[Topline]

Local SIP: 167k ADO, 107% RR, CB% +0.12pp MoM; $1.64M ADG, 99% RR, CB% -0.13pp MoM; ADO outperform while ADG miss target because of MYSG lane; in Sep MYSG lane P&L revised to breakeven + price raise, leading to lower ADO; loss in MYSG ADO was offset by growth across other lanes; however, other lanes have lower ABS vs MYSG, leading to weaker ADG performance.

CNSIP: 30k ADO, 92% RR, CB% maintained MoM; $261k ADG, 94% RR, CB% +0.03pp MoM; RR<100% mainly due to lower marketing budget from stopping 5% seller P&L reinvestment Sep; ADO impact more than expected while P&L +$185k MoM.

Direct: **11k ADO, 100% RR, CB% maintained MoM; $149k ADG, 104% RR, CB% +0.04pp MoM**; ADO<100% mainly due to MYSG decline in traffic exposure.

WH cross-selling: **7k ADO, 75% RR, CB% -0.05pp MoM; $46k ADG, 72% RR, CB% -0.03pp MoM**; mainly due to (1) CB FBS over-projection (74% RR) and (2) Local SCS (78% RR) lower topline from MYSG P&L revision to breakeven; to revise WH segments target for Oct.

Local SIP P&L [Sep full-month]: Seller standalone P&L $1.63M including big seller discount, +$0.98M above target; total standalone+MP+SLS P&L $3.31M

Highlights

1 **Seller/SKU count**: +103%/ +99% MoM across lanes; most lanes (except MYSG and THPH) see SKU effi improving MoM alongside SKU growth; Oct focus on 1) ramp up mass pitching to all eligible sellers; 2) streamline RM pitching process to control local RM workload

2 **ADO**: missing target mainly due to MYSG underperform

1) MYSG 82% RR mainly due to traffic exposure -18% MoM, due to SGCB traffic boosting issue and more intensive traffic competition from local sellers; Oct focus on boosting seller ads investment via AdExpress and co-share vouchers

2) THPH 83% RR as TH local RMs have challenge in supporting Export acquisition and seller support; Oct focus on 1) select top 500-1000 managed sellers for 1:1 pitching; 2) ramp up mass pitching

3 **P&L**: healthy, negative for some lanes mainly due to first 3-months commission waiver

Highlights

1 **Shop performance miss target driven by old Chatbot underperformance**

- **New LLM chatbot rollout timeline:** from mid-Oct, to rollout 50% coverage
  - Context: during the A/B testing for new chatbot, SIP had lower deflection rate (due to poor listing quality), resulting in more chats routed to agents, additional agents are therefore required
  - rollout is planned to start after new agents are hired and trained up in PH, aligned with the PH migration process, so SIP new chatbot rollout timeline is behind SBS/SCS
- **Current Progress:** 5 additional agents have been hired to support new chatbot rollout and will complete training by the 2nd week of October

2 **Agent Conversion Rate** lower than other markets, due to old upselling SOP; next to train PH agents with new upselling SOP

3 **Average Waiting Time** recovered from week 15 Sep by enhancing peak-time and weekend WFM planning

4 **Agent productivity** dropped: due to PH migration in progress, 55% MY chats are handled by PH agents by 30 Sep; Data above only shows the migration performance (PH agents support MY chats), productivity will be on track after fully migration by end of Oct

System/Product: Key system launches in Oct: 1) IDMY Direct auto-payout to local wallet ; 2) Local SIP order sync fail dashboard; 3) Force update P order when A order cancelled
