Highlights

Local SIP: 182k ADO, 111% RR, CB% +0.58pp MoM; $1.71M ADG, 102% RR, CB% +0.24pp MoM; ADO overachievement driven by 1) MY market newly created SKUs discount push 2) PH new ads incubation ramp-up 3) trendy skus push

CNSIP: 32k ADO, 93% RR, CB% +0.09pp MoM; $278k ADG, 95% RR, CB% +0.06pp MoM; RR lower than expected due to 1) VN ADO -27% after CB custom tax from 11 Oct (-1.7k ADO vs target), ADO%CB on par; 2) Oct batch new SKU growth slower than proj (-0.6k ADO vs target)

Swarm: 10k ADO, 95% RR, CB% +0.09pp MoM; $53k ADG, 111% RR, CB% +0.06pp MoM; RR lower than expected due to cut spending in last week of Oct for non-OF incubation sellers to meet P&L target

Direct: **14k ADO, 111% RR, CB% +0.10pp MoM; $181k ADG, 111% RR, CB% +0.20pp MoM**; growth mainly driven by (1) new seller/SKU growth; (2) SKU effi improvement of maturing SKUs

WH cross-selling: **6.8k ADO, 73% RR, CB% -0.003pp MoM; $43k ADG, 71% RR, CB% -0.01pp MoM**; mainly due to (1) CB FBS over-projection (83% RR); (2) CB Choice cut loss making SKUs; (3) Local SCS experienced system glitch (no order on 4 & 5 Oct), in progress of catching up to Sep level via more aggressive marketing push. Revised BU target from Nov onwards

Highlights

[1] **Seller standalone P&L $1.26M USD on target**

- [2] **+$174k** (0.3% GMV) above target is within +/- 0.5% fluctuation buffer of breakeven
- [3] **-$165k vs Sep** as Sep under-spent budget resulting in unplanned P&L surplus; vs Sep, Oct spent additional $615k marketing budget to 1) incubate new SKUs; 2) diversify marketing tools to ramp up AMS and livestream (free sample); incremental CPO ~$1.4

[4] **Total P&L: $4.21M**

- [5] **-$43K vs Sep** mainly due to 1) **-$161k seller P&L** as mentioned above; 2) **-$54k SLS P&L** due to ASF reduction for MYSG, IDPH, IDTH, THMY wef 1 Oct; savings passed back to SIP team as additional marketing budget; partially offset by 3) MP PC2 **+177k** from higher topline; 4) big seller discount **+97k** from higher topline

** staff cost increases MoM for both local and CNSIP as SIP team started to pay for PH agent cost from Oct onwards as aligned with PH (ID started from Sep); for CS office staff, will start booking cost together with HQ SIP staff cost from Jan-26 onwards as aligned with Reagan team*

Highlights

1 **Seller standalone P&L -$1.40M**

- 2 **-$21k** (-0.5% GMV) vs target within +/- 0.5% fluctuation buffer of target; spent more than proj mainly due to lower than expected budget ROI from 2 small-scale pilot initiatives in W4 Oct to catch up topline (price reduction of non-performing SKUs + AMS ramp up); to adjust budget allocation based on pilot learnings in Nov
- 3 **-$1.5M MoM** mainly due to 1) incorporating swarm seller P&L **-$1.49M** in Oct reporting; 2) increase in CS agent cost **$17k MoM** as SIP team started to pay for PH BPO cost from Oct (previous months paid by PH local as aligned with PH); partially offset by higher big seller discount booked from higher topline

4 **Total P&L -$546k**

- 5 **-$757k** MoM mainly due to incorporating **-$912k** total Swarm P&L in Oct reporting; partially offset by **+225k MoM** for CNSIP (excl. Swarm), mainly driven by 1) **+$159k** MP PC2 improvement and 2) **+$77k** SLS P&L driven by topline growth

Highlights

1 **Seller/SKU count**: **115%/117% RR; +72%/ +85% MoM**

- 2 **IDMY 93% RR** mainly due to delay of mass pitching ramp up to align pitching approach with ID local seller comms; has received local greenlight to proceed with 1) whitelisting of all eligible sellers; 2) weekly mass pitching from 3 Nov
- 3 **THPH 3% RR** as TH team faces capacity constraints to scale up pitching; has aligned top 1k sellers to prioritize pitching as most wanted sellers from PH/MY/SG (top short-tail managed sellers with high ABS and preferably Mall sellers); to kick off pitching post 11.11.

4 **ADO/ADG**: **109%/111%RR; +27%/+23% MoM**; grow mainly driven by MYSG/IDMY/VNMY

- 5 **VNPH 90% RR** due to data issue causing target to use overstated reference for projection; has resolved data issue and adjusted target for Nov
- 6 **MYTH 43% RR** due to a system hiccup on onboarding leading to most sellers only onboarded in H2-Sep resulting in slow ADO ramp up, issue resolved, seller number ramped up

Nov Reg team focus: 1) design and implement automation tool to simplify RM pitching; 2) improve system SKU migration from local shop to Direct shops; 3) explore ads top-up service to increase traffic; 4) review promotion sync and markup% to reduce ABS

Launch new lanes: Launched SG-MY on 24 Oct with 7 ADO, 59 active sellers MTD; target to launch additional 5 lanes by end-Nov, including VNTH/IDTH/SGTH/THSG/THMY
