1 **KRJP Topline** : KRJP missed target with RR 94%/RR 95% for ADO/ADG respectively, which is on par with PLT for KR while -1%p behind for JP

- KR grew MoM +1% but showed MoM degrowth in all markets except TH/VN mainly from lack of aggressive promotion
  - PH, biggest degrowth from key resellers' shop close due to IPR issues and more resources being allocated to premium local brands for profitability
- JP MoM degrowth in SG/PH/TW - SG/PH MoM live SKU regression from QC driven PLT deletion, TW M-1 fraudulent uplift from order brushing *-detail in section 2e*

2 **KRJP MP PC2 + SLS PnL**: KRJP PnL RR is 103%(MoM +2%) yet KR PC2($) MoM -15% mainly low revenue from missing topline while PRM slightly increased MoM

- TR% growing MoM reaching 19.5% for KR and 13% for JP especially from paid ads TR% increase in SG
- SLS PnL strong despite slow topline with PPO MoM +17% mainly from increased ASF(from VF increase) coupled with lower cost from net positive return from SLS+, which started to be included in PnL from Sep (expecting net ~110k USD /month)

1b. OKR

KRJP Sep OKR - KRJP topline showed slower growth vs. PLT with Video ADG also behind due to TH -15% MoM decline while other OKR especially KRJP new seller will close ahead of target with good momentum

Note:

1. *Competitor related metrics(ADG share in SEA, ADO% to platform's origin SKU ADO) are M-1 actual vs. M-1 target due to the time limitation of gov't official data publish period and processing time*
2. *New seller definition is sellers' which go-live after '24 Oct onwards*
3. OKR items without EOM projections, RR is based on MTD actual vs. Target

Highlights

1 **KRJP Topline OKR:** In Sep, KRJP ADO showed slower growth vs. PLT(on par with Aug) mainly from PH due to 1) lack of aggressive promotion vs M-1 and 2) local resource being allocated to premium local beauty brands vs. KR beauty brands

KRJP Key growth driver OKR:

2 JP Sep new seller # expect to close strong with RR 170%(MoM +30%, highest in '25) driven by lead CVR push coupled with seller community seasonality, yet from Oct expect impact from reduced MKT budget

3 LS Sep RR 106%, with TH up +2.6% despite the platform's -0.3% MoM decline, yet VDO closed at RR 93%, mainly due to a -15% MoM decline in TH, driven by 1 seller regression in video #

4 LFF Sep expect to close ahead of target with RR 107% (MoM +16% vs. KR MoM +3%) mainly driven from VN(RR 138%) UST beauty brands' inbound and PH(RR 107%) from air consol(5% of PH ADO)

5 **Logistics OKR:** all trending good especially CPO lower vs. Aug due to SLS+ profit offsetting cost, which started to be recorded starting Sep

** Sep XDD/NDD coverage % target is low due to continued closure for MY XDD channel from tighter CC inspection*

2a. KR S2S mapping for all markets & plan (Songie)

[S2S mapping] completed TTS mapping by 50% of all KR managed shops, and expecting to complete 100% with local BI's help by Sep 30; will move out shops which not operated by brand (including local vendor) by Mid Oct due to long holiday in Korea

As of Sep 26	Total	MY	SG	TH	PH	VN	ETA

[C] / [B] NPC dashboard update RR%	50%	79%	42%	67%	62%	24%	

- Top 10 sellers per market already updated in NPC dashboard in all markets; now expanding the pool to cover all managed shops in all market (ETA: end of Sep)
- As 20% of shops that we found on TTS are not actually unauthorized or fake shops, we'll remove out after 1:1 checking with sellers by mid Oct, due to long public holiday in Korea (Oct 3 to Oct 9)

[B] refers to the sellers among [A] that have a TTS ID. Local BI teams are planning to link the shops under [B] to the dashboard by the end of Sep. Those already linked are counted as [C].
In parallel, to enable negotiation actions, we plan to verify by the end of Sep whether the shops under [B] are actually being operated by the sellers [B-1-1].

