Highlights

Local SIP: 182k ADO, 112% RR, CB% +0.6pp MoM; $1.7M ADG, 103% RR, CB% +0.3pp MoM; ADO overachievement driven by 1) MY market newly created SKUs discount push 2) PH new ads incubation ramp-up 3) trendy skus push

CNSIP: 32k ADO, 93% RR, CB% +0.1pp MoM; $278k ADG, 95% RR, CB% +0.1pp MoM; RR lower than expected due to 1) VN ADO -27% after CB custom tax from 11 Oct (-1.7k ADO vs target), ADO%CB on par; 2) Oct batch new SKU growth slower than proj (-0.6k ADO vs target)

Direct: **14k ADO, 110% RR, CB% +0.1pp MoM; $181k ADG, 110% RR, CB% +0.2pp MoM**; growth mainly driven by (1) new seller/SKU growth; (2) SKU effi improvement of maturing SKUs

WH cross-selling: 6.9**k ADO, 74% RR, CB% +0.01pp MoM; $43k ADG, 71% RR, CB% -0.01pp MoM**; mainly due to (1) CB FBS over-projection (83% RR); (2) CB Choice cut loss making SKUs; (3) Local SCS experienced system glitch (no order on 4 & 5 Oct), in progress of catching up to Sep level via more aggressive marketing push. Revised BU target from Nov onwards

Local SIP P&L [Oct EOM proj]: Local SIP seller P&L $1.1M on target; total seller standalone+MP+SLS P&L $4.03M

Highlights

1 **Seller standalone P&L $1.08M on target**

- 2 +$58k (0.001% GMV) vs target within +/- 0.5% fluctuation buffer of target
- 3 **-$350k MoM** as budget was under-spent in Sep resulting in unplanned P&L surplus; expect no underspending in Oct consistent with higher topline (+9% MoM)

4 **Total P&L: $4.03M**

- 5 **-$230k MoM** mainly due to 1) **-$350k MoM seller P&L** as explained above; 2) **-$76k SLS P&L MoM** due to ASF reduction for MYSG, IDPH, IDTH, THMY wef 1 Oct; savings passed back to SIP team as additional marketing budget, 3) partially offset by A MP PC2 **+$194k MoM**.

** staff cost increases MoM for both local and CNSIP as SIP team started to pay for PH agent cost from Oct onwards as aligned with PH (ID started from Sep); for CS office staff, will start booking cost together with HQ SIP staff cost from Jan-26 onwards as aligned with Reagan team*

CNSIP P&L [Oct EOM proj]: CNSIP seller P&L $84k on target, total seller standalone+MP+SLS P&L $544k; to include Swarm into CNSIP P&L from next weekly reporting

Highlights

1 **Seller standalone P&L $84k on target**

- 2 -28k (-0.5% GMV) vs target within +/- 0.5% fluctuation buffer of target; spent more than proj mainly due to lower than expected budget ROI from 2 small-scale pilot initiatives in W4 Oct to catch up topline (price reduction of non-performing SKUs + AMS ramp up); to adjust budget allocation based on pilot learnings in Nov
- 3 **-$19k MoM** mainly due to increase in CS agent cost **$22k MoM** as SIP team started to pay for PH BPO cost from Oct (previous months paid by PH local as aligned with PH); partially offset by higher big seller discount booked from higher topline

4 **Total P&L $545k**

- 5 **+225k MoM,** mainly driven by 1) **+$159k** MP PC2 improvement and 2) **+$77k** SLS P&L driven by topline growth

BWT [Oct MTD as of 30 Oct]: IDPH E2E LT -0.4 days MoM due to delay in PH domestics transit to Davao area, target to recover in W1 Nov; 9/10 top SIP lanes faster than CNCB

BU	Lane	Current month (Oct 25)					Benchmark	
		MTD	Target	RR (MTD)	M-1	MoM (MTD)	CNCB	vs. CNCB
Local SIP / Direct (Top 10 lanes)	IDMY	5.5	5.9	108%	5.6	-0.1	6.8	-1.3
	MYSG	3.3	3.3	101%	3.4	-0.1	5.7	-2.4
	IDPH	6.5	6.5	99%	6.2	0.4	6.5	0.0
	VNMY	6.6	7.2	109%	7.3	-0.7	6.8	-0.2
	IDSG	4.7	4.9	105%	4.8	-0.2	5.7	-1.0

