation and TH UE improvement

- **Choice P&L: +0.3mil** vs target

4 driven by P&L optimization through SG&A improvement

- **Local SIP seller P&L: +0.3mil**

5 vs target mainly from optimised marketing spend

- **LFF Standalone P&L: -0.5mil**

6 **vs target** mainly from increase of PHD warehouse pre termination costs vs budget and inclusion of inventory migration costs that was not in budget

[Jul'25 Projections]: CB ADO at 3.1mil, with EBITDA at 11.6mil, -1.6mil vs target

Note: KR refreshed projection after Friday

Key Highlights:

Topline:

- Overall CB ADO/ADGMV prj. runrate at **104%/103%** driven by increased PH and BR PRM spending

P&L: proj. to be **-1.6mil** vs Target

- **MP P&L**: **PC2 -5.6mil** vs target due to higher PH and BR PRM spend to boost topline
- **SLS**: **+3.6mil vs target,** from BR Fx appreciation and PH higher orders
- **Choice +0.6mil vs target** mainly driven by higher order projection

[H1'25 Actuals] CB H1 achieved 2.9mil ADO with 82mil EBITDA, +23mil vs target, +69mil vs last year H1

Key Highlights:

H1'25 Actuals: a growing trends MoM in Topline with a EBITDA of 82mil

1. Mar->Apr: ADO fall back due to withdraw CIR where generally EoQ to invest, and VN specifically due to PC2 optimization
2. May-> June: further investment in PH injection and BR FSV10 push
3. H1'25 vs budget: topline close to target, EBITDA **+23mil** (+0.5pp vs target) mainly from higher ads investment in Q1 and Choice P&L savings in warehouse G&A
4. H1'25 vs H1'24: ADO/ADGMV +7%/15% YoY (slower growth vs platform +26%), profitability largely improved by **69mil** (+1.6pp EBITDA%) mainly driven by 1) commission increase in SEA mkts, 2) choice seller P&L optimization, 3) SLS: FX appreciation and LM savings in BR

Agenda

- **CB Performance update**
  - Jun’25 Actuals Performance (as of Jun 11th)
  - Jul’25 Projection
  - H1’25 Review
  - Drill down of Jun’25 Performance
- **Key Initiatives Updates**
  - **All BU:** Local Ownership Initiatives (Workshop Feedback)
  - **Marketplace**: Commission Increase/Waiver Updates
  - **SLS**: [VN/PH] Customs New Regulations Status Update
  - **SLS**: [MY] BSC Push Impact

[Jun'25 Actuals] - Deepdive: MoM we are spending 8.5mil more to get +5%/+2% ADO/GMV growth, vs Target high GMV runrate driven by low margin TH and offset by high margin market MY

Table: CB Overall Jun'25 actual performance (vs Target, MoM)

Key Highlights:

#1: Why Jun GMV 101% runrate but EBITDA negative?

Key markets are MY/TH

1. TH drive up GMV higher runrate at 108%, offset by MY lower GMV RR at 95%, which shift market share by 1%
2. However, MY is more profitable than TH, leads to negative impact to P&L

#2: Why hasn't our profit increased as expected with the rise in GMV given positive P&L, both month-over-month and compared to our targets?

MoM: given volatile push trends: poor incremental ROI in MY/TH/VN/PH face heavier competition from TTS, two key factors

3. **(-) Spent on previous "cost free" orders**: MY/TH auto apply FSV and stackable vouchers
4. **(-) Low ABS push**: VN/PH push FSV0
   - **(+)** High ABS push: TH/PH

vs Target:

- We've already factored in the worsened ROI, hence -17% vs -131% of incr. ROI
- Still MY/VN understate the severeness of auto apply/low ABS push, with negative ROI but still within -50% threshold

[Jun'25 Actuals] - Deepdive PRM spending | All mkts investing more in PRM than TR% uplift except SG, where FSV0 PRM strategy is most effective at order uplift

Table: by Market spending allocation

Key Highlights:

Finding #1: We spend more on PRM than our increase in commission >>all markets push order growth except SG

