SIP Monthly Meeting

20 Nov 2025

Agenda (20 Nov)

1. Performance

2. For update: 11.11. Performance update

3. For discussion
   - 3.1. P&L: change of booking and treatment of big seller discount
   - 3.2. Ops: IDSIP rubik cube case follow up
   - 3.3. CNSIP: SKU funnel
   - 3.4. Direct selling: 1) launch update; 2) target setting alignment with import markets and performance, 3) promo sync feature adoption, 4) payment solution (3PP vs wallet)
   - 3.5. KRSIP/JPSIP sizing (to be covered in KRJP meeting)

Performance

Performance [FY25 overview]: Continued growth into Q4-25; on track to FY25 ADO 194k (+62% YoY, %CB +2.2pp), seller P&L $0.1M without big seller discount ($12M with big seller discount), total P&L $45M (+$13.8M YoY)

**excludes Taobao ERP project*

Highlights

Topline 62%/58% YoY growth, CB penetration +2.2pp/+2.3pp, mainly driven by
>> SIP: improved SKU migration system, optimized marketing ROI
>> Direct selling/WH cross selling: unlocked more lanes/WH segments/sellers

Seller/standalone P&L $0.1M, +$3.9M YoY, CNSIP -$0.6M (~-0.7% GMV close to +/- 0.5% breakeven buffer range), due to reinvestment of seller P&L in Jun-Aug to counter management fee removal and drive new SKU incubation. With big seller discount, Seller/standalone P&L shall be ~**$12M.**

Total PC2 (standalone+MP+SLS) $45M, +13.8M YoY

Topline performance [Oct full month actual]:
244k ADO, 106% RR, %CB 8.0%, +0.9pp MoM; ADG $2.3M, 101% RR, %CB 9.3%, +0.3pp MoM

Highlights

Local SIP: 182k ADO, 111% RR, CB% +0.58pp MoM; $1.71M ADG, 102% RR, CB% +0.24pp MoM; ADO overachievement driven by 1) MY market newly created SKUs discount push 2) PH new ads incubation ramp-up 3) trendy skus push

CNSIP: 32k ADO, 91% RR, CB% +0.09pp MoM; $278k ADG, 95% RR, CB% +0.06pp MoM; RR lower than expected due to 1) VN ADO -27% after CB custom tax from 11 Oct (-2.0k ADO vs target), ADO%VNCB on par vs Sep; 2) Oct batch new SKU growth slower than proj (-0.9k ADO vs target

Swarm: 10k ADO, 95% RR, CB% +0.09pp MoM; $53k ADG, 111% RR, CB% +0.06pp MoM; RR lower than expected due to cut spending in last week of Oct for non-OF incubation sellers to meet P&L target

Direct: **14k ADO, 111% RR, CB% +0.10pp MoM; $181k ADG, 111% RR, CB% +0.20pp MoM**; growth mainly driven by (1) new seller/SKU growth; (2) SKU effi improvement of maturing SKUs

WH cross-selling: **6.8k ADO, 73% RR, CB% -0.003pp MoM; $43k ADG, 71% RR, CB% -0.01pp MoM**; mainly due to (1) CB FBS over-projection (83% RR); (2) CB Choice cut loss making SKUs; (3) Local SCS experienced system glitch (no order on 4 & 5 Oct)

Private & Confidential

Topline performance [Nov EOM proj as of 17 Nov]: 243k ADO, 100% RR, %CB -0.1% MoM; ADG $2.39M, 100% RR, %CB -0.3% MoM; Nov focus on 1) local + CN SIP marketing ROI improvement; 2) direct selling acquisition ramp up

Private &

Highlights

Local SIP: 184k ADO, 102% RR +1% MoM, CB% -0.2pp MoM; $1.78M ADG, 100% RR, +4% MoM, CB% -0.3pp MoM; ADO% MoM decline within expectation due to lack of EL/brands for 11.11 push. Budget re-allocated to new skus aggressive discount/ads to push 2H incremental growth.

CNSIP: 31k ADO, 90% RR, CB% -0.1pp MoM; $268k ADG, 90% RR, CB% -0.1pp MoM; RR lower than expected mainly due to 1) VN ADO gap due to import tax implementation (-2.5K ADO); 2) PH market halloween assortment detrend (~0.5k ADO), will push Xmas assortment in Nov-Dec

Swarm: 4.3k ADO, 100% RR, CB% -0.2pp MoM; $33k ADG, 100% RR, CB% -0.1pp MoM; RR lower than expected due to ADO drop slightly higher than expected after P&L normalization.

Direct: 16k ADO, 100% RR, CB% +0.1pp MoM; $249k ADG, 112% RR, CB% +0.2pp MoM; growth mainly driven by (1) new sellers onboarded, including SIP performing sellers; (2) SKU effi improvement of maturing SKUs through PRM support

WH cross-selling: 7.4k ADO, 94% RR, CB% +0.01pp MoM; $53k ADG, 96% RR, CB% +0.01pp MoM; RR missing target due to 1) CB SCS LFF optimized P&L (~300 ADO); 2) MY SCS>SG price markup to do ads less effective than expected (~300 ADO)

Local SIP P&L [Nov EOM projection]:
Local SIP seller P&L $1.09M (on par with target); total seller standalone+MP+SLS P&L $4.1M

Highlights

1 **Seller standalone P&L $1.09M USD on target**

- 2 **+$37k** (0.001% GMV) above target is within +/- 0.5% fluctuation buffer of breakeven mainly due to larger comms waiver from higher topline
- 3 **-$168k vs Oct** as due to higher FX loss vs Oct ~$150k (as part of OPEX cost)

