Follow up from previous meeting

#	Topic	Action Items	PIC	Deadline	Status
1	Overall KR growth	1. Double check if VN KYC fraud products are liquidated in the proper way 2. Double-check how revenue from liquidating offsets SLS+ cost.	Joanne Lee	11/7 Via email	WIP
2	FPNA	**<Take-Rate>** 1. Cross-check EoM paid ads take-rate RR with Faye's team. 2. To improve accuracy of EoM TR RR projection, double check below items: 1) Whether Paid Ads target setting was wrong? The actual was really accurate? 2) Whether PRM was overspent 3. Provide take-rate breakdown by commission and paid ads breakdown in the next meeting onwards. **<CIR>** 1) Faye's team to share CIR calculation logic with KRCB. 2) KR to sense-check whether take rate MoM target.	Faye Yan Haenle Suh	10/30	Done(replied via email)
3	NPC - Torriden	Explain why Torriden has only 1 matching sku on SHP <> TTS? Need to double-check assortment difference between SHP vs TTS(sub category difference? product line? price range? And why)	Yebin Ju Chaemin Yoon	11/7	WIP

4	Distributor Analysis	Vendor vs Brand analysis from the below perspectives: ● Assortment (TTS SKU matching) ● Pricing ● LFF After the analysis, KRCB will check with brands' top mgmt about our suggestion.	Yebin Ju Yuna Kwon Jason Yu	10/31	WIP
5	Distributor Acquisition	Once KR makes decisions on which distributors should be acquired, Local SA team should lead the acquisition of the distributors.	Jason Yu Yuna Kwon	10/31	WIP
6	JP Head Count	Follow up in a separate email regarding: ● 2026 original headcounts for next year ● How many more headcounts are needed? ● How will they be allocated? ● What will be the impact?	Heeyoung Hwang Haenle Suh	11/11	2nd proposal WIP
7	Paid Ads Take-rate	1. Share the rest of the markets' take-rate RR except for TH and TW. 2. Replicate the success case of TH and TW for markets with low RR.	Kayoung Choi	11/6	Will share via separate email
8	TH/VN Seller Visit	1. Check the participation rate for the trip in Feb. 2. If the participation % is low, propose a new budget to Ian	Yuna Kwon	10/31	WIP

1a. Topline

KRJP Oct Topline : KRJP Topline RR 95%(MoM +1%, growing slower than PLT) mainly from KR's less promotion/investment coupled with IPR issues in TH/VN also resulting in low PnL RR

Key Highlights

1 **KRJP Topline** : KRJP closed with ADO RR 93%/ADG RR 99%(excl JPTW fraud but addt'l investigation ongoing) with KR showing slower growth vs. PLT

- KR MoM flat mainly from TH/VN showing MoM degrowth due to less promotion from lack of new product launch/exposure and sellers withholding investment for Nov(historical KR sellers behavior) added with reseller IPR issue
- JP MoM +7% growing ahead of PLT
- In Nov, KRJP aims to grow MoM +7% mainly from aggressive promotions(OOH, new product) and campaign participation push in KR

2 **KRJP MP PC2 + SLS PnL**: KRJP PnL $1.6mil with RR 56%(MoM -4%) missing total $1.25mil of which $1.05mil(85%) from MP with $0.2mil from SLS

- From MP, $0.6mil from TR%(esp. $0.25mil from missing ads TR%) while also $0.5mil from GTF(accuracy will be improved by using M-1 BU specific %)
- From SLS, gap mainly from VN/TW fraud while Nov also similar PPO expected from WH cost increase and mega day VF fluctuations

Note:

1. *Competitor related metrics(ADG share in SEA, ADO% to platform's origin SKU ADO) are M-1 actual vs. M-1 target due to the time limitation of gov't official data publish period and processing time*
2. *New seller definition is sellers' which go-live after '24 Oct onwards*
3. OKR items without EOM projections, RR is based on MTD actual vs. Target

Key Highlights

1 **KRJP Topline OKR:** In Oct, KRJP topline related indicators are strong(vs CB) as CB is also saw slower growth;

- Yet, KR topline missed target mainly TH/VN while JP closed ahead of target with 13k(MoM +7%, growing ahead of PLT even after excl. JPTW fraud)