Breakdown of PRM spend

- **MY:** Auto apply FSV
- **TH:** Voucher rebates
- **VN:** FSV0
- **PH:** FSV0 + high ABS voucher rebates

Finding #2: Auto apply FSV effective in increasing FSV orders%, but lower order uplift than FSV0

- **MY:** FSV orders +27%, while ADO uplift lower than VN/PH

[Jun'25 Actuals] - Deepdive by BU impact | However, the support to each BU is different, and combining commission increase + FSV0 push, lower ABS BU (SCS) grew less than other BU

	FSV0 order (%)	**25%**	38%	23%	18%	32%	12%	**38%**	60%	35%	26%	32%	19%	**13%**	23%	13%	8%	0%	7%
	ADO	**1,036k**	89k	129k	358k	412k	37k	**1,124k**	95k	146k	390k	436k	44k	**9%**	7%	13%	9%	6%	21%
	ADGMV	**6,278k**	207k	875k	2,269k	2,492k	349k	**6,690k**	199k	945k	2,387k	2,677k	397k	**7%**	-4%	8%	5%	7%	2 14%

Key Findings:

#1: The lower the ABS, the lower the topline growth factoring both commission increase + FSV- impact
#2: when ABS is closer, it depends on how much platform invested, e.g. PH LFF heavily reply on voucher/item rebates to boost

Agenda

Total	10.7m	5.9m	-2.0m	1.3m	1.2m	-1.0m

Problematic good | Problematic bad

Key Highlights:
Overall accuracy is improving, total gap within Jun'25 is within 5% threshold and EBITDA gap of -1.0m

ADO (Q2 vs. Q1):
ADO mostly within 5% threshold for Q2, improvement from Q1
1 To pay more attention to countries like VN/PH

- [TH/PH]: Spike in May due to platform PRM injection
- [VN]: Spike in May from platform PRM injection for low ABS push, dip in Apr/Jun from lower CB ADO penetration

SLS P&L (Q2 vs. Q1):
SLS also seeing slight improvement for most countries
2 To pay more attention to TH

- [TH]: Overachievement mainly from less tax loss
- [PH]: Overachievement from both orders and lower CC quotations

Overall view on EBITDA (Q2 vs. Q1):
Total EBITDA (SEA + TW) gap seeing less variance, from +10.7m in Jan to -1.0m in Jun

Spikes in Q2 mainly driven by MP PC2:
[SG]: Spike in Jun'25 from higher paid ads
[MY]: Spike in L2M due to PRM fluctuations
[VN]: Spike in May'25 due to PRM injection

Local Ownership Initiatives: CB FP&A to work with local on increasing visibility both ways, providing a preview of SLS P&L in advance while requesting for local's timely submission and clear insights

Context:
During the Reg FP&A workshop last month, CB FP&A had a sharing session with local teams. The objective was to build better collaboration with each local team given the higher frequency and interdependency we have with each other, and to gather feedback from locals on certain key challenges they face when dealing with CB

Summary:
The key challenges raised was **lack of visibility** and **alignment issues**, in terms of clarity and knowledge of CB future business directions or changes in P&L matters (e.g. SLS unit economics). Summary of each key challenge and follow-up actions below:

S/N	Key Challenge	Details / Examples	Follow-up actions	Status	Impact
1	**Lack of Visibility**	*Unclear business direction:* Local unclear on CB business direction (e.g. sudden 2% commission change)	CB team to provide heads-up on changes prior to management approval (vs. after it's been approved)	Ongoing Process	Better **accuracy** and **planning**
		Tight timeline: Local only have 1 day workaround for budget after receiving CB submission gap	CB FP&A to include an earlier preview of SLS P&L prior budget submission within their "all-in-one" file	Done	
2	**Alignment Issue**	*PRM split by BUs:* Locals received request from various CB BUs on PRM splits (e.g. CNLS/KRCB), but they do not drill down to CB granularity. Unable to provide insights on CB when there is a gap	Local FP&A and CB FP&A to cross-share and align on projection methodologies for key metrics; to align with CB BUs if level of granularity requested to Local FP&A is required	Ongoing Process	**Less errors made** each budget cycle **Less last minute changes** when BUs are more synced
		Different priorities: Misalignment between Local and CB BUs (e.g. MY Local may have fashion push, but Lovito's focus is for P&L improvement)	Local and CB team to sync-up immediately whenever there are any changes to Platform / Local / CB in terms of policies or business direction	Ongoing Process	
		CNLS projections: CNLS requested Local to provide projections, but Local FP&A unfamiliar with CNLS business	Local FP&A to work and align with CNLS team on projections, CB FP&A to help smoothen budget process, to consolidate CNLS projections from all local within "all-in-one"	Done