4 **Total P&L: $4.10M**

- 5 **-$107K vs Oct** mainly due to 1) **-$168k seller P&L** as mentioned above; offset by 2) MP PC2 **+41k** and 3) SLS P&L **+19k** from higher topline

	Total P&L (Standalone+MP+SLS)	**559,851**	**226,276**	**624,034**	**636,227**	**514,469**	**145,824**	**80,563**	**97,227**	**210,540**	**(491,147)** 5	**318,860**	6 **810,007**

Highlights

1 **Seller standalone P&L -$0.27M**

- 2 **-$24k** (-0.5% GMV) vs target within +/- 0.5% fluctuation buffer of target; spent more than proj mainly due to lower than expected budget ROI from price reduction of non-performing SKUs in Nov (despite positive pilot result in Oct), has re-adjusted budget allocation to hit P&L target
- 3 **-$0.25M** Nov target P&L set as -ve due to support Swarm ramp up
- 4 **+$1.1M** MoM mainly due to optimization in Swarm spending to operate the business more healthier.

5 **Total P&L +$0.32M**

- 6 **+$0.81M** MoM due to Seller P&L MoM improvement mentioned above, but partially worse off by 1) **$130k** MP PC2 and 2) **$171k** SLS P&L deterioration due to topline dropped

Private & Confidential

SIP SLS lead time [FY25 overview]: E2E LT -14% YoY (21% faster than CNCB); LH+CC LT -26% YoY (42% faster than CNCB), driven by better capacity planning and closer monitoring with vendors

Highlights:

- YoY LH+CC and E2E LT has reduced by 26% and 14% respectively.

1 IDMY / VNMY LH LT YoY reduction > 20% due to (1) volume split across 2-3 export/import ports to reduce capacity constraint (2) closely work with key vendors this year to do advance capacity planning and execute ad-hoc solution during peak season

2 VNMY E2E LT higher than CNCB by 20%, with LH+CC LT higher by 50% due to (1) limited VN export flight resource - direct flight capacity are scarce for VN export routes (2) limited VN export custom clearance time - custom official works 9-5.30 Mon to Sat, which made same-day flights or Sunday flights no possible

SIP SLS CPO [FY25 overview]: LH+CC/kg -14% YoY (63% lower than CNCB); CPO -10% YoY with savings reinvested to SIP topline growth; CPO 12% higher than CNCB due to 3x heavier in avg parcel weight

Highlights:

1. YoY LH+CC/kg and CPO has reduced by 14% and 10% respectively.
2. LH+CC/kg is better than CN in MY/PH/SG. CPO is worse than CN in IDMY, IDPH, VNMY mainly due to SIP avg parcel weight is 3x heavier than CN (0.44kg vs 0.17kg).
3. MYSG LH cost reduced by 46% mainly due to a **change in vendor and charging method**. Shifted to FTL charging method since 2H 24, which allows us to reduce cost with maximised truck capacity.
4. ID-MY and VN-MY CPO increase YoY due to the **increase in average parcel weight** resulting in increase of LM and LH cost/pcs.

CS - SG as import market [Nov MTD]: All agent performance metrics met target in L4W; Nov shop CSAT +21pp vs Sep with agent migration & new chatbot rollout; Next to focus on CR uplift and Chatbot DR improvement

Highlights

1. **All agent performance metrics met target in L4W, after full migration on 30 Sep**
   - Next to continue driving Conversion Rate improvement, by refreshing Upselling SOP and promote best-practice sharing from high-conversion agents
2. **Shop CSAT +21pp after new chatbot rollout**
   - 24 Sep: 50% of chats (excluding ID-SG lane) moved from old to new chatbot
   - 22 Oct: 30% of ID-SG chats moved from old to new chatbot, rollout percentage was determined based on current ID agent capacity
   - Next to work with Chatbot PM to improve DR by optimizing backend solution, Chat DR expected to meet target in Dec

CS - MY as import market [Nov MTD]: Nov Shop CSAT +13pp vs Sep after new chatbot rollout in Oct, next to focus on Chatbot DR improvement; Weekend AWT miss target due to ID capacity shortage, next to improve weekend WFM planning

Highlights

1. **Shop CSAT +13pp after new chatbot rollout**
   - 20 Oct: 50% of MY chats (excluding ID-MY lane) moved from old to new chatbot
   - 22 Oct: 30% of ID-MY chats moved from old to new chatbot, rollout percentage was determined based on current ID agent capacity
2. **MY migration completed on 29 Oct, all agent performance metrics met target in L4W except AWT**
   - AWT miss target due to 1. ID capacity shortage caused by recent resignations and new agents still in training; 2. weekend chat volume higher than forecast
   - Actions taken: unbind non-performing shops to reduce chat volume, performance recovered since 17 Nov; next to further adjust weekend WFM planning
3. **Chat DR miss target due to newbot rollout:** next to work with Chatbot PM to improve DR by optimizing backend solution, expected to meet target in Dec

CS - PH as import market [Nov MTD]: All agent performance metrics met target in L4W; next to focus on 1. Chatbot conversion and DR improvement; 2. Agent Conversion Rate and CSAT improvement

Highlights

1. **All agent performance met target in L4W**
   - AWT miss target on 15 Nov due to chat spike, quickly recovered on the next day
   - Agent CR and CSAT slightly lower than other markets, can be further improved by reinforcing SOP training (in progress)
2. **Shop Conversion Rate** missed target, mainly due to lower chatbot CR
   - Chatbot conversion in PH is lower than other markets, consistent with patterns observed in other business lines, further deepdive in progress
3. **Chatbot DR miss target due to newbot rollout**
   - 18 Aug: 30% of chats (excluding ID-PH lane) moved from old to new chatbot
   - 22 Oct: 30% of ID-PH chats moved from old to new chatbot, rollout percentage was determined based on current ID agent capacity
   - Next to work with Chatbot PM to improve DR by optimizing backend solution, Chat DR expected to meet target in Dec

Highlights

1 **ADO achieved 434K, YoY +18% mainly contributed by PH market (+37%) and TH market (+85%) driven by key categories push**
- SG market ADG decline due to MYSG -18% YoY after shop return to direct, other lower ABS lane growth unable to compensate ADG drop
- BR and MX due to 1) IDBR SKU clean-up due to platform limits; 2) removal of marketing budget to prioritise SEA market with higher ROI

2 Vs 10.10: expected penetration decline due to 41% CB uplift contributed by EL/Brands which Local SIP lack such assortment, similar to past year trends.

