SIP Monthly Meeting

18 Sep 2025

Agenda (18 Sep)

1. Performance

2. For Discussion
   - 2.1. SIP seller P&L booking and target
   - 2.2. Direct selling regional roll-out
   - 2.3. SIP x Adjacent market entry
   - 2.4. SIP x Resell

3. For update
   - 3.1. Price bidding
   - 3.2. Trendy SKU push
   - 3.3. Content push
   - 3.4. CS migration

Aug-25 monthly meeting follow-ups

#	Topic	Action item	PIC	Updates
1	CS	Proceed to confirm PH CS management / support team to be based in MY, with 11 SIP dedicated HC	Qiang Wei / Emily Lin	Completed; reporting line change from 1 Oct
2	CS	Update Chris on the change of reporting line and cost saving	Qiang Wei	Completed; topic discussed in Aug CB monthly meeting
3	CS	Align with reg BI on FTE/BPO cost booking to achieve highest combined PC2 at Shopee level	Chiong Zhi Ann	Completed; aligned with reagan team 1) BPO cost booking from Sep-25; 2) FTE cost (non-CS and CS) booking from Jan-26
4	CS	Align with regional CS on defintion of CS ops metrics (e.g., abandonment rate, AWT)	Qiang Wei	Completed; updated in SIP weekly email week ending 29 Aug
5	Livestream	Explore livestream options for SIP	Zhang Yu	Update today
6	Direct selling	Propose incentive plan with local RMs to accelerate 1:1 pitching of target sellers	Jill Huang	Update today
7	WH cross-selling	Assess opportunity of local FBS cross-selling regional scale up	Jill Huang	In progress; aligned with reg BD team on focus markets (MY, VN, PH); in progress of discussing potential and feasibility with local markets; to update regional proposal in Oct-25 monthly meeting

Private & Confidential

Performance

[Topline]

Local SIP: 602k ADO, 106% RR, CB% +0.18pp MoM, driven by 1) MY&SG fashion program push and 2) new SKU ads optimization

CNSIP: 29k ADO, 109% RR, CB% +0.13p.p MoM; mainly driven by 1) new SKU migration and incubation 2) CSPU price bidding

Direct: **10.6k ADO, 119% RR, CB% +0.05pp MoM**; mainly driven by MYSG lane MoM new sellers incubated via co-share vouchers and auto opt-in for Adxpress

WH cross-selling: **8.6k ADO, 106% RR, CB% +0.04pp MoM**; mainly driven by 1) CB FBS Direct SKU growth, 2) CB choice 132% RR (target under projected); ADG **90% RR**, mainly due to ABS missing target: CB Choice ADO outperformed with low ABS ($4), while Local FBS missed ADO target with high ABS ($10)

Topline - Sep EOM proj: ADO 209k, 100% RR, %CB -0.05% MoM; ADG $2.1M, 98% RR, %CB +0.03% MoM. MYSG adjusted down projection vs target to land at P&L breakeven while comms fee reverted back to CB rates starting from 16 Sep

[Topline]

Local SIP: proj 159k ADO, 101% RR, CB% -0.1pp MoM; proj $1.63M ADG, 99% RR, CB% -0.1pp MoM; Performance MoM drop as less marketing budget from MYSG seller P&L revision back to breakeven to CB seller level, MYSG proj ADO -2.2k orders, proj ADG -$39k vs initial target.

CNSIP: proj 31k ADO, 95% RR, CB% +0.07pp MoM; proj $268k ADG, 98% RR, CB% +0.10pp MoM; RR<100% mainly due to incubation organic SKU efficiency lower than expected, will push to catchup in 2nd half of the month.

Direct: **proj 11k ADO, 104% RR, CB% +0.02pp MoM; proj $139k ADG, 97% RR, CB% +0.01pp MoM**; driven by strong seller/SKU growth in VNMY and IDMY (+45% MoM)

WH cross-selling: **proj 8.7k ADO, 93% RR, CB% +0.01pp MoM; proj $54k ADG, 85% RR, CB% +0.02pp MoM**; mainly due to (1) CB FBS over-projection (84% RR) and (2) Local SCS (93% RR) reduces investment to reach P&L breakeven.

Revised

Added comparison vs target

SIP Seller standalone P&L - Sep EOM proj: Local SIP expected to land at -$40k as BR requests BRSIP P&L run at -$40k to drive topline; CNSIP expected to land at breakeven

[P&L]

Local SIP

- **Aug actual: +$559k, +847k above target**; driven by higher than expected profit passback from ID from BPSF initiative
- **Sep projection**: **-$40k**, **+$265k above target**; due to target revision to breakeven for all lanes except BR requests BRSIP P&L to run negative at -$40k to drive topline growth
- P&L booking changes from Sep onwards 1) added CS BPO cost; 2) **revised MYSG P&L from -3% to breakeven by 1) cutting marketing budget; 2) raise price w.e.f 18 Sep.**

CNSIP

- **Aug actual: -$317k, -$128k below target**, due to **-200k** from reinvesting 5% P&L in Jun-Aug to counter management removal and incubate new SKUs; **-117k** from new-to-market 3-month commission waiver higher than expected; commission waiver booked as cost in CNSIP seller P&L in Jul-Aug (instead of foregone revenue in MP PC2) due to ops challenge to set waiver in the system, resolved from Sep
- **Sep projection**: **+$6k**, **+$92k above target**, due to target revision by raising price for SG, MY, TW (w.e.f 4 Sep) and follow by TH, VN (w.e.f 18 Sep) to 1) offset increasing platform fee; 2) generate marketing budget (instead of running negative P&L in Jun-Aug)

[For discussion] Local SIP seller P&L booking and target alignment

Revised

Added Baseline Comparison vs Chris version

[Recap] Management direction to provide SIP big seller discount - 2% commission waiver + 5% ads discount