8	NNWH base commission / SLS discount change	TBD	TBD	Negative			✓		✓					TBC		TBC			3

Key updates:

- **#1 All mkts General Commission Increase in May/Jun** ***>> details in later slides***
  - **SG/MY/VN**: increase base commission for All seller type except FBS, **PH** increase from ALL seller type; **TH** increase for 3PF seller only
  - Choice baseline commission also increase together with normal MP sellers per transfer price guideline
- **#2 New to Site shops Commission Waiving** ***>> details in later slides***
  - **SEA + MXCOCL** launched in Jul
  - **VN:** Got green light from local, pending official email approval from local team. ETA to launch: Aug 1st
  - **BR:** To add counterfeit and anti-fraud criteria for LATAM sellers. Commercial team to align with local early next week. ETA to launch: Aug 1st
- **#3 NNWH base Commission / SLS discount change** ***>> details in later slides***

#1 Post May/June Commision Increase CB performance: to review by 3 aspects

#A: Do CB Topline Performance impacted?

>> truly impacted by commission increase, for SG/MY where local didn't increase and for VN/PH where both CB and Local increase while CB has lower ABS than local

#B: How much do Seller Increase Price to counter this?

>> To view from listing and selling price,

- **Listing Price:** indicate Seller price increase by 2-7%, slightly higher than commission increase%
- **Selling Price:** indicate of combining of seller increase price + Pltf PRM sponsored, less increase vs listing price despite still increase by 2-5%

#C: How is Seller Sentiment Reaction?

>> From listing speed and new shop opening perspective, most markets not impacted, except

- VN: CB SKU listing
- TH: 3PF shop opening

#1A: Post Commission increase - CB ADO% truly impacted by commission increase, for SG/MY where local didn't increase and for VN/PH where both CB and Local increase however lower ABS than local

Table: Platform ADO/ADGMV% by CB key BU changes

BU	Metrics	Period	SG	MY	TH	VN	PH

Key Findings:

For mkts where CB increase but local not, CB penetration dropped, i.e. SG/MY

For mkts where only 3PF increase:

- Little impact, i.e. TH, similarly when back then MY increased 3PF fee
- But with higher fee increased, 3PF hits this time round

For mkts that both CB and Local increase, CB impacted more than local, i.e. VN/PH
Impacted more than local despite both increased given low ABS

#1B: Post Commission increase - Price Increase: Overall listing price +2-7%, slightly higher than fee increase%, also has larger gap vs local in terms of listing price

Table: price increase across markets vs local same period vs fee increase%

Type	Mkt	BU	CB					Fee increase comparison vs local/reference				
			D-14	*D-7*	*D+0*	*D+7*	*D+14*	CB	ee Increase'	Local	CB vs Local	CB vs Fee%

	TH	3PF	3.45	3.81	4.56	3.96	3.69	7%	1%	13%	-6%	6%

1 3 2

Key Findings:

- Overall listing price **+2-7%**, and selling price increase mostly less than listing price
- vs Fee increase%: Slightly more increase
- vs Local listing price increase, but selling price impacted by FSV policy, varies by markets

Note: Listing Price using 20% of all listing items, Selling Price using average seller price as representative; Fee Increase defined as charge rate increase / (1+CIR%) as proxy