	VNSG	5.5	6.4	116%	6.2	-0.6	5.7	-0.1
	VNTH	6.3	7.2	115%	6.8	-0.5	7.0	-0.7
LFF cross-selling	MYSG	2.3	2.4	103%	2.3	0.0	5.7	-3.3

Performance

- **IDPH 99% RR, 0.4 days MoM:** LH LT increase 0.4 days due to continuously offload for IDPH-Davao shipment. IDPH-Davao shipment use flight transit in MNL, which using the same MNL-DVO resources as MY/CNPH-Davao shipment. Vendor has separated the load to various airlines starting from 25 Oct, expect LT to recover in 1st week of November
- **VNPH 106% RR, -0.4 days MoM, +0.6 days vs. CNCB:** lead time longer than CNCB due to no direct ingestion to Davao/Cebu area, which caused overall LM LT longer than CNCB by 1 day.

Nov focus

- **Campaign planning:** Work with stakeholders to (1) First Mile: increase FM direct ingestion trucks (2) WH: extend X-ray operation hours + secure part-time workers (3) LH: secure additional space (4) LM: align on best handover time to avoid loading bay congestions
- **2026 Target/RFQ Preparation:**Prepare new SLA requirement and support on trial shipment arrangement, RFQ to be finalised by end Dec

CS - SG as import market [Oct full-month]: Agent migration completed; all agent performance metrics met target in L4W; shop CSAT +21pp vs Sep with agent migration & new chatbot rollout; next to focus on Chatbot DR improvement

Highlights

1. **All agent performance metrics met target in L4W, after full migration on 30 Sep**
   - Actions taken to recover AWT: unbind non-performing shops to reduce chat volume; improved WFM planning to ensure sufficient staffing
   - Agent productivity in Sep miss target due to SG/PH agents overlap during migration transition period, and fully recovered after migration completion
2. **Shop CSAT +21pp after new chatbot rollout**
   - 24 Sep: 50% of chats (excluding ID-SG lane) moved from old to new chatbot
   - 22 Oct: 30% of ID-SG chats moved from old to new chatbot, rollout percentage was determined based on actual chatbot deflection rate
   - New bot improved CSAT but led to a lower deflection rate; next to work with Chatbot PM&Dev to improve DR for SIP

CS - MY as import market [Oct full-month]: Agent migration completed; all agent performance metrics met target in L2W; Shop CSAT +14pp after new chatbot rollout; next to focus on Chatbot DR improvement

Highlights

1. **All agent performance met target in L2W**
   - Actions taken to recover AWT: unbind non-performing shops to reduce chat volume; reskill training ongoing, agents from other markets are able to support PH during chat spikes; standardized PH Agent working hours and platform to be the same as other markets
2. **Shop Conversion Rate** missed target in L2W, mainly due to lower chatbot CR
   - Chatbot conversion in PH is lower than other markets, consistent with patterns observed in other business lines, further deep dive in progress
3. **Chatbot DR shows a decreasing trend, newbot rollout was completed**
   - 18 Aug: 30% of chats (excluding ID-PH lane) moved from old to new chatbot
   - 22 Oct: 30% of ID-PH chats moved from old to new chatbot, rollout percentage was determined based on current ID agent capacity
   - Next to work with Chatbot PM&Dev to improve backend solution configurations for SIP, in order to increase Chatbot DR

System/Product: Key system launches in Oct: 1) IDMY Direct auto-payout to local wallet ; 2) Local SIP order sync fail dashboard lived

Highlights

11 export lanes opened direct selling option to local sellers from MY/ID/VN/TH/SG;

SGMY launched on 24 Oct, with 47 active sellers until date, 9.7K live SKUs; next step to work with SG/MYCB team to include highest potential sellers into seed program and push for success case and topline

November launch pipeline:
(1) VN-TH / ID-TH: 17 Nov
(2) SG-TH / TH-SG / TH-MY: 24 Nov

Target to launch all planned Direct selling lanes by Jan-26

Direct performance [Oct MTD as 30 Oct]: 14k ADO, +25% MoM; $181k ADG, +21% MoM; 48k active sellers, +72% MoM; 4.6M live SKUs, +85% MoM; Nov focus on 1) simplify pitching; 2) improve SKU migration; 3) push paid ads and price comp

Highlights

1 **Seller/SKU count**: **115%/117% RR; +72%/ +85% MoM**

2 **IDMY 93% RR** mainly due to delay of mass pitching ramp up to align pitching approach with ID local seller comms; has received local greenlight to proceed with 1) whitelisting of all eligible sellers; 2) weekly mass pitching from 3 Nov