Confirmed to give
1) 2% commission waiver and
2) 5% Ads waiver

SIP team revise the baseline based on better push performance, that's why

- ADO is increasing vs the version we show Chris,
- seller P&L for option 2 also increase from 12.5mil to 13.8mil

Proposal for approval: To be consistent with Choice approach, SIP plans to reinvest the seller P&L surplus from the big seller discount to drive maximal and sustainable topline growth, which is best for platform

Recommended

	Option A (Not to spend at all)	Option B (Spend all on ads)	Option C (Spend for max topline, Choice approach)
Biz priority	**Keep seller P&L as-is**	**Maintain combined PC2 at Shopee level**	**Maximize topline**
Spending strategy	Do not spend, keep in seller P&L	Maximize investment on ads, so that spending on ads can translate to platform ads revenue to minimize combined PC2 reduction	Spend on a combination of marketing tools for max spending ROI
FY26 ADO	181k	187k	190k
FY26 ADG	$1.9M	$1.9M	$2.0M
FY26 Seller PnL	$13.8M	$0	$0
FY26 MP PC2	$39.2M	$49.5M	$44.2M
FY26 SLS PnL	$6.2M	$6.6M	$6.8M
FY26 Combined PC2	$59.3M	$56.1M	$51.0M
FY26 UE	$0.90	$0.82	$0.71
Considerations	(-) no value-add to shopee, only a transfer of booking between 2 P&Ls	(+) minimize change on combined PC2 and UE on Shopee level (-) CPO high at ~$5.5 (-) poor ads ROI will cannibalize platform ads ecosystem (same issue with Choice last year)	(+) highest topline (+) best marketing ROI, CPO ~$3.0 (-) combined PC2 will be lower

Highlights (FY26 projection)

Propose to follow Choice approach, target seller P&L breakeven and maximize topline

$750k/month additional budget from big seller discount

- $1M/month total saving from big seller discount
- (-) $250k/month additional FTE cost

[Option C] Plan to drive +8k ADO by reinvesting $750k/month budget into topline growth

- $300K on paid ads mainly to incubate new SKUs, incremental CPO $3.3
- $375K on rebates/vouchers, mainly to drive conversion of trendy/top SKUs, incremental CPO $2.9
- $75K to diversify marketing / traffic sources to drive sustainable growth (e.g., AMS, livestream, OM), incremental CPO $3.7

Private & Confidential

[Backup] MoM budget submission view: Big seller discount effective from Oct-25; seller P&L above break-even for all months in FY25 and FY26

We are here

Highlights

- 3 lanes newly launched on 25 Aug: VNPH/VNSG started acquisition ramp-up; THPH piloting with 50 selected brands till 22 Sep to ensure system stability
- 5 lanes target to launch by 25 Sep: IDSG/IDPH planned on 19 Sep; MYTH/MYPH pending MY and TH SPX sign-off logistics channel live testing by 19 Sep and launch by 22 Sep; SGMY pending TOS & logistic channel testing by 24 Sep
- Target to launch rest of the lanes by EOY as to: (1) Focus on ramping up top lanes for biz case building (2) Local Ops, product resource constraint during peak seasons

Direct targets: For MYSG/IDMY/VNMY, target 25K sellers, 23K ADO (+24% incremental to lane) by Dec-25; 45K sellers, 87K ADO (+85% incremental to lane) by Dec-26; in progress of aligning targets for newly launched lanes

Highlights

Seller/SKU count: +51%/+55% MoM across lanes, despite paused seller acquisition 1-15 Sep in view of campaign

ADO/SKU effi: MTD missing target due to 1) seller needs time to ramp up (IDMY/VNMY observes MoM SKU effi improvement despite fast SKU growth); 2) long-tail sellers onboarded via mass-pitching have low ADO/SKU effi potential; **catch-up plan**: top 10 sellers success case building with upsized rebates and ads exposure

P&L: healthy, negative for some lanes mainly due to first 3-months commission waiver

[Seller acquisition] Progress: 893k (84% pitching pool) pitched with 22k accepted; next step focus on building success case for ID to support target sell repitching, and simplify RM process for VN to speed up pitching

	Target pitching pool			Progress		Conversion

Highlights

1 **[P1] Acquisition to focus on group [A] 1:1 target pitching pool**, **high ADO potential** as they are the top local/SIP sellers with more resources and business ambitions to be successful in direct selling; **current pitching speed target at 1k sellers per month**

- 2 **VN**: 11% target sellers pitched for R1, 40% accepted; **slow pitching progress** as RMs prioritized capacity to support seller onboarding and troubleshooting in Jun-Jul; catching up to 1k per month as aligned from Aug-Sep; next steps to 1) **explore RM incentive with VNBD**; 2) **dev seller sign-up and onboarding automation tool** to simplify RM workload
- 3 **ID**: 46% target sellers pitched for R1, 8% accepted; **low acceptance rate** as more ID sellers 1) want to focus on local biz; 2) non-responsive; next step to **focus on building success cases to support RM re-pitching** [details on next 2 pages]

- **[P2] Mass pitching for group [B], lower ADO potential** but serve to open opportunities to those willing and capable
  - 85% Pitched, rest are SIP performing sellers that we want to pace out the pitching to reduce ADO loss from SIP; target to complete 100% by EOY
  - Next step to trigger weekly system pop-up to increase acceptance rate

[Seller acquisition] 1:1 pitching rejection reasons: 37% of ID sellers rejected indicated lack of interest in expanding overseas; critical to build success cases to support RM re-pitching

