Highlights

Local SIP: 185k ADO, 113% RR, CB% +0.7pp MoM; $1.75M ADG, 105% RR, CB% +0.4pp MoM; ADO overachievement driven by MY market newly created SKUs discount push +6.4K ADO and new batch of incubation ads +5.0K ADO with strongest gains in MY and PH market.

CNSIP: 34k ADO, 99% RR, CB% +0.2pp MoM; $291k ADG, 100% RR, CB% +0.1pp MoM; RR slightly lower than expected mainly due to VN and TW new SKU organic effi lower than expected.

Direct: **14k ADO, 112% RR, CB% +0.1pp MoM; $188k ADG, 114% RR, CB% +0.2pp MoM**; growth mainly driven by SKU effi improvement of maturing SKUs onboarded in the past 3 months

WH cross-selling: **6.7k ADO, 72% RR, CB% -0.005pp MoM; $43k ADG, 70% RR, CB% -0.01pp MoM**; mainly due to (1) CB FBS over-projection (84% RR); (2) CB Choice cut loss making SKUs; (3) Local SCS experienced system glitch (no order on 4 & 5 Oct), in progress of catching up to Sep level via more aggressive marketing push. Revised BU target from Nov onwards.

10.10. Performance: Local SIP achieved 335K ADO, +6% vs 9.9., +21% vs 10.10. last year; ADO as %CB 7.1%, +0.9pp vs 9.9., +1.8pp vs 10.10. last year

Highlights

1. **Seller/SKU count**: +39%/ +40% MoM; 96%/93% RR; on track to reach target by EOM. Oct focus: 1) push accepted sellers onboarding via seller center pop-ups + agent reachout; 2) improve SKU migration% via weekly mass resync
2. **ADO/ADG**: +27%/+26% MoM; 109%/114%RR. Oct focus: 1) push seed sellers topline growth; 2) push sellers on ads spending and promotion sync to improve traffics
3. **P&L**: healthy, negative for some lanes mainly due to first 3-months commission waiver

Performance

- **All lanes on target**: 70% of 10.10 gross orders has been delivered, with 0.5 days LT improvement vs. 9.9
- **IDPH 101% RR, 0.3 days MoM:** LH LT increase 0.2 days due to continuously offload for IDPH-DVO shipment. IDPH-DVO shipment use flight transit in MNL, which using the same MNL-DVO resource as MYPH-DVO shipment. The 2 is now competing for the same airline capacity. Has asked vendor to separate the load to various vendors for meeting SLA. Vendor to implement the new flight plan from 22 Oct, expect LT to recover from 25 Oct

Oct focus

- **Nov spike capacity planning:**
  - First Mile: Review SOC capacity to see if (1) ad-hoc direct ingestion truck needed (2) require to increase inbound trucking frequency to mitigate backlog issue
  - Warehouse: Benchmark local SPX on Part-time hiring bonus to secure the attendance rate; Stock-up consumables
  - Line-haul: Additional buffer of 1x-1.5x capacity in planning
  - Last-mile: Work with CNCB to push up capacity and performance

CS performance - SG as import market: All agent performance metrics met target in L3W, 10.10 long AWT due to earthquake; New chatbot rollout started on 24 Sep, Chatbot CSAT +17pp / DR -13pp after 50% chats moved to new bot

Highlights

1. **All agent performance metrics met target in L3W, after full migration by 30 Sep**
   - 10.10 long AWT is caused by earthquake in PH, agents need to exit from the building several times hence CS operation was impacted
2. **Shop CSAT +26pp after new chatbot rollout**
   - 24 Sep: 50% of chats (excluding ID-SG lane) moved from old to new chatbot
   - 22 Oct: to rollout ID-SG 30% chats to new chatbot rollout and monitor new bot performance, especially the chat deflection rate
   - Next to further analyze the root cause of new chatbot's low deflection rate and potential solution (ETA 24 Oct)

CS performance - MY as import market: AWT miss target due to ~20% chat vol increase, lower bot deflection and earthquake, next step to optimize WFM planning; Agent migration to PH and new chatbot rollout in progress, target completion end Oct

Highlights

- **Agent migration to PH:** started from 1 Oct, 80% chats migrated to PH agents, target completion by end Oct.
- **SIP MY New chatbot rollout plan**
  - 20 Oct: 50% of MY chats (excluding ID-MY lane) to be moved from old to new chatbot
  - 22 Oct: start with 30% ID-MY chats to new chatbot, consider current agent capacity (high chat vol, new bot may further pull down DR)

1 **Shop Conversion Rate** temporarily declined after 10.10 campaign, likely due to most buyers had placed orders during campaign; CR recovered on 14 Oct

2 **Average Waiting Time** miss target, driven by ~20% chat volume increase in ID-MY lane in Oct, lower chat deflection and earthquake, actions taken:

- Reduce chat volume by unbinding non-performing shops on weekly basis
- Optimize WFM planning to ensure more accurate staffing based on projected chat volume, performance recovered since 16 Oct
- Additionally, 3 new agents have been hired to support ID-MY ado growth, with training completion on 22 Oct. The ~20% chat volume increase aligns with ADO growth (+27% MoM in Oct MTD vs Sep), which has already been considered during HC planning.

CS performance - PH as import market: AWT miss target due to ~30% chat volume increase; next to focus on agent reskill training for cross-market support and optimize WFM planning

Highlights

1. **Shop Conversion Rate** temporarily declined after 10.10 campaign and recovered on 14 Oct
2. **Avg. Waiting Time** miss target, mainly due to ~30% chat volume increase in Oct:
   - Chat spike for PH started from 4 Oct, triggered by the Chinese public holiday, most additional chats were buyer inquiries on orders not shipped out on time; later compounded by 10.10 campaign traffic
   - 10/11 Oct: AWT spiked after earthquake, some agents returned home for safety, causing temporary manpower shortage. Priority was given to top shops, leading to longer waiting time for other shops; 15 Oct got volume spike near the end of the shift (around 11pm) and some chats were answered next morning
   - Next to reduce chat volume via unbinding non-performing shops; and reskill all PH agents for cross-market support, enabling agents from other markets to support SIP PH when there are chat spikes; performance recovered from 16 Oct
3. **Chatbot DR** miss target due to new chatbot rollout, next to further analyze the root cause and potential solution (ETA 24 Oct)
