SCS & Lovito & Warehouse bi-weekly update

2025/9/18

Follow-ups from previous meeting

No.	Business	Function	To do	Progress
1	SCS	Sales ops	**PO-only shop**: Consider to create a seperate shop dedicated for PO-items, however can not use the Shopee brand	A PO-only shop's lower conversion rates can limit its ability to attract and retain organic traffic, thereby reducing its overall visibility and growth potential. To maximize reach and flexibility, we will launch several standalone shops (unbranded) where we will not cap PO%, allowing us to mirror all PO and non-PO listings across these stores.
2	SCS	Fulfillment	**VN local entity**: Communicate with VN local SCS to see if can collaborate on selling SCS goods locally to enable true LFF	Due to concerns about the risk of goods violating regulations and the potential for the government to perceive Choice as favoring Chinese products, Local VN SCS has refused to provide us with an entity for warehouse inbound. Based on VNCB's latest payment solution, we no longer require a local entity to operate VN 3PF and are currently advancing in this direction.
3	LVT	Assortment	Competitor KOL collab data: Check Shein's revenue contribution and ROI on IP collab and KOL collab	SHEIN's KOL+IP program delivers 5% of GMV by running targeted campaigns quarterly in top markets, e.g. US/BR, with a ROI of 1-2.

All OKR expect to meet target this month

SCS P&L review: SCS reached breakeven in Aug and expected to remain breakeven with ADO at 215K and $98K P&L in Sep despite increasing platform fees and ads limitation/competition

SCS P&L Summary Updated til 2025-09-09	2025 Aug Actual	2025 Aug Budget	2025 Aug Actual - Budget	2025 Sep Projection	2025 Sep Budget	2025 Sep Projection - Budget	2025 Oct Budget

Highlights

Aug performance (actual)

1. **ADO/ADG:** SCS achieved **236K** (MoM -12%, **run-rate 126%**) and ADG **~$0.8mil** (MoM -17%, **run-rate 111%**), with less than expected BAU traffic boost phase-out (actual -8% MoM ADO drop vs. budgeted MoM ~30% ADO drop)
2. **Shop P&L:** SCS earned profit of **~$0.9mil** following ADO outperformance and through ads/marketing/pricing optimization and SG&A cost savings initiatives

Sep performance (projection)

- **Outlook:** We remain **focused on breakeven and meet ADO/ADG targets** through continued ads/marketing/pricing optimization and cost saving levers, despite
  1) **Platform fee increase in PH/TH** ($167K/$22K P&L impact)
  2) **Ads test to limit 1P business traffic reduced 45% of our ads traffic** in Sep 5/6/7
  3) **CSPU cheapest deboost test** in BR/TW, leading to ADO decrease
  4) **CPM cost rise** driven by higher platform rebates to 3P sellers and ads competition

3. **ADO:** Projected to **reach 215K** (MoM -9%, **run-rate 100%**) and ADG **765K**(MoM +6%, **run-rate 97%**). BR/MY/SG/TW ADG at risk from above factors
4. **Shop P&L:** Expected to **reach $98K** ($45K better than the budget) accounting for platform fee increase and ADO/ABGMV impact

Oct budget outlook

5. **Outlook:** SCS expect to deliver profitability of **$41K with 217K ADO (MoM+1%) and $0.8mil ADG (MoM+2%)** through multiple initiatives including
   1) New listing launch improvement
   2) Pricing strategy optimization
   3) LFF adoption uplift

*MOM: data from September with the corresponding period in August

Highlight

1. **Pool sourcing:** already sourced 5.4k (MOM +75%), will reach 100% for full month and facilitate sourcing for Oct target (Sep target ~9.7k, current RR ~56%)
2. **Seller nomination sourcing:** already sourced 31k this month (MOM +7%)
   - 15.5k can be matched with Shopee current items with COGS+ net comp ~81.7% (MOM +2pt)
   - 15.5k cannot matched with Shopee current items, 5.7k can be matched with competitors items in Shopee market (SEA+LATAM can be matched, US/EU/ME market cannot do matching due to system constraints)
3. **Pass rate:** pass rate ~48% (target ~50%), MOM -4pt *(double click in the next page)*
4. **Selling price:** average listing price improved to ~$9.4,MOM+$2.4, ASP of selling items improved to ~$4.0, MOM + $1.1, indicating our pushing in high COGS assortment sourcing
5. **PC3PO:** new models are still being invested and ramping up in the first half of the month; MOM -$0.36 due to platform ads product issue during 5-7 Sep

新品出 单 - 以Shopee ADI>=2 sourcing pool为例：在sourcing策略没有 变动的情况下，新品出 单能力在下降，主要受 cheapest能力下降 导致，下一步要通 过一系列手段 优化新品价格 竞争力

From Pool Date up to 2025-09-14

	原品是否trending down		25%	26%	-1%
	原品CSPU是否trending down		31%	29%	5%

观察

1. 新品出单能力在PID drop后逐步变差，表现为pass rate和item efficiency在恶化，从数据表现来看：
   2. Impression在下降：1）新品过去都在PID扶持，PID停掉之后影响impression；2）广告投入变成GMV max逻辑之后优化广告投流效率，导致付费流量也有下降；3）cheapest比例下降影响cheapest boosting流量
   3. 商品CR在变差：商品COGS+实质在优化，但前端cheapest的比例在恶化，主要原因切换至了without SLS discount之后SCS商品的价格竞争力在下降

应对策略

- 核心要提升新品的价格竞争力，将通过以下手段不断优化：
  - 核价策略改为 without SLS discount进行倒算价计算（已完成）
  - 持续进行供应链的低价产业带转移
  - 大力推进早鸟价活动
    - 过去问题：早鸟价机制僵化，需要供应商参与的时间长（2个月），供应商参与率低，降幅低
    - 对比竞对：TTS早鸟价打短期高降幅策略
    - 下一步：已与BPM沟通，灵活优化早鸟价策略，提供短期高降幅的选项
  - 推进local supplier参与CB全托管，避免SLS成本和必须承担的BS成本
  - 部分确定性高的新品，用LFF定价，让cheapest比例更高

JIT Buyer Experience: 整体买家体验没问题（预售8.0%，NFR 1.3%）；履约时效方面，JIT稳定比VMI多2天，没有 变慢，虽然非广 东商家的出 单比例逐 渐增多，但整体到 仓及时率稳步提升

SCS v.s. UST表现

Data up to: 2025-09-15

		Pre order （JIT）				VMI			
		SCS		UST	SCS v.s.UST	SCS		UST	SCS v.s.UST
		2025-Aug	2025-Sep	2025-Sep	2025-Sep	2025-Aug	2025-Sep	2025-Sep	2025-Sep
1	1 PO listing%	5.9%	8.0%	7.5%	0.5%				
1.1	NFR	1.7%	1.3%	2.3%	-1.1%	0.7%	0.6%	1.9%	-1.3%
2	2 APT	2.97	2.94	2.46	0.48	0.78	0.73	1.13	-0.40

3 PO by region

地区	2025-Sep	2025-Aug	2025-Jul
广东	49.3%	49.2%	57.2%
非广东	50.7%	50.8%	42.8%

4 JIT到仓及时率 by month

	2025-Sep	2025-Aug	2025-Jul	2025-Jun
Overall	93.7%	92.5%	92.7%	86.7%
广东	89.3%	86.9%	88.4%	86.4%
非广东	98.5%	98.0%	98.3%	100.0%

Highlight:

1. **预售占比提升，为大促准备：**
   - PO listing %为 8.0% (MoM+2.1%)：由于十一假期，部分卖家休假不发货。为更好地完成测品并赶上99和1010大促，我们在控制整体PO 的前提下，提前上架JIT产品
2. **履约时效保持稳定：**
   - 整体来看，SCS JIT比VMI稳定慢2天：
3. **虽然非广东地区订单占比增加，但未造成APT变慢：**受制于货物需统一运抵广东处理，目前非广东订单持续逐步增加，占比已超过50%，其运输时间相对更长>> 直发SOC可进一步缩短物流时长，ETA11月
4. **受招买管理教育，供应商到仓及时率不断提升：**整体供应商到仓及时率逐步优化，主要通过履约不合格供应商的清退，及持续的卖家教育

Highlight

1. ADO：2025年侧重IP品（特别是潮玩）货盘搭建，实现200 ADO；26年引入更多的家居、3C类产品，丰富货盘，同时借助TH站点扩张，实现年末1K ADO
2. GMV：ASP 7 usd，ABS 9.2，价格带较高；25年末实现$60K月GMV，26年实现$370K月GMV
3. PC3：通过优化直播、广告和 优惠券花费，截至 25 年底实现 PC3 with SLS discount 盈利，without SLS/Ads discount 微亏

MINISO progress update：尽管SCS较MINISO官方（包括 线下店和线上总代官方店）的价格更有 竞争力，但平台存在 较多价格极低的山寨品，影响出 单；将与RBP合作打 击假品

SCS MINISO

SGD:16.99

RM:46.99

Shopee Mall

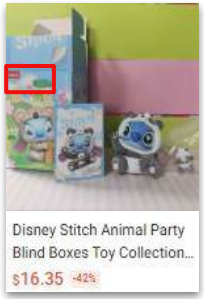
SGD:17.44

RM:49.78

Shopee同款（高度怀疑为假品，因无Mall认证、店铺内产品及商详杂乱）

SGD:16.9

SGD:16.35



SGD:16.35

RM:30.78

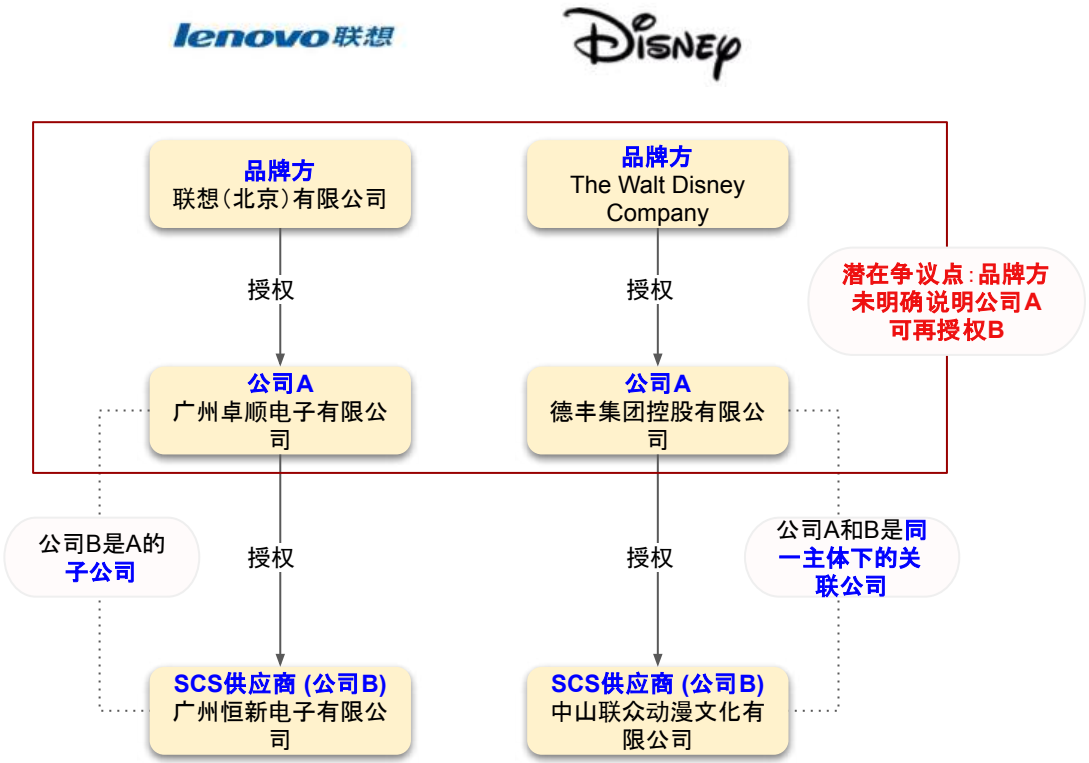
RM:15.69

RM:13.97

Highlight

- 判断假货标准：
  - 店铺资质：该店铺为**非官方认证的Mall店**
  - 名称排查：店铺名称中**不包含“MINISO”**品牌关键词
  - 商品特征：店铺内货品**品类杂乱**、非品牌专营模式、部分商品材质和工艺与正品存在明显差异、使用白牌包装替代MINISO正品包装等
- 下一步：正与RBP确认是否能以SCS的身份在Brand Portal举报潜在假品