2b. KR NPC Progress for all markets & plan (Songie)

[NPC] Market view - Overall (link):SG on track, MY getting improvement; the rest NPC got worse but ADG multiplier widened in Sep vs. Aug; will push NPC "fully" for all shops & markets from Oct as S2S mapping is done throughout Sept

[Assessment of Brand HQ vs. vendor operation] if bring local OS model (managed by local vendor), can improve NPC to 100% in platform level; however for commercial improvement, brining TTS unique skus is critical of expected ADO/ADG uplift at 15%/23% respectively; Next action is to confirm how many SKU we can bring to KRCB

Expected ADG uplift from local vendor leverage					**23%**

- **Key issue of low NPC vs. TTS is because of TTS' operational model, managed by vendor;** thus brand HQ can not proactively reject in platform's rebate for TTS whereas they do for SHP KR operation
  - 1 However, SHP cheaper SKUs ADO/ADG efficiency is not that competitive enough vs. TTS
  - 1 On the other hand, SHP expensive SKUS ADO/ADG efficiency is quite good vs. TTS

- Expected ADO/ADG uplift from leveraging local vendor is 15%/23% for better NPC. However, commercial impact will be mainly coming from TTS unique SKUs instead of NPC improvement. It's because
  - 2 **TTS unique SKUs as it's ado/adg efficiency is 1.3x/1.7x higher than TTS avg; 2.6x/3.9 higher than KRCB avg**
  - ○ SHP cheaper SKUs ADO/ADG efficiency is not that high compared to TTS

⇒ **Next action item** is to confirm with brand HQ on how many SKU/ ADG we can bring to KRCB or local OS. And push to have it on SHP.

[Back-up] KRCB shop vs. local OS: KRCB shops operated by Brand HQ are way better than local OS on SHP in all factors: assortment (2.4x), ADG (18x), ADO (11x), ADG efficiency (7.5x), ADO efficiency (4.8x) while NPC is only 0%

Key Highlights

1. **JPCB:** 9.9 RR + 10%p & +11%p for DD and SSV respectively. 9.25 RR +2%p vs 9.9 for DD & -2% vs 9.9 for SSV
2. **KRCB:** 9.9 RR% grew vs 8.8 by +4%p for DD, +6% for SSV, but KR 9.25 showed regression vs 9.9 by -3%p in DD and by -11%p in SSV. Mainly due to RM transition & lack of RM resources. To improve RR, KR will implement a SOP where Projects team provides seller list with low RR in order by biggest ADG impact to RMs on a bi-daily basis and RMs share follow-up results.

MY KRJP Big Campaign: KR/JP grew 9.9 vs 8.8. For 9.25 JP is on track vs 9.9 especially considering that it is the 1st time for JP, but KR showed drop in 9.25 RR mainly due to RM transition & lack of RM resources.

2d. KRCB TW: Counter-Coupang

Counter CP: Targets (SOB) - KRCB will achieve SOB of 0.34x (vs current 0.26x) by end of year by prioritizing SKU/brand sourcing in especially TKB, Beauty categories

Key highlights

1 **(SOB) KRCB can reach SOB of 0.26x in Dec'25 from 0.34x Aug'25 by prioritizing assortment sourcing, along with NPC improvement**

a. Priority: KRCB plans to prioritize sourcing/migration of assortment (vs NPC improvement), as NPC improvement will have limited impact due to large assortment gap

b. Category: Uplift in F&B comes from NPC, while TKB/beauty uplift mainly comes from sourcing

i. F&B: NPC improvement with breakeven pnl

ii. TKB: NPC improvement with breakeven pnl and sourcing

iii. Beauty: Sourcing & NPC improvement with seller price nego

2 **(SKU Match %) From active sourcing, SKU match rate can reach 67% in Dec'25 from current 24% levels**

	Crawled SKU #	59	3,191	2%	8%

Status Quo:

- **KRCB currently matches 43% of Coupang CB's SKUs**
  - For CP top (crawled) brands/SKUs, KRCB has lower match rate of 24%
- **KRCB's biggest gap vs Coupang CB comes from F&B, TKB**
  - Beauty: >100% match rate vs Coupang, there is still big gap in CP top (crawled) SKUs (34% match)
  - Fashion, Others: difference in platform vs crawled match rate suggests assortment between SHP vs CP is differentiated