RM 1:1 pitching	IDMY		Next steps
	seller #	% of total pitched	
Total piched sellers	**2,547**	**100%**	
[1] Total accepted	**245**	**9%**	
[2] Total rejected	**1,132**	**45%**	
[2a] Valid rejected reasons	**34**	**1%**	**N.A.**
-- Already has MY store	**13**	0.5%	
-- Export limitations (e.g. blocked categories, distribution rights)	**21**	0.8%	
[2b] Can repitch with more support	**971**	**40%**	
1 -- Seller wants to focus in local business	**720**	29%	Support repitching with success cases
-- Manpower/Budget limitation	**175**	7%	
-- Unsure about export success	**14**	0.6%	
-- High admin fee	**62**	3%	Add seller education materials to address seller questions directly
-- Unfamiliar about systems and processes	**0**	0%	
-- Unfamiliar with using marketing tools in overseas market	**0**	0%	
2 **[2c] Rejected without reasons**	**127**	**6%**	
[3] Pending response	**1,170**	**46%**	

Highlights

1. **37% ID sellers pitched indicate the lack of interest** in expanding overseas (focus on local biz, resource limitations, uncertain about potential); critical to build success cases to support RM repitching to stimulate seller interest

2. **52% of ID sellers pitched are pending** (rejected without reasons, pending response); next step to push RMs to obtain definite answers by EOM, and explore local RM incentives to improve follow-ups

[Seller acquisition] Directional alignment - Success case building: Propose to build success cases with 5 locally nominated IDMY/VNMY sellers; need $95k budget from MY

Top shops on IDMY/VNMY based on ADO and local RM nominations

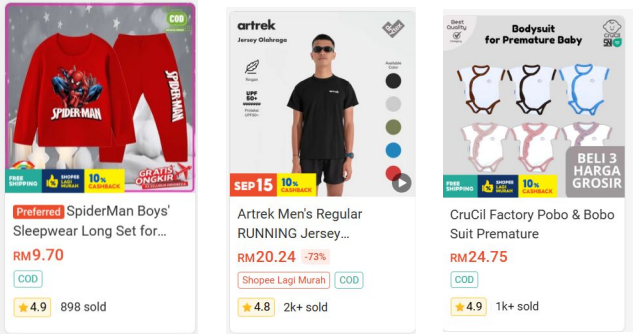
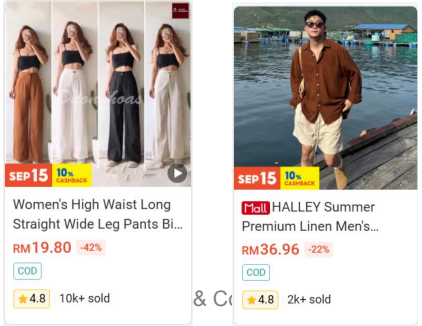
Assortment (IDMY):



Assortment (VNMY):



Highlights

- Require strong success cases to support target seller repitching + local offline seller event engagement
- Plan to support the nominated sellers for a month in Oct as seed sellers
- Next-steps to align seed seller list and budget with MY

[SKU effi] Observed MoM increase of SKUs, ADO and SKU effi for each batch of newly onboarded sellers across lanes

[Follow up question from SIP weekly email] The increase in SKUs does not seem to translate to ADO. Are the new sellers participating in campaigns yet?

>> Sellers take 1-6 months to ramp up CB related know-how and topline. For each monthly newly onboarded batch, we observed their SKU count (new listings from sellers), ADO, and SKU eff improved MoM across all batches and lanes

Performance tracking of monthly onboarding batch

**No CFS Slots incentive for MYSG Direct*

[Backup] Direct focus for launched lanes: Sep-Oct focus on (1) improve scope and performance for launched lanes (2) prepare for new lanes launching in Aug

Focus area	Initiatives	Action plan
Grow seller / SKU	1. Ramp up mass seller acquisition	1a. Complete whitelisting of all eligible sellers on launched lanes to GSC (complete IDMY/VNMY/MYSG by end-Sep) 1b. Conduct weekly mass acquisition via system pop-up (start from 15 Sep for H2 of each month Oct-Dec) 1c. Explore offline seller events to market direct selling program (align marketing plan with local markets by end-Sep)
	2. Push top local sellers to join	2a. Focus local RM 1:1 pitching efforts on top local sellers (on-going) 2b. Build success cases with top sellers to supporting pitching effort (include IDMY/VNMY top sellers to MY fashion push by end-Sep) 2c. Confirm 3-month incubation/growth incentive plan with each import market (completed)
	3. Support accepted sellers to start selling	3a. Send system reminders to sellers to complete onboarding process (on-going) 3b. Local RM to follow up with top sellers to support onboarding (on-going)
	4. Improve SKU migration efficiency	4a. Assess current migration gaps, improve SKU migration via ops/system measures (start from 22 Sep with BI data) 4b. Continue weekly cadence to revive deleted SKUs from SIP-returned shop (on-going) 4c. Push system tool to mass-resync SKUs for sellers (on-going) 4d. Push for listing limit lift for new Direct shops (on-going)
Improve SKU effi	5. Push for price competitiveness	5a. Roll out system feature to use seller's discounted price to calculate overseas pricing (system live 5 Sep, seller notifications by 16 Sep) 5b. Continue to push top seller lower price in exchange of destination market PRM support (on-going) 5c. Nominate direct sellers to price bidding (start from 1 Oct)
	6. Push for marketing investment, campaign participation	6a. Monitor and push seller utilization of platform ads credit and paid ads (on-going) 6b. Build offline ads virtual shop to help seller top up ads in overseas shops (completed for ID/VN) 6c. Push sellers to invest in marketing tools (voucher, campaign participation, etc)
	7. Enhance system to enable more marketing tools	7a. Build system feature to allow ads purchase with shopee wallet, AMS, seller video, seller livestream in overseas shops (in dev pipeline)
Formalize regional direct selling system	8. Establish regional ops policy and process	8a. Align listing limit sync between export and import markets (ETA end-Oct) 8b. Align payment flow between export and import markets (on-going with lane launches) 8c. Align seller and buyer CS SOP and knowledge base in each market 8d. Align regional TOS, seller pitching materials, seller comms messages for direct selling
	9. Establish regional commercial policy and process	9a. Propose incentives / KPI measures to motivate local RMs (deep-dive today) 9b. Align regional criteria of Mall status and SOP to onboard direct sellers to CB Mall in import markets (pilot on IDMY, to roll out by end-Sep) 9c. Provide product bible to help sellers choose the right listings and pricing for overseas shops (completed for ID/VN)