品牌二级授权：SCS虽获知名品牌授 权且全链路资质完备，但相关 链路仍存在争 议点，将与 RBP沟通 SOP



Highlight：

- 目前，SCS已陆续获得多家知名品牌的二级授权，但尚未完全获得Local Team认可，主要争议点在于品牌方未明确公司A可再授权B
- 针对类似情况，SCS出现85例被判定侵权情况，46例与Local申诉成功，39例仍在沟通中
- 下一步：将与RBP团队沟通确认该授权链路是否可行，ETA 9.18回复

Sales ops: 除自播受 竞争影响不达 标，各渠道均达成目 标；各渠道 MoM下滑主要由于 PH和TH平台加收费用，为优化P&L进行了涨价，拉低了渠道出 单表现...

SCS sales channel performance overview

Up to: 2025-09-13	ADO				ADO penetration vs CB*		Shop ADO contribution	
Channels	**MTD**	**MoM%**	**Target**	**RR**	**MTD**	**MoM%**	**MTD**	**MoM%**
Livestream (Self)	10,957	1 -24.6%	11,539	95%	15.6%	1 -6.7%	4.8%	-1.0%
Video (Self)	2,896	-2.7%	2,581	112%	0.8%	-0.1%	1.3%	0.1%
Paid Ads	101,672	2 -9.0%	91,309	111%	8.9%	2 -1.8%	44.2%	0.3%
AMS	46,391	-2.5%	32,206	144%	11.1%	-1.5%	20.2%	1.5%
- Livestream (affiliate)	1,850	3 910.8%	421	440%	2.3%	2.0%	0.8%	0.7%
- Video (affiliate)	36,046	4.7%	24,932	145%	14.3%	-1.4%	15.7%	2.1%
- Social Media (affiliate)	8,495	4 -34.7%	6,853	124%	10.0%	4 -4.7%	3.7%	-1.4%

- **All sales channels achieved MoM growth target:**

1 **Livestream (self) ADO MoM -24.6%, target RR 95%, shop ADO contribution -1.0%, CB pene% -6.7%**

- 进入旺季后开播卖家数暴涨，CB 开播卖家数增长 17%，且为了促进直播，CB卖家设置了优惠券（PH 卖家发$1~2 off券，主要在affiliate livestream上），因我们UE相对薄（$0.19），无法跟随折扣，导致我们 CB 占比下跌；此外，在PH和TH，为了应对平台额外收费，有较大规模涨价，也对直播出单产生影响（详见下页）
- **Next step:** SCS 本月已在 VN PH 站点与 MCN 合作开播，并在MY TH 站点与 MCN launch了直播GMV激励政策，提升直播效率，以提升直播的单量绝对值和店铺单量占比。

Video (self) ADO MoM -2.7%, target RR 112%, shop ADO contribution +0.1%, CB pene% -0.1%

- Video 单量店铺占比 +0.1%，Video 单量下跌 2.7%，因为 BR platform 本月缩减了 video 渠道专属的 FSV0 发放量（-25%），导致 BR SCS Video 单量下跌 15%。
- **Next step:** 平台多个站点都在严抓视频版权，为了减少侵权、封号风险，SCS 店铺账号会逐步减少搬运视频（即使有二次剪辑也不行），增加直播切片和AI 视频发布量。

2 **Paid Ads ADO MoM -9.0%, target RR 111%, shop ADO contribution MoM +0.3%, CB pene% -1.8%**

- 9月5日晚-9月8日早上8点，SCS广告花费和单量较异常前整体下滑~30%，初步反馈为算法侧AB测试参数设置错误导致，具体细节还在追问中，尚未有更具体反馈。
- **Next step:** 我们在对有PNL空间的商品进行加投，但由于9月流量成本整体提升接近5%（进入旺季且受ROAS Rebate激励，CB卖家整体投入MoM +10%），会平衡UE和单量，适度加投

AMS: ADO MoM -2.5%, target RR 144%, shop ADO contribution MoM +1.5%, CB pene% -1.5%

3 **Livestream:** 平台于8月底优化产品功能，新增affiliate直播间特惠价标识，推动affiliate直播转化率大幅提升（2.8% >> 5.8%），进而带动affiliate直播间流量增长。会进一步以周报方式增加affiliate对热销特惠价商品的visibility，使affiliate重点直播推广

4 **Social media:** ADO和CB pene% MoM drop主要是在PH；本月为优化UE，通过降低affiliate活动奖励及下调AMS佣金（10% >> 6%）控制成本，导致affiliate推广积极性降低、流量-10%，同时店铺涨价引发 CR -19%；下一步将针对PH的头部affiliate，筛选一批UE较好的品恢复AMS commission rate

Sales ops: ...若剔除涨价市场（PH、TH）的影响，Livestream(self + affiliate)、Video、Ads、AMS均呈现增长

Up to: 2025-09-13	ADO (exclude PH TH)			ADO penetration vs CB (exclude PH TH)			Shop ADO contribution (exclude PH TH)

1 **为应对平台手续费上涨，late Aug PH TH 都做了大规模的商品涨价*，除这两个站点后，各渠道ADO均MoM增长：**

- 店铺自播+affiliate 直播单量增长 +2.7%，Shop ADO contribution +0.1%
- Video单量增长+6.2%
- Paid ads单量增长+0.9%
- AMS单量增长+26.7%

**PH 为应对 platform ₱5 processing fee，店铺商品大规模涨价，Shop ABS MoM +9.1% ($1.65 to $1.80)，直播ABS MoM +7.5% ($1.73 to $1.86)，且直播要求售卖更高价格商品来改善店铺UE*

TH 为应对 1% 的平台佣金费率提升以及 1 THB fix fe 额外费用，店铺商品涨价，Shop ABS MoM +3.1% ($2.56 to $2.64)，直播ABS MoM + 0.6% ($3.19 to $3.21)，且直播要求售卖更高价格商品来改善店铺UE

Sales ops - Ads Backup: 9月5日晚-9月8日早，SCS广告推测算法波动影响，ADO整体下滑32%；目前已恢复正常；自查无异常操作，初步了解 为算法侧AB testing导致，细节待产研进一步反馈

- 9月5日晚-9月8日早上8点，SCS ads花费异常下降，排查异常前均无自动化及人工调整动作，从CB sellers的数据来看也并未做大规模调整，推测是算法层面发生变动。
- 影响范围：SCS & Lovtio all sites，CB other sellers及Local sellers数据未见异常
- 影响幅度：SCS all sites单量下跌32%
- 异常期间应对措施：1）密切监测数据走向并尝试加投拉高广告花费，但效果不佳，单量增长不显著，后回撤加投动作；2）联系BPM和产研团队排查异常
- 当前状态：9月8日早上8点后，广告花费及单量恢复正常水平。目前产研团队初步反馈为算法侧ABT导致

Sales ops - Ads Backup: There are several experiments on organic and ads traffic every week, 3 experiments have impact on 1P business recently

Background

- Various experiments are conducted regularly by PM/Dev to optimize traffic strategy in both organic and ads
- Some of the experiments might impact Choice impressions

Known Experiments with Potential Impact on Choice

Experiment	Purpose	Region	SKU Impacted	Traffic Impacted	Time	Status
SCS Cheapest Boost Optimization	To adjust boosting strength for SCS Cheapest Boost, in face of currently high CTR*CR loss	BR/TW	SCS cheapest SKU in CSPU	30% of traffic with potential boost strength downgrade	Two weeks starting from 11 Sept	On-going
Bid Boost Optimization	To optimize boosting strategy for bid winner to reduce ads rev loss	ID/MY/PH/ TH/VN	All bid winner including SCS bid winner	20% of traffic with potential boost adjustment	Started from 15 Sept, no end time yet	On-going
Ads Experiment on 1P	To evaluate ads rev impact of 1P	ID/MY/PH/ TH/VN/SG/ TW/BR	1P ads campaigns	Scheduled to be 5% traffic, but accidentally led to 45% ads impression drop due to mis-configuration	05 Sept - 08 Sept	Done

Notes:

- PM/Dev team conducts avg. 3-5 experiments per week, majority of which have minimum impacts on business thus will not inform business beforehand.
- For experiment with expected impact that could be captured by business, notice would be provided in advance -- e.g. SCS cheapest boost optimization experiment in TW/BR

Sales & ops (ABS uplift): Bundle ADO & PC3 contribution% to shop both improved MoM; In the next will further optimize the bundle auto-setting tool to improve bundle CR

	MTD	M-1	MoM	Sept target	Target RR
MP model #					
- Set to bundle	872,983	830,169	5.16%	-	-
- Shop overall	1,316,781	1,331,465	-1.10%	-	-
- Bundle coontri% to shop	66.30%	62.35%	3.95%	-	-

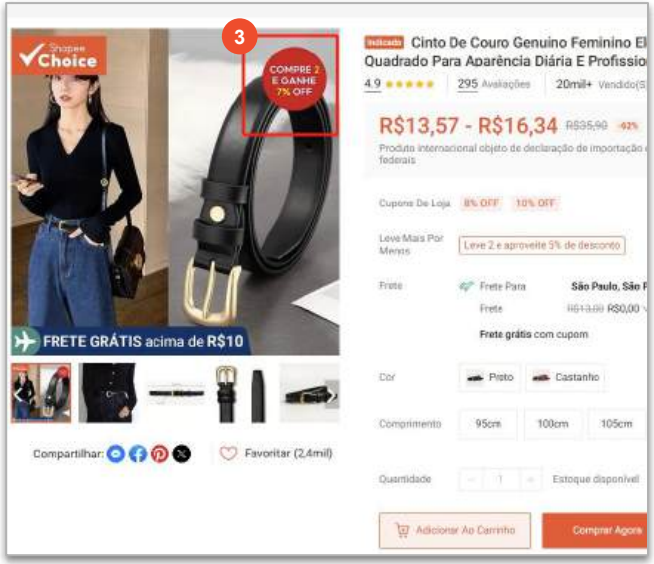
MTD as of 09/14



1 **Highlight: Bundle ADO contribution% to shop and PC3total contribution% to shop MoM有所增长，mainly due to:**