Plan:

- **To achieve 67% by Dec'25, KRCB plans to focus on the following initiatives**
  - Beauty: Acquire 3K more SKUs via SKU migration & acquisition to achieve 100% beauty brand match rate
  - TKB: Mass acquire 2K more SKUs via acquisition & SKU migration
  - F&B: Open SLS channel to support with import CC process (ETA: late Oct to mid Nov mainly for KYC feature dev requirement)

Counter CP: Assortment status of Brands - Of 51 Beauty brands in Coupang, SHP has 19 brand shops, and plan to source remaining 32 brands via brand acquisition & reseller sourcing

Beauty	19	51	**37%**
Fashion	3	25	**12%**
Others	0	0	**-**
Total	22	141	16%

Highlights:

1. Out of 51 beauty brands in Coupang, 19 are already on SHP as brand shops
2. Through seller acquisition & reseller SKU sourcing, KRCB will acquire 100% of the remaining 32 brands by end of year

Key highlights

1. **SKU sourcing is targeted more in Oct-Dec due to BSMI clarification required with TW local team (ongoing) and F&B channel open, but started more with Beauty and Fashion brand-level sourcing**

2. **Progress: Runrate of brand 150%, SKU 117%; successfully onboarding 6 brands and 140 SKUs in September mainly in beauty & TKB**
   a. Beauty, Fashion, TKB: acquired 6 more sellers, working to list 30 SKUs per shop
3. **Roadblocks & Plans**
   a. **All:** Discussing with TW local to find TFDA license vendors, as there is no KR vendor supporting TW market (~Oct W1)
   b. **TKB:** Discussing with TW local to ease BSMI regulations which prohibit certain TKB items from sale (~Oct W1)
   c. **F&B: Received rate quote from CC vendors necessary to open SLS channel, pushing for SLS open at (expected; may delay) late Oct**
      i. Start date will be finalized by BPM upon product development of pre-tax charge logic change & buyer input system

Counter CP: NPC - Based on approved budget of 17.8K USD, KRCB is currently pushing for applying rebates to target SKUs with starting ETA of Oct W1

Key highlights

1. Status quo: Following up on 17.8K USD budget approved for NPC improvement (breakeven pnl), KRCB is discussing with TW on execution details
   a. (Recap) Total of 17.8K USD budget will cause 0.26% PnL impact on KRCB overall, while improving NPC by -37% for crawled SKUs
2. Timeline
   a. Receive confirmation from TW Legal to apply rebates on KRCB items (~Oct W1)
   b. Confirm on details for 1) rebate method, 2) target SKUs, and 3) date coverage
   c. Initiate applying rebates to target SKUs immediately following TW legal approval

2e. JPCB MoM de-growth Deep dive - PH/SG

Executive Summary

- **MoM Regression**: JP Sep ADO declined MoM -0.08% while for ADG, JP grew MoM +6% ahead of PLT by 2%p. Main contributor of degrowth is SG/PH/TW only(with other markets outgrowing PLT) from structural reasons(e.g. QC deletions/penalty points) vs. seasonality reasons seen in Jul MoM degrowth(e.g. Pokemon card etc)

- Market level deep dive
  - SG(MoM -0.9%): QC deletions and penalty shops contributed >300% to ADO MoM decline, outweighing natural category growth especially in H&B category leading to less productive SKU #
  - PH(MoM -1.7%): QC deletions and penalty shops contributed >230% to ADO MoM decline, outweigh natural category growth but on top of this PH Top 20 KAM sellers decreased ads spending, respectively also leading to decrease in shop traffic

- **Action Plan:** SG/PH focus (top 2 markets by ADO, SKU, sellers) with immediate recovery of 432 ADO
  - Mass SKU migration tool (3rd party, ETA 2nd week Oct) to drive structural new SKU inflow (similar to SIP).
  - MS push program maintained, with added Top 10 seller monitoring (productive SKU + paid ads spend vs. M-1) to ensure engagement.
  - Penalty point mitigation: introduce SKU/shop-level monitoring + targeted seller education to reduce QC/penalty driven losses

