Highlights

1.ADO/ADG Target Underachieve: ADO 47K (87% RR), ADG $461K (83% RR), ADO% to CB (excl CNLS) 5.7% (MoM +0.6pp) mainly due to:

- Lever 3 underperformance (RR 28%), expected to catch up via 1-1 seller pitching.
- Lever 1 RR reached 99%, driven by Mosequeen, contributing 1.8K ADO across all sites, accounting for 70% of Lever 1 performance.
- The program was expanded in August to include Sports & Outdoor apparel, footwear, and BKF to align with Taobao's Fashion assortment push.

2.SKU Target Underachieve: SKU# at 858K (28% RR) due to Lever 3 challenges similar to topline underperformance.

3.Program PC2: 0.1% driven by overinvestment in MY (-1.1%) and PH (-1.7%)

Highlights

- **SG:** RR 92%, MoM SKU# recovered +8% mainly driven by recovery of shops from fake 3PF penalty and fix of PO whitelist system bug last week
- **MY**: RR 111%: Lever 2 RR 94% mainly due to topseller 润泽优, whose SKU# quota for non-performing shops was reduced from 1000 to 100 as per Ops clean up. We have appealed to remove the quota for some shops under the GGP and seller migrate these SKUs to unrestricted shops.
- **TH**: RR 97% MoM +14% driven by continued strong performance of top seller 中南 MoM +33% to 1.2K ADO driven by ads investment. Ads ADO MoM +34% to 1.1K after aligning with seller to reinstate ROAS to 15.

Highlights

- **Overall, Lever 3 underperformance remains the key reason for most markets missing targets, due to pause of of mass pitching efforts. 1-1 pitching through other leads has commenced to catch up on performance.**
- **SG**: RR 40%: driven by Lever 2 underperformance. We will focus our efforts on SG top seller 石狮市安米商 (Aug ADO 149, 45% of SG total; MoM 17%), with planned cooperation with seller to upload more quality new SKUs (est ~300 per month) & expand their assortment to more food brands to catch up on performance.
- **MY**: RR 69%:
  - Lever 1: Onboarded 17 new shops with a total of 9K SKUs; SKU# RR reached 145%. Sellers will begin receiving program incentives to support performance ramp-up.
  - Lever 2 is generally on track. Expect to improve further as top seller 杭州喆众 (Aug ADO 212, 15% of MY total; MoM -16%) is currently recovering from account transfer impact, working with seller to push for new SKU upload in August.

Highlights

1.ADO/ADG Target Overachieve: ADO 31K (112% RR), ADG $197K (100% RR), ADO% (excl CNLS) to CB L1 at 8.9% (MoM +4.0pp) due to:

- Lever 2 overperformance 111% RR, 79% MoM (111% RR, 79% MoM) following strong 8.8 campaign performance supported by platform investment particularly in VN with top seller Carslan & Judydoll reaching 30K orders on 8.8 supported by item rebate

2.SKU Target Underachieve: SKU# at 45k (9% RR) mainly due to Lever 3 underperformance driven by slowdown in pitching vs initial planned, expect to improve through 1:1 pitching efforts planned in August.

3. **PC2%:** -0.2% driven by overinvestment in MY (-1.9%)

Highlights

- **Overall: Beauty sellers benefited from strong platform investment during 8.8 campaign, with PC2 performance reaching near neutral levels across most markets**
- **SG:** ADO RR 92% driven by Lever 3 delayed seller onboarding. WIP with CN MKT team to engage 1:1 pitching in August to onboard beauty sellers.
- **VN**: ADO RR at 100%, driven by top seller Judydoll's & Carlan's strong 8.8 campaign performance (>30K orders), boosted by platform rebates. However, EOM projection is expected to reduce to 92%, as top seller 福州亿点点 (low ABS nail deco) saw a -25% MoM drop (from 1.5K ADO in July), following price increases due to KYC enforcement.
- **PH**: ADO RR at 7%. Align to leverage PH's new wholesaler program to grow Counter TB, CN Cluster will nominate suitable sellers for program inclusion next week

   b. **Improved Leads & Conversion :** Expect to get ~24 high-quality leads from ERP partners by end of Aug, will conduct cold call and offline visit to convert.
   c. **Increased Outreach Channel** : further pushing seller acquisition through multiple channels starting from mid Aug, e.g. mega offline events, cold call, MCN seller referral, etc

   a. Aug RR gap from Fashion (81%), while YTD RR on track; RM price nego for wishlist SKUs ongoing, expect RR to improve next week
2. **Next Steps:**
   a. **Wishlist Expansion:** In August, we expanded wishlist based on newly aligned subcategories (Expanding Furniture into smaller furniture) & refresh Fashion/F&B to reflect seasonal changes in product listing
   b. **Improve Seller Nomination Detection:** In August, we enhanced the sourcing nomination process by working with BI to detect successful uploads by seller according to the wishlist, improving the previous method where we required seller to feedback manually which was prone to error and time-consuming for both sellers and local teams to review.
   c. **Improve Price Review Criteria** : In August, we refined our approach by introducing category and region specific price thresholds based on SHP vs.TBG price analysis, replacing the previous blanket 120% threshold which sellers found difficult to meet due to structural pricing differences

Lever 3 - SKU Sourcing by ERP: Aug MTD ADO at 972 (+642% MoM, 10% RR); #Sellers at 26 (+5 WoW) MTD, MKT and SAI in progress for 1:1 pitching

Key Highlights

New Seller Incentives - Aligned across all sites except for PH. PH focus is on growing and onboarding brand and mall sellers. No incentives is currently provided to new Non-Mall/Brand sellers

Existing Seller Incentives - Aligned with new seller incentives just without commission waiver across all markets.

SKU Sourcing Incentives - All sites other than PH provide SKU sourcing incentives when seller source for TB SKU that is proposed from Regional SKU wishlist. PH only offer SKU incentives based on Local Fashion wishlist.

Call Out: Without the requested incentives, PH overall Dec target is expected to decline from 56K to 26K. (-30K mainly from Lever 1 and Lever 2 due to weaker seller performance)

- Next Step: To push seller to join PH new whole seller program (Microsite exposure, 6% comms waiver) - ADO impact to program to be assessed ETA: 22nd Aug

Upsizing Counter TB Incentive Plan - MY, SG, TH, VN and TW will further increase their new and existing seller incentive packages starting from Sep'15 to accelerate the growth of focus sellers.

Key Highlights

Focus Seller Program:

1. **SG/MY/TH/VN/TW:** Incentives were aggressively upsized to accelerate the growth of focus sellers in the Counter TB program. The incentive is available to both new and existing sellers. In return, the program requires a deeper commitment from sellers, including SKU-level commitments and a willingness to work with the platform to improve NPC month-over-month.

Key Highlights

- We have expanded NPC SKU pool from 1.8K trial SKUs to **49K SKUs**. However, based on total buyer-paid price, Shopee NPC is currently **underperforming at -6%** vs. target of 40% mainly due to SG's performance at **-47% due to higher logistics hidden fees charged to sellers**
- By category, **Furniture have the lowest NPC at -70%**, while Beauty is performing much better at 32%.
- **Next Step:** We have started to engage sellers to negotiate price adjustments for 25K uncompetitive SKUs down to target price. P1 to focus negotiation on our program sellers estimated at 3.6K SKU; results will be concluded by 25 Aug.