KRJP Key growth driver OKR:

2 JP new seller # closed strong with RR 200%(again the highest in '25) driven by lead CVR optimization and KR new seller ADO as well from promo/pkg

3 KRJP EBITDA miss target from missing MP PC2*(shared separately on the why and gap contri.)*

4 LS shortage mainly from VN's ADG MoM -3.7% as UST sellers(incl. VT) were not featured by mega KOL (reactivation planned in Nov) while VDO met target

5 LFF closed with RR 107% mainly driven from PH Torriden's FBS resume and VN UST sellers' CBP pkg uplift. Nov also expect to hit target mainly from 1) PH consol inbound before 11/11(7% of PH LFF) and 2) VN license subsidy program sellers' new onboarding(3% of VN LFF)

Logistics OKR: all hit target

***Notes - MoM lower XDD/NDD% target/actual from channel being closed during KR long holiday*

2a. KR Counter TT NPC Progress for all markets

[Counter TT - MY Action Plan] (1) Price - All KRCB sellers can match SKU prices (Brand HQ controls TT), (2) Assortment - Q4 focus varies by Group A~D by SHP/Overlap/TTS SKU # ratio and Brand Strategy

Even with the onboarding of local OS shops, (1) NPC improvement remains challenging due to Brand HQ control. Q4 focus area is (2) Assortment gap closing - targeting Group A sellers. Key migration targets are TTS bundle deals, and the mid-term strategy is to launch new SHP exclusive SKUs to strengthen the SHP assortment portfolio.

- **Group A (▲TT exclusive SKU 25~50%) :** Close assortment gaps(mainly from bundle and live-streaming deals) by migrating TT exclusive SKUs to SHP
- **Group B (▲ Overlap SKU 25~70%) :** Improve NPC performance by focusing on price competitiveness
- **Group C (▲ SHP exclusive SKU 70% ~) :** Launch new SHP exclusive SKUs(bundle deal, mini size deal) and maintain a healthy SHP exclusive portfolio
- **Group D (▲ TT exclusive SKU % & ▲ SHP exclusive SKU %) :** Improve NPC performance by focusing on price competitiveness (brands strategically operate different SKUs across platforms to avoid cannibalization)

[Appendix: Counter TT - MY Action Plan] Torriden MY has been leveraging TTS as marketing-focused platform — its exclusive bundle SKUs(43% of total) were created mainly for livestream or video exposure

1. **Difference in SHP vs TTS exclusive assortments**
   a. No major diff. in sub-category/lifecycle
   b. TTS-exclusive(61% of total) focusing on livestream
      1 i. 70%(43% of total): bundles(main-mini combo or mini-bundle for livestream), contributing 44% of TTS sales
      ii. 30%(19% of total): single SKUs(mini-size items), contributing 13% of TTS sales
   c. SHP-exclusive focusing on sales
      i. 57%(39% of total): single SKUs with no mini & exclusive product in several lines
      ii. 43%(30% of total): focusing on main-size SKU bundle

2. **Action Plan**
   a. by EOY: push migration of TTS-exclusive assortments(esp. focusing on bundle skus)
   b. In 2026:
      i. Activating live & video(77% of TTS sales) with bundle skus
      ii. Rebate support required to accelerate npc execution

[NPC ADO SG/TH/VN] Price Parity Improvement Plan by market NPC Incremental pp% by market added as SMT RM KPI Bonus Metric from Nov - Improvement Expected in Nov vs Oct

- **SG** (ADO data - fixing) : Among 10 sellers, Torriden and Clubclio are below the target 60%. As of 11/3, 5 out of 6 SHP expensive SKUs already have lower prices due to Beauty category exposure, and sellers will align remaining SKUs with TT prices moving forward.
- **TH** : Among 100 SHP expensive SKUs, 35% already have lower SHP prices, 15% are OOS, and price negotiation data has been shared for the remaining 50%, expecting up to a 30 pp improvement by 11/11.
- **VN** : Skinfood and Somebymi are identified for improvement, targeting 11/11 and leveraging all available rebates with local team alignment.