JP Topline - JP Sep 12.1K ADO (vs. M-1 12.2K), MoM degrowth in SG/PH/TW only(others outgrew PLT), where PLT SKU deletions explains 100% of degrowth(except for TW), thus need aggressive new SKU push

Key highlights

1. All markets except SG showed growth in live shops and SKUs MoM, indicating no assortment constraint.
2. Despite assortment growth, overall ADO regressed (-0.08% MoM, TW M-1 order brush inflated), mainly due to:
   - QC failed deleted SKUs - removed by local ops due to IP/policy(e.g. FDA license) issues
   - > 3 Penalty point shops impact - shops restricted from campaigns & SKU adjustments
- Conclusion: ADO regression concentrated in PH/SG, where faced significant ADO loss due to QC failed SKU deletion and shop penalty trigger shown from decrease in productive SKU count *(details in the following page)*

2. *"QC failed deleted" refers to SKUs with QC failed reasons remarked by local ops in QC database. If a listing triggers IP issue (no license) or other violation of listing policy, local ops will ban/remove the listing and leave QC failed reason in the system*
3. *"Penalty shops" refers to JPCB shops with penalty point >=3 in Sep, these shops are not allowed to participate in campaigns and are bound to listing quantity/adjustment limitation*
4. *% to MoM delta shows the total positive/negative impact of #2 and #3 to respective market MoM ADO change*
5. *Order brushing - fraudulent shops uploading very low item for 1~2 days to increase shop rating and order to sell shops to 3rd party*

Private & Confidential

PH Topline - ADO MoM drop by -1.7%(vs. ADG MoM +7% outgrowing PLT MoM +4%), highest out of all markets, driven by large-scale productive SKU loss especially in Beauty from QC deletions + penalties

Key highlights

1. PH productive SKUs fell -12.2% MoM (-5.3K SKUs), out of which 570 SKUs(>10% of total deleted SKU count) loss due to QC deletion, especially in Beauty, -16.0% productive SKU drop, leading to -0.4% ADO regression, outweighing natural category growth.
   2. Without QC deletions (-81 ADO impact) and penalty shops (-122 ADO impact) SG would have grown MoM outgrowing the PLT

Key Highlight

1. PH MoM showed MoM -1.7% degrowth where top 20 KAM sellers(~35% of ADO coverage) showed bigger degrowth of MoM -2.1%
2. PH overall paid ads spending increased MoM 2.5% yet top 20 KAM sellers' showed MoM -41.5% decrease in paid ads spending
   - 2-1 Especially if we look at the top 5 sellers, their daily ads spending is <100 USD from lack of aggressive push during P3M(member movement between SA<> KAM and first time KAM member joining etc)
   - b. Top 20 KAM sellers penetration for paid ads is even lower than ADO coverage(22% vs. 33%) - *aligned with the profitability action why we focus on increasing PH paid ads TR%*
3. Daily average traffic(which is unique visitor to shop) also showed MoM -0.4%, even more so regression in top 20 KAM sellers MoM -30.2% mainly from seller driven (paid ads decreased -> traffic decrease)

Private & Confidential

SG Topline - SG ADO MoM decline by -0.94%, more macro reason such as penalty shops and QC failed/license triggered deletions in Beauty & Health rather than top KAM sellers peformance

Key highlights

- QC deletions and penalty shops contributed >300% to ADO MoM decline, outweighing natural category growth.
  - 1 ADO loss from ops violation at -67 ADO, especially in Beauty and Health (QC deletions at -14 ADO and penalty shops at -53 ADO)
  - 2 QC deletion resulting in productive SKUs dropped -156 from Aug to Sep, losing the opportunity to generate ADO in Sep

Note:

1. *'25 Sep data as of 9/27 snapshot in respective markets (SKU and ADO), top 3 ADO L1s are ranked by '25 Sep ADO in respective markets*
2. *"QC failed deleted" refers to SKUs with QC failed reasons remarked by local ops in QC database. If a listing triggers IP issue (no license) or other violation of listing policy, local ops will ban/remove the listing and leave QC failed reason in the system*
3. *"Penalty shops" refers to JPCB shops with penalty point >=3 in Sep, these shops are not allowed to participate in campaigns and are bound to listing quantity/adjustment limitation*
4. *% to MoM delta shows the total positive/negative impact of #2 and #3 to respective market MoM ADO change*

