Highlights

- **SG:** July MTD ADO 575, ADG 40.6k, SKU # 188k. ADO below RR due to: 1) impact by fake 3PF penalty (sellers are forced to close shops or switch to SLS) 2) PO whitelist bug that wrongly delisted ~8K SKUs from key seller 润泽优, causing them to miss 7.7. Next steps: to relist affected SKUs and further push to recover sales, and build an SKU-level tracker to improve delist appeals process.
- **MY/TH: SKU target below RR due to** top seller 润泽优 SKU # decrease, due to: 1) Incomplete listing info >> have educated seller to revise listing info, ETA next week, 2) SKU # 100 quota (vs 1000) for non-performing shops: next step: as furniture SKUs are high ABS and require longer time to ramp up, to discuss with CN & Reg Ops to understand possibility to whitelist 润泽优 and ease SKU # quota limit

Highlights

1.ADO/ADG Target Underachieve- ADO 919 (89% RR), ADG $7.7K (89% RR) due to:

- Limited seller pool as existing program is only extended to specialised F&B sellers, which are more long-tail and have slower growth. In discussion to loosen criteria to expand criteria to include more top mixed grocery sellers.

2.SKU Target Underachieve - SKU#at 30K (68% RR), due to Lever 3 onboarding progress where only 2 out of 15 shops has completed listings. Actively driving remaining shops to start listing.

3. **Targets overall**: Dec'25 targets adjusted to latest iteration, WIP to breakdown targets to monthly pacing by 25 Jul.

Highlights

1.ADO/ADG Underachieve- ADO 20K (95% RR), ADG $151K (94% RR) due to:

- Top seller Judydoll with delay in July investment due to operational staff change MoM -18% in MY & TW to 260 ADO

2.SKU Target Underachieve - SKU# at 5k (93% RR) due to delay in SKU onboarding via Lever 3 as system trial is ongoing and existing manual onboarding process (i.e. shop creation and SKU listing) needs to be improved prior mass pitching in August.

3. **Targets overall**: Dec'25 targets adjusted to latest iteration and extended to include PH for Beauty, WIP to breakdown targets to monthly pacing by 25 Jul.
