Highlights

- **SG:** ADO 1.6K (RR 104%) driven by good performance from seed program MoM +216% to 192 ADO faster than program growth at 21% after upsized PRM and traffic drive through seller's ads investment, notably Lever 1 seller Mosesqueen MoM +400% to 57 ADO.
- **MY**: ADO 14.8K (RR 130%), driven by Lever 3 top GGP 安阳市殷 MTD 602 ADO (MoM +204%) after upsized campaign support and Lever 2 top GGPs Daduhey MTD 429 ADO (MoM +47%) and Bostanten 392 ADO (MoM +11%) after inclusion in program in Sept'25.
- **VN:** ADO 13.3K (RR 89%) due to slower growth from top sellers, including 来朝, which is undergoing internal restructuring to close unprofitable shops and delist 沙河 SKUs while shifting to CNLS. Next step: Propose upsizing the seed program with Local, focusing on livestream and AMS support
- **TW:** ADO 597 (RR 106%), but SKU target achievement remains low at 60%, with Lever 2 seller falling short of SKU migration targets.
    - We propose using SKU migration tool to help sellers migrate however 73 out of 129 sellers have yet to onboard SKU migration tool due to potential duplicate listing penalties. Next steps: BI to explore duplicate listing detection and auto-removal; discussions with Ops BI ongoing.

1.Topline: ADO 7.4K (RR 98%), ADG $240.6K (RR 99%), ADO% to CB 0.7% (MoM +0.0pp) mainly due to:

Highlights

- **SG:** ADO 1.1K (RR 140%) due to Lever 1 overperformance. However, 27 shops still on penalty points lock out for the quarter due to order brushing/non-fulfillment issues, resulting in limited campaign exposure. Seller education have been made to avoid order brushing and extend PO lead time set to avoid non-fulfillment issues. Next step: To monitor in W1 Oct as penalty points refresh.
- **MY**: ADO 5.2K (RR 98%), driven by strong performance in Lever 2 (RR 110%), in particular top Lever 2 GGP 中国万象 achieving 165 ADO. Lever 1 GGP (selling tables, small cabinets) 常州市希薇尔 continue to see good growth at MoM +20% to 104 ADO. Next step: to work with seller to ensure SKUs are price competitive and replace uncompetitive assortment.

Highlights

1.Topline: ADO 2.7K (RR 76%), ADG $18K (RR 60%), ADO% to CB 3.9% (MoM +1.5pp) due to:

- Lever 2 underperforming due to limited SKUs onboarded due to low seller interest in SG. Next steps: we have already secured 5K SKUs (SG/MY 2.5K individually) per month, will be tracking this moving forward.
- Lever 3: We have shifted focus to grow F&B in Sep, currently supporting top 6 sellers via campaigns and unlocking restricted categories (2 in SG, 5 in PH F&B). Restricted categories are generating 22 ADO from 537 SKUs.

2.SKU#: 60K (RR 9%), due to the above mentioned reasons.

Highlights

- SG ADO 613 (RR 61%) underperforming due to limited SKUs onboarded for Lever 2 with participation coming mainly from mid-tail and long-tail sellers.
  - Next step: We have identified 24 sellers with higher cooperation and are expected to upload 2.5K SKUs per month from Oct'25 - Dec'25. This will bring us to 26K out of 33K SKU target. We are evaluating to close the remaining gap through improved SKU efficiency as we doubled down on seed shop inclusion to drive F&B.
- MY ADO 1.8K (RR 76%) underperforming with similar SKU# to SG yet underperforming in SKU efficiency with 53 ADO vs 111 ADO.
  - Next step: Idenefied 4 shops to overinvest and provide targeted campaign support.

Highlights

1.Topline: ADO 49K (RR 100%), ADG $312K (RR 113%), ADO% to CB 13.6% (MoM +4.5pp); growth is attributed to

- Lever 2 overachievement driven by strong contributions from SG/MY (e.g. JOOCYEE, SHEGLAM) where top sellers are supported by discounted investments and together with seller re-investment
- Lever 3 continue to underperform at 9% RR due to focused efforts on F&B acquisition in August. In September, refocused efforts brought in 152 sellers and 15K SKUs MTD (MoM +11599%). Next step: Shortlisted 10 potential sellers to push and ramp up ADO in H2 Sep.

2.SKU#: 88K (RR 35%) primarily driven by Lever 3 underperformance (pitching efforts are continuously ramping up)