- 2 **开发自动化bundle设置程序*，确保“应设尽设”:** 目前全店66%的品已经设置了bundle deal, MoM+3.95%
- 3 **开发自动化水印设置程序(如右上角截 图):** 确保在主图准确/实时反映Bundle活动折扣力度
- ○ **持续渠道推广:** Livestream, AMS, CS chat欢迎语，UM

Next step: 持续优化自动化Bundle设置程序，确保每 组bundle内listing个数尽量接近 2K的上限，从而提升 “千人千面”下的CR

* 自动化bundle设置程序规则：1）哪些品应该设置Bundle：除了OOS和亏损品外，其他品“应设尽设”（包括不出单品，暂时设定为99折）；2）如何设定“买几件”：在对一个品新设bundle时，参考其过往的IPO，并向上取整；3）如何设定折扣率：共有99/95/90/85/80折档位，当bundle order PC3PO vs. non-bundle PC3PO >2x时，自动加深折扣到下一个折扣档位；4）如自动化程序发现合并机会（同购买数量/折扣率），则会进行合并，除非所在不同shop或不同fulfillment模式（SLS/LFF）

Sales & ops (ABS uplift): High ASP products showed better PC3PO/ABS vs. shop avg; We aim to improve it's ADO/PC3 contri% to shop via ops resource support and more assortment development

Highlight:

1. 高价品* **ABS和PC3PO都远高于Shop avg**水平
2. 高价品ADO contribution% to shop和PC3 total contribution% to shop **MoM均有所提升**

3. **Next step:** Target将高价品的**ADO contribution to shop由Aug的2.8%提升至Dec的3.5%，PC3 contribution to shop由Aug的8.2%提升至Dec的9.2%**，核心drivers包括：

- **运营端：1）更低的盈利率 PC3%要求：**高价品aim PC3%=15%，而非高价品aim PC3%=20%；**2）渠道大力推广：**AMS, Livestream, CS chat, UM

4. **企划端：**Aim Spet to Dec每个月高价品(ST)的上新量为1.3K~1.5K，**占全部ST上新量的比例为13%~15%，高于Aug 11%的水平**

* 高价品定义：COGS>20RMB; ** Data range: MTD as of 09/14

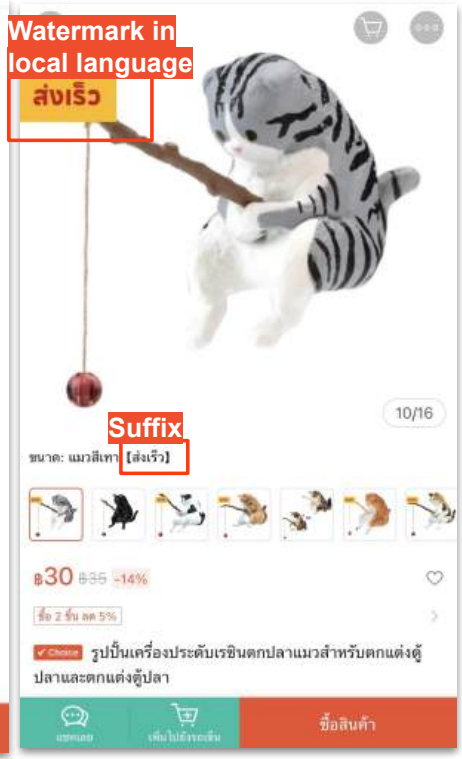
1. SCS LFF(excl NNWH) Aug ADO 47,925 RR 119%, penetration at 37.4%, MoM +4.3pp, RR 116%. Aiming to further expand to 44% by Dec25 by pushing VN 3PF and TH official local warehouse

- Next Step:
  2. PH inbound issue:
     - Inbound quota for PH first half of the month is controlled at 40k, with the LFF% of PH decreasing from 49% at the beginning of the month to around 45%
     - In the second half of the month, we plan to gradually restore the inbound volume to 75k (total CB quota 225k: PHB 140k; PHL 35k; PHE 50k)
  - VN 3PF:
     - VNCB provides a payment solution using virtual accounts. CN Finance has evaluated this solution and confirmed its feasibility, while CN Legal recommends that we proceed by using a VN entity to set up an account for receiving payments
     - The contract with 3PF is in progress

[SCS LFF model level listing optimization] We developed automation tools for LFF models to add watermark and name suffix, hence to improve LFF model conversion

Demo: watermark and suffix



Conversion uplift from listing optimization across markets

** Testing period: before(8/5-8/7) after (9/5-9/7), results based on 87k models (covering ~50% SCS LFF ADO), CR and CTR data normalized by shop overall trend,*

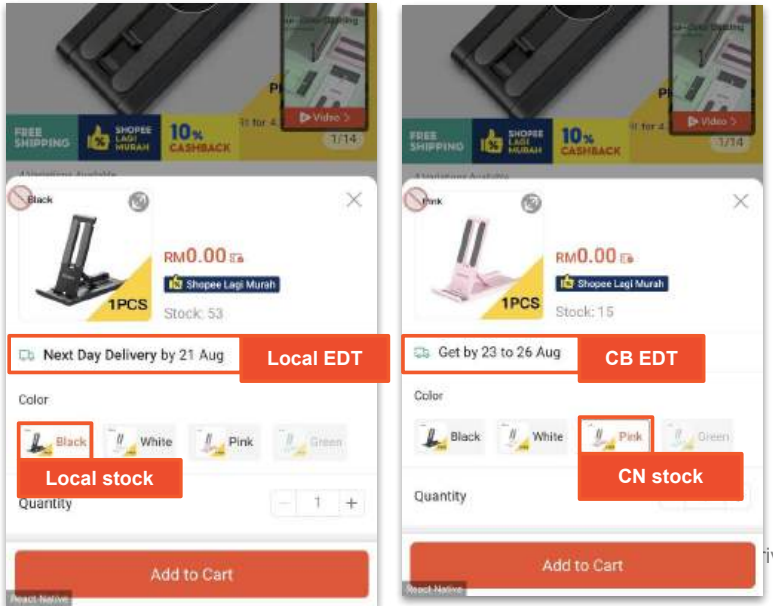
Key highlight:

Starting Sept 4th, we have deployed an automated tool to enhance all LFF models by adding watermarks to product images and name suffixes, strengthening buyer awareness of LFF's fast delivery advantage, driving significant conversion uplift across all markets.

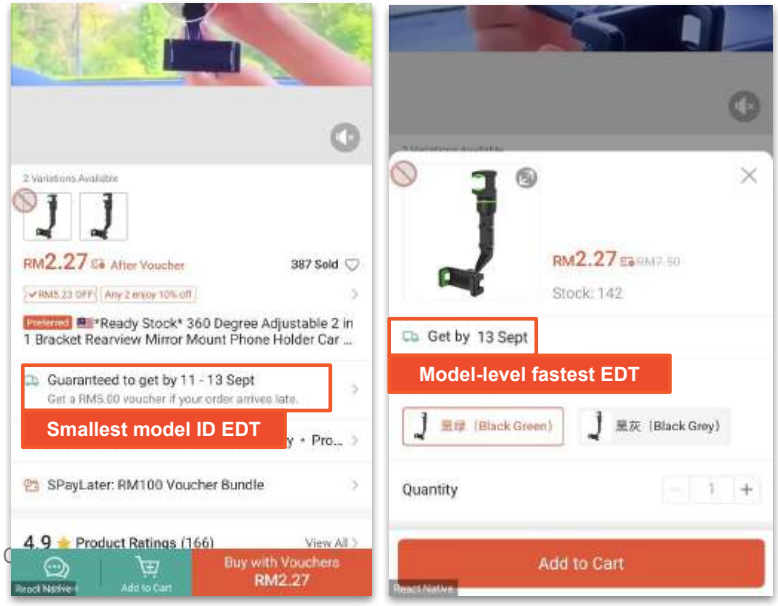
[EDT display on ATC] AB Test results do not have a conclusive trend, plan to extend AB test time period and deep dive further into test results to identify

- Deep dive direction of 21 Aug - 7 Sep ABT result:
  - **Exclude pre-order** listings, since there's no EDT displayed on ATC panel
  - **SG: Reclassify MY-SG channel**'s orders as LFF order rather than SLS
  - 1 Focus on **listings with both LFF stock and SLS stock**, 2 further **divide these listings into 3 groups** to monitor performance:
    - PDP EDT > ATC EDT of fastest model
    - PDP EDT = ATC EDT of fastest model
    - PDP EDT < ATC EDT of fastest model
- Marketplace Product plans to extend AB test for a longer period of time before reevaluating the data.

Requirement 1: listing with both SLS and LFF stock

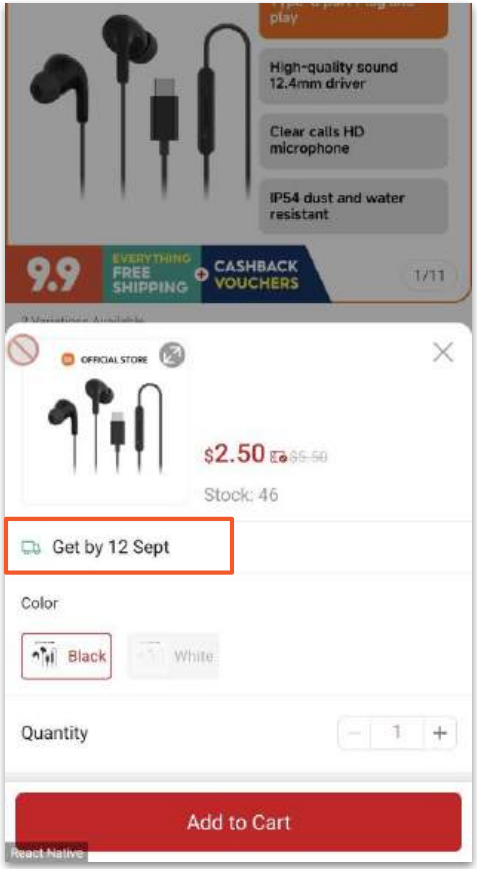


Requirement 2: PDP EDT differs from fastest ATC EDT

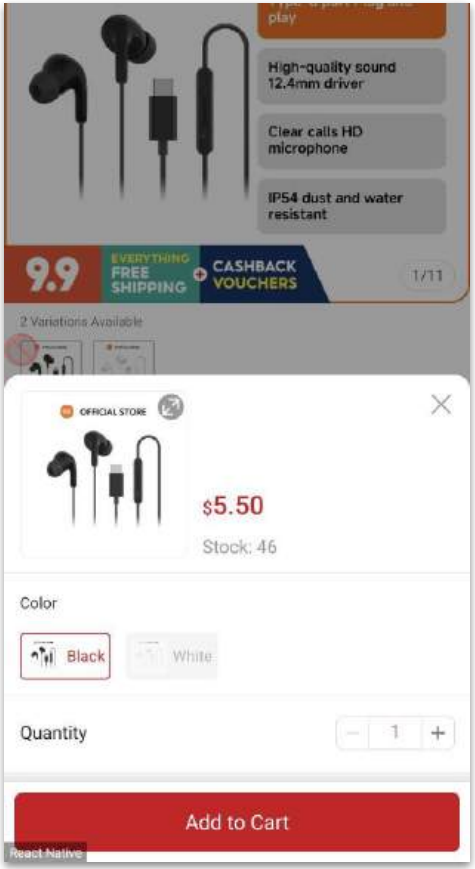


[Back up] - UI Reference

Treatment



Control



[EDT display on ATC] AB test result - PH has a negative ADO trend for both SLS and LFF orders while MY shows positive ADO results overall