3 **THPH 3% RR** as TH team faces capacity constraints to scale up pitching; had discussed with Ken (THBD head) on last Friday, aligned to mobilize RM/CS capacity to ramp up pitching from 3 Nov

- **Nov focus**: 1) increase active selling rate via ops shop opening feature, ETA end Nov; 2) improve SKU migration% via weekly mass resync

4 **ADO/ADG**: **108%/109%RR; +25%/+21% MoM**; growth mainly driven by MYSG/IDMY/VNMY

5 **IDMY/IDSG 96%/96% RR** due to pitching delay mentioned above

6 **VNPH 87% RR** due to data issue causing target to use overstated reference for projection; has resolved data issue and adjusted target for Nov

6 **MYTH 30% RR** due to a system hiccup on onboarding leading to most sellers only onboarded in H2-Sep resulting in slow ADO ramp up

- **Nov focus:** 1) rotate seed sellers to push topline growth; 2) explore ads top-up service to increase traffic; 3) review promotion sync and markup% to reduce ABS

Acquisition funnel [Oct MTD as of 30 Oct]: From export market ADO coverage view, total 89% ADO eligible for pitching, 42% pitched, 5% started to sell; Nov focus on 1) share success case; 2) simplify 1:1 pitching; 3) ramp up mass pitching

Highlights

1. **ADO coverage view (total): across 10 launched lanes, 89% export market ADO eligible for pitching, 42% pitched, 5% started to sell**

2. **Seller # view (total): 68% target pool pitched (+3pp MoM); 2% started to sell (+1pp MoM)**

3. **Seller # view (1:1 pitching pool)**:
   - 29% target pool pitched (+1pp MoM), growth mainly driven by ID team started batch 6 of 1:1 pitching as planned
   - 29% started to sell (+2pp MoM), growth mainly driven by VN team improved pitching success rate further via multiple reachout channels (email/chat)
   - Nov focus on
     - Add seed sellers success cases to seller comms/pitching materials/PR events; ETA 7 Nov (deep-dive on next slides)
     - **Streamline and simplify local RM workload**; via 1) automate weekly reminder system to each RM to feedback on sell acquisition progress via individualized survey and bot; 2) dev system feature to allow SIP ops team to open the shop for accepted sellers [ETA end Nov]

4. **Seller # (mass pitching pool)**:
   - 69% target pool pitched (+3% MoM); 2% started to sell
   - Nov focus on: 1) ramp up ID/VN export lanes to 100% pitching rate by end-Nov; 2) ramp up MYPH/TH to 30% by end-Nov; 3) align THPH pitching plan with THCB/BD team

Highlights

(1) % of sellers set up ads still below their respective local shops; MoM slight decline in % driven by increased +30% total sellers

(2) paid ads TR% remains low vs local shop except for MYSG +0.4pp higher with upsized ads incentives a) 20% off paid-ads top-up b) rebate 50% of ads top up through platform sponsored vouchers c) adxpress

(3) Ads ROAS observed MoM improvement across lanes, still below local shop returns generally expected with longer lead time

Challenges & Next step

(1) Low adoption rate from ID/VN sellers due to a) offline ads top-up, additional step required vs from wallet top-up; b) seller no visibility on payment details; both to be resolved with global wallet function (deep-dive on next slides)

(2) To explore a) internal ads top-up service, b) SIP ads management services for sellers, c) incentives with destination markets to drive first-time ad adoption

Paid ads investment: From ID/VN export team feedback, the key blockers preventing ID/VN sellers to invest more on paid ads are 1) inconvenient top up; 2) lack of payment visibility; 3) low ROI vs local shop