[For discussion] Adjacent market x SIP system enhancement

Adjacent market launch: TH/VN decide to use SIP model to launch KH/MM/LA in Feb-26, after the adjacent market platforms are ready; SIP targets to start with 5 local SIP lanes and 3 CNSIP lanes at launch

SIP phase 1 launch prep for adjacent markets

Parent market	Adjacent market	Economic metric vs parent market	CNSIP	Local SIP (adjacent)	Local SIP (other lanes)
VN	KH / Cambodia	17% population 9% GDP	Feb-26	Feb-26, VN-KH SIP	Later phase, small biz potential Benchmark IDVN ADO = 300
TH	MM / Myanmar	73% population 12% GDP	Feb-26	Feb-26, TH-MM SIP	Feb-26, ID-MM SIP / VN-MM SIP Benchmark: IDTH ADO = 4.5k VNTH ADO = 3k
TH	LA / Laos	12% population 3% GDP	Feb-26	Feb-26, TH-LA SIP	Later phase, small biz potential
MY	BN / Brunei	1% population 3% GDP	No (1 FE)	No (1 FE)	No (1 FE)

SIP system enhancement requests: TH/VN to initiate feature requests to add 3 features to existing SIP design (seller promo, buyer chats by seller, RR by seller) for adjacent entry purpose, with system replicability to other SIP lanes

System enablement of cross-selling models

	Entity	Local SIP (as-is)	Local SIP (to-be)	Direct Selling
	Shop mirroring	✅	✅	✅
	Listing mirroring	✅	✅	✅
	Stock sync	✅	✅	✅
	Price sync	✅	✅	✓ *Partial*
	Order sync	✅	✅	✅
	One-stop shipment	✅	✅	✅
1	Seller promo sync	✓ *Partial*	✅	✓ *Partial*
	Platform Promo sync	❌	❌	❌
2	Buyer to Seller Chat	❌	✅	✅
3	RR / Return to Seller	❌	✅	✅
	Ads Budget / Affiliate sharing	❌	❌	❌

Impact assessment: Estimated $2.8M monthly budget saving (6.5% GMV) with risks of seller drop-out/inactivity; to monitor feature roll-out in adjacent markets closely to draw learnings to other SIP lanes before scaling up

	Feature enhancement	Biz implications		Benefits vs risks assessment	
		Local SIP (as-is)	Local SIP (to-be)	Potential benefits	Potential risks
1	**Seller promotion sync**	Auto-sync to overseas shop ● **Item promo** only	Auto-sync to overseas shop ● Item promo ● **(+) Seller voucher** ● **(+) Deep discount**	**$500K monthly budget saving**, assume 20% platform orders come with export market seller vouchers	**Potential seller complaints** given local seller fail to earn profit with different voucher usage behavior in foreign markets.
2	**Buyer-to-seller chat**	**SIP agent** manages buyer chats	**Seller manages** buyer chats	**$100k monthly agent cost saving**, assume 50% performing seller adoption rate	**Long-tail sellers lack capacity/motivation** to serve overseas buyers **Sellers lack knowledge on SIP shops and CB selling** to provide right responses to buyers (e.g. overseas shipping, listing, pricing related)
3	**RR/failed delivery cost back to seller**	**SIP bears** 100% cost	Enable RTS **Seller bears** 100% cost	**$2.2M/month budget saving**, benchmark 5% GMV in Aug-25	**Negative seller sentiment** from additional cost vs no cost in current SIP model **Potential seller loss-making**, if overseas RR cost higher than local RR cost
				Total benefits: $2.8M budget saving per month (~6.5% GMV)	**Key risks: additional cost/responsibility to seller leading to seller drop-out/inactivity/negative sentiments**

[For discussion] SIP x Resell

[SIP-PH Resell] Serve to reduce loss from failed delivery orders; in progress of obtaining HQ legal/tax/finance clearance and securing PHWH space for launch by Nov-25; Email approval required for regional FPC to set up SIP-resell P&L structure

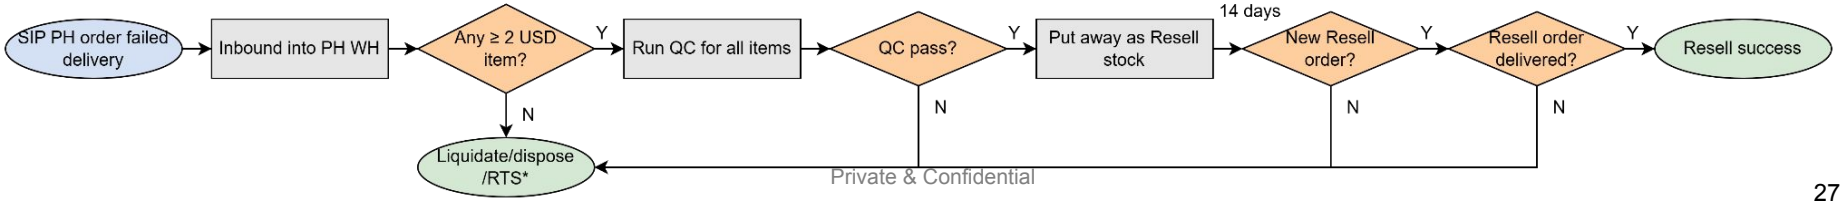
About Resell	Eligible items of failed delivery/in-transit RR orders are inbounded into a fulfillment WH for secondary sales
Objective	Reduce loss from failed delivery orders (otherwise liquidated or disposed) by giving eligible items a second chance to be resold
Scope	CNCB has already rolled out to PH & VN **SIP rollout to PH first for both CNSIP and local SIP (ETA: Nov 2025)**
Biz Impact	Projected **615 ADO, $5.1k ADG by Dec-25** (assuming full rollout)
Rollout Progress	**WIP:** 1) Obtaining HQ legal/tax/finance clearance; 2) PnL set up* ***Email approval required for new business initiative request to FPC*** **Blocker for earlier launch:** PH WH at full capacity, proposed pilot with limited shops/SKUs; awaiting PH PIC update on space allocation