- PH, MY, TH, SG: opened 10% traffic for treatment and control from Aug 21st until Sep 7th; Table below captures last 2 weeks data;
- In general, **the ADO does not always show uplift for treatment group**:
  - **PH:** CB in general shows **-0.77%** and **-0.31%** drop in SLS and LFF orders; when deep dive for LFF shops, only Choice shows slight uplift (**0.06%** SLS and **0.07%** LFF);
  - **MY:** CB in general shows **+0.36%** and **+0.60%** uplift in SLS and LFF orders; when deep dive for LFF shops, each LFF shop type can see an increase;

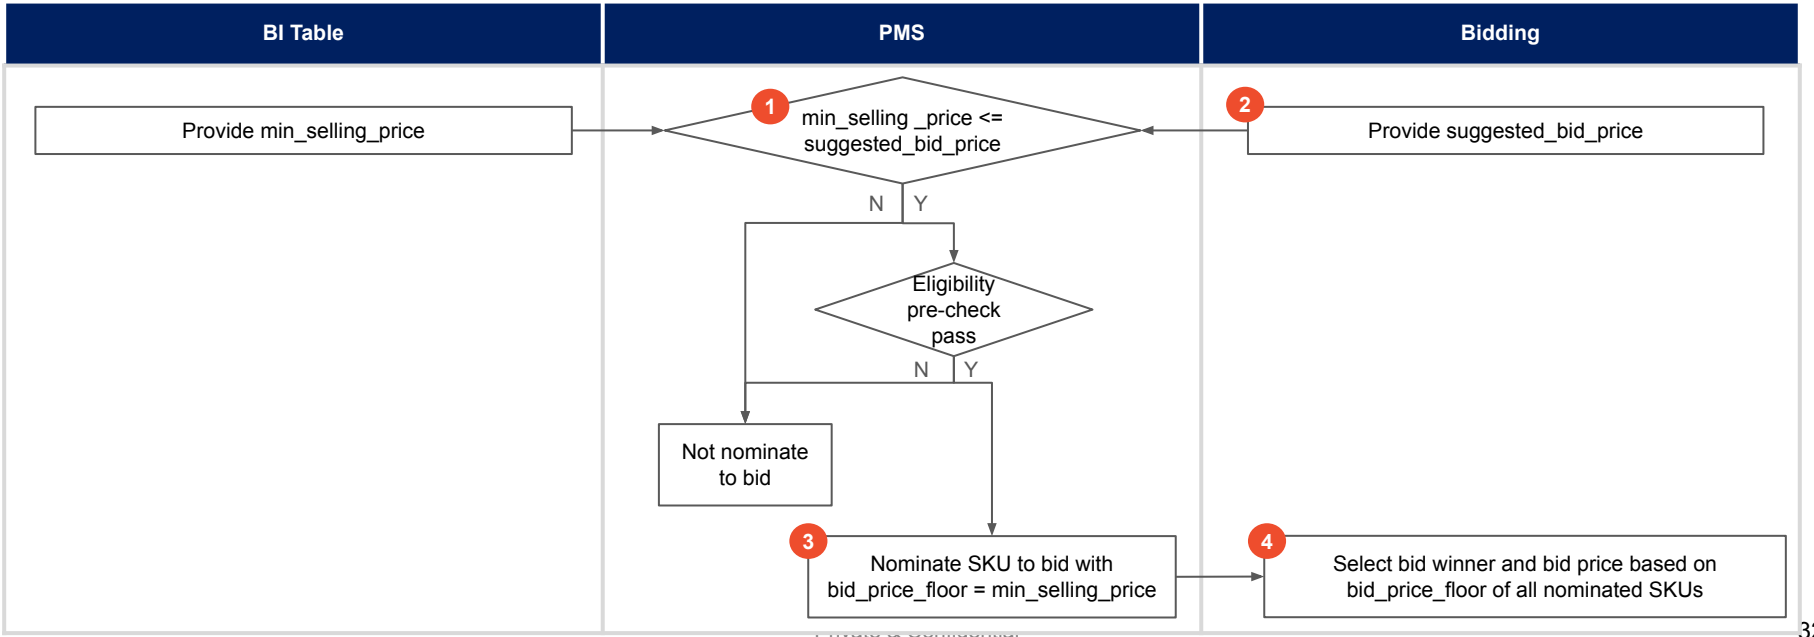
Auto Bid: PMS auto-nominates SKUs to join bidding based on BI-provided minimal selling price in order to improve bid rate and win rate.

Highlights:

1. PMS nominates eligible SKUs to join bidding when BI-provided minimal selling price <= suggested bid price from bidding system
2. Suggested bid price is updated hourly from bidding system, auto bidding enables more timely reaction to suggested bid price changes compared to manual bidding in CNSC, which helps to improve bid rate and win rate.
3. PMS nominates SKUs to join bidding using minimal selling price as bidding price floor.
4. Bid winner and bid price selection follows platform bidding price follow mechanism.



Auto Bid: 176k SKUs toggled on PMS Auto Bid, higher win rate is observed in auto bid compared to manual bid, system enhancements planned to reduce nomination failed due to stock and price.

Highlights:

1. Since PMS Auto Bid feature lived in on 24/Jul, totally ~176k SKUs have adopted the feature.
2. 32k SKUs are successfully auto-nominated to bidding system, with ~29k SKUs selected as bid winner.
   - Win rate of Auto Bid (89%) is higher than Manual Bid (60%) mainly from more timely reaction to suggested bid price changes compared to manual bidding
3. Major causes of not nominated are:
   - B. Not meet bidding min stock requirement: expected to be resolved by auto-adding vendor stock feature (Live ETA: end of Oct 2025).
   - C. Min plan price > suggested bid price: 1) biz to work on COGS down, 2) system to allow biz to define a lower min selling price for LFF stock (ETA TBC).
   - D. CSPU Invalid: due to CSPU not eligible(CSPU L7D ADO=0, Model Cnt =<2) or CSPU not in bidding scope (legacy CSPU data).

Highlights

Aug performance (actual)

1. **ADO/ADG:** Lovito ADO outperformed target, reaching **24K ADO (run-rate 105%) and 200K ADG (run-rate 102%)**, driven by FACC assortments launch and ADO uplift from Marketing/Ads optimization, as well as lesser than expected BAU boosting sunset impact
2. **Shop P&L:** Lovito continued to breakeven in Aug with Shop **P&L of ~$10K in RegBI script** *(better than the budget by ~$8K)* driven by ADO outperformance, ads/pricing strategic optimization and SG&A cost savings initiative

Sep performance (projection)

- **Outlook:** We strive to remain P&L **breakeven and meet ADO/ADG targets** through continued Ads/Pricing optimization, accelerated FACC new assortments, and cost saving levers, despite
  1) **Platform fee increase in PH/TH** ($23K/$8K P&L impact)
  2) **Ads test to limit 1P business traffic reduced 45% of our ads traffic** in Sep 5/6/7
  3) **Ads competition intensified**, especially in SG (CPM cost MoM +85%/+$0.83)
  4) **Underperforming CBWA platform trends** vs. budget in PH/TW

3. **ADO/ADG:** Projected to **reach 25K** (MoM +3%, **run-rate 103%**) and ADG **197K**(MoM -1%, **run-rate 94%**). PH/VN/TH/SG/TW ADG at risk driven by above factors
4. **Shop P&L:** Expected to reach **6K in RegBI script** *(better than the budget by ~$5K)*

Oct onwards outlook

5. **Outlook:** Lovito is set to deliver profitability of **$3K with 25K ADO (MoM flat) and 200K ADG (MoM flat),** through multiple initiatives covering
   1) New listing launch improvement
   2) Pricing strategy optimization
   3) Inventory/BS management enhancement

Executive Summary of KOL Partnership

基于我们对**SHEIN的外部调研**以及**Lovito内部情况，预估26年全年整体KOL联名可以给Lovito带来1%的ADO uplift**；我们判断KOL对整体ADO uplift不大，不过我们**建议先继续推进PH/BR的trial**，基于trial的结果再考虑明年是否继续进行

- **Shein Study: 整体KOL+IP联名占SHEIN收入的比例~5%，前者主要结合每个季度的换季新品进行发布，大市场每季度1次**
  - Shein的KOL联名款集中在UE/EU/BR等收入占比高的核心市场，在其他市场虽然以季度维度进行规划，但落地案例较少
  - KOL联名款ROI一般1-2，低于日常KOL合作，其核心目的是通过联名为本季的整体上新增加市场知名度；过高频次以及单季合作更多并不更有助于该目的的实现，反而有可能拉低ROI
- **Planning: 考虑到P&L和可合作的KOL数量，计划在PH/BR按季度进行1次KOL联名款的合作，而在有一定合作空间的MY/TH在明年Q4进行1次合作**
  - 基于Lovito各市场的P&L情况，我们预估了实现break-even可接受的单次KOL合作的费用上限，PH ~10k，BR ~8k，MY ~5k，其他市场空间有限
  - 结合合作费用的上限，我们对历史合作过的KOL进行筛选，其中PH有4个KOL，BR有6个KOL满足合作要求；针对这些满足合作要求的KOL，目前我们在积极地和对方沟通合作报价和合作内容
  - 考虑到满足条件的KOL数量有限，我们目前计划在PH/BR按季度进行1次KOL联名款的合作，而在有一定合作空间的MY/TH在明年Q4进行1次合作，整体带来1%的ADO uplift
- **Execution: PH Jenela项目进度on track**
  - 计划在9.24完成联名款的KOL拍摄，并在10.9正式发布联名款；在此过程中，为了保证拍摄效果，我们为Jenela的拍摄准备了完整的拍摄Brief SOP，从人、品、场三个维度细化规范

KOL Partnership Projection: 基于我们对SHEIN的外部调研以及Lovito内部情况，预估26年全年整体KOL联名可以给Lovito带来1%的ADO uplift; 建议先继续推进PH/BR的trial，基于trial的结果再考虑明年

Est. ADO uplift																1.04%
Est. ADG uplift																1.01%
Est. PC3 uplift																0.18%

Highlights

1. Currently we plan to have **5 PH, 5 BR 1 MY, 1 TH collaborations** from 25Q4 to 26 year end（2 in 25Q4, 3 in 26H1 and 7 in 26H2）
2. We estimate to generate **1% uplift of ADO and ADG**, **0.2% uplift of PC3** (taking into account for local support 5-10k)

- If the PH BR 25Q4 trial performs well, will consider whether to proceed for 2026

Backup - SHEIN study: KOL+IP联名占SHEIN收入的比例 ~5%，前者主要 结合每个季度的 换季新品 进行发布，在US/EU/BR等大市 场每季度1次；且由于 ROI较低（ROI 1-2），并不考 虑加大合作 频次