11.11. Performance [SEA Export overall]: 574K ADO, +23% YoY, CB%+2.2pp; $5.9M ADG, +31% YoY, CB%+1.5pp driven by Local SIP and new biz models ramp-up

P&L: Change of booking and treatment of big seller discount

[Dec budget submission] Aligned with all markets on 1) booking SIP seller P&L to destination markets; 2) give SIP big seller discount. FY26 Local SIP +$13M seller P&L, CNSIP (incl Swarm) +$0.9M Seller P&L, both assuming no spend of big seller discount

For Dec budget cycle submission view >>

FY26 projection		Overall	SG	MY	PH	TH	VN	TW	BR	MX	AR
Local SIP	ADO	**175,949**	44,497	74,243	46,239	8,728	0	1,157	344	113	628
	ADG	**$1,776,725**	$570,693	$664,428	$398,978	$94,594	$0	$23,178	$7,766	$1,996	$15,093
	Seller P&L	1 **$13,215,899**	$5,210,841	2 -$247,543	$5,416,778	$2,882,950	$0	$233,647	2 -$161,091	-$183,477	$63,794
CNSIP (inc Swarm)	ADO	**72,480**	5,082	6,680	15,339	14,867	11,792	3,161	7,222	139	8,198
	ADG	**$910,785**	$57,472	$71,766	$121,990	$139,186	$130,928	$54,694	$135,643	$3,150	$195,957
	Seller P&L	3 **$860,315**	$82,750	$15,598	$183,441	$161,631	$61,220	$44,005	$278,345	$10,751	$22,574

Highlights:

- All import mkts aligned on Dec budget submission for FY26: 1) book SIP SIP seller P&L in destination markets; 2) give SIP big seller discount

1 Local SIP - Seller P&L will be **$13M** after receiving the big seller discount

2 MY is still slight -ve at **-$0.25M** due to strategic topline push on IDMY/VNMY fashion categories to support MYCB fashion push; to revise seller P&L target with MYCB, ETA 28 Nov

b. LATAM generally on -ve as requested by LATAM team to drive topline; to keep the -ve P&L for now as aligned with BR management

3 CNSIP (incl Swarm) - Seller P&L will be **$0.9M** after receiving the big seller discount

[For directional alignment] SG/MY/PH keen to reinvest the discount to drive topline growth for strategic reasons, the other markets prefer to keep as P&L surplus; propose to support local market direction

Context:

- **Recap for big seller discount treatment** - Per last monthly guidance, 1) book the big seller discount as P&L surplus under SIP Seller Standalone P&L as default; 2) if any local markets prefer SIP team to spend the surplus to grow topline, discuss with local on any strategic reasons to do so

1 **Progress** - SG, MY, PH prefer SIP to reinvest the discount for strategic topline growth; other markets prefer to optimize for P&L health thus keep the discount as surplus. Next steps after today's alignment: SG/MY/PH local CB team to seek country manager approval for reinvestment

Based on Local SIP simulation >>

Import mkt	Big seller discount amount	Seller P&L w/o big seller discount	Seller P&L incl. big seller discount	Potential ADO uplift	Incremental CPO	Country direction	Next step
Overall	$13,439,998	$2,451,329	$13,215,899	+10,894	$2.51		
SG	$4,573,137	$1,537,243	$5,210,841	+2,305	$4.35	**Prefer SIP to use the waiver** Rationale: drive topline of unique SIP categories like fashion and FMCG to protect Shopee share	SGCB to seek SGBD/country manager approval, ETA 28 Nov
MY	$5,087,648	-$4,208,603	-$247,543	+5,039	$1.35	**Prefer SIP to use the waiver** Rationale: drive topline of unique SIP categories like IDMY muslim fashion and fashion from other markets to protect Shopee share	MYCB to seek MYBD/country manager approval, ETA 28 Nov
PH	$2,882,795	$3,064,621	$5,416,778	+3,550	$2.50	**Prefer SIP to use the waiver** Rationale: drive topline of unique SIP categories like ID motorcycle products and VN fashion; and high ABS SKUs vs CNCB in line with platform direction	SIP team to share topline projection by spending the waiver to PHCB, ETA 26 Nov PHCB to assess and secure PH management approval, ETA 5 Dec
TH	$675,692	$2,312,963	$2,882,950	-	-	**Prefer SIP to keep the waiver** Rationale: THCB budget constraint, to prioritize P&L health	-
TW	$113,016	$133,588	$233,647	-	-	**Prefer SIP to keep the waiver** Rationale: No strategic/unique categories that local needs SIP to grow more at this moment; to keep the waiver first and reassess later	-