Illustration of Resell Impact

FD/ITRR Order Handling		As-Is	Resell Success
Physical Parcel	CN SIP	Liquidate/dispose/ RTS*	Delivered to buyer
	Local SIP	Liquidate/dispose	
Payment	CN SIP	Seller bear loss	Seller & SIP paid
	Local SIP	Seller escrowed, **SIP bear loss**	

**Only applicable to CN SIP sellers who open RTS service*

SIP PH Fail Delivery Order Resell Flow



[For update] SIP price bidding

[Overview] SIP Commercial initiatives in FY25H2: Reduce price for focus SKU groups and increase price for the rest to cope with budget tightening, while optimizing traffic tools to improve marketing efficiency

Key Levers	Key initiatives	2025 H1 (completed) *SIP Jun 25 ADO uplift +29K vs Dec 24*	2025 H2 (on going) *SIP Dec 25 ADO uplift +32K (E) vs Jun 25*
Price adjustment	**1. Lane level markup adjustment**	1a. Reduce export market BPSF - Reduce export market first mile charges as SIP orders don't have last mile in export markets - *Total budget savings 1.7M monthly*	1b. CNSIP increased country margin - In SEA market to counter 10% management fee removal - *Total budget savings 70K monthly*
	2. Focus group push	2a. Seller COGS reduction - Pitching seller for shop level price reduction - *ADO uplift +1.5K by Jun 25*	Update **2a+. CSPU price bidding** - Bid for lowest price for SIP - *Expect: ADO uplift +3.7K by Dec 25* - Status: WIP. Full scale ramp up ETA Oct 25
		2b. Non-performance SKU price reduction - Price rebate for non-performing SKU >90D - *ADO uplift +15K by Jun 25*	-
		2c. Raya assortment push - SKU sourcing for Raya hot assortment - *ADO uplift + 22K YoY in Raya month*	Update **2c+. Trendy SKU push** - Source and push assortment based on top keywords in all markets - *Expect: ADO uplift +7.6K by Dec 25*
		-	2d. Focus category joining platform programs - SG/MY done in Aug 25. PH WIP ETA Oct 25 - *Expect: ADO uplift +7K by Dec 25.*
		-	2e. SKU level price optimization - Adjust price in SKU level with Price elasticity automation Tool - Automation tool under development. ETA Oct 25 - *Expect: ADO uplift +3K by Dec 25*
Marketing optimization	**3. Traffic: Ads, AMS, Livestream, etc**	3a. Paid ads lifecycle revamp: - Cut existing ads if ads reliance is lower. Ramp up new ads - *ADO uplift +9.6K by Jun 25*	3a+. Paid ads optimization: - Machine learning model to select SKU for new SKU incubation - *Expect: ADO uplift +3K by Dec 25.*
		-	Update **3b. Traffic diversification** - Video: SIP video upload from 4 sources - Livestream: trial with SG KOL and Shoppe OA

SIP price bidding: Started price bidding since Aug; YTD 48.6k winning models representing 7.8k SIP ADO

Coverage funnel		CNSIP	Local SIP	SIP Total
SIP Model#	Eligible model	200,741	817,662	1,018,403
	Bidded model	17,940	59,216	77,156
	Winning model	13,497	35,135	48,632
	Bidding rate: bidded model / eligible model	8.94%	7.24%	7.58%
	Winning rate: winning model / bidded model	75.23%	59.33%	63.03%
SIP ADO	Eligible model	3,272	32,993	36,265
	Bidded model	1,407	8,037	9,444
	Winning model	1,266	6,572	7,839
	Bidding rate: bidded model / eligible model	43.00%	24.36%	26.04%
	Winning rate: winning model / bidded model	89.98%	81.78%	83.00%
CSPU ADO	Total CSPU	1,916,183	2,079,429	3,995,611
	Eligible CSPU	256,109	480,588	736,697
	Bidded CSPU	14,348	30,114	44,462
	Bidding rate: bidded CSPU / total CSPU	0.75%	1.45%	1.11%

* Bidding rate on 9/14
* CSPU ADO is not aggregated by unique CSPU

Actions taken from Aug

- Nominated CNSIP and local SIP SKUs to price bidding **since Aug-25**
- Completed 2 phases of actions
  - **BAU nomination of all no-discount-needed models**; submit bidding twice a week
  - **Trial run for discount-needed models**, to assess rebates required and spending ROI before scaling up to more SKUs

Bidding result

1 **SIP SKU/ADO angle: winning models are mainly short-tail SIP models**
- 1M models (36k SIP ADO) eligible for bidding
- 77K model bidded, representing 8% of eligible SKUs (26% of eligible SIP ADO)
- 49k models won bidding, representing 65% of bidded models (83% of bidded ADO)

2 **CSPU ADO coverage angle: bidding rate is low but expected mainly due to long-tail nature of SIP SKUs**
- **1.11% bidding rate** (vs CNCB MP bidding rate of **30%**)
- Lower bidding rate due to 1) low eligible rate due to long tail SKU pool nature; 2) bidding with rebate is not fully ramp out yet. 3) manual process has 2 days delay from real time bidding pool

YTD results: Pilots successful, +1.4k ADO (+38% uplift) on winning models, mainly driven by 42% impression uplift; incremental CPO healthy at $0.24