#1C: Post Commission increase - Seller Sentiment: Seeing New SKU Listings drop / New to site Shop # drop in VN/TH

Table: post commission increase CB new SKUs / new Shops onboarding speed comparison vs 2024 same period

Mkt	BU	CB New SKU Listings							CB New to site Shop						
		Daily new listing (2025)			Daily new listing (2024)			'25 vs '24	Daily new to site (2025)			Daily new to site (2024)			'25 vs '24
		Bef	Aft	Δ%	Bef	Aft	Δ%	Δ%	Bef	Aft	Δ%	Bef	Aft	Δ%	Δ%
MY	CB MP	694k	763k	10%	293k	291k	0%	10%	425	495	17%	435	237	-46%	62%
VN	CB MP	566k	606k	7%	473k	587k	24%	-17%	178	169	-5%	186	156	-16%	11%
PH	CB MP	520k	674k	30%	184k	209k	14%	16%	307	402	31%	178	178	0%	31%
SG	CB MP	723k	787k	9%	273k	234k	-14%	23%	413	424	3%	486	207	-58%	60%
TH	3PF	57k	67k	17%	13k	15k	15%	2%	67	38	-44%	18	22	25%	-69%

Key Highlights:

- **CB New SKU Listing:** Only VN seeing slower New SKU Listing compared to LY same period
- **CB New to site Shop #:** Only TH seeing a drop in new to site shop # compared to last year

Note: bef/aft defined as 28 days bef/aft fee change effective date; 2024 using last year same period

#2 [MP] Commission Updates | ~$1.4mil truly foregone comms revenue in Jun, ~1.1% of CB MP Revenue, ~7.7% of CB EBITDA

Table: Monthly Foregone Revenue Tracker (Jun'25)

					1			2							3	3	4	

*Note: **For LFF boosting initiatives, showing performance for FBS/3PF orders only.***
Not including HK/KR/JP incubation shops (long-term incentive). Foregone revenue calculated based on standard 3P SLS charge rate.

Key Highlights:

Total we have **~4.1k** shops on commission waiving program with **~$1.4mil** true foregone revenue. Foregone Rev MoM change mainly come from CNCB mobile category and MY Newly onboard FBS programs driven by higher topline

[Call Out #1] New special commission waiving programs from **July** (Set up and check done)**:**

- **Direct Selling (IDMY/VNMY) & CNSIP:** first 3 months 0% commission for sellers new to site, capped at 500 orders/shop/month.

[Call Out #2] Negative PC2 mainly from:

1. **PH Focus Brand Program:** Mostly are Beauty and Lifestyle brand shops. Higher CIR% coming from Voucher discount and FSV0 push to counter TTS, align with local direction.
2. **CN mobile category:** Mostly coming from negative PC2 from Xiaomi/POCO in PH
3. **PH/MY Newly onboard FBS Program:** Higher CIR% coming from platform GMV push through Voucher discount and FSV auto-apply initiative; worse than overall CB PC2 mainly due to foregone Commission
4. **VN FBS Boosting Program:** Higher CIR% from platform FSV0 push and Voucher discount. Aligned with PIC to add PC1% for sellers to be eligible starting from next batch

#3: NNWH Discount Review: both VN and TH suggested to increase base comm + keep SLS; VN timeline TBD due to KYC, TH ETA Sep after system enablement

Table: NNWH Discount in MP and SLS simulation

					>> suggested by local			>> suggested by local	

Key Highlights

VN: [Launch ETA: TBD with e-KYC]

- Option 1:
  - Same as Anbo rate
  - Less overall order impact
  - Maintain NNWH order level for cost economy of scale (esp. for TH)
- Launch date **postponed** from 1/Aug due to e-KYC roll-out on 1/Aug for CN

TH: [Launch ETA: Sep]

- Option 1: Same reason as VN
- Launch date rely on product support to lift system limitation* with ETA Sep

**Currently system does not support different base commission rate settings between [NNWH] and [Other Local Official WH]*

