Highlights

- **Nov full month P&L (after factoring in SLS discount) land at -$406k, -90k vs target**
  - $17K P&L gap come from ADO overperformance in last 5 days of Nov; $10K P&L gap from SG SLS discount overestimation; Rest of gap from ads spending underestimation due to a P&L projection logic issue; to fix and achieve seller P&L target by Dec
  - JST mature sellers overspent vs. projection while JST incubation sellers underspent, reason is that mature sellers have better ROI and thus we keep investment for success case seller comms purpose
- **Nov UE at -2.7 USD, optimised vs previous month -4.8 USD**

**Dec target to be refreshed on 10 Dec*

Highlights

Seller/SKU count: **126%/134% RR; +5%/ +12% MoM**; on track to meet target by EOM for below lanes:

- **VNMY 97% RR,** to adopt ops shop opening feature from 18 Dec for accepted sellers to increase shop open rate
- **SGMY 80% RR**, to start 1:1 pitching after training on 18 Dec to improve the shop opening ratio; Further assessment for mass pitching to be done after training
- **THPH 57% RR**, aligned with TH team to start mass whitelist/pitching in Dec, expect to whitelist 60K sellers per week.

ADO/ADG: **93%/92%RR; +12%/+15% MoM**; growth mainly driven by MY, PH import lanes, on track to meet target by EOM. SKU effi lower than expected for most lanes.

- **VNMY 54% RR** due to MoM decline in ads ROAS after platform increased min daily ads budget, resulting in less ads investment. VN team encouraging top sellers to resume ads investment + exploring ads top-up service this month to help improve ROAS
- **SG import** due to limited traffic from lack of free ads credits compared to MY imports; will explore ads top-up service to boost traffic through paid ads instead
- **TH import 73%**, to look into sellers' utilization of free ads credits and paid ads investment.

Dec Reg team focus: 1) implement seller programs with greater coverage to benefit more sellers; 2) improve system SKU migration from local shop to Direct shops; 3) explore ads top-up service to increase traffic; 4) review promotion sync and markup% to reduce ABS