国家/地区	GMV占比	合作频次	合作案例
US	38.7%	季度1次	Milania返校季联名
EU	33.7%	季度1次	MONSE×SHEIN全球时装秀级联名
BR	6.9%	季度1-2次	Lore Improta狂欢节联名
LATAM(excl.BR)	8.9%	无	
PH	1.6%		
SG	0.5%		
MY	0.4%	无	
VN	0.2%		
TH	0.7%		
Others	8.6%	无	

Highlight：

- **Shein的KOL + IP联名贡献总收入的比例～ 5%**，其中KOL联名款集中在US/EU/BR等大市场，每季度1次，在其他市场虽然以季度维度进行规划，但落地案例较少；
- KOL联名款ROI一般1-2，低于日常KOL合作，其核心目的是通过联名为本季的整体上新增加市场知名度，**过高频次以及单季合作更多并不更有助于 该目的的实现，反而有可能拉低 ROI**

Private & Confidential

Backup - KOL Partnership Planning: 基于Lovito各市场的P&L情况，我 们预估了 实现break-even可接受的单次KOL合作的 费用上限，其中 PH/BR相对较高，其他市 场空间有限

KOL partnership budget	PH	BR	MY	VN	TH	SG
Est ADO uplift	173	70	64	49	94	20
Est GMV uplift	$94,107	$81,353	$41,239	$25,236	$50,604	$17,032
Maximum KOL cost with which we can achieve break-even	**$10,103**	**$8,422**	**$5,444**	**0**	**$2,683**	**$64**

Highlight:

- 假设KOL**合作主要覆盖每个站点的头部40-50款且有平台额外资源支持的情况下**，得出合作不亏情况下各市场可接受的KOL合作费用上限
  - **PH/BR:** 合作费用上限高8-10K，有较大的空间进行KOL联名款的合作
  - **Others:** 合作费用上限较低，其中**VN/SG市场规模小增量收益低，不适合进行KOL联名合作**

Backup - KOL Partnership Planning: 基于费用上限，我 们对历史合作 过的KOL进行筛选，其中PH有5个KOL，BR有3个KOL满足合作要求；针对这些满足合作要求的 KOL，目前在 积极地和 对方沟通 报价和内容

Phase	Key Metrics	PH	BR	MY	TH	Progress from last week

	-- Pending Our Reply	1	1			
	-- Pending KOL Reply	2	1			
	-- Quote Accepted	0	0			
	-- Quote Rejected	0	0			
Collaboration	Confirmed	1	0	0	0	

- **PH**：价格范围内具备一定带单能力的KOL时尚度都偏低且整体账号风格偏娱乐化，后期通过KOL介绍/MCN推荐扩大pool，同时重点搜索近期综艺/选秀出圈的时尚新秀；
- **BR**：KOL POOL存量较大，但目前收到的报价与budget相差较大，在进一步筛选建联新的KOL pool；
- **MY**：中腰部以上KOL Pool数量非常有限，进行联名合作费用高，暂无合适可推进进一步议价的KOL；
- **TH**：历史合作KOL转化效果一般CPO较高，在sourcing新的竞对合作KOL；

筛选KOL合作标准

1. 硬性指标为基础门槛：粉丝量级与画像需精准匹配目 标客群，互动数据需真 实健康杜绝水军刷量行为；
2. 品牌安全与形象契合度：背调确保无任何公关 风险与争议历史，其时尚品味与内容 审美必须与品牌调性高度契合；
3. 合作效率与效果最大化：优先从已合作的 KOL里面去筛选或者找到高度相似的高潜新 KOL；

KOL Partnership Execution: 整体项目进度on track，计划在9.24完成联名款的KOL拍摄，并在10.9正式发布联名款

	July	Aug	Sep	Oct	Nov	Dec	Key success factors	Status	Key Timeline Milestones
1. KOL Shorlisting	Shortlist and evaluate candiates						-Leverage tools, current collaboration pool, MCN nomination to dicover potential candidates -Run thourough assessment to eliminate risks and define the best-match candidate	Completed	
2. Collaboration planning		Terms negotiation and confirmed					-Negotiate rates and deliverables	Completed	
3. Assortment Planning		Assortment concepts and product plan					-Leverage the KOL's personal story and fashion sensitivity develop high-relevant product theme -Develop designs matching the KOL's styles and targeted consumers' preferences	Completed	
4. Merchandising		Product mechandising					-Manufacture new party style products	In progress	**Oct. 13:** Launch the new party listings
5. KOL Shoot&Production			KOL video/print shoot and deliver assets				-Prepare meticulous pre-production plan on creative vision, logistics, styling, and expectations between the brand and the KOL	In progress	**Sep. 24:** KOL lookbook Shooting **Sep. 30:** MKT Assets & listing ready
6. Marketing		Planning	Marketing Assets Preparation	Campaign Period			-Intergrated marketing campaigns across multi-channels leveraging high-quality KOL assets to amply impression and traffic -Authentic storytelling and diverse visuals that seamlessly blends the KOL's unique narrative with the product's core value, to drive engagement and conversion within her followers	In progress	**Oct. 9:** KOL release the video & launch the campaign officially

Current Progress

- 确定拍摄方案并与KOL及摄影工作室沟通方案(详情见后面slides)
- KV视觉方案+ Marketing渠道执行准备中

Next step

- **9/24:** KOL lookbook拍摄
- **9/30:** MKT Assets & listing ready
- **10/9:** KOL视频发布，Lovito全渠道宣发，campaign正式上线

KOL Partnership Execution: 为了保证拍摄效果，我 们为Jenela的拍摄准备了完整的拍 摄Brief SOP，从人、品、场三个维度细化规范

Collection 1- Cozy Days

1-Styling搭配方案：怎么穿

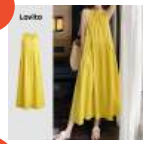
衣服: 宽松，舒适版型，简单基础设计，柔和面料及颜色，如jumper, knitwear, wide leg jeans, midi skirt, tunic dress等
鞋:舒适,平底为主，如flats,sneakers, sandals
包:柔软包型为主，部分大容量，如tote, backpack, shoulder bags

----------Key Looks----------

1

2

3



4

2-Shooting场景化拍 摄方案：怎么拍

妆发:自然且“有生活感”。如松散的低马尾、凌乱的发髻，自然卷发披肩；淡妆妆容，侧重清新，裸感伪素颜

场景1:室内居家，如living room，阳台等
道具1:搭配绿植，儿童玩具或用品，盖毯，抱枕等
姿势1:整体放松，舒展姿势，可用坐姿，与道具自然互动

场景2:室外场景，如街道，咖啡厅
道具2:购物袋、包、咖啡、鲜花或grocery
姿势2:自然行走或站立，转身面向镜头，露出轻松自在的微笑。咖啡馆拿着咖啡杯等

3- 1+2 AI呈现效果

KOL Partnership Execution: 为了保证拍摄效果，我 们为Jenela的拍摄准备了完整的拍 摄Brief SOP，从人、品、场三个维度细化规范

Collection 2- Workchic Edit

1-Styling搭配方案：怎么穿

衣服：修身,利落版型，有设计细节，挺括面料, 如套装, 马甲，pants, 连体裤，shirts，blazers等
鞋：简约干练，如loafers, mules, pumps(粗跟/方头/圆头）
包：硬挺包型，容量适中，如handle bags，baguette

----------Key Looks----------

Key updates summary – Lovito IP collaboration

Lovito

Over the past weeks, we have focused our efforts not only on ongoing IP negotiations but also on new IP outreach and pipeline development, moving several key discussions forward in parallel.

Current Deals

- **Barbie** – Negotiated Minimum Guarantee (MG) down **from $120K (18 months) to $100K (27 months)** while royalty remains at 10%. Risk assessment completed and deemed manageable; proposal now under licensor review and we aim to close the deal by this month, **with first collection to be launched by 25Q4**
- **BT21 (IPX collaboration)** – Sales projections and Minimum Guarantee (MG) aligned with IPX (agency) with total MG amount of $38K (royalty at 6%) and term period of 22 months; proposal currently under review by the artists' agency

New IP Development

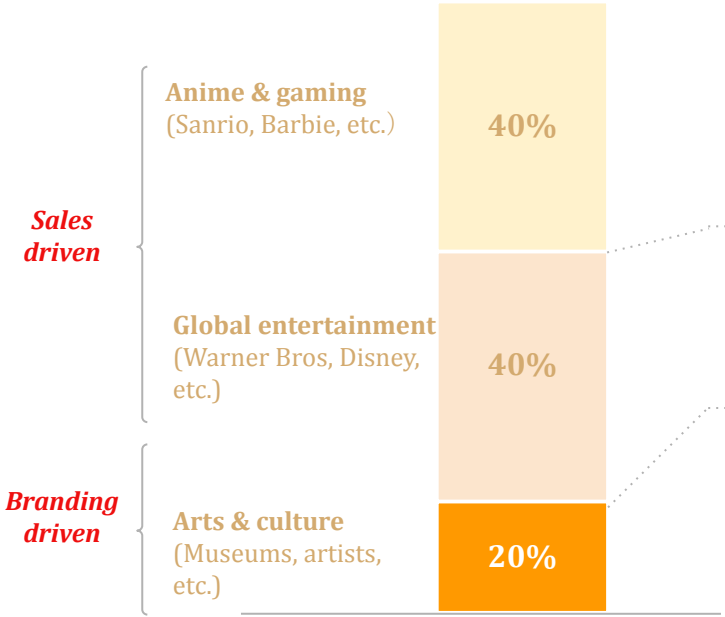
- **Warner Bros IPs** – Prioritized 3 IPs (Harry Potter, Supergirl, Powerpuff Girls) for 4 launches tied to key WB marketing events in 2026. Initial sales projection submitted to PLS (agency) for review
- **Alfilo (Art Museum IPs)** – Met with agency representing leading museums (e.g., British Museum, MFA Boston). Following initial projections, agency proposed MFA collaboration at $30K as Minimum Guarantee. We will develop a more detailed assortment plan to advance discussions in the following weeks
- **Free IP Study** – Benchmarked fashion use cases of free/public domain IP; noted SHEIN leverages this in secondary designs. Plan to explore **building a similar design capability in-house** by leveraging the latest AI tools;

IP collaboration: Lovito is driving collaboration progress across three key IP categories – Anime & gaming, Global entertainment, and Arts & Cultural IP

Lovito

IP Collaboration breakdown (% of GMV)

Based on interviews with Shein / Uniqlo



Progress update

1 Barbie — Negotiation

- With ongoing negotiation on commercial terms, we have managed to reduce Minimum Guarantee **from $120k (for 1.5yrs) to $100k (for 2yrs)** while royalty is maintained at 10%
- After internal assessment with scenario simulations, we agreed to proceed and proposal is now under licensor's review; we aim to **finalize the deal by this month and target to launch by Q4**

2 — Negotiation

- Aligned with IPX on sales projections and MG; the proposal is now under review by the the artists' agency.

3 WB — Planning

- After internal review we have **prioritized 3 IPs of WB** (incl., Harry Potter, Supergirl and Super Puff Girls) with **4 launches along with their key marketing events in 2026**
- We have sent initial sales projection plan to PLS for review

4 mfa BOSTON — Planning

- We had a meeting with Alfilo which represented various art museums across the globe, incl. The British Museum and MFA (Museum of Fine Arts Boston). After sharing initial sales projection, they proposed MFA for collaboration **with MG of $30K**
- We plan to develop a more detailed assortment plan to move the discussion forward this week

IP collab process Planning | Negotiation | Contract | Design | QC | Production

1 Barbie update: With ongoing negotiation efforts we managed to reduce Minimum Guarantee (MG) from $130K (1.5 years) to $100K (2 years), aiming to launch by 25Q4

Lovito

Commercial terms evolved after several rounds of negotiation with PLS...