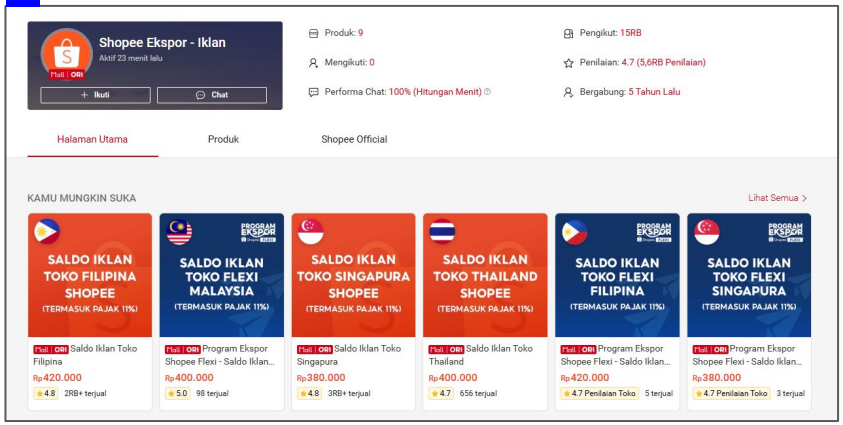
No.	Key blockers of seller investing in paid ads	Root-causes	Short-term workaround in place	Long-term plan and ETA
#1	**Hard to purchase ads**	**System issue** - Direct selling shop wallet function is not in place; rely on offline manual adjustment for escrow and payout	1) **Use international credit/debit card** to purchase ads (easy process, however not many ID/VN sellers have international credit cards) 2) **Purchase ads credit from a virtual goods shop**, local export team converts the purchase to ads credits, then top up to sellers' direct shops, alert sellers to set up ads **(backup #1)**	In progress of developing the wallet function for direct selling [**ETA: Dec**] **(backup #2)**, that allows 1) ads purchase by directly deducting escrow from overseas earnings (same as local shop ads purchase process) 2) real-time order level breakdown of cost components
#2	**Lack of visibility on order level revenue/cost breakdown to decide how much margin can be used to invest in ads**		Provide seller with **manually generated invoice every week**, for sellers to do retrospective reconciliation, and inform margin	
#3	**Overseas shops ads ROI lower than local shop**	**Business model issue** - 1) CB orders longer lead time than local orders 2) SKUs are chosen for local market match instead of overseas market	**[MYSG best practice]** 1) 20% off paid-ads top-up 2) rebate 50% of ads top up through platform sponsored vouchers 3) provide adxpress service	1) Work with import markets (MY/SG/PH/TH) to provide similar incentives to encourage ads investment [**ETA: 7 Nov**] 2) Formulate and provide ads operations service by SIP [**ETA: 14 Nov**] **(backup #3)**

[Backup #1] Offline ads purchase from virtual shop: Majority of VN/ID sellers purchase ads via virtual ads shop, then VN/ID export team helps to top up ads credits to their Direct shops

Ads Top-up SOP

Via Seller Centre	Via Virtual Shop
1. Seller purchases ads via Seller Centre* **Must use international credit card*	1. Seller purchases ads as virtual product via listing on Shopee ID, maintained by ID SMT
2. Paid ads credits automatically injected by system immediately after purchase, seller can set up ads	2. ID SMT to consolidate virtual shop orders and manually top up PA credits on back end
	3. SMT to inform seller once the top up has been completed so seller can set up ads

1



2

1 Listings are separated by country → SIP / Direct

2 Top up amounts are pre-determined by Shopee within the item variations

[Backup #2] Direct selling wallet development: To enable seller to use overseas shop balance to purchase ads credit via seller center; currently in development, target to rollout from Dec-25

Current / short-term payment Method (Except MY Export lanes using 3PP wallet)

To-Be Payment Method

	Current	To-Be: Direct Balance
Payment Method	Pay to local shop balance	Pay to overseas shop balance
Details	Escrow overseas revenue to seller's local shop balance; Seller can bypass 3PP to withdraw money with local bank account	Upgrade wallet feature to enable overseas shop balance to be binded with local bank account; Balance of local shop and overseas to be separated and can be used independently
Ads top-up method	1. International credit cards 2. Virtual ads credit shop	**1. Overseas shop balance** 2. International credit card 3. Virtual ads credit shop
Pain Points	1. Sellers are not able to use shop balance to purchase overseas ads credit due to legal/tax concern 2. International credit card adoption rate is low for SEA markets	
Remark		ETA to launch in mid Dec, roll out sequence: VN Export -> ID Export -> MY Export

[Back-up #3] Ads operations service by SIP: SIP team provides ads service to CNCB MP sellers with good ROI to seller and potential service profit to platform; to explore offering the service similarly to Direct sellers

CNCB Ads Service As-is

Seller enrollment	• Monthly pitch sellers through CNSC mass invitation. Target CNCB self-run shops:
	  ○ ① Non-brand sellers
	  ○ ② Sufficient payout (L4W average pay out > $100)
	• Provide six tiers Ads package (USD 100–3000), 7–10% service fee

Payment Flow	1. Seller enroll and authorize deduction through escrow 2. Ads team raise deduction ticket in “Adjustment center” 3. P&L/Ops/CB Payment approval 4. Payment Team deduction 5. CNCB MKT team manual top-up Ads credit to shops 6. Binding agent account to shops to enable Ads setting
Ads Operation	• Ads team mass set up Ads and optimize budget run rate at shop level • Program Ads ROI 12.5, +30% vs MP seller self run Ads.

