1a. Topline

KRJP Oct Topline : KRJP Topline RR 94%(MoM +1%, slower than PLT) mainly from KR's less promotion/investment coupled with IPR issues in TH/VN also resulting in low PnL RR 65%(MoM -10%)

Key Highlights

1 **KRJP Topline** : KRJP missed target with RR 94% for both ADO/ADG, with KR showing slower growth vs. PLT

- KR MoM flat mainly from TH/VN showing MoM degrowth due to less promotion from lack of new product launch/exposure and sellers withholding investment for Nov(historical KR sellers behavior) added with reseller IPR issue
- JP growing MoM +6% with all markets ahead of PLT(except for SG) even after excluding the TW order brushing sellers)

2 **KRJP MP PC2 + SLS PnL**: KRJP PnL RR is 65%(MoM -10%) missing total 1mil USD from 1) decline in MP PC2 by 690k(MoM -2%) and 2) SLS PnL by 31k(MoM -19%) with majority of the gap coming from KR missing Rev - commission target from slower Topline - *detail in next pg*

- SLS PnL declined, with PPO down MoM -19%, due to VN SLS+ costs (compensation driven by a surge in suspicious failed deliveries)

**KRVN suspicious buyer fraud - mass buyer driven failed delivery - (current EOM assumes VN SLS+ compensation amount will be on par with Sep actuals)*

KRJP Oct PnL Deepdive: KRJP PnL RR 65%(1mil USD gap vs. target); 315k USD is from SLS PnL shortage while majority of the rest is from KR missing Revenue target from slow topline

Key highlights

1 Overall for Oct, KRJP PnL(MP PC2 + SLS) is expected to have 1 mil USD gap vs. target of which 315k is from SLS PnL while majority of the rest is coming from KR's MP PC2 gap

1-1 SLS PnL gap is mainly coming from 2 reasons;

- Lower than expected Revenue from slower KR Topline with ADG RR of 90% on top of which KRTW having lower G2M ratio vs. historical
- Higher than expected cost from KRVN mass buyer fraud (under investigation, ADO 50) causing spike in failed delivery triggering higher than SLS+ compensation cost(e.g. Compensate in return for no physical return for failed delivery cases)

1-2 MP PnL gap mainly coming from KR missing Revenue target with RR 89% despite overall TR%(incl paid ads TR% 0.7%p above target) growing MoM still missed target

- TH - 1) OOS for Inga and Fwee with surging demand for new products 2) sellers' investment & promotion strategy shift to contain Oct budget and allocate for Nov 11.11 3) Shop penalties for IPR cases for resellers
- SG - SMT1/SMT2 sellers withhold investment in paid package and MS spending for Nov (-13% MoM in both spending and ADO)
- VN - 10-day CFS block due to customs fee implementation (CFS ADO MoM -46%; ADO contribution MoM -6%p from 13% to 6%)

Appendix - KRJP PnL by market: Especially SG/TH/VN are the top 3 markets with the biggest gap of PC2 vs. target which aligns with ADG lagging where the gap is primarily coming from from weaker seller investments and promotional inefficiencies

Note:

1. *Competitor related metrics(ADG share in SEA, ADO% to platform's origin SKU ADO) are M-1 actual vs. M-1 target due to the time limitation of gov't official data publish period and processing time*
2. *New seller definition is sellers' which go-live after '24 Oct onwards*
3. OKR items without EOM projections, RR is based on MTD actual vs. Target

Key Highlights

1 **KRJP Topline OKR:** In Oct, KRJP topline related indicators are strong(vs CB) as CB is also seeing slower growth;

- Yet, KR topline is lagging mainly TH/VN while JP expected to hit target(MoM +6%, even after removing JPTW fraud)

KRJP Key growth driver OKR:

2 JP new seller # expect to close strong with RR 170%(again the highest in '25) driven by lead CVR push and KR new seller ADO also from promo/pkg enrollment

3 LS RR 99% mainly from VN ADG MoM -8.8% as UST sellers(incl. VT) were not featured by mega KOL (reactivation planned in Nov)
VDO RR 97%, VN ADG MoM -22.3% mainly driven by UST sellers having MoM -35% traffic from intense competition(traffic boost planned in Nov)

4 LFF to close RR 104%(2%p ahead of KR) from strong uplift in VN UST sellers' CBP exposure making up TH regression from ST brands' testing promotion strategy

5 **Logistics OKR:** all trending good with low XDD/NDD % due to channel being closed during KR long holiday

**KRMY XDD channel re-open(10/21) and monitoring CC lead time*

[S2S Mapping & NPC Progress Coverage]

- **S2S Mapping Coverage**:
  67% (33 shops) of S2S shop data sourcing completed (16 shops remaining to be mapped with local BI)
- **ADG Coverage (Seller Confirmed Shops = KRCB NPC monitoring Shops)**:
  19% total ADG coverage for KRCB ADG
- **Seller Negotiation Coverage**:
  RM price negotiations started from MY and expanding to all markets except PH (PH seller negotiation raw data pending from BI)