Ops: Rubik cube case follow-up

Summary of recent incidents, SIP actions, and next-steps

Escalation Case	Issue	Root cause	SIP actions taken / proposed	Next steps
IDSIP Rubik cube *2025.11.11*	Item received did not match product page display; item was low-quality & non-branded and it was clear the seller was trying to scam the platform	• **IDSIP SKU price limit at USD 100** to reduce fraud listing which was not effective • **ID local shop was tagged by ID fraud as "potential risk"** for suspected order brushing activities in 2024, but information not relayed to SIP team	• **[Done for all export markets] Lower pricing limit** on category level for all SIP skus to filter out outliers [Slide 31] • **[Done for all export markets] Tighten onboarding criteria** to include "potential risk" tag at account level as additional exclusion criterion from SIP onboarding *[Above 2 actions will prevent IDSIP Rubik cube case in the future as both actions will prevent this seller onboarding to SIP]*	Additional assessments/SOP planned, post current measures done and ops metrics stabilizes: • Assess offboarding sellers if their local shop seller-fault RR/cancelation hits a threshold • Assess offboard seller's SIP shops in all markets, if one SIP shop in one market hits offboarding criteria or suspected low quality/fraud
MYSIP Sticker kit *2025.11.15*	Seller initiated cancellation as it is likely that item is genuinely out of stock. This SKU has also run out of stock amongst other sellers on the platform	• [Platform wise] Cross-Border sellers show a seller-fault cancellation rate nearly 2× higher than local sellers. Despite this gap, both groups are governed by the same cancellation policy.	Although current SIP policy is stricter than CNCB, SIP will tighten our own offboarding policy to improve seller quality and reduce fraud risks, including • **[Proposal] Tighten SIP high RR policy** to remove outlier and benchmark to CNCB average [Slide 25-26] • **[Assessment WIP] Tightening SIP high Cancellation policy** to remove outliers	

[Backup] SIP onboarding criteria stricter than CNCB

Highlights

1 **Not recommended to remove all shops operated by untrusted sellers**
- Untrusted sellers account for 31% of SIP-SG ADO and 37% of ADG, representing approximately 6% of SGCB ADO/ADG.

2 **Improve SIP seller fault RR % to benchmark with CNCB average**
- SIP seller fault RR 0.3pp higher than CNCB, mainly driven by **untrusted sellers from non-MYSIP**
- **Propose to remove high seller fault RR (>10%) sellers from ID/VN/TH/PH/TWSIP**
- **Seller fault RR improves to 1.6%** better than CNCB average
- Estimated SIP-SG ADO impact **~1.3%**

3 **Review highest seller fault cancellation shops to better improve CR**
- SIP seller fault cancellation perform better than CNCB average, 0.4pp lower than CNCB
- But untrusted shops underperform
- Next step to identify outlier shops and apply stricter control, ETA 21 Nov

IDSG & VNSG seller fault RR analysis: Propose to offboard all SIP sellers fault RR rate > 10% to improve average RR from 2.6% to 1.6%, overall impact to SIP-SG 1.3% ADO, 1.8% GMV

ID SIP & VN SIP Oct RR date, exclude the L30D shop orders <3

Highlights

1. According to the ID/VNSIP seller fault RR analysis, overall higher seller fault RR rate is mainly driven by 2136 problematic sellers with high seller fault RR rate >10%, which contribute to ADO 588, 9621 USD ADG (**SIP-SG 1.3% ADO, 1.8% GMV**). Propose to offboard these problematic SIP sellers.

2. Seller fault RR impact after remove problematic sellers: average seller fault RR will be reduced from 2.6pp to 1.6pp, which is 0.2 pp better than CNCB average seller fault RR rate.

[Backup] SIP Seller Fault RR by Category [SG market]: Untrusted sellers' seller fault RR rate is 0.3pp–4.1pp higher across categories, particularly in Mom & Baby and Hobbies & Collections

Highlights

- **Proposal #1: Lower IDSIP/VNSIP price floor to USD30/40 (from current USD50)**
  - **95% of total IDSIP/VNSIP GMV** is generated by SKUs with average **local ASP of USD30/40 and below** across categories
  - Therefore at **USD30/40 will be able to exclude the outliers** that price significantly higher than normal in each category
- **Proposal #2: Allow higher price floor for categories in higher ASP range by category nature**
  - **Higher price cut-offs of USD 40-50** to be applied to certain categories based on their 95th percentile GMV performance
  - **USD 40 categories**: Motorcycles, Sports & Outdoors, Hobbies Collections, Automobiles, Mom & Baby
  - **USD 50 categories**: Home Appliances, Computers & Accessories, Audio Cameras & Drones,Gaming & Consoles
- **Proposal #3: Trusted sellers (locally short-tail managed, Mall sellers, top SIP sellers) to lift pricing floor given their low fraud risk and high traceability**

[Backup] Price floor by category [ID export]: Propose to lower price floor to USD30 excluding trusted sellers, and allow higher floor for selected high ASP categories Overall impact to IDSIP of 0.1% ADO and 0.8% ADG which is acceptable to business

Highlights

- **Follow up question from SIP Oct Monthly Update: To update CNSIP Seller/SKU/ADO coverage by import market**

1 **CNSIP only coverage:** across all markets, CNSIP covers 18-52% CNCB sellers, migrated 3-24% performing SKUs, which covers 2-17% of CNCB ADO coverage
CNCB total coverage (Direct + CNSIP): across local markets, 43-82% CNCB sellers are present, 12-51% performing MTSKUs migrated to local markets, which covers 14-67% CNCB ADO

2 **Not covered by Direct/SIP:** Across all local markets, ~33% to 86% CNCB ADO is uncovered. Not covered SKU/ADO reason breakdown is in next page

CNSIP SKU/ADO non-coverage reason breakdown by import markets: Across all local markets, top reason for performing skus non-coverage is due to rejected sellers is 23% to 47% and contribute to 16-45% CNCB ADO coverage