SG Top KAM sellers - unlike PH, SG is more long tail(top 20 KAM seller coverage only 22% vs. 33% in PH) and overall ads spending and traffic okay for top KAM sellers

Key Highlight

1. SG MoM showed MoM -0.9% degrowth where top 20 KAM sellers(~22% of ADO coverage) showed healthy growth MoM 20% -> overall SG is very long tailed in seller/SKU
2. SG overall paid ads spending increased MoM 10.5% and same for top 20 KAM sellers
   - 2-1 Top 20 KAM sellers penetration for paid ads is higher than ADO coverage(32% vs. 22%) *- SG is the highest paid ads TR% market*
3. Daily average traffic(which is unique visitor to shop) also showed MoM -7.5%, but top 20 KAM sellers MoM 22.2% growth

JP Action Plan - 432 ADO to be recovered by focusing on SG/PH with main lever remaining the same, 1) structural new sku push via mass migration tool roll out, 2) leveraging MS push program and 3) tighter ST monitoring

Key highlights

- **Background/Direction:** Total live SKU #(new live SKU#, productive SKU#) is important for JP(more so at current JP growth stage) while it is being hindered by mass impact of QC/penalty points which the only way is push for more SKU # coupled with managed ST seller SKU/shop level monitoring and seller push

1 Will focus on SG/PH(JP's top 2 ADO/SKU/seller market) with main actions unchanged - 1) structurally push more new SKU from 3rd party migration tool(similar to SIP, ETA 2nd week of Oct) and 2) leveraging already existing MS push program but adding Top 10 seller monitoring (e.g. shop level, M-1 productive SKU paid ads spending monitor & push)

2 Change in shop level productive SKU & shop level penalty point to be addressed with tighter SKU level monitoring and seller education

Solutions on SKU/Shop Penalty

Market	Category	Target Seller	Main/Structural Levers	Additional Actions	Detail	Mthly ADO impact
SG/PH	1 New SKU	All sellers	3rd party SKU migration tool -similar to SHP SIP(ETA 2nd week of Oct)	n/a	Share Hanabi tool with selected sellers for SKU migration PH -> other markets + SG -> PH	78
	Producitive SKU	ST/Managed sellers		2 SKU level productive SKU monitoring	Top 10 seller per RM's top 30 SKUs' ADO, price, paid ads spending, OOS monitoring and seller push	175
	Shop Penalty	ST/Managed sellers		Shop level penalty point monitoring	Penalty criteria education, pre-campaign check	
	Paid Ads	ST/Managed sellers	MS push program	Top 10 seller additional layer monitoring	Adding ST seller monitoring layer(e.g. GP level & shop level, M-1 productive SKU paid ads spending monitoring)	179 (SG 25 + PH 154)

Note:

1. *Q3 data from Jul 1st to Aug 31st*

Key Highlight

1. PC2% - In general, JP PC2% is behind that of KR by 2.5~3%p yet except for Jun/Jul JP maintains positive MP PC2
2. TR% - JP's Q3 avg. TR% is 12.5% which is 5.72%p lower vs. KR(TR% 18.23%) in all revenue components

By component;

3. Out of the TR% gap, ~70% of the TR% gap is from paid ads(4.18%p/5.72%p) which the gap is growing
4. PLT fee(including base commission and charged services) combined have steady gap around 1%p vs. KR
5. MKT package also has 0.25%p gap vs. KR from KR brand sellers buying year long CBP/JPB packages

JP TR% overview by market - PH is by far the market with the biggest -PC2 with 200k USD for Q3 avg. followed by TH with -75k USD and for TR%, TW has the most room to increase while PH/TH have room to increase paid ads TR%

Note:

1. *Q3 data from Jul 1st to Aug 31st*

Key Highlight

1. PC2% - except for Jun/Jul JP maintains positive MP PC2, with SG/TW healthy PC2% with 5~6% while TH/PH are the markets with negative PC2% around 4~5%
2. PC2$ - PH/TH 2 markets combined "off-set" the positive PC2$ from SG/TW leaving with very thin PC2$ which poses threat to negative PC2
3. TR% - TW/BR have the lowest TR%(<less than 10%), while SG/MY/PH has the highest TR% around 13~14%
4. Paid ads TR% - SG/TW are top 2 paid ads TR% (above JP avg) VN/PH/BR are the lowest paid ads TR%