[Next Action]

- **(MY)** Complete RM price negotiations with MY sellers (with W42 shared sku) - 10/24
  - We collect one week of daily SKUs from the local team and share them with sellers together with that **week's TTS price movements**. In other words, we negotiate W42 shared SKUs during W43. Around 90% of SKUs show no price changes b/w SHP and TTS over the course of a week.
  - **Why weekly approach?** To improve efficiency by 1) removing duplicate SKUs and 2) aligning with sellers' lead time, as Brand HQ SHP managers need higher-level approval for any price changes.
- **(All Market) Expand RM price negotiations to all markets** except PH (Seller nego data pending BI) - 10/31
- **(All Market)** Extend [C]/[B] mapped shop % to 100% - 10/31
- **(All Market)** Monitor October MTD NPC across all markets - 10/31

[NPC ADO/NPC SKU - Market overall] : SG is on track NPC, room to improve MY/TH/PH/VN

- **MY (NPC ADO)** - On progress, monthly (Oct MTD) NPC is still below the target, but has improved by 2pp compared to Sep
- **SG (NPC SKU)** - On track, SHP has price competitiveness
- **TH (NPC SKU)** - Attributed to top sellers; (TH) cosrx, (TH) somebymi → Next step : Ask RM to negotiate
- Support needed : 1) NPC ADO (SG/TH/PH/VN), NPC SKU (PH) BI data pending → Need local BI support
  2) Seller incentive program (e.g. MY SME) is required to negotiate

Local BI WIP

Check data accuracy

[NPC ADO - MY] : 1) among 13 identified shops, 12 shops are updating, 2) 13 shops ADG coverage to krcb is 29%, 3) matching sku ado coverage to shop is 43% 3) improvement of monthly NPC by 2pp and weekly NPC by 20 pp

1) We can see improvements of MY NPC ADO by 1 **20pp** from 6 Oct to 19 Oct, despite 3-12 Oct being holidays for most sellers
2) **RMs have also reached out to all the 12 brands below to confirm their model of operations** (dr.althea - TBD)
   a) **Brand HQ (B2B Team Control):** 2 sellers (somebymi, cosrx) have internal TTS & SHP team controlling price. Price negotiation can done internally by brand with fast lead time. Next Step: To monitor price change with brand weekly and ensure competitive pricing are set align with local MY Process since both seller are on SME Program
   b) **B2B Vendor + Brand HQ:** 7 sellers have no TTS team; HQ gives pricing guidelines to vendor but final price setting by external vendor with slower lead time of RM-HQ-vendor communication loop, Next Step: To request resource from Local MY to support sellers who are not on SME program to improve NPC
   c) **B2B Vendor:** 3 sellers operated fully by local vendor; brand has no price control, 2 Next Step: SHP Local os onboarding is needed (tirtir, meditheraphy, skinfood)

Key Highlights

1 **JPCB:** 10.10 RR +6%p & +12% vs 9.9 for DD and SSV respectively. 10.25 RR(as of Oct 21) on track for SSV, but only 2% for DD as focus was on MY LTD/DDV with local team's separate edu session and new SOP build -> Will replicate MY's optimized SOP to SG within 2 days and share progress by month-end.

2. **KRCB:** 10.10 RR -4%p & +0%p vs 9.9 for DD and SSV due to long holiday period(Oct 3 - Oct 9). Unlike SSV, DD showed a drop as SSV is operated in a way that unless sellers indicate otherwise, all sellers participated in M-1 peakday are considered to be participating in the campaign while DD requires sellers' sku submission through SC. 10.10 RR vs CN was higher for 9.9 by +19%p for DD and +14%p for SSV. KR 10.25 RR is on track at 81%

MY KRJP Big Campaign: JP grew 10.10 vs 9.9 for both DD/SSV while KR dropped due to long holiday period(Oct 3 - Oct 9). KR/JP are on track for 10.25, as we expect the nomination to catch up by the deadline of 24 Oct

Key Highlights

1. **JPCB:** 10.10 RR +6%p & +4% vs 9.9 for LTD and DDV respectively. 10.25 RR(as of Oct 21) on track for DDV and improved a lot by 25%p for LTD thanks to edu session and new SOP build to minimize seller resource(e.g. Confirm basis with target price vs. seller self CMT nomi)
2. **KRCB:** 10.10 RR -9%p & -10%p vs 9.9 for LTD and DDV due to long holiday period(Oct 3 - Oct 9). 10.10 RR vs CN was slower for 9.9 by -7%p for LTD and -15%p for SSV. KR 10.25 RR is on track at 62% and 57%(as of Oct 21). This will go up by the deadline Oct 24.