Highlights

- **ADO not covered by Direct/CNSIP**
  - 1 **Reason #1 - rejected sellers:** across all markets, **16-45% ADO coverage** (23-47% of performing skus) are not covered as the group of sellers rejected SIP consecutively for 3 months in Jul to Sep; aligned with CNCB not to repitch immediately to control seller sentiment; next steps to repitch them in Jan
  - 2 **Reason #2 - ineligible sellers incl. Incubation sellers:** across all markets, **8-18% ADO coverage** (15-27% of performing skus) are not covered due to ineligible sellers (including new CNCB sellers under incubation); next steps to pitch them after incubation period or when shop performance meets CNSIP onboarding criteria

Direct selling

Summary: Direct selling topics to update / discuss today

Category	Topic	Update (since last update)
New lanes	Launch lanes	• 12/22 planned lanes launched • **Launched VN-TH** on 17 Nov • On track to soft launch additional 3 lanes by end-Nov, including IDTH, THSG, THMY [Slide 40]
Track and report regional targets	Transfer target setting ownership to import markets	• **SG/MY as import market**: aligned topline target, pitching prioritization, import market additional support between SG/MY and VN/ID [Slide 41] • **Other import markets**: in progress of aligning topline target based on import market needs, ETA W1 Dec (before next budget submission)
	Nov MTD performance	• **17K ADO, 104%RR, +23% MoM, $247k ADG, 109%RR, +36% MoM** • 69k active sellers, 101%RR, +42% MoM [Slide 42]
Drive cross-lane optimization	Price competitiveness / Promo sync	• **Context**: Direct selling ABS is currently 161% of SIP, 2 on-going assessments to check Direct SKU price competitiveness and formulate action plan to improve • **Assessment #1 [deep-dive today,** slide 43-46**]**: system feature is available for seller to use best local listing price to price Direct skus. However, feature adoption is low due to seller understanding gap and local team resistance to mass toggle-on. If fully adopted, expect 9-29% ADO uplift for top 20 sellers. Next step to 1) improve seller education; 2) improve system feature to default toggle on • **Assessment #2 [WIP]**: NPC analysis for Direct SKUs + markup components deep-dive to identify price reduction potential further; ETA 30 Nov
	Payment	• **Context**: Current MYSG Direct sellers face payment pain points with 3PP wallet (hard to set up, additional service fee) • **Assessment [deep-dive today,** slide 47-48**]**: Assessed a potential new 3PP vendor (BRDGX) however no cost advantage over existing 3PP provider (Payoneer); propose to adopt inhouse "Global Wallet" as the cheapest and best seller experience, ETA rollout Dec-Mar

	RR/RTS	• **MYSG Direct case (RTS currently available)**: SG/MY CB team in progress of assessing 1) cheaper RTS vendor/cost; 2) lower RTS threshold, based on seller/buyer experience and impact to platform, proposal ETA 30 Nov
		• **Other lanes (RTS currently not available)**
		  ○ Additional considerations vs MYSG case include 1) seller painpoints: longer RTS time, higher RTS cost, higher chance of package loss at customs, higher import tax without grey channel; 2) platform impact: system efforts and prioritization; WH/CS capacity in handling RTS
		  ○ **Assessment [WIP]**: working with Monee Insurance to compare buyer/seller/platform impact between 2 options, ETA 30 Nov
		  ■ Option 1: No RTS, mandatory RR insurance [KRCB model]
		  ■ Option 2: Build RTS [CNCB/MYSG model]

Launch new lanes: Launched VN-TH on 17 Nov; target to launch additional 3 lanes by end-Nov, including IDTH/THSG/THMY

Highlights

12 export lanes opened direct selling option to local sellers from MY/ID/VN/TH/SG;

VNTH launched on 17 Nov, with 10K sellers whitelisted for the 1st batch

Upcoming launch pipeline:
(1) ID-TH / SG-TH / TH-SG / TH-MY: 24 Nov
(2) SGTH: 3 Dec

Target to launch all planned Direct selling lanes by Jan-26

Target revision with destination markets as the target owner: Aligned SG/MY import topline target and pitching prioritization with SG/MY import team and ID/VN export team

Highlights

Targets:

1. Projected to grow by 176% ADO by Dec-26, with greater ramp up in the first 6 months through (1) Continuously pushing seller acquisition; (2) Pushing SKU effi % via dedicated strategic seller programs

Assumptions:

2. To repitch all sellers monthly who have not yet joined the program
   - Target shop opening rate and SKU migration rate follows MTD actuals
   - SKU efficiency projected to ramp up gradually to match SIP lane SKU effi %

Next steps:

- Streamline pitching to focus on strategic sellers aligned with import market L1 focus categories
- Onboard more sellers onto co-investment programs supported by import markets; upcoming Tier 2 seed program to be rolled out for IDMY/IDSG/VNMY/VNSG managed sellers

Direct performance [Nov MTD]: 17K ADO, +23% MoM; $246k ADG, +36% MoM; 68k active sellers, +42% MoM; Nov to focus on expanding incubation program to cover more sellers in SG/MY and building success case in PH/TH markets

Highlights

Seller/SKU count: **101%/98% RR; +42%/ +79% MoM;** on track to hit target by EOM

- **MY imports 94% RR** mainly due to lower seller onboarding% during spike week, to restart mass pop-up for rest Nov to catch up the progress
- **THPH 50% RR** as TH team faces capacity constraints to scale up pitching; has aligned top 1k sellers to prioritize pitching as most wanted sellers from PH/MY/SG (top short-tail managed sellers with high ABS and preferably Mall sellers); to kick off mass pitching from 24 Nov and local CB team to source capacity for 1:1 pitching by Jan 26.