What we should focus on ; Top 2 - PC2 market(PH/TH) with lowest TR% market(TW)

- (P1) Decrease PH PC2$ of -200k USD by tackling by either/and increasing base commission and improving paid ads TR%
- (P1) Improve TH PC2$ of -75k USD from improving paid ads TR%
- (P0)Increase TW TR% from increasing base commission(mandating FSS as mandatory service) - *ETA Oct 1st for both KR/JP*

JP ads TR% for PH/TH - JP ads TR% already exceeds KR SMT3 reseller group thus, Q4 focus on PH/TH to drive structural TR% uplift from 1.74% to ~1.97% with ~$2.8K additional daily spending

Key highlights

- [Benchmarking decision] **[A] JP's Sep ads TR% (1.74%) is already above (ref) KR SMT3 resellers (0.73%)**, so KR SMT3 is not a meaningful benchmark. Instead, JP benchmarks against **[C] KR CS,** the group of non-managed sellers, at least JP should be above. This ensures JP sets realistic yet ambitious TR% targets, aiming to narrow the gap with KR overall.
- 1 [Phase 1 execution] (Oct–Dec) **focus PH and TH**, where TR% is far below JP TR% avg (PH due to low spending from top sellers) + overall top 2 negative PC2 needed improvement.
  - **PH TR% uplift: from 0.88% → 1.38%**, supported by increasing daily spend from $1,322 → $2,187 by Dec.
  - **TH TR% uplift: from 1.72% → 2.20%,** with daily spend growing from $887 → $1,381 by Dec.
- Phase 2 planning to expand TR% benchmark KR CS to other markets.

Key Highlight

- Key considerations are
  1) PH/TH are top 2 negative PC2 market for JP
  2) TW is the lowest TR% market for JP
  3) Can either go with 1) increasing paid ads TR% and/or 2) increasing base commission

Proposal - scenario 3 which will 1) focus on increasing PH/TH paid ads TR%(benchmarking KR unmanaged seller group TR%) and 2) mandating FSS for all TW orders increasing the base commission due to its maximum impact and little impact to JP seller sentiment

1 **Impact -** '25 full year PC2 to be 1.36mil USD, PC2(%) 0.85%(which is ~2%p increase vs. baseline) with overall TR% to reach 12.14% for JP

2g. Pushing KR MS Take Rate Progress – TH/TW

KR MS Paid ads take-rate (TH/TW) :
TH initiative delivered +0.5% increase in KRTH paid ads takerate vs M-1 (103% RR), and planning to continue monthly TH/TW seller level push to reach FY25 KR target 5.8%

Key Highlight

1. **TH Performance (in progress, as of Sep 24)**
- Push program ongoing with **7 sellers**
- **Run Rate at 103%**, already exceeding Sep Target (4.3%)
  Baseline (Aug) 3.9% → Current 4.4% (+0.5%p uplift)
- Key contributors: Mediheal (118%), Somebymi (99%)
- Gap vs. KR FY Target : Plan to sustain 4% avg. take rate across top 7 sellers during Oct–Dec to maximize gap fill

2. **TW Performance (execution planned in Oct)**
- Push program planned with **18 sellers**
- Baseline 3.3% (Aug) → Current Sep MTD 3.5% → Target for Oct 3.6%
- **Actual program impact will start from October**
- Gap vs. KR FY Target: Push to focus on 18 FSS sellers during Oct–Dec

3. **KR Overall Impact**
- FY25 Target (Before): 5.7% → (After): 5.8% (+0.1%p uplift)
- **Run Rate 97%**(YTD Act 5.7%) → full-year target remains within reach

4. **Risks & Attention**
- Underperformance from certain sellers (e.g., Beplain, Ringke in TH)
- For TW, Inga, Irisbright and Meditherapy showed inflated Sep TR% due to GMV drop, but should be retained to defend TR% with stable spending.