- **Next action for Direct shop**
  - To test payment deduction workflow.
  - Finalize service package tiers and service fee details
  - Prepare seller pitch and communication

Key initiatives

SIP key initiatives update (1/3)

Growth lever	Initiative	Update	PIC
CNSIP revamp	**CNSIP new batch pitching**	• **Oct batch:** 10K GP with 26M SKU opportunity was pitched in week of 10.20. GP acceptance rate is 80%. Open shops and migrate SKUs this week, will start sales on Nov 3rd.	Linda
More SKUs	**SKU migration improvement**	• **Direct selling:** WIP to build SKU migration funnel for all lanes to analyse existing migration gaps and take actions to improve migration efficiency; ad hoc resync done based on initial assessment of breakdown, next step to identify more actions for other gaps	Emily
Cheaper price	**SIP price bidding**	• **Bidding progress:** MTD winning model# 68K, MoM +89%, target run rate 152%. Winning model ADO 10.7K, MoM +84%, target run rate 132%. • **Scalability improvement:** ○ Submitted biz requirement to automate bidding process, PRD WIP. Target to automate process in Dec. ○ Request to optimize SIP eligibility standard to enable more models to bid. Working on biz impact analysis to PM.	Linda
Cheaper price	**Price elasticity**	• **Context:** raise prices for inelastic SKUs (unique to platform) and reduce prices for elastic SKUs; trial indicated overall ADO improvement; however require SKU level automation tool to scale up across lanes. • **Product status:** Feature development in progress, 2 months required time to complete	Ailin
Better marketing ROI	**Trendy SKU push**	• **Context**: To match SIP SKUs to platform top trending keywords; automated keyword prioritization across categories and download board for SKU curation; detect existing top and rising demand early to ride on traffic trends promptly • **Performance**: Q3 116k trendy SKUs incubated in 8 lanes, +4.2K ADO incremental uplift • **Status:** Oct fully ramp-up 90K additional SKUs for trendy keywords across MY, TH and PH markets; Nov focus to optimise lower ROI ones and review category level efficiency	Ailin
Better marketing ROI	**Ads ML model for new SKUs curation**	• **Purpose**: to select new SKUs that are more likely to be successfully incubated with ads • **Findings**: ML model identified 4 attributes of survival - item traffic, shop ADO, category, and export market SKU ADO • **Short-term**: Using weighted attribute scoring for SKU ranking and selected 35k SKUs for trial with 3.6K ADO generated, observed **survival rate improved from 7% to 9% with IDSG +6%, MYSG +5%** • **Long-term**: WIP with BI & product to build destination market-specific ML models	Ailin

SIP key initiatives update (2/3)