ADO/ADG: **104%/109%RR; +23%/+35% MoM**; growth mainly driven by MY import lanes

- **VNMY 85% RR** due to less aggressive platform PRM set up for top sellers vs Oct, coverage and mechanics ramped up to catch up by EOM
- **IDSG 57% RR** due to lower SKU effi than expected, to refresh seed program sellers to more responsive shops with higher seller investment
- **PH imports 94%**, on track to hit target by EOM, L7D outperformed target

Dec Reg team focus: 1) implement seller programs with greater coverage to benefit more sellers; 2) improve system SKU migration from local shop to Direct shops; 3) explore ads top-up service to increase traffic; 4) review promotion sync and markup% to reduce ABS

[Recap] Promo sync feature: Launched to Direct sellers in early Oct, so that sellers can choose to use the best local price to decide direct shop price to improve price competitiveness

Promotion Sync Feature Recap: Promotion sync feature was launched to Direct selling in early Oct to enable sellers to sync local price rebates to direct shop (i.e., using best local price to set price for Direct SKUs), to improve price competitiveness without hurting sell profit margin (vs local shop)

Promotion Sync Logic:

Local Shop Price Setting	
Original Price	20 MYR
Seller Promo Price	15 MYR
FE Price	**15 MYR**

Overseas Shope Price Setting	
Seller Input Price	15 SGD
Promo Sync Price	12 SGD
FE Price	**12 SGD**

Promotion sync price
*= 15 MYR * FX + Markups*
= 12 SGD

Overseas Shope Price Setting	
Seller Input Price	10 SGD
Promo Sync Price	12 SGD
FE Price	**10 SGD**

Seller input price < Promo sync price,
FE display seller input price

Promotion sync UI/UX

Adoption: However only 8-12% of locally set price rebates are synced to the Direct shop; sellers didn't toggle on mainly due to educational gap; next step to 1) improve seller education; 2) improve system to set toggle on as default

Promotion Sync SKU Coverage%	2 **10%**	**8%**	**10%**	2 **14%**	**37%**	**25%**

Highlights

Findings: low adoption rate for promotion sync feature

- Out of all promotion sessions set up for local shop on listing price discount, only 8% and 12% adopted to direct shops for ID and VN Direct sellers respectively, covering 10% and 14% SKUs that are discounted locally
- Top 20 direct sellers show higher adoption rate at 30% and 21% for ID and VN respectively, but discounted SKU coverage still low at 8% and 37%

Root-cause: educational gap based on top seller feedback

- ID: 60% of top sellers are not aware of the feature; ID team used seller center banner to announce the feature launch - not effective in reaching sellers or provide sufficient information in retrospect
- VNMY: Top sellers are aware of the feature, but fear for loss due to lack of understanding on the system logic

Next steps

- **Increase awareness**: add the feature introduction to monthly seller training and recordings, ETA 28 Nov
- **Better seller education materials**: improve SEH articles with interactive slides/calculators for easier understanding. ETA 28 Nov
- **Improve feature**: set toggle on as default [request raised and expedited, ETA pending]

[Back-up] IDMY top 20 sellers adoption: 30% sync ratio with 8% SKU coverage, potential 8% price reduction leading to 44 ADO (+9%) uplift; most of top sellers are not aware of the feature

Survey Result	#	%
How do you calculate your price?		
Manually	13	100.00%
Using Price Sync Feature	0	0.00%
If sellers calculate their margins manually, are they aware that Shopee provides the "Price Sync" feature?		
Yes, aware	5	38.46%
2 Not aware	8	61.54%
If the seller is not aware of the 'Price Sync' feature, is seller is interested to try out the feature?		
Yes, interested	6	75.00%
Not interested	2	25.00%
If the seller is is aware and yet have not activate the feature, what are the reason they still haven't activate?		
3 Seller wants to set different margin	3	
Seller do not trust the system/logic	1	
Would you be willing to allow Shopee to help enable the "Price Sync" Feature for your FLEXI store, so it can sync with all ongoing promotions in your Indonesia store?		
Yes	6	50.00%
No	6	50.00%

IDMY Top 20 Seller Deepdive

1. 15 sellers (75%) didn't turn on any promotion sync; For sellers who turn on, has covered 88% of discounted SKU
   1 Price / ADO impact: expect selling price to reduce by 8%, with potential 44 ADO increment if reached 100% sync rate
3. Top seller survey result:
   - 2 Most of sellers are not aware of the feature
   - 3 For sellers who are ware, choose not to set-up as seller wants to have higher margin in overseas shop

[Back-up] VNMY top 20 sellers adoption: 21% sync ratio with 37% SKU coverage, potential 13% price reduction leading to 137 ADO (+29%) uplift potential; most of top sellers fear of loss after turning on the syncing feature