	9.1 version	9.11 version
Term Period	Oct 1, 2025 - Dec 31, 2027 (27 months)	Oct 1, 2025 - Mar 31, 2027 (18 months)
Total sales value	*1,411,765*	*2,000,000*
2 *Implied monthly sales*	*78,431*	*74,074*
Royalty Rate	10%	10%
1 **Total royalty commitment**	141,176	200,000
Minimum guarantee % based on royalty	*85%*	*50%*
Minimum Guarantee (MG)	120,000	100,000
2 **Payment Terms**	Full payment upon signing	$50K upon signing $50K before Jun 1st, 2026
Distribution Channel	Shopee	Shopee, Pop-up
Territory	BR, PH, TH, MY, SG, VN	Same

Highlights

1. After several rounds of negotiations, managed to reduce minimum guarantee from **$120K to $100K** by securing lower MG% **from 85% to 50%,**
2. At the same time, we managed to prolong the overall collaboration period from **18 months to 27 months** and negotiate **MG payment split into 2 installments** (instead of full upfront payment) to reduce sales pressure and improve cash flow flexibility

- Status: proposal currently under licensor (Mattel) review

*We have also validated the commercial terms with IP specialists from Garena, who confirmed that the **current deal is already optimal and within average for American IPs** (10% royalty and $100K MG)*

1 Barbie update: We expect to deliver net PC3 (after royalty and BS) of ~$140K from the Barbie IP collaboration, with 50 SPU to be launched in 2 years

PC3 after BS	3,488	3,150	3,488	3,375	3,488	3,375	3,488	3,488	6,750	6,975	6,750	6,975	6,975	6,300	6,975	6,750	6,975	6,750	6,975	6,975	6,750	6,975	6,750	6,975	54,788	82,125

Highlights

- We expect to launch total of **50 listings** across the term period, with **average SPU efficiency of 10** (current 爆品efficiency at roughly 14) and **PC3% of 20%** (+5% vs current PC3% to reflect price premium of IP)
- After considering **5% of potential black stock**, we aim to deliver monthly net PC3 of $3.5K during 1st collection, and $7K during 2nd collection. **And total net PC3 during the term period will reach $140K**

1 Barbie update [backup]: Assortment illustration

Lovito

Highlights

- Barbie is a **top-priority IP for us,** ranking among the top 25 most-searched IPs by both Shopee and Lovito buyers, generating **~105K** daily search impressions on Shopee and **~2.7K** within Lovito
- Outside of Shopee, it's also very popular with high instagram and google search volume, especially in our key markets such as BR and PH

2 BT21 update: Current commercial term is favorable with MG requirement of ~$38K (royalty of 6% and MG of 50%), pending review from artists' agency

Lovito

Commercial terms	
Term Period	Oct 1, 2025 - Aug 10, 2027 (22 months)
Total sales value	*1,271,667*
Implied monthly sales	*57,803*
1 **Royalty Rate**	6%
Total royalty commitment	76,300
MG%	*50%*
Minimum Guarantee (MG)	38,150
Payment Terms	70% payment upon signing 30% payment before Jan 1st, 2027
Distribution Channel	Shopee
Territory	BR, PH, TH, MY, SG, VN

BT21

Highlights

1. Current commercial terms are already favorable with **royalty at 6% and MG at 50%** (~$38K for 22 months), which is at the low bar of industry average levels. We are awaiting review and approval by the artists' agency.

2 BT21 update [backup]: Assortment illustration

Lovito

3 WB update: We prioritized 3 IPs for 4 launches tied to their marketing events in 2026 and initial sales projection already submitted to PLS for review

Lovito

2026	Mar	Jun	Aug	Dec
Prioritized IP		SUPERGIRL	Harry Potter	
Key events	International Women's Day celebration	New movie launch in June	HP 25th anniversary + Back to Hogwarts	HBO TV series (Launch in Q4)

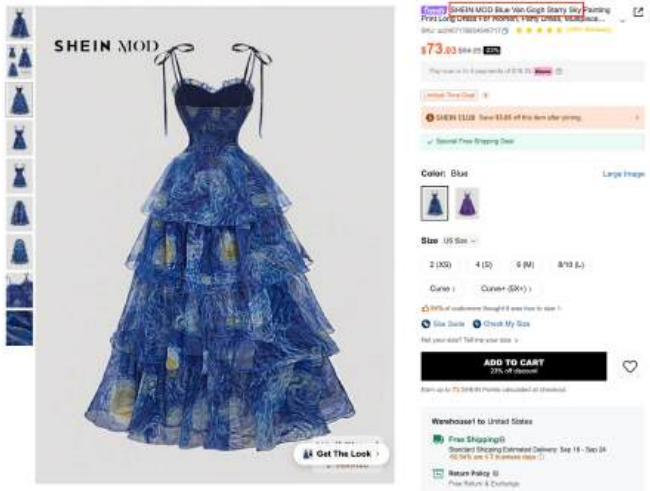
Assortment proposal

- **All categories,** covering T-shirts/blouses/dresses/shorts/jackets/tote bags/back bags, etc.
- **20-30 listings in each collection,** with annual GMV $500K

4 Free vs. Paid Arts IP: paid collaborations could strengthen brand image despite higher cost and longer lead time

Lovito

Free arts IP collaboration



- **定义**：已经进入公共领域（Public Domain）的艺术作品；主要包括：**梵高、莫奈、达·芬奇等过世超过 70 年**以上的艺术家的作品
- **Pros**：免费，无需授权方审核、可快速上线
- **Cons**：直接挪用则容易撞款，否则**需要较高二创能力**；缺少“官方合作”噱头，失去IP联名意义

Paid arts IP collaboration

- **定义**：拥有艺术品版权/品牌商标的**机构、博物馆或艺术家版权代理**，以付费授权的方式合作。例如：博物馆（卢浮宫）、当代艺术家（草间弥生）、艺术机构IP（MoMA）
- **Pros**：官方背书（x Louvre, x MoMA等），不易撞款，**利用机构名气 实现销量和品牌调性的提升**
- **Cons**：需支付授权费（royalty + MG），对销售周期和市场有限制，合作流程复杂、周期长

Implications and next steps

- Arts IPs, especially free ones, **depend heavily on re-design capabilities,** which is not about simply copying artwork patterns, but about transforming them into **attractive and wearable designs**
- We plan to **use AI tools** to improve design capability. We are already actively testing different AI platforms and will run pilot trials on re-creation to build this skillset

4 Free vs. Paid Arts IP: Through Alfilo's resources, we could explore a one-year always-on collaboration with MFA Boston, offering rich assets with a controllable MG

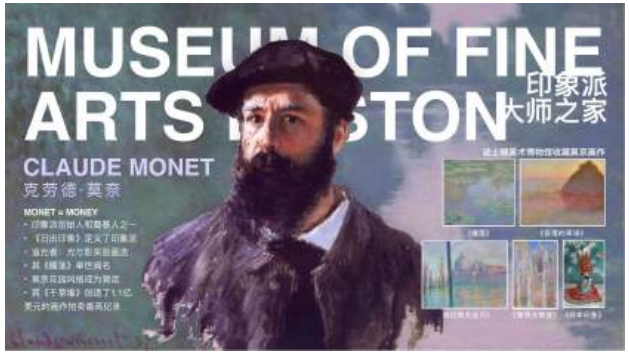
Lovito

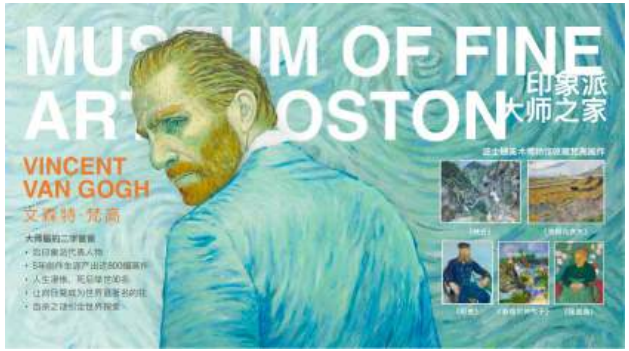
MFA, Museum of Fine Arts, Boston

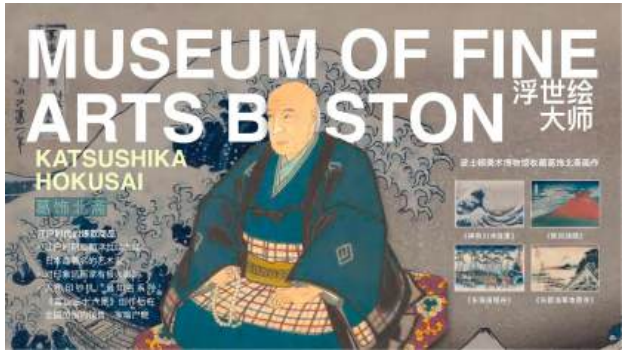
波士顿美术馆成立于1870年，是美国最重要的艺术博物馆之一，馆藏超过50万件。其亚洲艺术收藏尤其丰富，藏有葛饰北斋、歌川广重等日本浮世绘，以及中国传统书画和文物，**是东西方艺术交流的典范。**

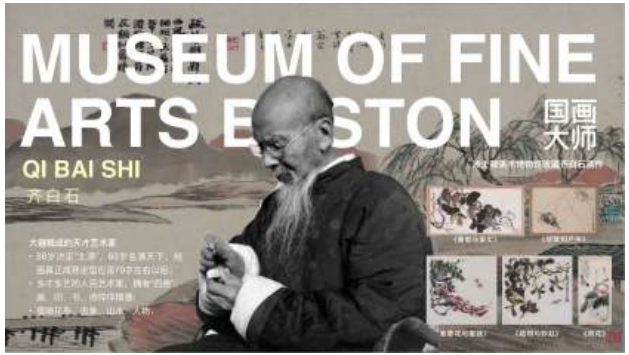
对于品牌合作而言，MFA 的优势在于：

1. **馆藏经典艺术家：**莫奈、梵高、雷诺阿等作品已进入公共领域，极具辨识度，适合普世大众。
2. **东西方融合 优势：**同时拥有西方经典与东方艺术（浮世绘、中国文物等），与亚洲品牌的审美调性契合。
3. **合作价值：**通过与 MFA 的官方联名，可以在传播中获得美术馆的文化背书，提升品牌形象与差异化。MFA也是优衣库、欧莱雅等消费品牌的官方合作伙伴









Highlight

- **IP艺术资源无限制：**合作期间可以无限次取用艺术IP，多次上新，比如全年**不同主题的 Lovito x MFA collection**
- **MG相对可谈，看中长期合作价值：**MG要求约 $35K（符合我们baseline projection预期），相对保守，看中incremental sales 价值

4 Free vs. Paid Arts IP [backup]: Assortment illustration

  - IP collaboration
  - New category growth - Women Bags

Key updates summary – Lovito Women Bags Plan

Lovito

Over the past few weeks, we have focused on exploring and defining the growth strategy for the women's bags business. To deliver this growth, we plan to launch and operate a dedicated specialized brand store (Lovito Carry). The following outlines our rationale, targets and execution plan