Growth lever	Initiative	Update	PIC
Drive content	**Livestream**	• **SG OA Livestream Plan:** collaborate with SG OA LS for 18 SIP fashion shops to test LS ROI, target 2 streams per week, 1.5 hrs per stream**;** WIP: To finalize OA schedule, shortlist top SKUs and arrange samples delivery [OA LS ETA mid Nov] • **Sending SG KOL to VN:** collaborate with SG marketing to support 6 streamers visit VN during Oct 24-30 on 14 selected VNSIP brands. Achieving +18K GMV for first the 4 days with average order per stream at 21, GMV at $488. • SG KOLs BAU Livestream: 12 IDSIP shops curated to match with local SG KOLs to livestream on BAU basis from their home or from shopee studio, target to build consistent content initiatives and improve top sellers brand awareness	Xiaoxuan Ailin
Drive content	**Video**	• **PDP video:** Discussion of migration opportunities with TH video team; looking into local team QC capacity • **AIGC**: Pending BI on SKU selection tool for more efficient prioritisation of SKU curation for AIGC • **External AIGC Video:** To run a 200-video pilot test in PH to validate video performance and ROI. WIP: aligning with SG Video team on offline budget transfer.	Xiaoxuan Shermaine
Drive content	**AMS**	• **MY/SG:** 100% coverage for performing shops in SG and 100% of coverage for fashion performing shops in MY; • **Other markets:** Regional Finance confirmed there will be tax implication when SIP performs AMS overseas. Will simulate the tax impact and get approval from Regional finance • Status: IDPH AMS trial observed +0.5K ADO uplift; with incremental CPO at $2.4 with lower than expected ROI at 2.6x due to lower AMS ABS. Nov focus still on new SKUs ads incubation due to higher ROI & ramp up in AMS on category level strategically	Zhang Yu
Lower OPEX	**Fraud management**	• **Cancellation Fraud**: **no new cases this week**; YTD 62 sellers, 157 orders, $26k GMV; wallets frozen, $19k recoverable with claw-back • **COD failure Fraud**: **no new cases this week**; YTD 343 sellers, 83k orders, $2.2M loss (29% clawed back) • **RR Fraud: no new cases this week**; YTD 20 RR fraud sellers,42 fraud buyers, $23K loss, $1.8K (8%) recoverable with seller wallet claw-back.	Lesley
Lower OPEX	**SIP x Resell**	• **Purpose**: reduce loss from failed delivery orders (vs liquidation) • **Status**: in progress of obtaining HQ legal/tax/finance clearance and PH WH capacity allocation; next step to submit new business initiative request to FPC	Emily
Lower BWT / shipping cost	**IDSIP sea shipping**	• **Progress:** Aligned with IDSPX that previous assumption was too aggressive, seashipping potential is limited. WIP assessing 1) air economy channel and 2) reassessment on IDSIP FM order allocation plan to better leverage high performing 3PLs to improve FM LT	Zhi Ann

Private & Confidential

SIP key initiatives update (3/3)

Growth lever	Initiative	Update	PIC
Lower BWT / shipping cost	**VN/PH-MY Collection Point launch**	• **Progress:** Working on system configuration and live testing; launch ETA 1 Nov.	Zhi Ann
Stronger GR/PR	**MY export event**	• **MATRADE Government event** that initially planning on 1 Nov held in Johor will postponed till further notice due to other P1 Gov initiative.	Xiaoxuan
Strong GR/PR	**VN-SG event**	• **MoU Signing Ceremony** in SG on 25th Nov: official signing of the Memorandum of Understanding between iDEA Vietnam and Shopee Vietnam, witnessed by the Ambassador of Vietnam and representatives from ESG • **Event details:** 1) Livestream session showcasing cross-border eCommerce collaboration; top Shopee KOL Angel to have live demonstration featuring 3 VN brands 2) Workshops on CB operations and growth, SIP & Direct selling businesses for the delegations and VN sellers	Ailin
New market	**Dino**	• Dino launched on 16 Oct. L7D ADO 83. Late shipment in new shops ERP binding rate (~37%) is much lower than mature shops (~70%), as aligned by SIP team from past experience. Next step to work with RM push seller shipout on daily basis & monitor ERP stability if any other issues.	Qiang Wei
New market	**AME**	• **VN-KH/TH-LA/TH-MM [launch ETA Jan-26]:** In progress of launch prep with VN/TH PMO; TH-MM lane launch most likely delayed to Q2-26 as MM border is closed, more clarity on timeline in end-Nov. • **CNSIP-KH/LA/MM [launch ETA Jan-26]:** in progress of working with CN Monee team to design payment flow and CN SLS team to establish direct shipping from CN to KH/LA/MM; target CNSIP launch alongside AME lanes. • **SIP feature improvement on RR/seller chat/promo sync:** reg PM in progress of drafting feature RFR.	Cuiwei
Cross-team collaboration	**CNCB site expansion**	• CNCB is closing site expansion 1v1 pitch, for sellers did not expand to new sites yet, CNCB proposed to mass toggle-on CNSIP shops, notify sellers through Wecom and opt out shops if seller request • **Progress:** 333 GPs were pitched, 237 GPs accepted. 2112 A shops were opened this week. Will start sale on Nov 3rd.	Linda
Cross-team collaboration	**CNLS site expansion**	• **Completed top-down target setting** for CNLS site expansion with Direct selling model, benchmarking local sellers • Next step for CNLS PMO to coordinate local CNLS team review and target alignment • **PHMY lane (1st lane) onboarding delayed to Jan/Feb-26**, pending system improvement on tax collection; aligned new timeline with regional CNLS team	Jill