VNMY Top 20 Seller Deepdive

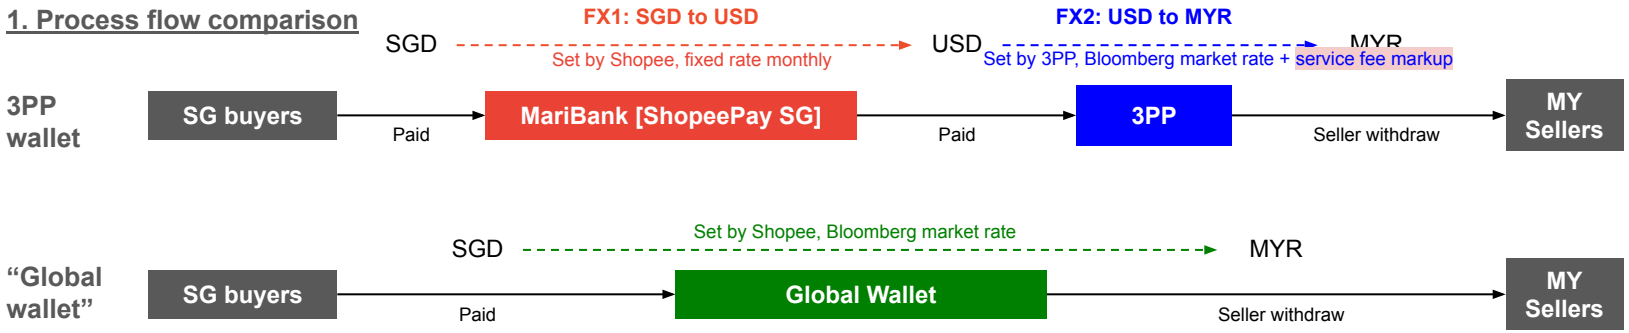
1. 13 sellers (65%) didn't turn on any promotion sync; For sellers who turn on, has covered 67% of SKU
1. Price / ADO impact: expect selling price to reduce 13%, with potential ADO increment by 137 if reached 100% sync rate
3. Top seller survey result:
    a. Most of sellers are aware of the feature, but sellers fear of loss after syncing the promotion, as they do not understand the system logic of this feature fully

Direct Selling payment: Target to rollout "Global Wallet" feature in Dec-Mar, to provide similar seller escrow experience as seller's local shop; to replace interim payment solution (3PP wallet, manual adjustment)

	At launch [As-is]		To-be [Dec-Mar 2026 rollout]
	3PP wallet (Payoneer)	**Manual adjustment**	**Global wallet**
Applicable seller group	Direct sellers from MY	Direct sellers from all other export markets	All Direct sellers (VN/ID: Dec-Jan; MY/SG: Jan-Feb; others: Feb-Mar)
Description	[Standard CB payment method] • Seller registers account with a 3PP wallet service provider and bind the wallet to Shopee • Shopee escrows earnings from Direct shop to 3PP wallet • Seller withdraws money from 3PP wallet to their local bank account	[Interim manual process before Global wallet] • Shopee escrow earnings to sellers' local shop wallets • Seller withdraws money from local shop wallet to their local bank account	In-house payment service mimic existing local shop wallet (local shop: local wallet; direct shop: global wallet) • Shopee escrow earnings to sellers' local shop wallets • Seller withdraws money from direct shop wallet to their local bank account
Why this method is chosen at launch	• MYSG Direct launched with 3PP wallet in Mar-24, to follow standard CB practice • Continue the practice for MYPH/MYTH launch as most sellers are existing MYSG Direct sellers that already have the 3PP wallet in use	• ID/VN request manual workaround that is more similar to the planned long-term solution, to protect seller experiences and increase adoption rate	-
Pros	• (+) Seller able to purchase ads using shop escrow similarly to their local shop • (+) Standard ops process established with CB ops	• (+) Skip the learning curve of adopting external payment service • (+) No service fee	• (+) Similar experience as local shop, no learning curve • (+) No service fee markup • (+) Able to see the charge breakdown and use the escrow (e.g. ads purchase) the same way as their local shop
Cons	• **(-) Service fee markup from 3PP provider** • (-) High educational cost: 3PP wallet concept new to local sellers, tedious process to set-up	• **(-) Sellers not able to purchase ads using shop escrow** • (-) Seller not able to see their earnings breakdown to check which cost component they can lower markup/increase investment further • (-) High manual efforts from local finance teams and SIP ops team	-

Service fee markup deep-dive [MYSG example]: Upcoming "Global wallet" is the cheapest payment solution for sellers due to no service fee mark-up (~1% highest escrow)

1. Process flow comparison



2. Service fee comparison illustration

	Payment Breakdown			
	SGD Amt	FX1	FX2	MYR Receivable
Payoneer (existing vendor)	S$100	0.7622	4.1425 (0.18% service fee markup)	MYR 315.74
BRDGX (potential vendor)	S$100	0.7622	4.1396 (0.25% service fee markup)	MYR 315.52
Global Wallet	S$100	3.1854		MYR 318.54

Highlights

- "Global wallet" is the cheapest payment solution to sellers as inhouse solution does not add service mark-up
- **Assessment on potential new 3PP vendor (BRDGX)** - propose not to proceed because
  - Charges on par with Payoneer
  - 6 months dev efforts to integrate API
  - Limited use case after "Global wallet" launch, limited capabilities beyond SG/MY/PH

[Backup] Reg Direct team focus: Target to launch 6 new lanes by Q4; Coordinate with import/export region on topline performance and streamline business process for existing lanes

Reg Direct team focus	Q4-25 key initiatives
1. Launch new lanes	Upcoming lane launches: ● By end-Nov: IDTH, SGTH, THMY, THSG ● By end-Dec: IDTW, VNTW ● By end-Jan: PHMY, PHSG, THMY, TWMY, TWSG Key deliverables for each lane launch ● Set up system/logistics/operational processes ● Obtain legal/finance/tax clearance ● Coordinate export market acquisition plan and import market seller package ● Secure export and import market resources to kick start biz
2. Report and track regional targets	● Coordinate cross-lane seller/topline target setting based on import market target ● Support export market teams to justify and prioritize resources
3. Drive cross-lane optimization	Design, pilot, and scale-up cross-lane optimization efforts ● Seller acquisition: drive mass pitching; simplify RM pitching; push for ERP adoption ● SKU supply: improve SKU migration ● Marketing tool adoption: improve paid ads investment, improve price competitiveness, enable marketing tool adoption (AMS, video, livestream) ● Seller service and operations: improve shop chat performance, improve key ops metrics, design and implement RR insurance
4. Establish and operate inter-market infrastructure and process	Build, operate, and optimize inter-market processes and policy, including ● System feature ● Logistics lead time / CPO ● Seller payment, payment operations ● CS flow and escalations ● Inter-market ops policy (e.g. listing limits) ● Mall onboarding criteria and process