2b. KR/JP Campaign Participation Progress for SG/MY

SG KRJP Big Campaign: KR grew 10.10 vs 10.25 for both DD/SSV with JP SSV showed 15%p drop due to less response from managed sellers. As of Nov 3, KR is on track for 11.11, but JP showed slow RR for DD due to nomination still WIP, will updated manually before D day.

	PSP	52	62	61	80%	53%	65%	68%	82%	29%			

Key Highlights

1. **JPCB:** In general, 1 SG lower ADG% vs. MY in 10/25 as the team was focusing on optimizing MY campaign process, thus will apply the same learnings from MY to SG for 11/11. But on top of MY process will couple with addt'l gov't budget(e.g. 7% seller discount, 3% SHP subsidy discount) for competitive price
2. **KRCB:** 10.25 RR +1%p & +0%p vs 10.10 for DD and SSV. 10.25 RR vs CN was higher for 10.10 by +28%p for DD and +35%p for SSV. KR 11.11 RR is on track at 54% for DD & 77% for SSV.

MY KRJP Big Campaign: KRJP grew 10.10 vs 10.25 for both LTD with drop in DDV due to slow participation rate from resellers. KR is on track for 11.11, but JP showed slow RR for DD due to nomination still WIP, will updated manually before D day.

	PSP	47	47	32	100%	100%	100%	42%	26%	21%			

Key Highlights

1. **JPCB:** 1-1 What worked in 10/25 was "removing" the seller operations via providing target price and getting confirmation for offline nomination. 1-2 For 11/11, will continue the best case but for managed sellers also do "auto" opt in for higher participation and in general expect to land around higher coverage vs. Oct spike days for Nov
2. **KRCB:** 10.25 RR +25%p & -10%p vs 10.10 for LTD and DDV mainly due to resellers not being responsive to our CMs this time. The team will push harder for 11.11. 10.25 RR vs CN was higher for 10.10 by +20%p for LTD but -25%p for DDV. KR 11.11 RR is on track at 44% for LTD & 40% for DDV.

2c. KR TW Counter CP Update on Targets/Budget & Progress

Recap: Previously, KRCB shared blockers & corresponding action items; This report will share progress for A & B items

Key Highlights

1. **Previously KRCB shared blockers to accelerating progress & action items to tackle them. Of those, the below 3 call for additional attention**
   - A **Assortment:** Readjust target and RR by updating RR calculation method & target to better reflect current ongoing activities
   - B **Price (NPC):** Expand target pool for vouchers to 471 SKUs (vs 115 SKUs) to enhance NPC by 58%
   - C F&B- NPC & Assortment: Incentivize F&B sellers with vouchers incentives if they source target SKU and achieve 1.10x of CP price

Hi Ian,

Please find below KRCB's action item plan for Counter-Coupang on improving 1) assortment and 2) price.

[Summary]

- **Through below action plans, KRCB expects to add 30 brands, ~5,000 SKUs & improve NPC by 114%, to improve brand acquisition RR to 100% (current 50%), SKU RR to 25% (current ~5%), NPC to 44% (current -70%)**
  - Under current plans, KRCB will start sourcing for F&B along with other categories from Oct W5 in order to prepare shops/SKUs to open right upon F&B SLS channel open (arranged for mid ~ late Nov)
  - **These are the 3 key action items which we think need your attention more (highlighted in blue in below tables) :**
    - A **[Assortment]** SKU RR is still low at 25% but we propose to change the definition of runrate (nominator) from previously counting only the matched SKUs, to all new SKUs of the matched brands. We propose this because initial reaction from sellers for sourcing is that many of the SKUs they don't have stock or are discontinued, but they can still source newer items of the same brands, which we see is beneficial for our assortment portfolio. This may help improve the RR and we're currently checking numbers and will share **next week** how the new definition will change the runrate, also check on the historical SKU trend when we run such incentive programs
    - B **[NPC]** Expand target SKU pool of local voucher support from 117 to 477 for vouchers by pushing SKU PnL to -27% (currently 0%). This will improve NPC from -69% to 0%
    - C **[F&B Only: NPC and Assortment]** Incentivize F&B sellers with voucher incentives if they source our target SKU and match to or below 1.10x of CP price. Average price gap vs Coupang is 25%; so if sellers match to Coupang's price by 15%, Shopee will subsidize 10%. (meaning if CP price is $10, our current price will be $12.5, but sellers need to match to $11 and SHP to provide $1 voucher). We propose this because sellers' initial reaction is negative to match CP price, due to different operating model of CP (1P retail) and SHP therefore worse margin structure. We will share additional SKU listing estimate and budget details next week.
- **Inclusive of the above key items, KRCB will update targets and budget details by next week EoW**