1. **Strategic rationale:** Across both CB and local markets, the top 10 women's bag shops are dominated by category specialists, accounting for more than 50% share. Compared to variety shops, category specialists formats attract more category-specific interest and purchasing users, leading to higher traffic weight and improved conversion on search-driven platforms. We conducted in-depth research on Mossdoom (one of the top CB brands) to understand the key success factors of revamping Lovito's women bag business
2. **Growth Target:** By reducing production costs, optimizing fulfillment, and strengthening user acquisition and loyalty, the Women's Bags business scale (ADO) aim to reach ~2,700 by December 2026, representing a 10x increase compared with today. Overall profitability (PC3) is expected to reach $0.3mil in 2026 and $1mil in 2027
3. **Key initiatives by benchmarking Mossdoom**
   - **Specialized Shop Operations:** We will establish dedicated shops focused exclusively on women's bags, supported by professional operations to strengthen a more premium and aspirational brand image. These specialized shops aim to attract fashion-conscious customers with higher purchasing power
   - **Product Development**: Beyond referencing Shopee top listings, we will leverage more local fashion trends, celebrity endorsements, film & cultural references, and social media buzz to incorporate the latest trendy hot-selling elements and strengthen product competitiveness. Our product strategy will shift from mass listings to curated, 精品-style launches, with greater emphasis on superior product quality and craftsmanship
   - **Sales & Marketing:** By expanding local fulfillment adoption and building in a stronger brand premium to support higher markups, we will allocate more resources to sales and marketing. Shop ADO growth will be driven by spike day promotion, paid traffic, live streaming and user activation

1 Strategic rationale：与女装相比，女包 CB penetration更高，但 Lovito女包在 CB市场份额较弱，预示着较大市场潜力

Lovito

Women clothes ADO breakdown

	VN	PH	TH	MY	TW	SG	BR
CB%	5.6%	16.9%	14.4%	45.8%	7.4%	84.0%	2.4%
Lovito%	4.5%	16.8%	8.9%	5.7%	3.5%	6.6%	29.9%

Women bags ADO breakdown

	VN	PH	TH	MY	TW	SG	BR
CB%	18.0%	20.9%	33.4%	47.9%	10.3%	79.2%	7.7%
Lovito%	0.2%	1.0%	0.2%	0.6%	0.6%	0.2%	4.5%

Highlights

- Shopee 平台女装CB penetration 参差不齐，**average CB penetration 10% 左右，**Lovito 在**CBWA占比10%**（L1份额）
- 女包受限于local供应链能力，整体**CB penetration高于女装（22%）**，但Lovito市场份额却显颓势，**亚洲市场基本1%以下**

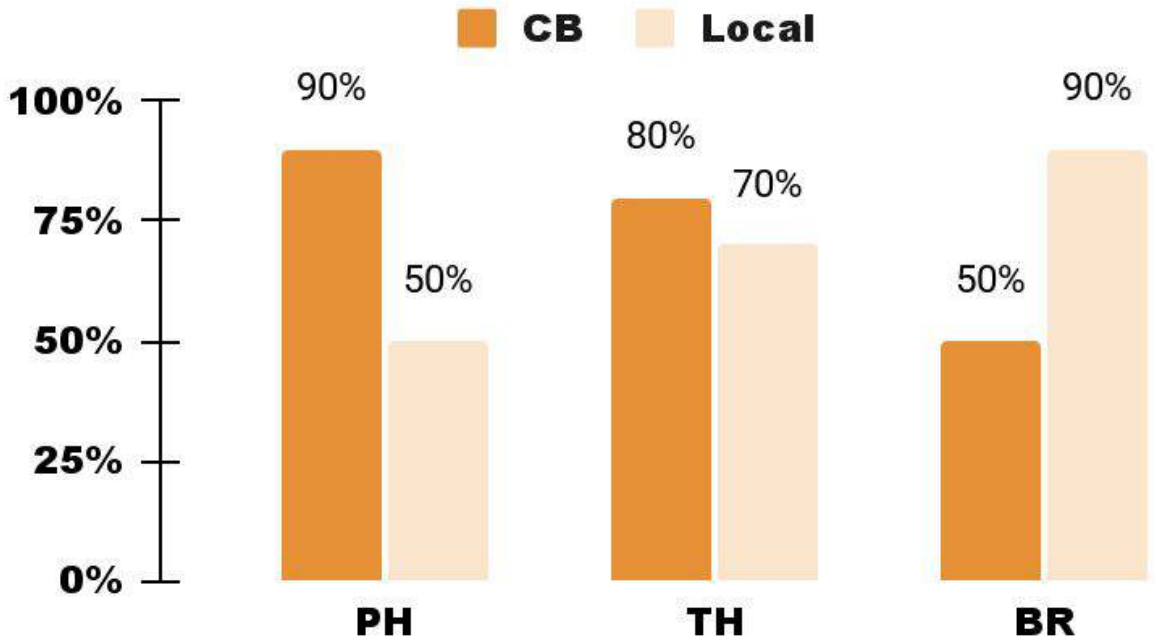
Note: CB% = CB L1 ADO / (CB+Local) L1 ADO; Lovito% = Lovito L1 ADO / CB L1 ADO

Private & Confidential

Strategic rationale：目前Shopee内女包Top shops以垂类店为主，少量非垂 类店会搭配鞋帽等配 饰一起售 卖

Lovito

Top10 Shops 垂类店比例



Highlights

- 无论是CB还是Local，女包top 10 shops 以**垂类店铺**为主，垂类店铺占比基本超过一半
  - 垂类店铺可以细分为**品牌（OEM或现货）**和**白牌铺现货（后面展开）**
- 非垂类店铺则以**包配型杂货铺**为主，除了女包以外还会同时售卖**帽子、鞋子**等配饰类商品
- 相比非垂店铺，垂类店铺能积累更多品类兴趣/购买用户，**从而在搜索等平台流量上获得更高权重，提升转化**

1 Strategic rationale：垂类店铺可进一步细分为3类，品牌OEM代表较优秀的产品设计能力，ODM较好平衡产品能力和价格 竞争力，白牌店 铺则强调规 模铺货和价格 竞争力

Lovito

	非垂类	垂类		
	品牌			非品牌

ID	259	1,323	2,963	4,085	5,308	6,284	5,102	

Highlight:

- 平均来看，各site店铺达到并稳定在当前规模均需要**1.5-2年左右时间**
- 除去ID后，整体ado规模~4k，**其中TH、PH为最大市场**
- **KSF包括：**
  - **自有供应链+海外仓严控PC2，留足充足营销预算**
  - **品牌-商品-运营闭环组织，共背GVM考核指标**

② Growth target：盈利能力方面，Mossdoom通过自有供应链换取丰厚的PC2，转化为充足的营销资源推动新店高速冷启，平均 2-3月实现稳定出单

Lovito

Mossdoom Women Bag UE				Lovito women bags UE (current)	
	USD	Revenue%	Note	USD	Revenue%

PC3	3.4	*30%*	*基于SG&A倒算*	1.1	*10%*

Highlight:

- 从整体的UE模型上看，**通过极低的生产成本和fulfillment cost换取73% PC2，转化为超过40%的markting&sales费用：**
  - **COGS:** 通过中国以及印尼本地的自有工厂进行生产，销量稳定下单款生产数量多（平均MOQ 1-2k），单件成本低；**是目前Lovito 采购价的60%**
  - **Fulfillment:** 聚焦亚洲市场，且所有商品通过海运到本地三方仓进行履约，与Lovito 相比极大降低了运费成本**（9% vs 38%）**
  - **Sales & marketing:** 超过40% 的市场营销预算，其中25% 用于**站内广告（5%）以及external marketing（20%）**

2 Growth target：Lovito女包垂店也将通 过优化商品开 发及履约成本，释放更多 营销花费

Lovito

PC3	3.4	30%	基于SG&A倒算	1.1	10%	1.5	13%

Highlight:-对比Lovito Current UE，我们将在以下方面进行优化：

1. 提升商品开发MOQ，在提升商品开发质量的同时，将cogs %从30%降低到28%
2. 在各个市场 推进LFF，PH测试100% LFF履约，将fulfillment cost% 从38%降低至16%
3. 提升External marketing及ads 花费比例，营销费用占比从15%提升至40%

2 Growth target：截止2026年，女包垂店 26年目标ADO ~2700、27年 ~4700，FY26 PC3 ~$0.3mil，FY27 PC3 ~$1mil

** Anbo FBS OKR metrics will be added after KPI calibration*

Key highlight

- **Cost:** Sep MTD CPI is $0.157, full-month CPI is projected to meet target
- **SLA**: all SLA related metrics are within target, with BWT 0.64 days faster than UST
- **Utilization is below 85%**, will continue to optimize the slots# per model ratio, improve model load capacity and refine the area storage strategy

**Aug actual costs are on-going update and will be finalized by end of August*

Highlights

1. Aug CPI **outperformed the target by 11%,** variable cost optimization mainly driven by continuous productivity improvement and fixed CPI 13% lower due to better-than-expected topline
   - 1a The cost of consumable is proportional to IPO, consumable CPI exceeded target slightly due to IPO dropped to 1.49 from budgeted 1.58 (6% drop)
2. As of Sep 15th, MTD CPI is $0.1565 within target, **full month expected to meet target;** Fixed cost may exceed by 1% due to projected LFF increase and CN ADO drop

BWT Update：对比UST，MTD APT+SOC快0.64天，BWT快0.65天，优于快0.2天的目标，MoM水平基本持平

Highlights:

1. MTD的BTW比UST快0.65天，优于目标的快0.2天，其中
   2. LM：在BR市场，SCS需要使用安 骏对母婴、美妆、保健品等品 类进行清关，而安 骏的时效表现较SPX慢2.24天，且SCS使用**安骏的占比高**（SCS 27.9% vs UST 13.07%）导致SCS BR LM落后0.4天；
   3. 对比UST，MoM的变化在各 环节处于正常波 动，除了LH的领先减少了0.08天：
      - BR 受8月底**台风**天气影响，一程航班出 现取消、延 误等异常 导致LH**优先安排被抵消** 且MoM LH时效增加；
      - TH 陆运受9月雨季影响路况 变差车辆运输放缓，**堵车情况 恶化**，导致LH优**先安排被抵消** 且MoM LH时效增加；

SLA Update: SCS SD%指标持续优于UST，在8/18放宽SD%考核要求后，SCS仍然有10%以上的领先；仓库应对99促销准备充分，SD%表现和日常相比没有变化，对比UST的领先扩大

SD% 考核标准调整

	SD%的订单确认时间	完成SD%考核的标准
818前	14:00 之前	必须在发货工作日23:59前完成首公里扫描
818后	12:00 之前	必须在发货工作日23:59前完成首公里扫描

Choice SD% vs UST SD%

Seller Team	7/28-8/3	8/4-8/10	8/11-8/17	8/18-8/31	9/1-9/7	9/8-9/11
UST	88%	86%	84%	88%	88%	83%
Choice	99%	99%	99%	99%	99%	99%
Gap	▲11%	▲13%	▲15%	▲12%	▲11%	▲16%

Data source: CNCB seller ops

Highlights:

1. CNCB 从8/18开始放宽对SD%的考核要求，截 单时间从14点放宽到12点，减少了要求当天到达 转运仓的订单数量；
2. 新的考核标准下，UST的SD%提升仅4%，主要由于UST长尾订单较多，仓库没有库存无法当天 发出；
3. 对比UST，SCS的SD%指标仍然有10%以上的领先；且仓库对99促销做了充分准 备，在促 销期间的SD%也仍然在99%和日常保持一致，对比UST的领先扩大到16%；

Ops update：为了优化CPI，仓库劳务工的编制较4月减少了35%，导致对抗单量波动的能力变差。因此，设计动态产能分级应急举措，现场管理已建立常态化预警机制，并根据不同单量波动情况执行相应人力调配方案

SCS 出库部门不同订单波动场景产能预备方案

单量涨幅场景	方案举措_SCS出库					响应时效	说明
100~110%	加班2H					T+0	当天部门主管视情况安排
110~128%	加班2H	部门停休				T-1	部门提前安排轮休计划
128~137%	加班2H	部门停休	跨部门支援			T-1	需跨部门协调沟通时间
137~141%	加班2H	部门停休	跨部门支援	FTE+BPO支援		T-1	FTE+BPO、跨部门协调沟通时间
141%~	加班2H	部门停休	跨部门支援	FTE+BPO支援	招聘临时工	T-3	HR与劳务公司的沟通时间

注1：1）加班2H指将当天部门作业时长由10H延长至12H；2）部门停休指当天不安排部门人员轮休；
3）跨部门支援指协调其他部门人员支援出库；4）FTE+BPO下场作业；5）招聘临时工补充人力缺口；
注2：以上方案只适用短期订单增量处理方案（如促销）

Target (Net ado)		2,387						2,065											
RR%		*46%*						*47%*											

Highlights

1. **单量：**出库ado 9月MTD 973，mom上升23%；出库卖家170家，mom增长21%
2. **Target setting：**8月target gross ado 1,380，RR 65%；**9月target gross ado 2,387**，相比8月目标提高了73%，RM完成难度较大，因此也在explore通过free trial等方式提高吸引力
3. **RM pitching**（后续展开）
   - 重新拉取了addressable pool & pitchlist，9月RM会按照新的pool再去re-pitch
   - **Anbo pool ado 500k，对应卖家数量4.2k；其中P0 pool ado 163k，对应卖家数量1.3k（以时效差的卖家为P0：APT1>1或APT>4的卖家）**

Anbo FBS：Anbo has expanded addressable ado pool by 3x and seller pool by 1.2x, with clear focus on high APT sellers; also designing free trial to improve conversion; all initiatives potentially drive YE ado from 1.2k to 2.6k

Key problems	Solutions	Progress Update	Status
Small addressable pool: Only ~160K ADO (5–6% of CB total ADO)	**Expand addressable pool：** • Anbo pool = CNCB total ADO - CBWH addressable pool (30–40% of CB ADO) - Anbo excluded pool • Include LATAM and TW sites' ADO to Anbo pool	**1. RM new pool** • RM addressable pool expanded **from 160k to 500k ADO** • Pitching seller pool expanded **from 2.8k to 3.3k GGP** 2. New pool in total 799k ADO • **Managed ADO: ~500k (RM's pitching pool)** • Unmanaged ADO: 288k (LT sellers, checking if can send group message in batch)	☑ Done
Low conversion: Only 1-2% pitched sellers converted	**Improve conversion:** • Prioritize sellers with worse APT to meet new DTS requirement	• **P0: APT1 > 1 or APT > 4** (APT worse than DTS requirements) ○ **1.3k sellers with 163k ADO** • P1: the rest, 2.9k sellers with 336k ADO	☑ Done
	• Redirect sellers with unsuccessful CBWH pitches to RM for Anbo follow-up	• Position Anbo as a storage and replenishment WH for CBWH, to minimize OOS and BS issue *(Pending Jason side evaluation)*	Ongoing
	• Enhance seller incentives:（E.g., Free trial）	**Free trial under evaluation** • **3–6 months** handling fee waiver for new sellers and new SKUs	
Limited KPI impact: Anbo + NNWH = 5% of KPI; Anbo only contributes ~4% of ado	**KPI optimization:** • Evaluate whether count only Anbo in KPI (exclude NNWH, which is with lower prioritization) to sharpen RM focus	Discussing with Jason team, pending NNWH final resolution	Ongoing

Anbo FBS [WIP]: Anbo can serve as a storage and replenishment WH for CBWH to mitigate blackstock and OOS issue and encourage higher FBS adoption

Work in progress, pending further verification

Metrics	MP seller now	Estimated: MP seller under Choice replenishment	Choice now
Black stock% *Take Aug. data of PH site as example*	*Potentially* 41% *(14% already BS, and 27% at risk)*	20%	10-12%
OOS% *Take Aug. data of PH site as example*	30%	15%	4-5%
FBS ado%	7%	10%	N.A.
Local WH cost saving	*To be evaluated*		

Values of Anbo staging model

1. **Black stock optimization:** help to control blackstock for MP sellers, esp. for new SKUs, sales-fluctuating trendy products and 轻小件 one-time shipments
2. **OOS optimization:** mitigate OOS esp. for volatile products and during campaign seasons, with sufficient storage in Anbo
3. **Higher FBS adoption:** attract sellers with blackstock / turnover concerns and onboard more SKUs from existing sellers to join CBWH
4. **Local WH cost saving:** reduce local WH cost and capacity pressure by lowering DOC storage locally

CS update

Lovito CS: Most of agent & chatbot related KPIs improved MoM, and Lovito is outperforming local SCS & SIP on most agent-related KPIs; We will focus on Order Conversion Rate uplift in the next

Lovito performs **better** than both local SCS/SBS & SIP+SID

Lovito performs **worse** than both local SCS/SBS & SIP+SID

Data range: MTD as of 09/12

Highlight:

1. **Agent-related KPI (MoM):** All agent-related KPIs showed MoM improvement over the past 3 months, mainly due to:
   - Weekly good/bad case sharing sessions, which have helped **improve agent CSAT**
   - Enhanced cross-sell and upsell training for agents, leading to **Order Conversion Rate (OCR)** improvement
   - Weekly shift-arrangement optimization, which helped reduce customer **waiting time in queue** while simultaneously improving **CPH.**
2. **Agent-related KPI (vs. other BUs):** Lovito is currently outperforming Local SCS/SBS and SIP+SID on all KPI metrics, with exception of Order Conversion Rate (OCR):
   - **Order conversion rate gap analysis:** CB SCS is lower than local SCS, mainly because our OCR in BR is low (MTD 12.8%), whereas Local SCS doesn't operate in BR. In contrast, local SCS has high OCR (MTD 21.6%) in ID.
   - **Next step:** 1) Continue to analyze the reasons behind unconverted chats and persist with selling skill training; 2) Follow up on the progress of the new "personalized listing recommendation" product feature in IHS (estimated live date - end of Oct)
3. **Chatbot-related KPI:** Chatbot deflection rate reduced MoM, as we shifted some low-CSAT scenarios to agents to improve bot CSAT and Order Conversion Rate

SCS CS: Most of KPIs improved MoM; We will focus on reducing waiting time in BR by fulfilling HC gap and traveling to PH to enhance onsite monitoring and optimize shift arrangement

SCS performs better than both local SCS/SBS & SIP+SID

SCS performs worse than both local SCS/SBS & SIP+SID

Data range: MTD as of 09/12

Highlight:

1. **Most agent-related KPIs are showing MoM improvements, and CB SCS is outperforming local SCS/SBS and SIP+SID on most KPIs,** except for order conversion rate and avg. waiting time in queue. MoM improvement is mainly due to:
   - Our **new PH vendor (ePerformax) is ramping up quickly** after a one-month pilot in Aug
   - We continue to conduct weekly good/bad case sharings to L1 agents to **improve CSAT**, and we've initiated upsell & cross-sell trainings to **improve order conversion rate**.
2. **Waiting time in queue: Although improved MoM, it's still longer than other BUs and higher than target. It's mainly due to long waiting time in BR:**
   - **Reasons include:** 1) BR ADO higher than expected (we overestimated the ADO drop under PID sunset). We've since added more L1 agents for BR given the current high productivity; 2) Some agents from our PH vendor were absent in Aug and Sept due to the rainy season in PH
   - **We anticipate meeting our Sept target by the EoM** by: 1) Adding more L1 agents to fulfill the HC gap; 2) Traveling to PH in Sept to enhance onsite monitoring and optimize shift arrangement
3. **Chatbot:** 1) Our order conversion rate is still lower than local SCS and SIP, particularly in BR. We will collaborate with BPM to deep dive into reasons and further improve the OCR; 2) Deflection rate MoM dropped as we shifted some low-CSAT scenarios to agents to improve bot CSAT

ePerformax (the new PH vendor) pilot review & HC shift plan: ePerformax demonstrated strong performance during pilot month, so we plan to transit from current VN vendor to ePerformax in Oct

ePerformax (the new PH vendor) trial month performance update (SCS)

	W1 Aug 11-17	W2 Aug 18-24	W3 Aug 25-31	W4 Sept 1-7	W5 Sept 8-14
ePerformax (50% PH chat volume)					
Agent conversion rate	20.0%	17.6%	15.6%	19.8%	21.0%

Agent productivity	-8.2	-1.1	0.7	0.1	0.9

Cost saving if shifting HC from BSV to ePerformax for all SEA sites (SCS)

	Sept	Oct	Nov	Dec
Daily Required chats # (SEA)	2,471	2,552	2,717	2,815
BSV				
Chat/hr/agent (BSV)	16.9	16.9	16.9	16.9
HC need (BSV)	26	26	28	29
Monthly cost per HC (BSV)	$1,132	$1,132	$1,132	$1,132
Total cost / mth (BSV)	$28,957	$29,914	$31,841	$32,989
Cost per chat (BSV)	$0.39	$0.39	$0.39	$0.39
ePerformax				
Chat/hr/agent (ePerformax)	15.9	15.9	15.9	15.9
HC needed (ePerformax)	27	28	30	31
Monthly cost per HC (ePerformax)	$812	$812	$812	$812
Total cost / mth (ePerformax)	$22,109	$22,840	$24,312	$25,188
Cost per chat (ePerformax)	$0.30	$0.30	$0.30	$0.30
ePerformax vs. BSV				
Total cost / mth saving	-$6,848	-$7,074	-$7,530	-$7,801
Cost per chat saving	-$0.09	-$0.09	-$0.09	-$0.09

Conclusion: Following pilot in Aug, we recommend replacing BSV (our existing VN vendor) with ePerformax (the new PH vendor), due to:

1. ePerformax's core KPIs have shown **rapid WoW improvement**
2. After only 5 weeks of operation, ePerformax has **surpassed BSV in most core KPIs**
- ePerformax demonstrates as **strong management capabilities** as BSV, including shift arrangement, gap analysis, and self adjustment

- **HC shift plan: We plan to shift all the 28 L1 agent HCs from BSV to ePerformax by mid-Oct for all SEA+TW chats**

3. **Cost saving: This HC shift is projected to result in a monthly cost saving of $7~8K, and cost saving of $0.09 per chat**

SCS & Lovito & Warehouse bi-weekly update

2025/9/18