Agenda

- **CB Performance update**
  - Jun’25 Actuals Performance (as of Jun 11th)
  - Jul’25 Projection
  - H1’25 Review
  - Drill down of Jun’25 Performance
- **Key Initiatives Updates**
  - **All BU:** Local Ownership Initiatives (Workshop Feedback)
  - **Marketplace**: Commission Increase/Waiver Updates
  - **SLS**: [VN/PH] Customs New Regulations Status Update
  - **SLS**: [MY] BSC Push Impact

[SLS] Overview of customs tax/duty/policy across Mkts and recent policy changes in PH/VN (IPC fee and VN e-KYC)

Import Tax is paid through 3PL vendors (LH / CC / LM) on behalf of Shopee, hence import tax/buyer duty related tax gain/loss booked under SLS P&L

Market	Tax markup component	Order/Item Level	#1 Low Value Goods	#2 High Value Goods	#3 Additional Buyer Import Duties	KYC
SG	Listing price markup *Tax included in listing price*	Order	9%		-	-
MY		Item	10%		Additional duties for HVG (>RM500) based on categories	-
VN		Item	5% - 10%		Additional duties for HVG (>VND 1m) based on categories	2 Yes (from Aug 1st)
CO		Order	20%		-	-
MX		Order	19%		-	-
TH		Order	7%		Additional duties for HVG (> 1500 THB) based on categories	-
BR	Checkout markup *Tax as a line item during checkout*	Order	20% (≤50 USD)	60% (>50 USD)	17% ICMS on all goods	Yes
CL		Order	-	26% (≥ 42,000 CLP)	-	-
TW		Order	-	~13%, by category (>5 orders or >2000 NTD)	-	Yes
PH	TBD	Order	1 PHP50 (≤PHP 2,000)	2.5% (>PHP2,000)	-	-

#1 [SLS] PH Import Processing Charge Update - In the short-term, IPC cost will still be borne by Shopee as amount is acceptable. Savings of 600K USD vs. last PHCB meeting from ID/MY vendor negotiation

Table 1: Custom Clearance rate increase by vendor and P&L impact

Seller Origin	CC vendors	Monthly Outbound Orders	Order %	Arrangement with CC vendors			Monthly est. P&L impact		
				PHCB Meeting (Jun 26th)	Latest Update (Jul 10th)	Worst Case (Per Law)	PHCB Meeting (Jun 26th)	Latest Update (Jul 10th)	Worst Case (Per Law)
				usd/kg	*usd/kg*	*usd/kg*	*usd, monthly*	*usd, monthly*	*usd, monthly*
CN	PLX	9,917k	60%	-	-	+$7.80	-	-	-7,717,534
	NCL, CBPI, RARR	5,142k	31%	-	-	+$8.70	-	-	-4,001,366
	SINO	114k	1%	-	-	-	-	-	-
	Janio	155k	1%	+$0.15	+$0.15	+$5.53	-3,270	-3,270	-120,615
ID/MY	ESL/NJV	783k	5%	B +$3.33	-	+$3.33	-609,258	-	-609,258

KR	LX Pantos	166k	1%	+$0.32	+$0.32	+$3.18	-13,031	-13,031	-129,306
JP	PLX	109k	1%	-	-	+$2.46	-	-	-85,086
Total		**16,552k**	**100%**	**+$0.34**	**+$0.01**	**+$6.96**	**-633,695**	A **-24,437**	**-12,792,531** C

Context:

PH Govt. imposed a PHP50 fee (IPC) on buyers for parcel values ≤ PHP 2000 w.e.f. 15 Jun 2025

Key Highlights:

A **#1 Short Term: little P&L impact, -24K** additional cost only

- **CN:** Vendors agreed to absorb costs as current charges are small; only Janio plans a post-15 Jul increase (under negotiation)

B **SIP Updated:** ESL/NJV agreed to not to charge till further notice

- **KRJP:** KR vendor charging a small fee

#2: Long Term: what if CC cost increase per law, and monthly cost >1-2mil to Shopee?