[A Assortment] KRCB has updated project targets to 269K USD in Nov (SOB 0.43x) compared to previous target of 305K (SOB 0.48x) to be more achievable based on past performance

Key Highlights

1. **Based on adjusted targets, KRCB expects to achieve 238K USD (SOB 0.40x) in December, while achieving 269K USD (SOB 0.43x) in November**
2. Reason for target adjustment is as follows
   a. # of SKUs to be sourced: Adjusted as 1) eliminating items not permitted for sale from target list, 2) reflecting past sourcing levels, 3) delayed non-beauty sourcing to December due to channel open date/lack of non-beauty reseller pool
   b. ADG per sourced SKU: Assumed different ADG per SKU based on seller ADO and duration since item listing
      i. (vs previously, assumed 21 ADG per SKU based on average of top 10K KRCB TW SKUs)

[A Assortment] Based on updated target, KRCB achieved Oct RR of 92% due to lower than expected KRCB entire performance (baseline); In November with sourcing KPIs now assigned to SMT, KRCB expects stronger momentum in sourcing

Key Highlights

1. **Based on renewed targets, KRCB has achieved 92% of platform ADG target at 223K USD**
   a. Despite target adjustment, RR was not as high as expected due to:
      i. 1) Baseline achieving lower ADG than expected at 223K (vs baseline target 239K)
      ii. 2) Lead time to new SKUs achieving targeted ADG as NSP/migration benefits are applied M+1
2. **Nov MTD RR is 83%, but is expected to rebound as SMT will begin its sourcing initiatives (migration & reseller sourcing)**
   a. Issue: In October, SMT lacked the drive to push Counter-CP sourcing initiatives bc there were no associated KPIs
   b. Solution: Therefore, Projects Team proposed SKU sourcing targets into SMT KPI starting from November based on historical migration levels

Key Highlights

1. **[RR] Due to strong progress in new brand sourcing by SA team, KRCB reached ~290% RR in October**
2. **[Plans] 1) New SKU sourcing & migration:** To drive initiatives, KRCB is planning to conduct the following
   a. Incentives: Align better benefits to incentivize sellers for migration/sourcing
   b. Reseller: Research & onboard non-beauty resellers
3. **[Plans] 2) New brand sourcing** will follow-up on brands who refused by the following
   a. Integrate with ERP provider: SA team has identified ERP provider who serves the most brands and will contact to discuss integration
   b. Identify local distributors

[B Price (NPC)]: Due to vouchers (pushing PnL to 0%) against 115 SKUs, KRCB TW NPC improved to -61% by ~10%p compared to NPC -70% in September

Key Highlights

1. **[Progress] NPC improved ~10% MoM due to appling vouchers against 115 SKUs (who become price competitive if PnL is pushed to 0%) on 10/22**
2. **[Plans] In the following months, KRCB plans to drive 1) seller negotiation and 2) propose to apply additional vouchers to expand target pool of SKUs for vouchers**
   a. Seller negotiation, like sourcing, was not driven strongly as intended due to lack of KPIs to push initiative
   b. However, as of November, seller negotiation has been applied to KPIs and therefore can expect to see strong performance

[B Price (NPC)]: KRCB proposes additional budget of 1,620K USD to expand voucher target pool by 356 SKUs (total 471 SKUs), improving NPC by 58% and GMV uplift of 82K USD

Key Highlights

1. **With budget of 1,620K USD, KRCB expects to improved NPC by 58% and uplift ADG of 82K USD**
2. This budget will be used to expand voucher target pool to 471 SKUs (before: 115 SKUs), newly including SKUs who are not price competitive after PnL push to 0% but become competitive if PnL is pushed to -27% (same PnL % as Coupang Taiwan)