Lanes	MTD bidded ADO	MTD winning ADO	Winning rate	PV change	SKU effi change	Sep ADO incremental	CPO
Local SIP	4,890	3,744	76.6%	+42%	+4.1pp	936	$0.18
CNSIP	1,201	1,093	91.0%	+42%	+2.3pp	415	$0.43
Total	6,091	4,837	79.4%	+42%	+3.5pp	1,351	$0.24

Highlight:

- +38% ADO uplift, mainly driven by 42% impression uplift
- +3.5pp SKU effi improvement, improvement observed for both ADO-generating SKUs and non-performing SKUs
- $0.24 incremental CPO, healthy and better than other marketing tools - plan to shift more budget to fund discount and bidding of more SKUs

Next steps: To scale up price bidding; target +3.7k ADO uplift by Dec-25, driven by 1) rebates to more SKUs; 2) more frequent bidding; 3) automated bidding process

Metric	Sep	Oct	Nov	Dec
Winning models	38,500	44,500	56,500	68,500
… Models do not require discount	12,500	22,500	12,500	12,500
… Models require discount	26,000	32,000	44,000	56,000
ADO coverage of winning models	7,000	8,083	10,815	13,462
Est. ADO uplift	1,900	2,195	2,941	3,654
Est. daily rabate $	$1,408	$1,832	$2,864	$3,977
Est. incremental CPO $	$0.74	$0.83	$0.97	$1.09

Highlights

- Target to ramp up to **69k models representing 13k SIP ADO** by Dec-25; generating **incremental ADO of 3.7k** while maintaining a **healthy incremental CPO at $1.09**
- Next-step key actions for Sep-Dec
  a. **Finalize rebate logic and budget allocation plan**; increase bidding coverage of discount-needed models [ETA end-Sep]
  b. **Automate bidding process** to improve bidding frequency and winning rate (current manual process has 2 days data lag) [ETA end-Nov]
  c. **Prioritize top CSPU** in auto bidding process to incubate high potential products. Improve order uplift from top demanding products.
  d. **Explore with BPM to optimize winning logic**, i.e., if SIP bidding price is the same as MP seller, prioritize SIP model as winner, similar to SCS treatment

[For update] SIP trendy/top SKU push

Trendy SKU push methodology: Source potential SKUs based on platform trendy keywords in SIP strong categories; reduce price/increase exposure to drive traffic and conversion

Table: Weekly top/trendy keyword monitoring for each import market (IDMY example)

#1 Keyword Rank	#2 Category Prioritisation	#3 Identify Gap vs Plt	#4 SKU Gap	#5 Traffic Gap	#6 CR Gap
Rank keyword importance by highest ADO and WoW growth rate	Focus on key L1 categories	Benchmark SIP (ADO, SKU, View, CR) against platform metrics	Source from ID markets if insufficient supply	Push via ads automation if lagging in Page View% Plt	Push via promotion discount for high traffic low CR SKUs

Keyword	Category	ADO %Plt	SKU %Plt	View %Plt	CR %Plt
dinner dress	Women Clothes	Low	Low	Low	Low
cargo pants women	Women Clothes	Low	High	Low	High
baju kurung moden	Muslim Fashion	Low	High	High	Low
telekung travel	Muslim Fashion	High	High	High	High

Sourcing

Ads Push

Discount

Highlights

- Trendy SKU Push targets to detect existing top and rising demand early in import markets to close assortment gaps and ride on traffic trends promptly
- More targeted SKU investment; to allocate ads budget to traffic-gap SKUs and discount support to conversion-gap SKUs aim to achieve more efficient use of budget and achieve higher topline

Trendy SKU Push: ~116K SKU incubated in 8 lanes, resulting in +4.2K ADO incremental uplift; quick wins for CR push ramp-up in SG and TH market; next step to implement SKU level optimisation to further lift ROI

		Overall		Traffic Push				CR Push				
Source	Import Market	SKU #	ADO Uplift	SKU #	Sep ADO	ADO Uplift	Uplift %	SKU #	Sep ADO	ADO Uplift	Uplift %	Prioritise
ID	SG	2,736	216	1,501	575	134	▲30%	1,235	270	82	▲44%	
MY	SG	7,112	508	3,969	290	149	▲106%	3,143	383	359	▲1496%

Highlights

- Pilot proves impact at scale covering ~116K SKUs achieving 4.2K incremental ADO
- Next step: 1) Re-allocate budget in each markets between traffic push and CR push by studying the uplift and ROI study 2) SKU level optimisation with 1-2 week test window, pause where incremental CPO >3 without improvement

Private & Confidential

Trendy SKU Push: Expect to further ramp up trendy SKU initiatives to push +7.6K ADO uplift by Dec 25 by increasing SKU coverage by 2x; next step exploring automation feasibility with ETA Nov-25

	SKU #				ADO Uplift			
Import Market	Sep	Oct	Nov	Dec	Sep	Oct	Nov	Dec
SG	9,848	15,000	18,500	22,675	724	1,103	1,360	1,667
MY	64,122	72,000	86,200	106,820	3,016	3,387	4,054	5,024
PH	37,494	42,000	50,100	61,930	397	445	530	656
TH	4,692	6,000	8,400	11,760	83	106	149	208
Total	116,156	135,000	163,200	203,185	4,220	5,040	6,094	7,555

Highlights

- Projected to cover total ~200K SKUs by Dec'25 and covering 15 lanes, expecting +7.6K incremental ADO
- Existing manual effort for keyword selection and SKUs curation; next step to build automation system that integrate 1) weekly keyword selection based on ADO potential 2) SKU curation and 3) automated marketing tool set-up and prompt optimisation; ETA Nov-25 with system development

[For update] SIP content push

[SIP content push] Diversify traffic exposure with multiple video and livestream types