Private & Confidential

KRSIP/JPSIP Update [same as KR/JP meeting]

[KRSIP] Estimated 2.9K SIP ADO potential (9.7K ADO potential after shop return), with 4.3M SKU migration potential in 8 markets. System develop efforts estimates to be 8 weeks

Metrics	Seller type	SG	MY	TH	PH	VN	TW	BR	MX	Total

*ICB + SA: Incubation and before incubation; PSP: + SMT + GR: managed seller; CS: unmanaged sellers

Key assumptions

1
- **SKU migration potential** is 4.3M in 8 markets, to close the gap between the shop MTSKU count vs each market existing shop SKU count
- **SIP eligibility rate** assumes 0% for ICB & SA and 60% for others (benchmarking CNSIP)
- **SIP acceptance rate** assume to be 70% for all sellers based on **opt-out model**
- **Migration efficiency** is 50% from acceptable shop SKU to live SKU after SIP migration, mainly due to prohibited categories, listing QC issues and system sync failure
- **SIP ADO efficiency** is 10-20% of self run shop SKU efficiency, based on CNSIP benchmark.

2
After the proof of market, SIP will return shops to good performing shops, which will be **9.8K ADO potential**, assuming returned shop will have the same SKU efficiency as existing self run shops

System Efforts

- KRSIP can ride on existing KRSC, and allow for seller onboarding, listing, shop management, payment and fulfillment following CNSIP.
- **Estimated Dev Efforts 8 weeks**

[JPSIP] Estimated 1.2K ADO potential (2.9K ADO potential after shop return), with 11.8M SKU migration potential in 7 markets. System develop efforts estimates to be 15 weeks

Metrics	Seller type	SG	MY	TH	PH	VN	TW	BR	MX	Total

*ICB + SA: Incubation and before incubation; KAM: managed seller; CS: unmanaged sellers

Key assumptions

1

- **SKU migration potential** is 11.8M in 7 markets to close the gap between the most shop SKU count vs each market existing shop SKU count
- **SIP eligibility rate** assumes 0% for ICB & SA and 60% for others (benchmarking CNSIP)
- **SIP acceptance rate** assume to be 70% for all sellers
- **Migration efficiency** is 50% from acceptable shop SKU to live SKU after SIP migration, mainly due to prohibited categories, listing QC issues and system sync failure
- **SIP ADO efficiency** is 10-20% of self run shop SKU efficiency, based on CNSIP data.

2

After the proof of market, SIP can return shops to good performing shops which will be **2.9K ADO potential**, assuming returned shop will have the same SKU efficiency as existing self run shops

System Efforts

- JPSIP needs to be developed after JPSC development, which requires additional 7 weeks development time.
- **Estimated Dev Efforts 15 weeks**

[Backup] KRSIP requires 8 weeks of development efforts, while JPSIP requires additional 7 weeks due to unavailability of JPSC. Propose to prioritize KRSIP given shorter dev efforts and higher impact

Product Line	JPSIP with JPSC first	KRSIP
Seller Center Creation	**Create JP Seller Center (similar to CNSC, KRSC)**	**Already have**
Seller Migration to JPSC	**Needed**	**No Need**
Seller Onboarding	Add CB merchant = JP. Shop opening configuration to onboard CB P shops.	Same as left
Seller Management Platform	Implement CBSC shop selector to allow sellers to access/manage their SIP A shops.	Same as left
CS	Allow SIP agents to attend to SIP Ashop CS	Same as left
Listing Upload	SIP config for listing migration, SIP Item Price display, and P-A listing synchronization/management rules.	Same as left
Promotion-Price	Price config and CBSIP price features (e.g., SIP rate calculation, SIP Item Price, country margin configuration).	Same as left
CMT	Configuration for SIP Campaign Settlement Price (CSP) set-up.	Same as left
Clearing & Settlement	Support for 3rd-Party Payment services and settlement using SIP supplier escrow for A shop orders.	Same as left
Return Refund	Feature to allow the JPCB seller to respond to A shop Return/Refund (RR) requests via the JPSC.	Same as left
Seller Fulfilment	Integration of the FM pre-declare module, which is a required standard for CBSC sellers.	Same as left
Total Overall Development Effort	**15 weeks**	**8 weeks**

[Backup] JPSIP system prefers to create JPSC and utilize CNSIP config. Using existing local SC cannot support centralized shop operation

	Option 1: JPSC + CBSIP	Option 2: Local SC + CBSIP
Content	1. Create JPSC first 2. Migrate JP sellers to JPSC 3. Enable JPSIP on JPSC, similar to CNSIP on CNSC	1. JP seller continues to operate on each Local SC 2. Customize each module to support JPSIP 3. Replicate the customization for each Local SC
Development Effort	**15 weeks**	**20-30 weeks**
Pros	- Clean solution, **same set up as existing CNSIP** for CNCB sellers - Any SIP improvements can be easily applied to all CBSC (CN/KR/HK/JP) - Less development effort - Better seller UX from operating on JPSC (e.g. **easier listing publish across shops, consolidated business insights**)	- No seller center migration effort
Cons	- Take time to migrate sellers from local SC to JPSC **[KR migration took ~9 months to complete migration]**	- Indirect solution, all product lines need to deepdive on if there is any unknown backend blocker - Any SIP improvements need to implement to CBSC and each local seller center, not the best use of engineering resources - Seller operation is less efficient for CB sellers as **Local SC does not allow for centralized shop operation**

The End
