Highlights

- **Overall**: Program ADO 131.5K (RR 92%), ADGMV $1.2M due to underperformance in F&B and Beauty. Lever 3 targets have been adjusted following P&L discussions, to focus on trimming P&L investment in Q4'25 and extend target achievement to Dec'26.
  - **Fashion:** ADO 70.6K (RR 96%), attributed to strong Lever 1 and 3 performance at both RR 102%
  - **Furniture:** ADO 9.7K (RR 94%), underperformance concentrated in Lever 2 at 83% RR
  - **Food & Beverages:** ADO 2.6K (RR 71%), Lever 3 sees strongest MoM growth +47% despite underperforming RR at 60%
  - **Beauty**: ADO 48.7K (RR 88%), underperformance due to Lever 1 and Lever 2 below target (RR 90%; 88%)

Highlights

- **SG: ADO 2.3K (RR 115%)** due to strong MoM performance from Lever 1 driven by seed shops MiZiQi (ADO 114; MoM +462%) and Mosesqueen (ADO 91, MoM +78%).
- **MY: ADO 16.9K (RR 106%)** attributed to strong Lever 2 (RR 104%) and Lever 3 performance (RR 112%), notable sellers include LuxeTote (ADO 551, MoM +125%) and Bostanten0.my (ADO 512, MoM +37%). PC2 declined sharply to -9.7%, WIP with Local team to plan for Nov'25 spending.
- **VN: ADO 12.5K (RR 72%):** Lever 2 underperformance (67%) following 10K VND platform fee implementation in Oct'25 causing top-seller price hikes.
  - Next Steps: CN Cluster have started pitching sellers to convert to 3PF to lower prices; top seller 岛屿 has agreed, expected to complete pitching for remaining sellers by Mid Nov
- **PH**: **ADO 14.8K (RR 81%)**: due to limited incentives allocated to Lever 2 sellers for performance catchup.
- In Nov, we will push for seed sellers overachievement in SG/MY/TH and consider recalibrating targets from VN to SG/MY/TH.

Highlights

1.Topline: ADO 9.7K (RR 94%), ADG $262.8K (RR 78%), ADO% to CB 0.6% (MoM +0.0 pp) for the following reasons:

- Lever 1 continues to overperform other key levers (RR 103%), attributed to strong MY performance (RR 145%).
- Top seller RZY continues to remain under penalty lockout due to poor seller ops (e.g. spam listings, non-fulfillment) and reduced ads spend;
  - Next Steps: We have removed shops to focus on a list of more cooperative shops under RZY while we focus efforts to acquire better sellers to replace RZY.

Highlights

- **SG: ADO 523 (RR 68%)** attributed to weak contribution from key GGP 润泽优 (MoM -31%); decline was driven by reduced ads spend during CN Golden Week holiday, price hikes, and penalty lockout. Next Steps: 1) Increase ads and voucher spending (already improved from -50% MoM to -16%), and 2) Coordinate with seller to revert selected products to original prices.
- **MY: ADO 6.0K (RR 112%)**, arising from strong Lever 1 (RR 145%) and Lever 2 (RR 101%) performance; growth concentrated around TableRave (ADO 168, MoM +51%).
- **3PF PO Listing Alignment:** 1) SG: 0 PO listings; requested exemption for TB program shops due to structural limitations where sea shipping rate card is uncompetitive. WIP with Local CB team to evaluate feasibility to adjust rate card; 2) MY/TH to follow local listing at 10% PO per shop. We expect to implement these policy changes afte 11.11

Highlights

1.Topline: ADO 2.6K (RR 71%), ADG $15.4K (RR 66%), ADO% to CB L1 4.0% (MoM +0.2pp) due to:

- Lever 2 underperformance (RR 73%) mainly driven by ADO decline from top sellers 深金辉 and 安米, following reduced ad spend and livestream activity earlier in the month. Both sellers have since ramped up investments: 深金辉 recorded +5% MoM growth, while 安米 improved from -50% to -10% MoM.
- Lever 3 underperformance (RR 66%) despite strong MoM growth (+47%).

2.SKU#: 66K (RR 94%), Lever 3 saw strong growth MoM +38% contributed by OF F&B sourcing over last week.

3. Program PC2: -10.8% (MoM -6.2 pp)

Highlights

- **SG ADO 604 (RR 97%)** underperformance primarily driven by decline during CN Golden Week holiday. Lever 2 slightly underperformed (RR 93%), but saw good growth from major sellers 三只松鼠 (MoM +161%) and 尚燚 (MoM +98%).
- **MY ADO 1.5K (RR 65%)** due to Lever 3 underperformance (RR 39%) & Lever 1/2 MoM performance decline:
  - Lever 1: Seller 泉州霄赞 (MoM -68%) is currently relocating warehouses and experiencing operational issues. Operations are expected to normalize by next month.
  - Lever 2: Seller 吉喵云 faced duplicate and ingredient listing bans earlier in the month (-50% MoM), but recovered to -26% MoM after resolving said issues and resuming new listings. Next Steps: RM has shared trending items to replace risky listings, and identified two high-stock sellers as next growth drivers, currently pushing for faster SKU uploads.
  - Lever 3: Top ERP seller (黑桃科技) is facing penalty issues due to prohibited listings listed. Pending to waive penalty points to reinstate campaign exposure.

Highlights

- **SG: ADO 1.4K (RR 103%)**, attributed to strong Lever 1 performance (RR 124%); notable sellers include Hexkin Flagship Store (ADO 54, MoM +50%) and LYDIMOON SG (ADO 20, MoM +268%). Lever 3 continues to record strong MoM growth at +92% amidst underperformance (RR 84%).
- **MY: ADO 4.8K (RR 104%)**, arising from strong Lever 2 performance (RR 107%). Following delayed platform voucher set-up in the beginning of October ~3K ADO sellers have noted robust growth for PV orders given recovery of BAU performance to ~4K ADO.
- **VN: ADO 27.8K (RR 91%)**, Lever 1 underperformance (RR 77%) driven by top seller 美一欣 top selling SKUs OOS. Restock is in progress and performance have improved from MoM -33% to -7%.
- **PH: ADO 10.2K (RR 72%)**, Lever 2 underperformance (RR 72%) driven by top sellers 广州市天臻姿 , 广州美舟 , and 义乌铭八 recording >10% ADO MoM declines after PH reduced PRM support for sellers with PC2 concerns. Next Steps: RMs to encourage sellers to increase self-investment to mitigate impact of subsidy cuts.

*Priority Pool includes both program and non-program performing SKUs with matching TB items that have sold count >10.

Key Highlights:

1. Shopee NPC is currently **at -25%** in the latest SKU pool refresh for Q4 that is driven by influx of new SKUs (70% different from Q3). We will work to close the gap through seller negotiation.
2. **SG Heavy Rate Adoption:**
   a. Rate Card Adjustment: Aligned to lower rate card to be competitive against Cainiao at <=100g and match to Cainiao at >100g for every incremental 10g weight tier and inclusive of enabling BSC. Tentative to launch from 5 Nov.
   b. Seller Pitching: Out of initial 216 TB shops shortlisted for heavy rate pitching, 27% (58 shops) have agreed to adopt. The remaining shops declined, primarily due to the lack of Buyer Self Collection (BSC) option for heavy rate channel. Next step: with the new rate card adjusted, to repitch sellers on Heavy Rate card adoption by 3 Nov.
3. **Next Step:**
   a. Ongoing automation efforts with DC to develop a TB crawler for more stable and consistent price tracking; WIP to review alternative options to optimize cost and feasibility