Channel	Type	Status	Next step	ETA
Video	AMS video	**SG:** 100% coverage for performing shops **MY:** 100% coverage for fashion shops **PH/TH:** pending reg finance advice on AMS payment flow	PH/TH AMS ramp up after payment flow settled	End-Sep
	Seller video	**SG:** SIP supply all videos to QC library, SG video team to decide the publishing logic **MY:** SIP supply 10k/day for QC, capped by local QC capacity **PH:** SIP supply 2k/day for QC, capped by local QC capacity	Review QC capacity after 2026 QC HC planning	Nov-25
	PDP video	**SG/MY:** Local video team handling PDP video migration, target to migrate all videos by Nov-25 Other markets: not recommended, language barrier	NA	NA

Highlights

- Video #: **SIP is supplying 23% of CB videos in SG, 11% in MY and 5% in PH**
  - SG: video supply +18% MoM mainly from PDP video sync and AIGC video supply; seller video aligned with SG QC Ops to trial from late-Sep
  - MY: video supply +12% MoM, driven by seller videos. MY QC limited SIP supply to 10K video/day
  - PH: video growth driven by both PDP video sync and seller videos
- ADO: **SIP video ADO is 11% of CB video ADO in SG, 12% in MY and 2% in PH**
- Next steps
  - **Explore external AIGC video productions** (more details in later slides)
  - **Ramp up AMS video in PH** after reg finance clearance on payment flow

1. External AIGC video production: Exploring external resource (Topview) for AIGC video to scale up SIP video supply; vendor to prepare 200 videos to pilot test in MY to assess ROI

	Product image	>>>	Video screenshot	
Internal AIGC video from BI script: Basic Promotional Video	VNMY			• PPT • 100% same as product image • AI script from product title • Translate to local language
External AIGC video demo: Pure AI Generation	IDMY			• **AI Avatar** • **Simulate clothes look on Avatar** • **Show different models** • AI script from title and description

Vendor introduction: TopView.ai

- AI-powered platform that automates video creation, turning static product links and images into dynamic, engaging video
- AI-generated content is designed to be highly engaging and persuasive, which can lead to better conversion rates
- Cooperating with Shopee in VN and PH

Next steps: 200-video pilot test in MY to validate the performance and ROI, before engaging the vendor further

2. VNSG SIP Livestream: ADO uplift of 337 across 6 days for VN fashion with ~5 streams daily; next step to ramp up more brands with KOL livestream from VN, and pilot ID fashion livestream from SG

Table: Livestream initiative collaboration with SG marketing for VN fashion brands

Date	AD Stream	ADO/Stream	ADO	ADG	ABS	Unique Viewers
2025-08-30	5	85	423	$7,150	$17	42,816

[For update] SIP CS

4 SIP CS topics for update today

#	Topic	Summary

1	SIP CS consolidation / reporting line change	• HC consolidation: transfer 332 SIP CS HCs to ID/PH
		  ○ 23 FTE (-39 vs current 62 FTE)
		  ○ 309 agents by Dec (+60 vs current 249 agents)
		• Base agent management teams in ID & MY to ensure smoother transition and easier oversight from SG
		• **Reporting line change** to SIP ops: ID completed; **PH ETA 1 Oct**

2	PH agent migration	• **TW: completed agent migration in Aug** • **TH/SG: in progress with 50% agent chats migrated [ETA completion end-Sep]** • **SEA+TW Target completion Nov-25** • By Dec-25, SIP seller P&L to absorb ~$186k/month BPO cost
3	Chatbot performance	• Plan: Roll out new chatbot alongside agent migration to improve shop CSAT ASAP • **PH: New chatbot rollout completed; shop CSAT improved by 10%** • **SG: Target to rollout 30-50% chats to new chatbot by late Sep**
4	CS performance deep-dive by location	• **PH: Shop CSAT improved by 11% after 30% chats rollout to new chatbot; Agent conversion improved by 3% via new selling SOP rollout** • **ID: Agent conversion improved by 4%; next to roll out new chatbot** All markets: shop CSAT missing target due to old chatbot; **next to speed up PH migration and new chatbot rollout to improve overall shop CSAT by 8pp by Dec-25**

2. Agent migration to PH: SEA+TW migration on track to complete by Nov-25; LATAM and adjacent markets to migrate start from Jan-26; headcount projections in progress for newly added markets

SIP Buyer Market	Jul-25	Aug-25	Sep-25	Oct-25	Nov-25	Dec-25	Jan-26	Feb-26	Mar-26
PH		New chatbot rollout							
SG			Migration+New chatbot						
MY				Migration+New chatbot					
TH	Pilot	Migration	Migration	New chatbot rollout					
1 TW	Pilot	Migration		New chatbot rollout					
VN					Migration+New chatbot				
BR							Migration		
MX,CO,CL									Migration
2 KH/MM/LA								New market rollout	

Highlights

1. **TW: complete agent migration by Aug, post-migration performance on next page**
- PH: complete chatbot rollout by Sep
- SG: prioritize migration + chatbot rollout by Sep
- Other lanes: SEA+TW complete migration + chatbot rollout by Oct/Nov; Latam ETA Q1

2. **Adjacent market: rollout with agent set up in PH, work in progress of headcount projection**

2. Agent migration to PH: TW migration fully completed with most KPIs on target; agent productivity remains the only key gap requiring action.