C **[Discussion]** If fees increase to PHP50, losses of **~13m** USD. To discuss how shall the cost be shared in the event it happens *(next slide)*

- Monitor how competitors reacts

Note:
#1: Current: Vendors have already charged us
#2: Expected: Vendors have yet to charge us, but will likely be charging us
#3: Worst Case: Pessimistic scenario that may happen, assumption based on current/expected competitors' rate

[SLS] PH Import Processing Charge Update - in the event of increasing CC cost(e.g.>1-2mil), by then, we suggest to add the additional to seller with an shipping hidden fee increase

S/N	Method	Existing Applicable mkt	Pros	Cons	Suggestion
Option 1	Increase **seller shipping fee** (hidden fee in ASF) and charge to **seller**	NA	• Least Impact to orders (per historical experience, seller increase% lower than fee increase)	• Negative seller sentiment	**Suggested** (**CN preferred**: as this has least order impact and clear message to both seller and buyer)
Option 2	Mark-up % in **listing price** and charge to **buyer**	**SG/MY/VN/TH**	• Better Seller Sentiment • High leverage of platform traffic	**Unclear mark-up to seller/buyer** • PH charges fixed $ import VAT unlike SEA using % • %-based markup would occur **legal risk** in overcharge selective buyers with higher ABS range and confuse sellers on **a random mark-up** unlike law	**Not Suggested** Has legal concern and random mark-up to seller price
Option 3	Add IPC amount in **checkout** page and charge to **buyer**	**BR**	• Flexibility in toggle on/off • Better Seller Sentiment • Straightforward and consistent messaging with law	• High churn out rate and a waste of platform traffic	**Not Suggested** (KR **preferred:** as higher ABS and less risk in churn out and have better seller sentiment, however from BR practice, this impact platform traffic)

#2 [SLS] VN KYC Update - No significant order drop after e-KYC implementation (10 Jun) based on latest trend; P&L impact of -60K USD to KRJP from 6 days of orders loss due to channels toggled off

Table 1: Order and P&L impact from VN e-KYC

			(A) Current Status		(B) Pessimistic Scenario	
Seller Origin	**Date**	**Status**	**Order impact**	**P&L Impact**	**Order impact**	**P&L Impact**
KR/JP/HK (Air/SEA)	5 Jul - 10 Jul	Toggled off all channels	-100%	-60,537	-100%	-60,537
	11 Jul - 31 Jul	Activated hard block, 10 Jul 7PM	0%	-	-22%	-26,024
CN (Land)	1 Aug - 30 Aug	e-KYC may impact land channels To toggle on hard block	0%	-	-22%	-868,673
Total			**-1%**	**-60,537**	**-23%**	**-955,235**

Table 2: KR-VN ADO Trend after reopening

Date	Jun BAU	Jul/01	Jul/02	Jul/03	Jul/04	Jul/05	Jul/06	Jul/07	Jul/08	Jul/09	Jul/10	Jul/11	Jul/12
KRCB	10,392	11,407	6,070	6,844	10,890	4	0	0	0	0	5,163	13,853	6,583
KYC Adoption											66%		78%

Table 3: KYC flow comparison vs BR and TW

	Verification Needed	KYC Process	Custom strictness
BR	Yes	When an order is placed, order won't be shipped out if KYC verification fails	High (all KYC info need to match)
TW	Yes	When an order is placed, if buyer did not approve Pre-authorization (Recurring for each order), seller is unable to ship out	Medium (Only some KYC info need to match, e.g delivery address not needed)
VN	No	When an order is placed, buyer will be brought to a one-time KYC page to input info. Order will not be shipped if not filled	Low (No verification for now, and likely random spot check at customs)

Context:

Goods crossing import customs by 9 July will require buyer KYC info

- *Phase 1 (9 - 31 Jul):* All AIR/SEA orders (i.e. KRJP)
- *Phase 2 (1 Aug onwards):* All CB orders (i.e. CNCB)

Key Highlights:

#1 Order Impact: No significant impact

A BAU orders back to normal after toggle on

- Non significant impact likely due to smooth user flow journey (*next slide*); and local VN push for e-KYC adoption (e.g. KOL engagement)