TW		Target	Before migration	After migration	RR	After vs Before
Agent conversion rate		13%	16%	20%	152%	4%
Agent CSAT	2	80%	85%	83%	104%	-2%
Agent Avg Response time/s		30	31	26	115%	-16%
Agent Productivity	1	14	13	8	57%	-39%
Abandonment rate		2%	1.0%	0.4%	524%	-1%
Avg waiting time in Queue (min)		5	5	4	116%	-13%

Highlights

- TW has fully migrated 100% of shops to agents in PH
- All performance metrics on target, except agent productivity

1 **Agent productivity:** lower than before migration due to BPO's over-conservative WFM plan to safeguard the other performance metrics during migration. Additional HC has been shifted to support other market chats from Sep 12, productivity has increased to ~11. Next step: To better reallocate agent resource to support other markets migration & new chatbot roll out. ETA Sep 20

2 **Agent CSAT**: slightly lower than before migration as new PH agents are **less experienced**; CSAT has improved WoW and hit 84% W-1; expect to hit 85% by end-Sep

4. [PH] SIP-PH CS performance: Shop CSAT improved by 11% after 30% chats rollout to new chatbot; Agent conversion improved by 3% via new selling SOP rollout

Highlights

1. **Shop CSAT** improved by 11%, mainly driven by new chatbot rollout. Currently 30% chats handled by new chatbot.
2. **Agent conversion rate** improved by 3%, mainly driven by implemented agent upselling/cross-selling SOP training; Next step is to further propose agent upsell activities for better CR
3. **Avg. Waiting Time got data issues in reg report, pending fix:** Based on real time data in CS system, L5D performance meet target ~ 3 mins

4. [ID] IDSIP CS performance: All agent performance met target; Agent conversion improved to 16% with new selling SOP rollout; AWT/ART issue fixed from Sep; next step is rolling out new chatbot to improve Shop CSAT

Highlights

1. **Chatbot CAST 94% RR** due to old chatbot; **next to focus on rolling out new chatbot ETA Oct**
2. **Agent conversion improved to 16%** mainly due to implemented agent upselling/cross-selling training from 8 Sep
3. **Average response time/Average waiting time issue fixed from Sep**
   - Action taken: 1) reduced chat volume from no-ADO-generating shops; 2) reduced concurrency; 3) revised HC planning

4. [SG] SIP-SG CS performance: Agent CSAT and ART lower due to MYSG order cancellation issue; Shop CSAT issue is due to old chatbot; PH migration, new chatbot rollout are in progress target to complete by end-Sep

Highlights

1. **Shop CSAT 97% RR due to old chatbot CAST 73% RR; next to focus on roll out new chatbot after agent migration to PH, ETA end-Sep**
   - Plan to roll out new chatbot after agent migration, as more agent HC needed to compensate lower DR of new bot
2. **Agent CAST and ART lower than target:** due to 1) MYSG order cancellation issue during 9.9 campaign, 2) slower agent response; **next to reinforce SOP to ensure faster replies**
3. **Avg. Waiting Time miss target:** due to 1) volume spike of 9.9, 2) 4 agents were pulled out to handle L2 escalations on 12 Sep, performance has been recovered in L3D
4. **Agent productivity miss target:** due to PH migration in progress, 50% chats are handled by PH agents; Data above is only include MY agents support SG chats

Private & Confidential

4 [MY] SIP-MY CS performance: Long AWT due to chats volume spike in 99 campaign; Next step is to 1) implement upselling SOP for MY; 2) focus new chatbot rollout to improve Shop CSAT & shop conversion by Oct

Highlights

1. **Agent conversion rate no improvement due to old upselling SOP:** **next to migrate agent to PH with new upselling SOP training**
2. **Avg waiting time**: miss target due to 1) volume spike of 9.9, 2) manpower shortage during the weekend; performance has been recovered on 15 Sep, to enhance peak-time and weekend WFM planning
3. **Chatbot CAST 79% RR** due to old chatbot; **next to roll out new chatbot ETA Oct**

Summary next steps: SIP CS focus on improving shop CSAT and CR through 1) accelerate agent migration to PH; 2) roll out new chatbot; 3) improve agent conversion via upsell/cross-selling-substitute selling

SIP	Key Tasks	Priority	Biz impact	Status	ETA
IDSIP CS	Upsell/Cross-sell/Substitute-sell SOP creation & agent training	P0	IDSIP agent conversion rate improved to 16%(+ 4pp vs Aug)	Done	28 Aug

Highlights:

1. **Sep MTD ADO 32.6K, 99% RR, +11% MoM.**
   - MoM growth slow down due to ADO loss from budget cut as CNSIP seller pnl back to breakeven (aligned previously CNSIP will only run negative from Jun to Aug).
   - [Incubation] New SKU migrate generate 5.7K ADO, 87% RR. Expect to grow further in later Sep as Aug/Sep batch (55M) new SKU getting mature.
2. **Targets: Expect to hit 48.7K ADO while maintaining seller pnl breakeven**
3. **Progress as compared to May,**
   - [SKU] +80M new SKUs (+123%), by 1) enhancing pitching/repitching; 2) improving migration efficiency
   - [ADO] +9.7k ADO (+29%), mainly drive by 1) +4.2k ADO from new SKUs organic + ads growth; 2) +2.2k ADO from price reduction

Next steps: 1) Ads optimization to improve new SKU ads orders, 2) Price bidding for CSPU, 3) use price elasticity to adjust price up to generate more budget

Private & Confidential

New

CNSIP Seller acquisition: 40k GPs/227M SKUs acquired in Jul-Aug. Seller and SKU acceptance rate improved MoM to 83% and 74% respectively; Sep pitching on-going including Dino pitching.

Highlights

1. **40k GPs / 227M SKUs acquired in Jul & Aug batch:** 216M SKUs from new sellers, including 168M group A SKU (cross-migration of SKUs not self-listed by Direct shops). 11M SKU from previously rejected/opt-out sellers
2. **Aug batch vs May batch, seller acceptance +7%, SKU acceptance rate +23%,** driven by livestream training to sellers, RM/CS training, SEH article revamp, and WeCom relaunch to engage seller directly
3. **Sep pitching is WIP (9.15 to 9.21), targeting 50M SKU in total,** exclude BR and TW A markets due to SKU limitation. 70% SKU (35M) are for DINO