#2 P&L impact: -60K USD once off mainly from KRJP 6 day losses when toggle off channels

B e-KYC adoption at 78%, worst case scenario is 22% order drop with a P&L impact of 955K USD

#3 User Journey comparison vs BR & TW

- **BR:** Need verification before order can be placed
- **TW:** Affected G2N as buyer need to further verify KYC at Ezway, if not seller can not ship out orders

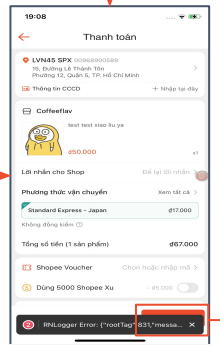
Next Steps:

- Closely monitor order impact over next few days, and account within latest budget
- To work on verification process, plan to use a 3rd party validator (details TBC)

[Backup] User Journey HARD Block - NEW APP - Checkout flow

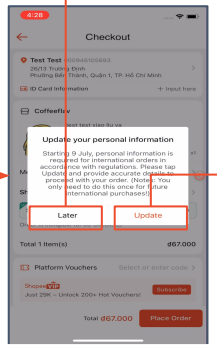
Input Area #1:

Check out item using HK/KR/JP channels

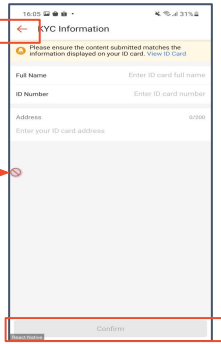


Checkout HK/KR/JP

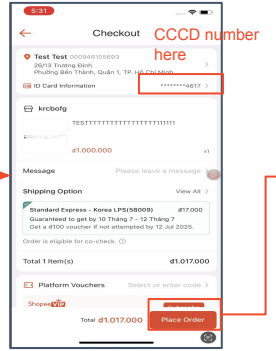
Every time click "Place Order"

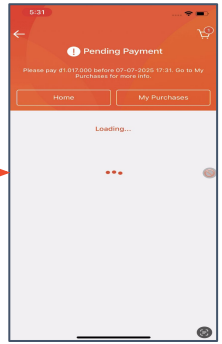


Pop up to ask for KYC update



Fill in **Name & ID** minimally, address optional

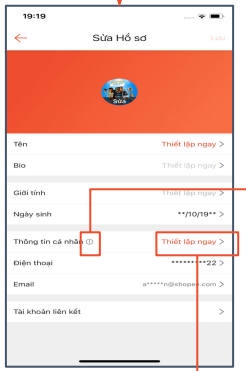


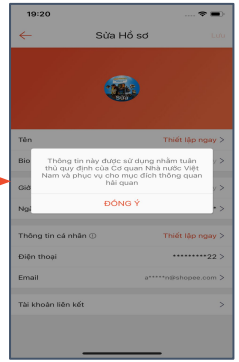


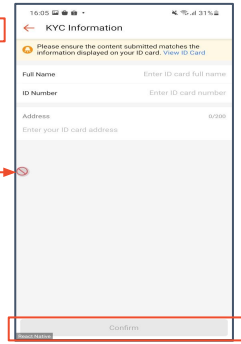
Checkout successful

Input Area #2:

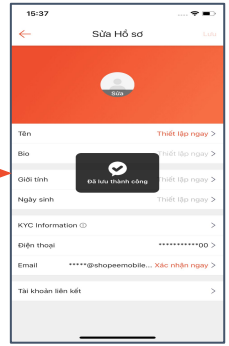
My Profile







Fill in **Name & ID** minimally, address optional



Private & Co

Agenda

- **CB Performance update**
  - Jun’25 Actuals Performance (as of Jun 11th)
  - Jul’25 Projection
  - H1’25 Review
  - Drill down of Jun’25 Performance
- **Key Initiatives Updates**
  - **All BU:** Local Ownership Initiatives (Workshop Feedback)
  - **Marketplace**: Commission Increase/Waiver Updates
  - **SLS**: [VN/PH] Customs New Regulations Status Update
  - **SLS**: [MY] BSC Push Impact

[SLS] MY BSC Push Impact: Overall UE for BSC is negative by -0.34 USD per order; BSC UE will still be negative in Dec'25, but to improve by +0.14 USD per order. Impact to Overall CB P&L is positive

Metrics	Breakdown	BSC

**Impact to Overall CB P&L assuming BSC penetration within CB to increase by 5% (15% to 20%)*
***Assumed 67% FSV utilization (Jun/Jul)*

Context:

Following up from last meeting, to understand:

1. Current UE for each BSC order
2. Potential impact for pushing BSC

Key Highlights:

A **#1a Current UE: -0.34 USD/order,** driven by:

- **MP PC2:** -0.17 USD/order, High PRM spend in Jun/Jul due to commission increase and FSV0 push
- **SLS PPO:** -0.26 USD/order, due to less ESF collected (RM2.0 vs. STD of RM4.9)
- **SPX Savings:** +0.10 USD/order from LM savings

B **#1b: Future UE: -0.20 USD/order** by Dec'25 after FE0:

- **MP PC2:** +0.54 USD/order from FSV savings (BSC channel) and RM0.50 order charge
- **SLS PPO:** -0.49 USD/order from lower ASF
- **SPX Savings**: +0.09 USD/order from LM savings

C **#2: Overall CB Impact: CB P&L -255K USD** for 5% increase in BSC to CB ADO penetration:

- **MP PC2:** FSV Savings from Non-BSC channels (0.70 usd per order, 67% utilization)
- **SLS PPO:** Losses from ESF (STD RM4.9 vs. BSC FE0), -1.16 usd per order

Backup Slides for Ian / Jianghong’s question

[Back-up] Local Ownership Initiatives: KRJP L6M Overview, we do see an improvement in ADO overtime and lower EBITDA gap in Jun, but consistently underperforming due to higher PRM spend

KRJP(Q2 vs. Q1):

ADO generally seen improvements overtime, with the exception of Jun'25 due to PRM injections. EBITDA gap has reduced to 0.2m (88% Runrate) in Jun

EBITDA fluctuation persists despite improving ADO accuracy, mainly driven by PRM inaccuracies given recent pushes from platform

- Worsen EBITDA in Jun despite higher ADO because:
  - TH did not factor in higher CIR% in target (last minute platform direction for more PRM)
  - PH ADO overachieve (Negative MP PC2)

[Jun'25 Actuals] - KR Deepdive: MoM we are spending 0.2mil more to get +12%/+12% ADO/GMV growth, vs Target high ADO and GMV runrate

Table: KR Jun'25 actual performance (vs Target, MoM)

Month	Metrics	SG	MY	TH	TW	VN	PH	BR	Total

	incremental ROI	5% (4)	1%	-121%	7% (5)	-2%	-21%	-78%	(6) -4%

Key Highlights:

#1: Why Jun GMV 101% runrate but EBITDA negative?

Key Markets are TH and PH

1. Higher PH GMV runrate shifted PH market share upwards by 1%
2. However, PH is less profitable than other regions and leads to negative P&L impact
3. TH profitability worsened vs May and impact was not accounted for in budget

#2: Why hasn't our profit increased as expected with the rise in GMV given positive P&L, both month-over-month and compared to our targets?

MoM: given volatile push trends: poor incremental ROI in MY/TH/VN/PH face heavier competition from TTS, two key factors

4. **(-) Spent on previous "cost free" orders**: MY/TH auto apply FSV and stackable vouchers
5. **(-) Low ABS push**: VN/PH push FSV0
   - **(+)** High ABS push: TH/PH

vs Target:

6. Overall, ROI of Target is in line with May at -4%
   - However, TH understated the severeness of auto apply FSV, stackable vouchers and high ABS push

Follow up

1. KRJP Performance, why is TH/PH in KR not profitable
   a. Profitability of KR biz (or is it structural issues of specifcia
   b.

Shopee

THE END
